SUMMARY OF MONTHLY NARRATIVE REPORT FOR JANUARY, 1953

		<u>Page No.</u>
<u>General</u>	Administration of Coronado National Memorial assigned to Southwestern National Monuments.	1
<u>Weather</u>	Generally fine weather prevailed during entire month.	1
<u>Special Activities</u>	In-Service training at Bandelier; locating water line break at Walnut Canyon time-consuming task.	1-2
<u>Official Visitors</u>	Regional Director Tillotson and Assistant Regional Director Miller at Aztec Ruins; Assistant Regional Director Miller at Organ Pipe Cactus and Saguaro.	2
<u>General Publicity</u>	Casa Grande received much nice publicity during January; fine article by Supt., King, Saguaro, in Italian travel magazine.	2-3
<u>Maintenance Rehabilitation, and General Work</u>	Frijoles Canyon Lodge, Bandelier, redecorated; Madrona Ranger Station bunkhouse rehabilitation completed, Saguaro.	3-4
<u>Roads and Trails</u>	Monument road, Canyon de Chelly, repaired to prevent constant washouts; Apache Trail improvements being made in Tonto area; plans progressing for starting Wupatki road project.	4-5
<u>Cooperation-Government</u>	Superintendent, Saguaro, discussed wildlife protection with Forest Grazing Advisory Board.	5
<u>Accessions</u>	Tonto acquires surplus Koehler plants; useful additions donated to Tuzigoot library.	5
<u>Interpretive Service</u>	Outside lectures, many accompanied by slides, continue to spread story of monuments and to build goodwill for our areas.	6-7
<u>Museum Activities and Exhibits</u>	Splendid progress on museum improvement reported from Casa Grande, Montezuma Castle, and Tumacacori.	7

New oak species identified at Organ
Pipe Cactus; search for evidence of
Yavapai community being made, Tuzigoot.

Accessions total 88; work of arranging
library continued during month, with
excellent results.

Page proof second edition, Flowers of the
Southwest Mesas, read.

Both Archeologist Vivian and Richert at
Chaco headquarters working on backlog
of reports.

New travel year off to splendid start
with 39% increase over January 1952.

Annual Don's Trek at Tonto.

Bandelier and Saguaro report action to
strengthen building fire protection.

Trail hiker accident at Chiricahua.

Water from new system now "satisfactory"-
White Sands.

Construction Supervisor Chittum reports
for duty, January 11 and assigned to
Mupatki; Park Ranger Bullard transferred
to Tumacacori.

Death of long-time Park Service friends
reported from Aztec Ruins and Chaco Canyon;
June in January at Saguaro and Tonto.

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - January 1953

General

Probably the most important event during the month was the receiving of notification that the administration of the recently established Coronado National Memorial has been assigned to the Southwestern National Monuments. This national memorial was established by Presidential Proclamation on November 5, 1952. It comprises an area of 2745.33 acres located near the Mexican border in southeastern Arizona.

While this area is basically of interest historically, it also contains much of biological interest. Mr. King will make a trip to the area within the near future and start collecting basic informational data.

The administration of this area has been placed under the jurisdiction of the Superintendent of Tumacacori National Monument. At present about the only work that can be done is to erect signs indicating that the area is a national memorial. It is hoped that a survey of the area can be accomplished within the relatively near future.

The assignment of this area to the Southwestern National Monuments brings the total number of areas administered to 26.

Weather

Almost every area reported unusually fine weather for January, especially during the latter part of the month. The ocotillo was leafing out and a few scattered wildflowers were beginning to bloom in southern Arizona. Lack of moisture was causing concern in some places, but, on the whole, everyone seemed pleased with Old Man Weather during January.

Special Activities

Bandelier--In-Service training meetings were started on the 21st and will be held once a week for eight weeks. Regional Naturalist Dodge conducted a discussion on wildlife at one of the meetings.

A new series of tests are being made by the AEC at the technical area northeast of headquarters. On two occasions windows were broken in the lookout and were replaced immediately by the AEC. A seismograph reading was taken during one test to determine the amount of shock that is being received at headquarters, but at report time the results had not yet been learned.

Special Activities - continued

Organ Pipe Cactus--The superintendent made one trip to Phoenix to secure quotations for equipment.

Tumacacori--The superintendent was advised late in the month that the administration of the newly created Coronado National Memorial was to be placed in his hands. He will plan to make routine inspections about once a month, with the first official report being made during the coming month.

Walnut Canyon--Considerable time was spent on matters connected with the request of the DAR to relocate the "Pioneer Mother" marker which was placed near the old log cabin back in 1915.

A new site along the west of the present parking area has been approved, and this apparently is satisfactory to all concerned. Ranger Spangle left on January 24 to attend the FM Radio Training Course in Washington D. C.

A break in the water line which resulted in the loss of some 300,000 gallons of water required much time and effort to locate. Seven miles of line were walked completely two times and location of the break was such that pressure was not affected on either side of the line and the loss was discovered when the monthly readings were made. After the break was found, it took the better part of two days to repair it. Weekly meter checks have been inaugurated to forestall the possibility of a recurrence of such a large loss of water.

Official Visitors

Headquarters Office--Regional Landscape Architect Miller.

Aztec Ruins--Regional Director Tiltonson and Assistant Regional Director Miller.

Bandelier--Highway Engineer George Smith.

Casa Grande--General Superintendent Davis, accompanied by Mr. Freeman Tilden.

Chiricahua--Messrs. Davis and Tilden.

Organ Pipe Cactus--Messrs. Davis and Tilden.

Assistant Regional Director Miller and Assistant General Superintendent Gastellum; Regional Landscape Architect J. Miller.

Saguaro--Messrs. Davis, Tilden, H. Miller and Gastellum.

Tonto--Messrs. Gastellum and J. Miller.

Tumacacori--Assistant General Superintendent Gastellum, accompanied by Mrs. Gastellum, and Mr. and Mrs. Boatright;

also Mr. and Mrs. John Davis, Jack and Ann -- headquarters staff were all taking a postman's holiday; Mr. Freeman Tilden.

Wupatki--Engineer Moran; Landscape Architect Carter; Construction Supervisor Harold Chittum.

General Publicity

General--Acting Superintendent Maxey of Aztec Ruins submitted a copy of a very fine article on the National Park Service which appeared in the January 1 edition of the Manchester Guardian Weekly, published in Manchester, England. It is interesting to learn what people in other countries think about our National Park System.

General Publicity - continued

Casa Grande--This area received considerable publicity including a full page color photograph in the January issue of Arizona Highways, photographs and some discussion concerning the area in the January 18 issue of the Arizona Republic, and one outstanding bit of publicity when a picture of the ruin appeared on the face of the program for the annual Salad Bowl game in Phoenix.

Chiricahua--A very well written article by Mr. Weldon Heald on the Chiricahua Mountain area in general, which included mention of Chiricahua National Monument, and some photographs of the area, appeared in the September-October issue of the Audubon Magazine. Mr. Cooke is now receiving numerous inquiries as a result of this article.

Gran Quivira--Seventeenth-century Pueblo mission churches, including the Salinas groups, were featured in a series of color photographs in the January issue of Sun Trails Magazine.

Saguaro--A feature article by Superintendent King appeared in the Italian travel magazine, Le Vie del Mondo.

Maintenance, Rehabilitation and General Work

Arches--The design and color conversion of all signs has been completed by Messrs. Winbourn and Morris. Mr. Morris' expertness in letter routing proved to be of great assistance in the completion of this project.

Bandelier--The lobby, dining room and coffee shop at Frijoles Canyon Lodge were redecorated. Six new road and trail signs were constructed and 5 old ones were reconditioned. The front of the checking station was repainted.

Canyon de Chelly--All automotive equipment was overhauled and every vehicle is now in good shape. A welded steel rack made of 1" tubing was placed on the Jeep pickup, providing an added safety factor for riders into the canyons.

Casa Grande--Some ocotillo has been planted to make a more visitor-resistant boundary to the ruin. Mr. Lopez has shown much versatility by repairing a number of electrical devices, improving the design of the ditch plow and repairing a paint spray compressor which had been returned to the area as unusable.

Chaco Canyon--A heating stove was installed in the new tool room, a new work bench constructed and the tools and supplies sorted and stored and placed for use. Fuel line connections were made from the two 500-gallon Diesel storage tanks to their respective light plants -- quite an improvement over the previous setup which consisted of a 5-gallon tank connected to the plants.

Chiricahua--A rock railing was completed around the lookout rock below Massai Point, thus giving a much safer feeling when a crowd gets on the rock -- the fall would have been about 20 feet.

Great Sand Dunes--The walls of the front room and hall entrance and the ceiling of the dining room and front hall entrance were painted. Vigas and ceiling in the front room were given linseed oil coat and the woodwork in the front room was sanded and enameled.

Maintenance, Rehabilitation, and General Work - continued

Montezuma Castle--At the well a new entrance sign was erected which will attract visitors, who not knowing what the area offers, pass by. A new flagstone walk was installed in front of the museum at the Castle. It has improved the looks of the area and calls attention to the museum.

Saguaro--The interior of the Madrona Bunkhouse was painted and final work was completed on rehabilitation of the butane system. A new apartment-size range was purchased and installed. Rehabilitation of the headquarters residence was also accomplished. A metal shower was installed, laundry trays were purchased and installed, the cooler renovated and repaired and new faucets placed for the kitchen sink. The exterior woodwork and trim of the headquarters building was repainted.

Jonico--Messrs. Wenger and Inear carried some 35 gallons of Gulf Sani-soil set to the ruin and processed the floors by sprinkling, raking, and brushing the soil-set into the dust. This has completely laid the dust and is a vast improvement.

A new tenthouse was constructed, the office was lined and insulated with Celotex. Further progress was made on the installation of the 2-1/2 inch pipe line to the proposed comfort station site.

Tumacacori--The cooperative observer's weather station was sanded and painted. The patio garden fish pond was cleaned and a great deal of work done in the patio garden.

Tuzigoot--Road signs in Claridade and en route to the monument were repainted. Both rest rooms in the museum were also repainted.

White Sands--Some time was spent getting fuel, electricity, and water to a trailer house to be used by Ranger Featherstone. A loaded tractor tore out about seven poles and one half mile of wire from the telephone line -- repairs were estimated to cost in the neighborhood of \$250.

Wupatki--The new 5,000-gallon water tank was filled and tested and found to be all right. The area was landscaped and the top of the tank painted and the tank is now in use. A total of 240 cloth boundary signs were placed along the fenced part of the boundary. The small contact station at Sunset Crater was moving to its permanent location in the parking area.

Roads and Trails

Arches--Washouts on approach road #93 were repaired by the state maintenance crew and an alignment change made.

Bandelier--A rock slide on the 21st on the south side of Ancho Canyon completely blocked the approach road for several hours. The Bureau of Public Roads maintenance crew removed the rocks. During the visit of Highway Engineer Smith, recommendations were made for improvements along the shoulders and ditches of the .6 miles of newly surfaced road near the checking station, and he also made suggestions for patching the approach to the campground bridge.

Chaco Canyon--The north and south approach roads were obstructed by snow the first of the month and then melting snow made them almost impassable.

Roads and Trails - continued

Canyon de Chelly--To eliminate the constant washing out of a section of the monument road between headquarters and White House Overlook, a flood water diversion control wall, several hundred feet in length, was constructed. The stone blocks used are of the same composition as the red sandstone rocks in the surrounding area.

Gran Quivira--Condition of the approach roads was very poor during the first part of the month, but state maintenance crews worked Highway 10 from Mountainair and it was in good condition at report time. Much of the superintendent's time was spent in shoveling snow and mud from the trails and dragging the entrance road.

Great Sand Dunes--Monument road was graded and was in fair condition. The entrance road was graded once by the county.

Montezuma Castle--At Montezuma Well, the county maintenance crew installed culverts and extensively gravelled the county highway through the area.

Organ Pipe Cactus--Good progress was made during the month on the headquarters road construction project.

Saguaro--The processing of 2,348 yards of chips for the looproad surfacing project was completed and work was continued on adding base course material to the looproad. This project was also completed and the road is now ready for oiling.

Tonto--The state highway department has crews working on the Apache Trail between Tonto and Globe, improving culverts, curves, and grades, in preparation for oiling several more miles. Considerable work was accomplished on the ruins trails, which was widened in places, drainage improved, and the trail resurfaced and gravelled.

Walnut Canyon--The county continued its work improving the approach roads. Cinders have been placed over the spots that need it, which takes in most of the road. It is possible that there will be a completely cinder-surfaced road before long.

Wupatki--Mr. Chittum has visited the area preparatory to getting the Wupatki-Sunset Crater road project underway. Mr. Mott arrived with the second trailer for the crew and several days were spent getting the trailer houses ready for occupancy.

Cooperation - Government Agencies

Saguaro--The Superintendent met with members of the Forest Grazing Advisory Board. There was considerable discussion on Park Service policy for the protection of all forms of wildlife.

Accessions

Tonto--Two surplus Koehler power plants, transferred from El Morro.

Tuzigoot--From Forest Service - quadrangle sheets covering the southwestern part of the Coconino National Forest.

From Superintendent Cook, Montezuma Castle, a typewritten copy of Ranger Sutton's Geology of the Verde Valley, a well-written, useful, and much-appreciated addition to the Tuzigoot library.

Interpretive Services

Headquarters Office--Requests for photographic prints from the library were numerous and took much time to answer. Naturalist King spent more than a day editing and dummyming the text for the second edition of the trail booklet for Gran Quivira. Permission was requested from the Regional Director for Superintendent Brewer to publish an excellent short manuscript on the history of Jerome, Arizona. The Saguardo propagation project has been revived and Mr. Arnbarger prepared correspondence between this office and the Regional Office on this subject. He assembled and submitted reports on organized camping and mountain climbing. On January 21 Mr. Arnbarger presented a short illustrated program on Arizona's National Monuments to the Globe Rotary Club. General Superintendent Davis attended and reported that the talk was very well received and highly commimented.

This office received a copy of Le Vie del Mondo, a magazine published in Italy, which correspondes to our National Geographic Magazine, and which carried as the lead article Superintendent Sam King's story of Saguardo. This is one of the finest articles which has been published on our Southwestern National Monuments in a long time and Mr. King deserves sincere congratulations. Mr. Arnbarger edited and revised slightly the guide leaflet for the Foothill Forest Trail at Chiricahua. Considerable time continues to be spent on activities related to the move to Gila Pueblo. It is quite a revelation to all how impressive our supplies and equipment are when they are all assembled in one location. Several days were spent sorting and arranging the many magazines and periodicals which are now stored on steel shelves in the library. A start was made on setting up a supply room for interpretive equipment and supplies. Aztec Ruins--Several slide lectures were given in the museum on cold stormy days. Mr. Maxey gave evening lectures, illustrated with slides to the following groups: the Farmington Kiwanis Club, the Home Builders Club of Aztec, and the San Juan County Kniphs of Columbus. Casa Grande--Mr. Jewell gave a slide talk to a Boy Scout Troop in Coolidge -- incidentally he now wears the green and gold insignia of an Assistant Explorer Adviser.

Chiricahua--Two conducted trips were made -- one over the Foothill Forest Trail and one over the Echo Canyon Trail. One thousand twenty-five visitors were contacted in the museum. El Morro--Thirteen parties of visitors took the trip around the Rock -- no one went over because of too much snow. Most of the more important, historically, and oldest inscriptions are on the south side of the Rock, which is fortunate, as the north side of the trail was virtually a sheet of ice. Gran Quivira--Here, as in other areas where weather conditions discouraged outside activity, most of the interpretation took place in the museum. A number of visitors, however, did use the self-guide facilities.

Montezuma Castle--A talk on the role of the National Park Service in archeology, accompanied by slides, was given to the Yavapai Archeological Society on January 13, by Ranger Sutton. Sixty-five persons attended.

Interpretive Services - continued

Organ Pipe Cactus--Three illustrated lectures were given by the superintendent. A new display was worked up for the little exhibit room. It was suggested by some illustrations in Prehistoric Men -- A Chicago Natural History Museum booklet, by R. J. Braidwood.

Saguaro--The superintendent showed the film, "National Parks Wildlife" to 469 children of the Carillo Elementary School in Tucson. A slide lecture on Southern Arizona was also presented to 15 teen-age victims of cerebral palsy, at the Cerebral Palsy Foundation, in Tucson.

Walnut Canyon--The new Walnut Canyon guide leaflet was placed in active use during the month and many favorable comments were received.

Museum Activities and Exhibits

Headquarters Office--Sketches of proposed material for easels at Gran Quivira were received, reviewed and returned to the Regional Office for preparation by the Indian School trainee on assignment in that office.

The need for interpretive exhibits in the small contact station at Sunset Crater was the subject of a memorandum to the Superintendent of Wupatki.

Preliminary plans for two easel exhibits on the self-guiding trail at Canyon de Chelly were reviewed and returned to the Regional Office with comments and suggestions. These also will be made by the Indian School trainee.

Casa Grande--The project of replacing old and faded labels continues. While trying to keep labels and signs in the museum to a minimum, the staff is experimenting with a few signs that answer the questions most often asked by visitors. Mr. Jewell is applying the finishing touches to a model of a typical house unit of Classic times. It is a two-story pueblo with a single-story house attached. The model, it might be added, is made from caliche, which is fairly satisfactory, and an inexpensive material, which, it is possible, might be used in the construction of dioramas.

Montezuma Castle--The Castle museum has been enlarged by utilizing the old kitchen section of the building. Partitions were removed, giving about one-third more museum space. Displays for the room are now being prepared.

Tumacacori--Spare time mounting and labelling and folder preparation by Rangers Featherstone and Smith resulted in about 150 previously identified herbarium specimens being all fixed up and ready for inclusion in the herbarium case -- when one is obtained. Ranger Smith spent several hours on a preliminary layout for another Multiplex display which when finished will tie in authentic mission architectural details of the museum building with sources, by pictures and text.

Research and Observation

Bandelier--Ranger Turney continued to work on classifying the pottery sherd collected in the Otowi section survey and spent one day at the Laboratory of Anthropology in Santa Fe analyzing some of the sherds with Mr. Stanley Stubbs.

Casa Grande--About 40 quail are seen every morning in the picnic area. Each of the cholla cacti has a cactus wren nest, two of which were recently destroyed, apparently by a hawk. The hawk soars overhead constantly and evidently has made its home on the monument. Great Saml Dunes--Mr. Baker of the State Game and Fish Department spent one day making track counts and studying browse conditions along the east side of the monument. As a result of the warm weather, the deer are working back up the mountain. Montezuma Castle--Several geological investigations were made during the month and some unusual formations in the limestone near the north entrance to the Castle have been detected and are considered of sufficient importance to merit further study. Organ Pipe Cactus--The oak in the area has been identified as a new species, Quercus ajoensis. The work was done by Dr. C.H. Muller of the University of California. Saguaro--Slight records of Javalinas and Mule Deer by visitors were on the upswing during the month. One visitor was able to get colored movies of a troop of 40 Javalinas crossing the loop road. Tuzigoot--A search was made for evidence of a Yavapai community known to have been located near Clarkdale about 1915. No artifacts were found, but two levelled areas suggesting house sites were noted. These will be checked at the first opportunity and the rest of the area will be given closer scrutiny.

Loan Library

Accessions totaled 88, including 10 books, 47 separates, and 31 periodicals. Series publications such as the American Museum Natural History, Viking Fund, the University of California, and others, were removed from the shelves and reassembled in a special section devoted to series.

Southwestern Monuments Association

Page proof for the second edition of Flowers of the Southwest Mesas was read and returned to the printer. This edition will be by letterpress on coated enamel paper, which will greatly improve the appearance of the book. It has been rearranged by the author and illustrator in accordance with color of flowers. Mr. King conferred with author George Olin and illustrator Jerry Cannon concerning their desire to publish a book on mammals of the Southwest. Mr. Arnbarger also came into the discussions and made some valuable suggestions. They were told to submit an outline of their proposed booklet for consideration for possible publication by the Association.

Ruins Stabilization

Both Archeologist Vivian and Richert were at the Chaco headquarters the entire month. A dummy was completed for all of the Nalakiu stabilization records and these are now ready for final typing and assembly. Maps and ground plans completed and sent for prints include: Bc-51, House A at Gran Quivira revised to include the 1952 work; and a large scale map of Chaco Canyon drawn to show the location of the major sites and all the smaller ones that have been excavated. The photographic files were sorted and negatives used for reports on Bc-51, Nalakiu, the Tri-Walled structure and Aztec were boxed for shipment to permanent storage.

Travel

If the travel figures for January are an indication of things to come, the current calendar year will far out-distance any other year in the monuments' history for travel. The increase in visitation over January of 1952 is 39%, one of the largest percentage increases ever recorded. Many areas reported phenomenal increases; Montezuma Castle, 142%; Tonto, 101%; Tuzigoot, 100%; Walnut Canyon, 387%, and Wupatki, 191%. Increases in many of the other areas were well above 50%. Looks like a big year for the Southwestern National Monuments.

Visitors

Headquarters Office--Superintendent and Mrs. Sam King, Saguaro; Superintendent Picknell, Casa Grande; Park Ranger Bullard; Superintendent Sharp and Archeologist Wenger, Tonto.

Bandelier--30 members of the Los Alamos Outdoors Club; Mr. R. E. Cole, Regional Chief of Engineering and Construction, AEC, Albuquerque.

Casa Grande--Mr. and Mrs. Allan Vedder, S'MA.

Great Sand Dunes--Jim Steffens, newly elected commissioner, Alamosa County; Bert Baker, State Game and Fish Department; and Lee Bachus, Fish and Wildlife Service.

Saguaro--Mr. and Mrs. Ratcliff, parents of Forester Ratcliff of the Regional Office; Mr. and Mrs. Ernest G. Holt, Montgomery, Alabama -- Mr. Holt is a long-time government employee, who worked on rubber development during World War II.

Tonto--Mrs. and Mrs. H. B. Taliaferro, Power Division, Bureau of Reclamation, Washington D. C.; Bishop Merrill, Latter Day Saints Church, Mesa, Arizona, with party of 35; Annual Don's Trek, with about 450 visitors -- these filled the parking area with 6 busses, and 70 cars, with some cars parked on the road.

Building Fire Protection

Bandelier--A new 115 volt siren was obtained from surplus at Los Alamos and installed at the power house and is considerably more dependable than the battery-operated siren formerly in use.

Saguaro--All fire hazards mentioned in the annual self-inspection report have been corrected, including rewiring of the Madrona Bunkhouse and the Ranger residence.

Accidents

Chiricahua--When a Heart-of-Rocks trail hiker failed to return the night of January 24, a search was started about 8:30 P. M. The man was found at 11:00 P. M., apparently having suffered a heart attack. No horse being available, it was necessary to leave him by a fire until morning. The remainder of the night and the following morning were spent making him comfortable by getting a sleeping bag and securing a horse to get him to the road at Massai Point.

Public Health

White Sands--For the first time since the new water supply has been tied into, the tests have been returned "satisfactory," and it is hoped the chlorinating system will keep this condition. A satisfactory water supply is a necessity, considering the prevalence of polio in the Southwestern areas and with health authorities keeping a "weather" eye on public-use facilities.

Personnel

Headquarters Office--Construction Supervisor Chittum entered on duty January 11. His first assignment will be the supervision of the road construction project at Wupatki.

Aztec Ruins--Superintendent Townsend is still on extended sick leave and is residing for the time being in Albuquerque.

Saguaro--Wendell A. Bryce entered on duty as seasonal ranger on January 4.

Wupatki--Ranger Wm. C. Bullard left the area on January 26 for his new assignment at Tumacacori.

Local Items

Aztec Ruins--Mr. Ora M. Clark, long-time NPS friend and former seasonal employee in several of the Southwestern National Monument areas, died of a heart ailment the latter part of December.

Casa Grande--All the staff had the influenza, but, even so, only a day and a half of sick leave was taken -- monument personnel just don't take sick leave in the midst of a heavy travel season!

The extra house has been rented to Mrs. Melba S. Johnston, stenographer with the Bureau of Indian Affairs.

Chaco Canyon--The monument staff did at least a couple of good deeds when it rescued stranded motorists. One had become stuck in the snow about seven miles from headquarters and was nearly exhausted after having to walk back through drifted snow without a flashlight.

He was given assistance and started on his way about 1:00 A. M.

Friends of Dr. Paul Reiter were shocked to learn of his death on January 9. Dr. Reiter directed the University of New Mexico Field Research Station at Chaco Canyon for many summers. At the time of his death, he was studying under a Ford Foundation Fellowship at the University of Michigan.

El Morro--One unusual activity was the digging out of the ice a skunk which had ventured out on thin ice, fell through and then froze solid. It is hoped the quick action in getting him out would prevent any unsavory taste showing up in the water.

Park Ranger Krear arrived from Tonto to pick up surplus light plants. When snow started to fall about lunch time, Mr. Krear left in a rush, murmuring something about getting back to sunny Arizona.

Saguaro--The warm days and rains in the latter part of the month brought some of the ocotillos into leaf and an occasional blossom on the Desert Marigold and Yellow Paper Daisy were observed in the Cactus Forest.

Tonto--June to January was also reported from Tonto, with ocotillo leafed out, and with Mallow, Desert Marigold, and Brittlebush blooming in a few places.

A son was born to Archeologist and Mrs. Wenger on December 31. He was a premature baby, and they left him in the hospital until he reached the required five pounds. He was getting along fine at report time.

ARCHES NATIONAL MONUMENT
MOAB, UTAH

January 24, 1953

Memorandum

To: General Superintendent

From: Superintendent, Arches National Monument

Subject: Monthly Narrative Report for the month of January, 1953
Arches National Monument

WEATHER: Intermittant light rain and snow fell during the first three weeks of the period, but the last week was clear and unreasonably warm.

TRAVEL: A total of 158 people entered the area in 50 cars and we note an increase of 57% over the same period last year.

INTERPRETIVE SERVICE: Only 14 contacts were made at Headquarters and none were made in the monument. The register at the Wayside Exhibit was signed by 95 people and we estimate the same number used the Cove Nature Trail. Twelve requests for information were answered.

ROADS: No maintenance has been done on our roads in the monument. The State road crew has repaired a few washouts and made one alignment change on approach road #93.

SIGNS: Maintenance man Winbourn has almost completed the design and color conversion of all signs. Ranger Morris was found to be an expert in letter-routing and has been a great assistance on this project.

EQUIPMENT: The front-end loader was given a complete motor overhaul in Grand Junction and Mr. Winbourn installed a rebuilt hoist pump. This unit is now in top shape.

GENERAL: The annual inventory was taken and all unservicable equipment surveyed. Ranger Morris is more than half through the rehabilitation job on our files and all office work has been brought up to date.

AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 January 1953

Memorandum

To: General Superintendent

From: Acting Superintendent Aztec Ruins

Subject: Report lml, Superintendent's Monthly Narrative

WEATHER: The seventh and eighth of January we had a very heavy wet snow which deposited 0.98 inches of moisture and has kept the country roads muddy ever since. We needed the moisture alright but clearing the walks through the ruin can soon develop into serious labor with only one small man on the shovel handle.

MAINTENANCE: All utilities in the Superintendent's residence were turned off and the water lines drained. When it came time to find the turn-off valves there was an earnest wish that the fact file had been kept up to date in the matter. The information is now recorded so at least the next man will have no difficulty.

INSPECTIONS: Regional Director M. R. Tillotson and Assistant Regional Director Hugh M. Miller stopped by on their way from Mesa Verde to Santa Fe and looked over the Superintendent's residence.

PUBLICITY: It is always interesting to discover what people in other lands think of our National Park Service so it was a pleasant surprise to find a very complementary article on the National Park Service in the January 1 edition of the Manchester Guardian Weekly of Manchester, England.

INTERPRETIVE SERVICE: We conducted 271 people in 54 parties through the ruin and had 215 people in 66 parties tour the museum and then take a quick look at the ruin. On cold stormy days several slide illustrated lectures were given in the museum. These lasted from 15 to 30 minutes and seem extremely useful in our winter interpretive program.

Park Ranger Maxey prepared evening lectures illustrated with slides for the following groups Kiwanis of Farmington January 14, The Home Builders Club of Aztec January 20, and the Knights of Columbus of San Juan County the 22 of January.

INCREASE IN TRAVEL: Travel has been steady during the month with only one day without visitors. We had 486 visitors from 19 states. This is a 46% increase in travel when compared with January 1952.

[The text in this section is extremely faint and illegible. It appears to be a series of paragraphs, possibly a letter or a report, but the specific words and sentences cannot be discerned.]

PERSONNEL: It is with regret that we report the passing of Ora M. Clark long time park friend, and seasonal employee in several of our southwestern areas. He died of a heart ailment December 29, 1952 while on a trip through Arizona. He is survived by his wife, two daughters and several grand children.

Superintendent Townsend, who is on extended sick leave, has disposed of his furniture and other household items, vacated the Superintendents residence, and moved to Albuquerque where his family has resided since August 1952.

Clyde A. Maxey
Clyde A. Maxey
Acting Superintendent

January 29, 1953

Memorandum

To: General Superintendent
From: Superintendent, Bandelier
Subject: Monthly Narrative Report, January 1953

Weather

The weather was generally mild for this time of the year with the exception of a cold snap the beginning of the month when the temperature dropped to 4 degrees above zero on the 3rd. The maximum temperature was 63 degrees on the 24th and 26th.

Three very light snow falls accounted for only .09 inches of moisture and much of the earlier snow had melted off by the end of the month.

Special Activities

In-Service training meetings were started on the 21st and will be held once a week for eight weeks. Regional Naturalist Dodge conducted a discussion on wildlife at the meeting on the 28th.

A staff meeting was held on the 5th at which property accounting, inventory, and revision of signs were the principal topics. These meetings are scheduled for the first Monday of each month.

A new series of tests are being made by the A.E.C. at the technical area north east of headquarters. The tests on the 8th and 22nd broke one window in the lookout each time. They were replaced immediately by the Atomic Energy Commission. A seismograph reading was taken during one of the tests to determine the amount of shock that is being received at headquarters but we have not yet learned of the results.

Inspections

Engineer George Smith visited Bandelier on the 21st in connection with invoices for the road surfacing job last September. While here he inspected and made recommendations for improvements along the shoulders and ditches of the .6 miles of newly surfaced road near the checking station. He also made suggestions for patching the approach to the campground bridge.

Maintenance

The lobby, dining room, and coffee shop at Frijoles Canyon Lodge were redecorated and placed in good condition for the coming season.

The following information was obtained from the records of the Federal Bureau of Investigation, Washington, D. C., and the Bureau of the Census, Washington, D. C., and is being furnished to you for your information.

There were three other witnesses who saw the
of evidence and one of the witnesses was called out of the
of the court.

[illegible]

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED
DATE 01-11-2001 BY 60322 UCBAW/SJS

[illegible]

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the South (CLPS) in the United States. The Commission is aware that the CLPS is a pro-Soviet organization and that it has been active in the United States since 1945. The Commission is also aware that the CLPS has been active in the United States since 1945. The Commission is also aware that the CLPS has been active in the United States since 1945.

Journal of Management Inquiry 22(1)

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a genuine organization or a front organization for the Soviet Union.

(continued)

The above information was obtained from the files of the FBI, New York Office, and is being furnished to you for your information.

Considerable sign work was accomplished by the Operator General. Six new road and trail signs were constructed and five old signs were reconditioned.

Work completed on marking all of the tools and some equipment with the electric marker that was borrowed from the Regional Office.

The front of the checking station was repainted.

A number of hand tools such as sledge hammer, axes, shovels were reconditioned. This consisted of replacing broken handles, sharpening, grinding off burrs, etc.

Approach Road

A rock slide occurred on the 21st on the hill on the south side of Ancho Canyon that completely blocked the road for several hours. It was removed by the Bureau of Public Roads maintenance crew.

Interpretive Service

A total of 350 visitors were conducted on 48 tours of the ruins.

The selectroslide and tape recorder were adjusted for better operation. Considerable difficulty had been experienced with the recorder breaking the tape but the cause was discovered and it is now operating satisfactorily.

Research and Observation

Ranger Turney continued to work on the classifying of pottery sherds collected in the Otowi section survey. He spent one day at the Laboratory of Anthropology analyzing some of the sherds with Mr. Stanley Stubbs.

Travel

Travel for this month was slightly under that of last year with 980 visitors as compared with 1013. With warmer weather the approach road became very muddy during the first half of the month which caused some visitors to turn back. It had dried out and was in fairly good condition by the latter part of the month.

Visitors

Visitors during the month included:

Mr. and Mrs. J.W. Hendron, New Mexico State Tourist Bureau, Santa Fe. 30 members of the Los Alamos Outdoors Club who hiked to the Rio Grande on the 25th.

Mr. R.E. Cole, Regional Chief of Engineering & Construction, AEC, Albuquerque, New Mexico.

Consequently the work was concentrated in the summer months. The two main lines were constructed and the other lines were reconstructed.

Work continued on making all of the lines and the equipment with the electric motor was improved from the original design.

The work of the summer season was completed.

A number of small lines were also made, some of which were reconstructed. This consisted of replacing broken cables, reconstructing, changing all wires, etc.

General Work

A new line was made on the line on the hill on the west side of the house. This was made by using the original design. It was made by the use of the same design.

Reconstructive Work

A total of 100 lines were reconstructed at the house of the owner.

The reconstructive and new work was completed in the summer season. Consequently the work was completed in the summer season. The work was completed in the summer season.

Reconstructive and New Work

Reconstructive and new work was completed in the summer season. The work was completed in the summer season. The work was completed in the summer season.

General

Work on the lines was completed in the summer season. The work was completed in the summer season. The work was completed in the summer season.

General

Reconstructive and new work was completed in the summer season. The work was completed in the summer season. The work was completed in the summer season.

Building Fire Protection

A new 115 volt siren that was obtained from surplus at Los Alamos was installed at the power house. It is considerably more dependable than the battery operated siren formerly in use.

REPORT ON VISIT BANDOLIER NATIONAL MONUMENT
JANUARY, 1939

January 28, 1939

Fred W. Binnewies

Fred W. Binnewies
Superintendent

MEMORANDUM

TO: General Superintendent
FROM: Superintendent, Canyon de Chelly
SUBJECT: Monthly Operations Report for January 1939

Incidents: In spite of unfavorable weather conditions no work was done on the monument. There were no visitors during January of 1939. This was due to a great deal of rain and a recent burning over of brush.

Work: Progress was made on the monument. The water and electric lines were moved from the old to the new location.

Notes: All work on the monument was done during the month. The water and electric lines were moved from the old to the new location. The work was done during the month.

Remarks: All work on the monument was done during the month. The water and electric lines were moved from the old to the new location. The work was done during the month.

Remarks: All work on the monument was done during the month. The water and electric lines were moved from the old to the new location. The work was done during the month.

The water and electric lines were moved from the old to the new location. The work was done during the month.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

January 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Canyon de Chelly

Subject: Monthly Narrative Report for January, 1953

Travel: In spite of unfavorable weather conditions 56 people in 18 cars did visit the monument. There were no visitors during January of 1952. This may indicate a trend that will result in a record breaking year of travel.

Weather: Frequent snow storms prevailed throughout the month, and high-low temperatures ranged from 50 to 4 degrees.

Roads: All approach roads are passable except through the Saw Mill region. Improvements started last fall on the stretch between Window Rock and Canado have been slowed to a minimum due to adverse winter weather at that high altitude. Little if any work can be accomplished until next spring.

To eliminate once and for all the constant washing out of a section of our own monument road, between headquarters and White House overlook, a flood water diversion control wall, several hundred feet in length, was constructed during the past 30 days. The stone blocks used in this wall are of the same composition as the red sandstone rocks in the surrounding area, consequently, it is not noticeable from the road.

Maintenance: All automotive equipment, which includes the Ford dump, Jeep, and Dodge pickup, was overhauled during our spare time. Motors, lights, breaks, etc, were put in good shape and every vehicle is now in good operating condition. A welded steel rack of 1" tubing was made and placed on the Jeep pickup. This provides an added safety factor for riders making trips into the canyons.

The water pump engine was almost completely torn-down and assembled with new parts. It, also, is working very smoothly.

UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT

January 24, 1962

MEMORANDUM

TO: Bureau of Land Management

FROM: Department of the Interior

SUBJECT: Bureau of Land Management Report for January, 1962

Enclosed is a copy of the report of the Bureau of Land Management for the month of January, 1962. This report contains a summary of the work of the Bureau during the month and a list of the lands which have been acquired or disposed of during the month.

The report also contains a list of the lands which have been acquired or disposed of during the month. This list is included for information of the Bureau and is not to be used for any other purpose.

All lands which have been acquired or disposed of during the month are listed in the report. This list is included for information of the Bureau and is not to be used for any other purpose.

To facilitate the work of the Bureau, the report is divided into two parts. The first part contains a list of the lands which have been acquired or disposed of during the month. The second part contains a list of the lands which have been acquired or disposed of during the month.

All lands which have been acquired or disposed of during the month are listed in the report. This list is included for information of the Bureau and is not to be used for any other purpose.

The report also contains a list of the lands which have been acquired or disposed of during the month. This list is included for information of the Bureau and is not to be used for any other purpose.

Very truly yours,
Director, Bureau of Land Management

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

January 25, 1953

MEMORANDUM

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for January, 1953

General: Casa Grande has been graced with splendid weather this month. Mornings are crisp, with high noon delightfully cool. There have been few winds and lots of sunshine. Visitor rate increases.

The only disharmony this month has been the influenza, all the staff experiencing it with varying degrees of discomfort. As one simply doesn't become ill at this monument, however, during the winter months at least, only a total of one and a half days of sick leave were taken.

Weather: No precipitation, and low humidity. High temperature 82 degrees (on the 11th), low 26 degrees (22nd and 23rd).

Interpretive Service: During the month 7,053 visitors arrived at Casa Grande. 4,367 visited the ruin in 219 guided trips averaging 50 minutes. 2,150 visited the museum for about twenty minutes without taking the guided trip to the ruin.

<u>Visitor Summary:</u>	1953	1952
January	7,053	6,703
Increase	350	

Noteworthy Visitors: A frequent visitor is Dr. Kenneth Stewart from Arizona State College. Visiting socially, he is also interested in our museum plans and changes.

January 5th	Mssrs. Davis and Tilden .
January 15th	Mssrs. Sharpe and Gueer from Tonto (not the Shappe but his brother).
January 18th	Allen and Barbara Vetter of SWNMA.

The report of the Archaeological Excavations at Casa Grande, Arizona, dated January 10, 1932, also contains a list of the artifacts and other objects recovered during the excavations.

The report of the Archaeological Excavations at Casa Grande, Arizona, dated January 10, 1932, also contains a list of the artifacts and other objects recovered during the excavations.

Administration and Protection: Nine requests for information were received this month, including the periodic inquiry from Desert Magazine regarding wildflower predictions for this area.

The Adamsville site continues undisturbed. Archeologist Jewell and the Superintendent spent a couple hours there this month examining the area closely.

The Superintendent made a quick trip to Globe this month carrying a desk and inquiries regarding the rental of our extra house.

An ocotillo fence was planted to intercept afternoon visitation to the ruin. More of this below.

As there has been no rain this month, the walls of Compound A are disintegrating less.

Museum: Work continues in the replacement of old and faded labels. Although striving to keep labels and signs in the museum to a minimum, we are experimenting with a few signs that answer common visitor questions and relieve the staff of repetitious answers (Where to we get our tickets? Did all this stuff come from these ruins, etc?).

Don Jewell is applying the finishing touches to a model of a typical house unit of Classic times. It is a two-story pueblo with a single-story house attached.

The model, it might be added, is made from caliche. This makes for a fairly satisfactory and, of course, inexpensive material. There are certain tricks in using it, but it is conceivable that it may be employed in the manufacture of dioramas.

Work continues with the catalog cards, endeavoring to locate cataloged material, and isolating material not previously cataloged. This is developing into a major undertaking.

A few exhibit specimens have been repaired.

Public Relations: The January issue of Arizona Highways dedicates a full page color photograph of the Casa Grande ruin, including elsewhere in the issue a brief description and interpretation.

The January 18 issue of the Arizona Republic is dedicated to Coolidge. Casa Grande is consequently discussed to some length, including photographs and mention of the staff.

9. Index
10. Summary

The following are the names of the persons who have been identified as having been in contact with the subject of this investigation, and who have been identified as having been in contact with the subject of this investigation.

the whole of the day a new development of the
the latest and greatest political and social movements

with approval as to the quality of the work done by the committee.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the industrial revolution. The process of urbanization is the movement of people from rural areas to urban areas. This is done for a variety of reasons, including the search for better living conditions, the desire for education, and the need for employment. The process of urbanization has led to the growth of large cities and the decline of small towns. This has had a significant impact on the way we live and work. For example, it has led to the development of public transportation systems, the growth of the service industry, and the decline of agriculture. The process of urbanization is still going on, and it is likely to continue for many years to come. This is because there are still many people who are looking for better living conditions, education, and employment. The process of urbanization is a complex one, and it is influenced by many factors. However, it is clear that it is a major force in shaping the future of the United States.

and on 10/10/1944, the following was received from the
Director, Bureau of Investigation, Washington, D.C.
"The Bureau has received information that the
subject of this case, [redacted], is a member of the
German-Italian Fascist Party, and is active in the
propaganda efforts of the Axis powers. The Bureau
is conducting an investigation of the subject's activities
in this regard, and will keep you advised of the results
of the investigation."

It is a long-standing tradition that the first of the year is a time of great celebration and festivity. The people of the world have always looked forward to the beginning of a new year with joy and anticipation. The first of the year is a time when the old year is left behind and a new one begins. It is a time when the people of the world are united in a common celebration of the new year. The first of the year is a time when the people of the world are united in a common celebration of the new year. The first of the year is a time when the people of the world are united in a common celebration of the new year.

This is a result of the process of urbanization, which has been going on since the beginning of the 20th century.

THE ABOVE IS A SUMMARY OF THE INFORMATION CONTAINED IN THE ATTACHED DOCUMENTS. THE INFORMATION IS UNCLASSIFIED EXCEPT WHERE SHOWN OTHERWISE.

UNITED STATES
DEPARTMENT OF THE INTERIOR

An outstanding bit of publicity for Casa Grande occurred at the Salad Bowl game, the ruin being pictured on the face of the program.

Don Jewell gave a slide talk to a Boy Scout troop in Coolidge. Mr. Jewell, incidentally, now sports the green and gold insignia of the Assistant Explorer Adviser. It is anticipated that he might go to the annual Boy Scout jamboree at California this summer.

Maintenance: Laborer Leadman Severo, demonstrating a versatility bordering on the spectacular, repaired a number of electrical devices long requiring attention, including a stubborn switch on one of our drills. He has improved upon the design of our ditch plow, and repaired the paint spray compressor returned (as unusable) from Globe. He has transplanted some ocotillo to make a more visitor-resistant boundary to the ruin. The ocotillo is doing nicely, taking root although only stalks were planted.

The balance of Mr. Severo's time has been occupied with routine maintenance.

Natural History: About forty quail are observed every morning in the picnic area, seeking left-overs from picnics of the preceding day.

Each of our cholla cactuses support a cactus wren nest, but two of them have been recently destroyed, apparently by a hawk. The hawk has evidently made its home on the monument, as it almost constantly soars overhead.

Personnel: As indicated above, we have all successively experienced the flu. Jim Clancy was hardest hit, and, although ill over an extended period, took only a day and a half of sick leave. At this writing, however, we are all fairly well.

The extra house (wistfully referred to as the new Ranger's house) has been rented to Mrs. Melba S. Johnston, stenographer with the Indian Service.

A. T. Bicknell
Superintendent

NATIONAL PARK SERVICE
Chaco Canyon National Monument
Bloomfield, New Mexico

January 22, 1953

Memorandum

To: General Superintendent

From: Superintendent, Chaco Canyon

Subject: Monthly Narrative Report for January, 1953

Weather This month we have had about the usual January weather. The maximum temperature was 58 degrees on the 12th and the minimum was 21 degree on the night of the 29th of December. Average maximum was around the mid-forties. Twenty hundredths of an inch of moisture was recorded. The last week of this month has almost been like March. High winds have kept up almost continuously and although cold have helped to dry out the roads.

Travel Due to bad roads most of the month and also to the weather conditions Chaco Canyon had only 10 visitors in 3 cars, and of this number only two availed themselves of guide services and went through Pueblo Bonito.

Administration Our annual equipment inventory was completed and the Board of Survey was submitted.

Mail receipt was delayed by muddy or impassable roads and on one occasion it was eight days between mails.

General Trouble was again experienced with the water line at the new residences. It had to be thawed out again this month in order to get water to the houses.

A new work bench was constructed and the tools and supplies which were removed from the old tool room were sorted and stored or placed for use, and a heating stove installed in the new tool room.

Fuel line connections were made from the two 500 gallon Diesel storage tanks to their respective light plants. This is indeed an improvement over the previous setup which consisted of a 5-gallon tank connected to the plants.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Maintenance Routine maintenance was carried on during the month and a considerable amount of time was spent on the old gasoline Onan light plant at Residence # 1 to get it back into usable condition for a stand by.

Several days have been spent on the library. New shelves have been built and the old ones rebuilt to permit better arranging and storage of the books.

Roads and Trails Both the north and south approach roads were obstructed by snow the first part of the month. After the snow melted the roads were so muddy as to be nearly impassable. At present they are in fair shape due to the numerous days of high wind.

An Indian Service pick-up which was pulling a horse trailer got stuck on the Rock Hill on the north approach road. After hitching on with the dump truck we got them going again.

Protection This month a total of 15 head of livestock were run off of the monument. Of this number, nine were horses, four burros and the other two were mules. The last two were hobbled.

Rescue A visitor leaving Chaco for Gallup on the night of January 1 got stuck in the snow about seven miles from the new headquarters area. He was nearly exhausted from having walked back through the drifted snow without a flashlight. After being rehabilitated a bit and helped out of the snow drift he went on his way about 1:00 A.M.

Death Numerous friends of Dr. Paul Reiter were shocked at the news of his death on January 9. He was studying under a Ford Foundation Fellowship at the University of Michigan, Ann Arbor. Dr. Reiter directed the University of New Mexico Field Research Station at Chaco Canyon for many summers.

Homer F. Hastings

south approach road the first
half of January.

Chiricahua National Monument
Dos Cabezas, Arizona

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendents' Monthly Narrative Report

Following is a report of activities at Chiricahua for the month of January.

Personal. Ranger Robert Barrell was on a furl leave January 5 to 22 visiting his home in Massachusetts.

Weather. Weather has been very favorable for January. Mild warm days have melted all of the snow and ice off of the roads and trails and with generally good conditions overhead everything has been conducive to travel, especially during the latter part of the month.

Inspections. General Superintendent Davis and Mr. Freeman Tilden spent a few hours on the monument on January 10. The Forest Ranger trail was checked and discussed along with other Chiricahua affairs.

General Publicity. We have recently received a number of letters as a result of an article in the Tucson Citizen of the Tucson Herald, by Weldon Heald. The article was in regard to the article in the Citizen of a surprise when inquiries started coming.

Maintenance. A rock railing was completed along our lookout rock road. The closing of this will be a great help along the edge of the road. A rock railing was also completed on the road. The fall of one had started off would have been about twenty feet.

Access to Monument. All approach roads are in good condition with the exception of the road over the mountain from Roso. This road has been closed by snow until a few days ago. It has now been open it within the last four days and we are now advising visitors to travel it at their own risk.

Interpretive Service. One conducted trip was made over the Foothill Forest Trail and one over the Red Mountain Trail. 1029 visitors were conducted in the month. One large Sunday travel was closed in

the museum due to a sickness emergency on the trails. Three visitors took the self guided Foothill Forest Trail and an estimated 75 the Self guided Nassai Point Nature Trail.

Increase in Travel. 1526 visitors came to Chiricahua this month. This compares with 1233 for January of last year or an increase of 24%. This is the largest January travel in the history of the monument and the 1233 of last January was the largest to that date.

Accidents. Carl Myers, a Heart of Rocks trail hiker failed to return the night of January 24 and a search was started at 8:30 P. M. He was found at 11 P. M., sick apparently with a heart attack. No horse being available it was necessary to leave him by a fire until morning. The rest of the night and the next forenoon were spent making him comfortable by getting a sleeping bag to him and securing a horse to get him to the road at Massai Point.

The section this month was a -line I enjoyed and the warmest was in Sagadahoc. There was a lot of water, all of which was in the form of snow and ice. I had 14 or 15 inches. Though that is not much, we spent a good deal of our time shovelling and our work was made as it were by small stones. The land on the north side of the lake has become virtually a sheet of ice. A few more days and the water will flow from the lake in the morning and evening on the north. In 14 February there was a lot of snow, but the water was not so high. The water level was 14 inches and the water level was 14 inches and the water level was 14 inches.

The squirrel made sure to get some food at the moment, and the squirrel took it in the store.

Paul Hanger, 5, 1400 17th Street, arrived from Chicago two days recently after being arrested. He stated that he is a former inmate of the Federal House in Chicago and is a man collecting money for the "Reds" and is now in the process of being released. He stated he was in the city of Chicago.

The second rubber stamp was also found with the first rubber stamp. The stamp is, "RECEIVED" and contains the date and time stamp. The stamp is also dated 10/10/1964. The stamp is also dated 10/10/1964. The stamp is also dated 10/10/1964.

7. The purpose of the post-off type the same, are required
to be the same. The purpose of the post-off type, are the

On March 10, 1964, the following information was received from the Bureau of the Federal Bureau of Investigation, Washington, D.C.:

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The second is the fact that the majority of the population is now living in the middle class. This is a result of the process of social mobility, which has been going on since the beginning of the 20th century. The third is the fact that the majority of the population is now living in the white middle class. This is a result of the process of racial integration, which has been going on since the beginning of the 20th century.

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

We had 64 visitors this month which is exactly twice the number of a year ago. They came in 20 automobiles. 43 of these visitors took a trip around the Rock in 13 parties, and 23 of them sat around the warm office and received an orientation talk. No one went over the top of the Rock - just too much snow.

The coolest this month was a minus 2 degrees and the warmest was 62 degrees Fahrenheit. There was a total of 1.02 inches of moisture, all of which came in the form of snow which made about 10 or 12 inches. Though that is not much snow, we spent a good part of our time shoveling out our walks and trails as it came in small doses. The trail on the north side of the Rock has become virtually a sheet of ice. A few warm days and the water runs down from the snow on the hillside and freezes on the trail. It is fortunate that most of the more important, historically, and the oldest inscriptions are to be found on the south side!

The approach roads have been in good shape most of the month, and the Monument road is in fine shape.

Park Ranger H. Robert Krear arrived from Tucson one fine morning for our light plants. We loaded them, but by dinner time it was snowing. He left in a rush uttering something about getting back to warm southern Arizona. Seriously, we enjoyed his too short visit.

The usual routine chores were accomplished which included driving stock off the Monument, painting and erecting signs which had become damaged, etc. The sewer line became badly clogged one evening. In fact, it suddenly stopped passing anything. We had to get out the fish tape and work around several hours before it was cleaned.

Our pond, because of the run-off from the snows, has remained nearly full throughout the winter. Several of the fish have died, but two

Gran Quivira National Monument
Gran Quivira, New Mexico

January 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report for January

Weather. We had a variance in the type of weather this month. Snow, rain, and generally threatening weather was received the first three weeks and warm sunny days closed out the report period. High winds predominated all month. Minimum temperatures continued at freezing and maximum temperatures varied between 37 and 65 degrees.

Local. Due perhaps to the changing weather, the vicinity has gone through a mild influenza and/or virus epidemic with over 30 percent of the Mountainair schools children absent from classes. Local authorities feel that the peak of the epidemic is over and no deaths have been reported.

Approach Roads. Four cars in one party reported the Carrizozo approach road in poor condition on the 10th of the month and were forced to make their return through Mountainair. Condition of both approaches was generally poor during the first part of the month but State maintenance crews have recently worked Highway 10 from Mountainair and the road is in good condition at this time.

Roads and Trails. Again it seems that a great deal of the Superintendent's time was spent leveling snow and mud from the trails and dragging the entrance road. Six half days were spent with the drag in an attempt to keep the road in passable condition and most of the corrugations have been smoothed out.

Maintenance. The comprehensive stabilization recently completed on the missions received it's acid test the last two months what with all the inclement weather. We can report that the work has stood up very well. No slough off of veneer was noted and provided drainage was adequate to handle all run off. Dust and debris fill in the kiva and House "A" was removed.

Publicity. Seventeenth-century Pueblo mission churches including the Salinas group were featured in a series of color photographs in the January issue of SUN TRAILS magazine.

Travel. We had a slight increase in travel for the month. 170 visitors in 49 cars were recorded with most of these entering on the week ends.

Interpretive Services. Our service to the public this month was dependent, as was all other activity, on weather conditions. More time was spent on interpretation in the museum (near the stove) than in the missions, a condition preferred by the visitor and concurred in by the guide. 119 persons in 28 parties were given guided tours for an average of 36 minutes and 51 persons used the self guide facilities.

Weather Conditions

Interpreted temperatures for January indicated that in about the mid part of the month a high increase in precipitation was expected. Local public law regarding protection near the trail of road in the mountains.

Interpreted temperatures - 50° on January 10
Interpreted temperatures - 50° on January 10
Interpreted temperatures - 50° on January 10

Boundary Revision Study

Earlier in year study of recommendations for the revision of the boundary of Grand Quivira National Monument made by the field and report was completed and forwarded to the Regional Director.

Maintenance and Rehabilitation

Painting was the major item accomplished this month. The walls of the front porch and hall entrance and the ceiling of the dining room and front hall entrance were painted with yellow-tan paint. The vines and railing in the front porch were given a limited oil coat and the woodwork in the front room was stained and varnished. Preparation of the walls and woodwork has been made very close to the actual existing.

The concrete road was graded more during the month and is in fair shape.

Approach Road

Approach Road graded the entrance road area and the road is in good condition for the next year.

100-443887-117

There is no evidence of any connection between the two groups. The only connection is the fact that both groups are active in the same area. The only connection is the fact that both groups are active in the same area.

GREAT SAND DUNES NATIONAL MONUMENT

Alamosa, Colorado

January 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Great Sand Dunes

Subject: Superintendent's Narrative Report for January, 1953

Weather Conditions

Above-normal temperatures for January stimulated travel to start the new year with a 110% increase in visitation for the month. Local people are becoming concerned over the lack of snow in the mountains.

Maximum temperature - 54° on January 10

Minimum temperature - 1° on January 16

Precipitation - 0.01 inch (0.2 inch of snow)

Boundary Revision Study

Review in your office of recommendations for the revision of the boundary of Great Sand Dunes National Monument made by Mr. Kell and myself was completed and forwarded to the Regional Director.

Maintenance and Rehabilitation

Painting was the major item accomplished this month. The walls of the front room and hall entrance and the ceiling of the dining room and front hall entrance were painted with rubber-base paint. The vigas and ceiling in the front room were given a linseed oil coat and the woodwork in the front room was sanded and enameled. Preparation of the walls and woodwork has taken much more time than has the actual painting.

The monument road was graded once during the month and is in fair shape.

Approach Road

Alamosa County graded the entrance road once and the road is in good condition for that type road.

Journal of Management Inquiry 20(1) 3-17

1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 26

[illegible]

1. $\mathcal{D} = \mathcal{D}_1 \cup \mathcal{D}_2$ and $\mathcal{D}_1 \cap \mathcal{D}_2 = \emptyset$;
2. \mathcal{D}_1 and \mathcal{D}_2 are disjoint;
3. \mathcal{D}_1 and \mathcal{D}_2 are disjoint.

where \mathbf{u} is the unit vector in the direction of the vector \mathbf{r} .

...and it is not possible to give you a final answer at this time. The only way to get a final answer is to wait until the end of the year. At that time, we will be able to give you a final answer. In the meantime, we will continue to work on the problem and will keep you informed of our progress.

1. The first of these is the fact that the

Very old, low, 4000 feet, mountain, with many small, round, holes.
Large, old, with many small, round, holes.

Research and Observation

Bert Baker, District Game Manager of the Colorado State Game and Fish Department spent one day here making track counts and studying browse conditions along the east side of the monument. The deer are working back up in the mountains this month as a result of the warmer dry weather and are in very good condition.

The plant specimens collected last summer and labeled in December are now at the University of Colorado for identification. They should be returned soon so we plan to mount and catalogue them in February.

Increase in Travel

An increase of 110% from 106 to 223 visitors occurred this month to start the new year with a bang. This is of little real importance, though, as one good summer day brings more people to the Great Sand Dunes than January and February combined.

Visitors

Among the more notable visitors to the Great Sand Dunes during January were Jim Steffens, newly elected commissioner in Alamosa County, Bert Baker, District Game Manager of Colorado State Game and Fish Department, and Lee Bachus of the Fish and Wildlife Service who is stationed in Monte Vista. Lee, an old friend of Paul Balch, visited the area while I was absent on a patrol trip with Bert Baker and I therefore missed seeing him.

Protection

The Medano Ranch started feeding their cattle last week so trespass from that direction has stopped.

(SIGNED)

Glen T. Bean
Superintendent

Montezuma Castle National Monument
Camp Verde, Arizona

January 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report for January 1953

Weather: This has been an excellent January as far as the weather is concerned. Days have been clear and warm with maximum temperatures averaging in the 60's and 70's. Only .2 inch of rain was recorded throughout the month.

Travel: Excellent weather brought good travel. 1566 people in 648 cars visited the Castle and 892 people in 289 cars went to the Well. This makes a total of 2458 visitors to the area as compared to 1014 for January last year.

Interpretation: The Castle museum was open 8 to 5 daily and most contacts made there. However, on Sundays the Castle model was attended and visitor contact made there. The Well museum was attended 88 hours during the month and received 182 visitors.

Ranger Sutton presented a talk to the Yavapai Archeological Society at Prescott January 13, dealing with the role of the Park Service in Archeology, and accompanied by slides. 65 persons attended.

Roads and Trails: At Montezuma Well, the county highway through the area was furnished with culverts and extensively gravelled. The work was done by the County maintenance crew. Also at the Well, a new entrance sign was erected. One of its functions will be to attract those travellers who, not aware of what the area exhibits, pass on by.

A new flagstone walk was installed in front of the museum at the Castle. This walk has improved the looks of the area and does call attention to the museum.

Maintenance and General Work: The Castle museum was enlarged by utilizing the old kitchen section of the building. Partitions separating the kitchen from the museum section were removed and as a result, we have about 1/3 again more museum space. Displays for this room are now being prepared.

Page 2:

Montezuma Well Farmland: Bids were opened at Gila Pueblo on December 29, for use of the irrigated farmland at Montezuma Well. Mr. Swift of Camp Verde was high bidder with a bid of \$700.00 per year for five years. This is good money for use of this property.

Research: Several geological investigations were made of the area during the month. Some unusual formations in the limestone near the north entrance to the Castle area have been detected and considered of sufficient importance to merit further investigation. A report of the Geology of the Verde Valley was completed by Sutton and a copy submitted to Tuzigoot and to your office for study.

Pierson worked up an Archeological Site Map which was submitted to the Regional Office for further processing. Upon completion of this map it will be made a part of the Master Plan for this area.

Navajo National Monument
Tonalea, Arizona

January 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Navajo
Subject: Monthly Narrative Report for January, 1953

Travel: There were no visitors this month which is not unusual for January.

Weather: We have had only .15 inches of moisture this month but still have 3 inches of snow on the ground. The maximum temperature recorded was 59 and the minimum was 12 degrees.

Roads: For the past 10 days the roads have been sufficiently clear of mud and snow to travel without chains. Our road maintainer has been returned from the Tuba City repair shop but due to freezing conditions not much has been done to eliminate the accumulated ruts in the road.

General: We now have completed the plumbing in the ranger hogan. It is not fancy but it works satisfactorily. The plumbing consists of hot and cold water for a laundry tub, wash bowl and kitchen sink with drainage to a nearby sump.

One load of lump coal was hauled for the superintendent's residence and the slack coal in the basement was removed and used as road fill. A sign at Segi Point was removed and is being changed for installation at another location.

The coal furnace celebrated New Year's Eve by filling the house with smoke and soot and the evening was spent with doors and windows open. New Year's day the furnace and chimney were cleaned and the house de-sooted.

Memorandum

To: General Superintendent, Southwestern Nat'l Monuments
From: Superintendent, Organ Pipe Cactus Nat'l Monument
Subject: Monthly Narrative Report for January 1953.

Weather

Perfect weather has prevailed throughout the month with only a few cool days. High - 82 Low - 25

Special Activities

The Superintendent made a trip to Phoenix on the 23rd and 24th to secure quotations for equipment.

Inspections

General Superintendent Davis and Mr. Freeman Tilden spent January 6 on the area on general inspection.

Landscape Architect Miller inspected construction work and general problems January 11 to 13.

Assistant Regional Director Miller and Assistant General Superintendent Castellum visited the area January 24.

New Construction

Headquarters road construction progressed well during the month. However it will slow up some since we have lost the use of our borrowed dozer.

Research and Observations

At last our oak of the area has been identified as a new species. The work was done by Dr. C. L. Miller of the Univ. of California called Quercus ajoensis.

Travel

We are as usual showing quite an increase in trailer use with our yard running over at times.

Travel to Mexico seems to be off this winter and reflects some on our total travel.

Interpretation

The Superintendent gave three illustrated lectures to

a total of 75 persons.

Attached is a photo of a new display worked up for our little exhibit room. It was suggested by some illustrations in "Prehistoric Men" - a Chicago Natural History Museum booklet by A. J. Braidwood.

William W. Suparnaugh
Superintendent

January 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Saguaro

Subject: Monthly Narrative Report, January 1953

General

Spring like weather was experienced throughout the month of January. On January 4, the temperature climbed to 89° and Tucson had the distinction of being the warmest city in the country that day. With the pleasant weather came many visitors and, by month's end, a new all time monthly travel record had been set.

Rains in the latter part of December plus the warm days brought some of the Ocotillos into leaf. An occasional blossom of the Desert Marigold and Yellow Paper Daisy were observed in the Cactus Forest. If the occasional rains persist through February, we should have another excellent display of wildflowers and cactus blossoms.

Special Activities

General Superintendent Davis and Mr. Freeman Tilden visited Saguaro on January 8. Mr. Davis made a trip to Nogales Ranger Station to view accomplishments in that area.

Eugene Cott arrived January 8 to pick up the house trailer and transport it to White Sands National Monument.

Assistant Regional Director Hugh W. Miller and Assistant General Superintendent Luis Castellum visited the area on January 23. This was Mr. Miller's first visit to Saguaro in twelve years.

General Publicity

A feature article on Saguaro National Monument appeared in the Italian travel magazine "La Vie del Mondo". The article entitled "Land of the Desert Giants" was written by the Superintendent and features the excellent photographs of Capt. Kenneth Appert, U.S.A. (ret.) and our own Marvin W. Frost.

Forms have been received for sending in wildflower reports to the "Richfield Reporter" news program broadcast every Friday at 10:30 P.M.

Maintenance and Rehabilitation

The interior of the Madrona bunkhouse was painted during January.

The corrals at Madrona were cleaned and repaired by Laborer Western and he is now engaged in working the lower portion of the Main Back Trail near Madrona Ranger Station.

Final work was completed on rehabilitation of the butane system in the Madrona Bunkhouse. A new apartment size pump was purchased and installed.

Rehabilitation of the headquarters residence was also completed during January. A metal stall shower was installed, laundry trays were purchased and installed, the cooler was renovated and repaired, and new faucets were placed for the kitchen sink. The exterior woodwork and trim of the headquarters building was repainted. We have been able to utilize the rehabilitation funds provided this fiscal year to good advantage. Much needed improvements were accomplished and we are appreciative that funds were made available for this purpose.

New Construction

Account \$223.14, Looproad Surfacing Project, Processing of 2,548 yards of chips was completed by the Bates Construction Company. Work was continued on adding base course material to the looproad. This project has been completed and the road is now ready for oiling.

Supervisory Ranger Steele constructed a drag broom to be used for dragging the road after surfacing.

Cooperating Government Agencies

On January 21 the Superintendent met with members of the Forest Gearing Advisory Board. The meeting adjourned on a cordial note after considerable discussion on Park Service policy of protecting all forms of wildlife.

Interpretive Services

Interpretive Service was afforded to 4,481 persons in 1,318 parties during January. This amounted to a total of 434 hours for an average of 10.5 minutes per party.

THE SECRETARY OF THE ARMY
WASHINGTON, D. C.
JAN 10 1918

RECEIVED BY THE SECRETARY
JAN 10 1918

GENERAL: I have the honor to acknowledge the receipt of your letter of the 7th inst.

and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
J. H. HARRIS

Enclosed for you are two copies of a report made by the Adjutant General's Office, Department of the Army, in response to your inquiry of the 2nd inst. regarding the status of the records of the 1st Cavalry Division, which were destroyed by fire at Fort Huachuca, Arizona, on the 19th of September, 1917. The report contains a list of the names of the officers and men of the division who were killed in action, and a list of the names of the officers and men who were wounded in action. It also contains a list of the names of the officers and men who were missing in action, and a list of the names of the officers and men who were captured in action. The report is divided into four parts, and is accompanied by a list of the names of the officers and men who were killed in action, and a list of the names of the officers and men who were wounded in action.

Very respectfully,
J. H. HARRIS

Very respectfully,
J. H. HARRIS

Very respectfully,
J. H. HARRIS

Very respectfully,
J. H. HARRIS

The Superintendent showed the film "National Parks Lifeline" to 469 children of the Carrillo Elementary School, Tucson. A slide lecture on Southern Arizona was presented to 15 teenagers, victims of cerebral palsy, at the Cerebral Palsy Foundation, Tucson, Arizona.

Exhibits

Preparation of labels for various specimens was completed and applications were prepared for each. The Lepoy lettering set was then sent to Montezuma Castle National Monument.

Observations

Sight records of Javalinas and Wild Bear by visitors were on the upswing this month. One visitor was able to get colored movies of a troop of 40 Javalinas crossing the Looproad.

Increase in Travel

There were 9,224 visitors to Saguaro National Monument in January. This is an increase of 5,212 visitors over last month and an increase of 2,211 persons over the corresponding month one year ago. A new all time monthly travel record was established.

Visitors

- Dec. 27, General Superintendent Davis and Family, Globe, Ariz.
" 30, Mr. Dave Carswell and Family, former naturalist at Grand Canyon National Park, Tucson, Arizona.
Mr. and Mrs. Ernest G. Holt, Montgomery, Alabama. Mr. Holt has a long record of government service and conducted field operations for the Public Development Corporation during World War II.
- Jan. 8, Eugene Wott, Globe, Arizona.
General Superintendent Davis and Freeman Tilden, Globe, Arizona.
- Jan. 14, Walter A. Bennett, former Ranger-Naturalist at Yosemite National Park, Los Angeles, California.
- " 21, Mr. and Mrs. Harold Chittum, Construction Supervisor
BIRM, Globe, Arizona.
- " 24, Assistant Regional Director Mark W. Miller, Santa Fe, N.M.
Assistant General Superintendent Luis Castellum, El Paso, Ariz.
Mr. and Mrs. Meteliff, parents of President Meteliff of the Union Trust Office.

Ranger Service

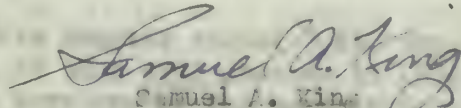

Wendell A. Bryce entered on duty as seasonal Ranger on January 4. We are very glad to have Wendell back at Fairbanks after a hitch with the U.S. Army in Alaska.

Building Fire Control

All fire hazards mentioned in the Annual Self Inspection Report have been corrected including re-wiring of the Barrow Lighthouse and the Ranger Residence.

Personnel

Supervisory Ranger Steele and Laborer-Ida Ann Stanberry were on leave over Christmas and New Years.

Samuel A. King
Superintendent

Tonto National Monument
Roosevelt, Arizona

January 29, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tonto
Subject: Narrative Report, 1mb, Tonto, January 1953

Weather. Half inch of rain on December 31, one inch rain on January 7. Last half of month warm, dry, very pleasant.

Travel. The traffic counter showed 5,710 cars and 19,850 persons entering the Monument, of whom 4909 persons in 1236 cars availed themselves of interpretive services at the headquarters museum during the month of January. All previous travel records for the month of January were broken, with travel showing over a one hundred percent increase over January last year. The Dons Club Trek has been arriving here in January for several years, so the increase reflects no unusual factors.

Business establishments, especially hotel and motel operators report a 10% decrease in business in the Phoenix area, which probably reflects the large increase in units constructed last year, rather than a decrease in travel, as the Highway Department indicates an increase of vehicles entering the state, over last year.

Dons Trek. On January 11, the annual Dons Trek from Phoenix brought in about 450 visitors in addition to the usual Sunday travel, making a record days travel of 684 visitors. The parking area was full, with 6 busses and 70 cars at one time, and some cars parked on the road.

Visitors. Archaeologist Don Jewell, Casa Grande, January 5.
Assistant General Superintendent Castellum and Landscape Architect Jerry Miller on January 9.

Assistant General Superintendent Castellum January 11, one of the very few administrators to witness a record days travel here.

Mr. & Mrs. H. B. Taliaferro, Power Division, Bureau of Reclamation, Washington D. C., January 20.

Bishop Merrill, Latter Day Saints Church, Mesa, Arizona, with a party of 35, on January 24.

Approach Roads. The State Highway Department has crews working on The Apache Trail between Tonto & Globe, improving culverts, curves and grades to a good standard, in preparation to oiling several more miles this summer. It may soon be possible to keep our cars in one piece, if a few more miles are oiled.

6. The following information is being furnished to you for your information:

7. The following information is being furnished to you for your information:

8. The following information is being furnished to you for your information:

Personnel. A son was born to the Rangers late December 31. This was a premature baby, by Caesarean section, and was a very close call for both mother and baby. However, both are apparently getting along excellently. We hope that the baby will soon gain weight to the required five pounds, so that he may be brought home from the hospital.

Power Plants. The new replacement Onan Diesel ran from December 17 to about January 3, when a leaking oil filter and bad carbon deposits forced us to shut it down. It was out of commission to January 22, when a mechanic from Equipment Sales Co., Phoenix, came up at the request of the Onan Company, and repaired the equipment. Carbon was removed, valves ground, one replaced, in one cylinder. The other cylinder was all right. A 1200 watt load from 2 heating elements is left on the plant at all times now, and as of January 29, it is still running excellently.

On January 20 and 21, Ranger Kreer made a trip to El Morro to pick up 2 surplus Koehler 1500 watt plants. One of these is serving as a standby for the Diesel, the other is installed in the utility area to run power tools and equipment for maintenance, and to furnish light to the two tent houses. Prior to this the road crew, temporary employees, had brought out their own small 250-watt plant to run power tools on Monument repair work. The Koehler plant runs very well, and very quietly.

Roads & Trails. Considerable work was accomplished on the ruins trail, which was widened in places, drainage improved, and the trail re-surfaced and graveled. The Schramm trail tractor was very useful on this job. The entrance road shows a few breaks in the oil coating, which will be hard to repair, as there is very little slab to tie to.

Water System. A considerable layer of earth was removed from the spring cover, which was found to be a good concrete slab. This was adequate to leave in place, so a good curb was built up around the hatchway, and the spring cleaned out. This should meet the requirements of the U.S. Department of Health. Construction is nearly complete on the project of putting in a dike about 20 feet downstream from the spring, and a good flow of underground water was intercepted at a depth of about 5 feet. This should increase the water supply enough to be adequate for several years. Further progress was made on installation of the 2 $\frac{1}{2}$ inch pipe line to the proposed comfort station site.

Cliff Dwelling. Archaeologist Wenger and Ranger Kreer carried some 35 gallons of Gulf Sani-Soil set up to the ruin, and pretty well processed the floors by sprinkling, raking & brushing the soil-set into the dust. This has been a vast improvement, and has completely laid the dust which was a continual source of throat irritation, and a health hazard. This was recommended by Archaeologist Vivian, and is very successful.

Introduction. A new and more complete edition of the "Handbook of the History of the United States" has been prepared by the author, and is now ready for publication. It contains all the latest information on the subject, and is written in a clear and concise style. It is intended for the use of students and teachers, and is also a valuable reference work for the general reader.

Chapter I. The new republic was born in 1776, and from that time to the present has been a constant struggle for freedom and justice. The first step was the Declaration of Independence, which was signed on July 4, 1776. This was followed by the Constitution, which was adopted in 1787. The new government was then established, and the first President, George Washington, was inaugurated in 1789. The early years of the republic were marked by a series of wars and conflicts, but the country emerged as a powerful nation. The next chapter discusses the growth of the country and the development of the economy.

Chapter II. The early years of the republic were marked by a series of wars and conflicts, but the country emerged as a powerful nation. The next chapter discusses the growth of the country and the development of the economy.

Chapter III. The early years of the republic were marked by a series of wars and conflicts, but the country emerged as a powerful nation. The next chapter discusses the growth of the country and the development of the economy.

Chapter IV. The early years of the republic were marked by a series of wars and conflicts, but the country emerged as a powerful nation. The next chapter discusses the growth of the country and the development of the economy.

Even with the customary use of personal time we are snowed under by office and maintenance work, as the number of visitors makes it nearly impossible to do much but contact work, which is of course our most important job. Ranger Krear made trips to Casa Grande and El Morro for equipment on his lieu days.

June in January. Ocotillo is leafed out, one even blooming cautiously. Mallow, desert Marigold, and Brittlebush are blooming in a few places, and of course the grasses are flourishing. Some of the White-throated Swifts are back in the cave, a girl in shorts visited the Monument, and the fishing in Roosevelt Lake is very good. No doubt this is all too good to last, and it will snow in early March.

Charles C. Sharp
Superintendent

Ponto, 1st, January 1953

1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 26

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tumacacori National Monument
Tumacacori, Arizona

January 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments

From: Superintendent, Tumacacori

Subject: Superintendent's Monthly Narrative Report for January, 1953.

Weather: January was extremely dry, with no extremes of temperature. Precipitation was .02", compared with a 15 year average for the month of .75". Maximum temperature was 86 on January 10, minimum was 22 on January 16 and 17.

Visitor Travel: This month: 6,332 persons in 1,836 cars
Highest previous January: 5,537 persons in 1952
Percent increase - - - -: 14.4%
Last 12 months - - - -: 45,057
Previous 12 months - - -: 44,194
Percent increase - - - -: 1.9%

Visitors:

12/26/52 - Assistant General Superintendent and Mrs. Luis A. Castellum, and Mr. and Mrs. Boatright. This was something of a postman's holiday for the Castellums and Mrs. Boatright, from our headquarters office.

12/28/52 - General Superintendent and Mrs. John Davis, with daughter Ann and son Jack, also on a postman's holiday.

12/29/52 - Superintendent and Mrs. Art Brown, Lehman Caves.

1/11/53 - Mr. Lewis Douglas, former ambassador to Great Britain, accompanied by Dr. Irving Erick, head of the American Institute of Aerological Research, and a group of outstanding meteorological scientists from Britain, Australia, and the U.S. Mr. Douglas sponsored some closed meetings of this group at the University of Arizona.

1/14/53 Charles C. di Peso, in charge of archaeological research for the Amerind Foundation, Dragoon, Arizona.

1/23/53 Dr. Ralph Linton, anthropologist from Yale University.

Inspections:

1/7/53 - General Superintendent John Davis, and Collaborator Freeman Tilden. This was Mr. Tilden's first visit to the area.

Maintenance: Most of this work, other than routine janitoring, was on the annual extensive cleanup of dead weeds from use areas. The cooperative observer's weather station was sanded and painted. The patio

garden fish pond was cleaned. A good deal of fertilizing and watering, and some pruning, was done in the patio garden and on the grounds. Two dozen Calendula seedlings were purchased and planted in the patio garden.

Personnel: Maintenance man Deubler has just finished a sick spell with a virus infection resembling "flu". Early in the report period the superintendent was knocked out for several days with something that started out like a cold, but left him so that he could hardly talk for 10 days.

Museum and Education: Spare time mounting and labelling and folder preparation by Ranger Featherstone and Ranger Smith have resulted in about 150 previously identified herbarium specimens being all fixed up and ready for inclusion in the herbarium case that we haven't got yet. Temporarily, specimens are kept in another type cabinet.

We have a cabinet with sliding panels, for storage of slides. It is for old type lantern slides. Task of altering sufficient of these sliding panels to accommodate kodachrome slides, was completed, and all our mounted slides are now neatly filed in the panels and readily available.

The superintendent prepared a somewhat detailed report of the water right history of the monument, with a map, and submitted it through headquarters. Several hours were spent on revisions and additions to our Fact files during the month.

Ranger Smith devoted several hours to preliminary layout for another multiplex display and thorough sifting of our photographic material to see what we have on hand that can be used. This display, when finished, will tie in authentic mission architectural details of our museum building with sources, by pictures and text.

A good deal of attention has been given this month to detailed scrutiny of and criticism of our guide talks. In this connection we are pleased at the keen interest shown in our interpretive techniques and interpretive problems by the Headquarters staff. We are again considering possibility of an experiment in self-guided mission trips, as a means of reducing regimentation and ensuring a higher percentage of visits to the mission church. As it is, less than a third of our monument visitors actually go through the mission church.

We are also pleased of late with the high degree of visitor enthusiasm for use of the nature trail leaflet which serves as a guide to the plants in our patio garden.

Coronado National Memorial Area: Late in the month we were advised that this superintendent will make routine inspections of, and reports on, the newly established Coronado National Memorial Area. Altho he has visited the area, he has never done so officially, and has never mapped the boundaries. Next month should see our first report on this area.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tuzigoot National Monument
Clarkdale, Arizona

January 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tuzigoot National Monument
Subject: Report lml, January, 1953

There follows the narrative report of activities in this area for the month of January, 1953.

Weather

Clear, bright and unusually warm weather prevailed during most of the month, bringing forth green shoots on plants, buds on the trees, and an unprecedented number of January visitors.

Maintenance and General Work

Road signs in Clarkdale and en route the Monument were repainted.

Tugblseeds around the museum were gathered up and burned. A new, fast-growing crop of weeds in the ruin and along the trail, induced by December rains and January warmth, was given the hoe treatment.

Both rest rooms in the museum were repainted.

The monument approach road was bladed by the county grader.

Museum Activities

The Museum Prospectus was completed and sent in.

Research

A search was made for evidences of a Yavapai community known to have been located near Clarkdale about 1915. No artifacts were found, but two levelled areas suggesting house sites were noted. These will be checked at the first opportunity, and the rest of the area will be given closer scrutiny.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WASHINGTON, D. C.
January 10, 1918

TO: General Superintendent, Yellowstone National Park
FROM: Superintendent, Grand Teton National Park
SUBJECT: Report on the results of the investigation of the
cause of the death of a bison, killed in the park, on
January 10, 1918.

The following information was obtained from the
report of the Game Warden, Grand Teton National Park,
who was present at the killing of the bison, on January 10, 1918.

The bison was killed by a hunter, who was
employed by the Game Warden, Grand Teton National Park,
and was found to be suffering from a disease of the
lungs, which was caused by a parasite of the lungs.

The bison was found to be suffering from a disease of the
lungs, which was caused by a parasite of the lungs.

The bison was found to be suffering from a disease of the
lungs, which was caused by a parasite of the lungs.

The bison was found to be suffering from a disease of the
lungs, which was caused by a parasite of the lungs.

Accessions

Received from National Forest Service quadrangle sheets covering the southwestern part of the Coconino National Forest.

Received from Superintendent John Cook of Montezuma Castle a typewritten copy of Ranger Myron Sutton's "Geology of the Verde Valley", a well-written, useful and much-appreciated addition to the Tuzigoot library.

Interpretive Service

Travel: 1362 visitors in 446 parties entered the monument, a new high for the month of January. Previous high was 1948 with a total of 1225. The usual run is 800-700 visitors. This month's high, like that of 1948, is probably due to the unusually fine, warm weather. Of the visitor total above, 122 visitors in 51 parties arrived during times when the museum was closed and so were not contacted.

NPS Visitors: Assistant Chief Ranger Carl Lehnert and Mrs. Lehnert, Grand Canyon National Park, on the 5th.

Ranger Myron Sutton, Montezuma Well, on the 6th.

Chief Ranger J. Barton Herschler and Mrs. Herschler, Rocky Mountain National Park, on the 13th.

Mr. and Mrs. John H. McKee and Mr. and Mrs. D. E. Jensen, Grand Canyon National Park, on the 17th.

Superintendent and Mrs. Everett W. Bright, Canyon de Chelly, on the 24th.

Other Agency Visitors: D. K. Frost, Whipple Veterans Administration Center, on the 14th.

Mr. and Mrs. Orval E. Winkler, National Forest Service, on the 17th.

A. E. Berell, Soil Conservation Service, Albuquerque, on the 20th, accompanied by C. F. Fuqua, Fish and Wildlife Service, and Lynn H. Hutchins of Albuquerque.

Foreign: Travel this month included visitors from Burma, Siam, Australia, Hungary, Alaska and Canada.

Protection

Warned off two parties of juvenile hunters who thought the rabbits inside the monument fence looked fatter.

about Talut National Monument
Flagstaff, Arizona

Memorandum

January 25, 1957

To: General Superintendent
From: Superintendent, Almit Canyon
Subject: Report of activities at Talut Canyon during the month of January, 1957.

Weather Conditions

With the exception of one light storm which brought the .75 inches of moisture recorded this month, the weather has been almost spring-like. The snow has disappeared except in the spots where the sun does not reach. Many small plants are sending up shoots.

Administration

The Superintendent returned from annual leave on January 8 to find some disturbing matters awaiting his attention. The transite pipeline had broken sometime during the month of December and 300,000 gallons of water was lost. The matter was placed before the City Council of Flagstaff to see if they would assist us in bearing the loss but our request was rejected.

Considerable time and effort has been spent in matters concerned with the request of the U.S.F. to re-locate the old "Viciner" Mother marker that was placed near the old log cabin back in 1915. A new site along the west of the present parking area has been approved. Study was also made on the possibility of an alternate route for the proposed approach road as the present proposed location has been covered with mining claims.

Park ranger Paul F. Shangle was designated as a trainee from Station three to attend the FM Radio Training Course in Washington, D.C. He left Talut Canyon on January 24 via T.E.I.

Maintenance

With the warm weather and the melting of the ice and snow we have been able to drag our roads and do other general clean-up work. With the complete cleanup and rearranging of the storage shed it was possible to move all transite pipe and other items stored or scattered around the Utility area under cover and generally improve the look of the area. The automatic oil furnaces were cleaned and oiled.

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF PLANT INDUSTRY

WASHINGTON, D. C.

January 1, 1911

MEMORANDUM FOR THE SECRETARY

Subject: Report of the Committee on the Investigation of the Plant Industry of the United States

The Committee on the Investigation of the Plant Industry of the United States, organized in 1907, has the honor to submit to you the following report:

REPORT OF THE COMMITTEE

The Committee on the Investigation of the Plant Industry of the United States, organized in 1907, has the honor to submit to you the following report: The Committee has been organized to investigate the plant industry of the United States, and to report to the Secretary of Agriculture on the results of its investigations. The Committee has held several public hearings, and has received many suggestions from the public. It has also conducted extensive research into the various problems connected with the plant industry of the United States.

RECOMMENDATIONS

The Committee recommends that the following steps be taken: 1. That the Department of Agriculture should create a Bureau of Plant Industry, which should be organized to conduct research into the various problems connected with the plant industry of the United States. 2. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States. 3. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States.

The Committee also recommends that the following steps be taken: 1. That the Department of Agriculture should create a Bureau of Plant Industry, which should be organized to conduct research into the various problems connected with the plant industry of the United States. 2. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States. 3. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States.

The Committee also recommends that the following steps be taken: 1. That the Department of Agriculture should create a Bureau of Plant Industry, which should be organized to conduct research into the various problems connected with the plant industry of the United States. 2. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States. 3. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States.

APPENDIX

The Committee also recommends that the following steps be taken: 1. That the Department of Agriculture should create a Bureau of Plant Industry, which should be organized to conduct research into the various problems connected with the plant industry of the United States. 2. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States. 3. That the Bureau of Plant Industry should be organized to conduct research into the various problems connected with the plant industry of the United States.

The break in the water line necessitated considerable work. There was still around six inches of snow on the ground and the water ran under it without its melting. Seven miles of line was walked completely two times and many test holes were dug in suspicious looking spots before the break was finally discovered. Melting snow and mud made the task more difficult. The location of the break was such that pressure was not affected on either side of the line and the loss was discovered when the monthly meter readings were made. Much hailing with buckets was necessary as the water ran back into the excavation from along the line and the soaked earth in the immediate vicinity. It took the better part of two days to get it fixed. Because of full-dozer operations in moving the old railroad switch at the Cliffs siding it was feared that the break was under the railroad right of way. Weekly meter checks have been instituted to forestall the possibility of a recurrence of such a large loss of water.

Approach Roads

The County has continued its work in improving both approaches to the Monument. Grinders have been placed over the spots that need it and that takes in most of the road. It has been bladed and is in excellent condition. Work is continuing and it may be that we will have a completely cinder-surfaced road before long.

Travel

With the nice weather travel has picked up and the Island Trail has been open for those who wished to make the trip. Our travel shows an increase of almost 400% over 1952. This year we had 696 visitors compared with only 143 during the corresponding period last year. These visitors arrived in 319 cars. This is the highest figure ever recorded for January.

Interpretive Services

The new Talaut Canyon guide leaflet was placed in active use during the month although they were received in December. Many favorable comments have been received.

Twenty three hours were spent in contacting 165 groups comprised of 488 visitors.

Meredith M. Millet
Superintendent

The Board of Directors of the American Telephone and Telegraph Company, Inc. (AT&T) has decided to increase the dividend on its common stock from \$1.00 per share to \$1.10 per share for the year ending December 31, 1933. This increase represents an increase of 10% over the dividend paid in 1932. The Board also decided to pay a special dividend of \$0.50 per share for the year ending December 31, 1933. This special dividend is in addition to the regular dividend of \$1.10 per share. The total dividend for the year ending December 31, 1933, will be \$1.60 per share. The Board also decided to pay a special dividend of \$0.50 per share for the year ending December 31, 1933. This special dividend is in addition to the regular dividend of \$1.10 per share. The total dividend for the year ending December 31, 1933, will be \$1.60 per share.

WHITE SANDS NATIONAL MONUMENT

Alamogordo, New Mexico

January 25, 1953

MEMORANDUM

To: General Superintendent, SWNM
 From: Superintendent, WSNM
 Subject: Report No. 1ml - Superintendent's Monthly Narrative.

Travel for January, 1953	Travel Year to Date
Visitors 12,795	Visitors ... 12,795
Cars 3,281	Cars 3,281

ARMED FORCES

Visitors 2,578	Visitors ... 2,578
Cars 687	Cars 687

GENERAL:

Most beautiful late spring or early summer weather has prevailed and no doubt this in part accounts for an increase of about three thousand over any like month in our history. An unusual heavy holiday period with the long week ends brought visitors out in large numbers. Low temperature for the month was 8 degrees on the 17th, with a high of 75 degrees on the 11th of January. Little moisture and several heavy wind storms just about tell our weather story.

PUBLICITY:

We never lack for Publicity. In fact the press and radio both give us marvelous coverage and will cheerfully use any information we can supply them. Many of the items given the local paper are sent out to the UP or AP depending on the time the story breaks. The weekly newscast over our local radio station is the most consistent publicity we get.

COMPLAINTS:

No written complaints were received. Of course we always have, and I suppose always will have, those when it is cloudy, want the sun to shine, and too, when the sun shines some grumble because it

is so bright, and wish for some clouds, etc. These are not complaints but as our friend Lincoln stated, 'you can fool part of the people all of the time and all of the people part of the time, but you cannot fool all of the people all of the time, and I guess you could substitute 'please' for 'fool' and it would be just as true.

MAINTENANCE:

Ray has been busy with little odd jobs taking time but showing little obvious results. Cleaning up storage bins, warehouse, sorting of surplus equipment and even our regular stocks of fittings, nuts, bolts, etc. Some time has been spent on supplying fuel, electricity, and water to a trailer house to be used by our new Supervisory Ranger, Bill Featherstone. We will try to make it just as livable as possible.

Joe, too, has been working on roadside cleanup, attempting to push back a little sand blowing into his roads. Some trouble has been experienced in the clutch slipping on the Cat. We have written El Paso asking their repair man to stop off and check it on his next trip up this way.

Gene Mott is coming in soon to enable us to get some extra work done on our picnic area, laying of a drainage for our new septic tank, some labor on our water tower, and plumbing - especially in our rest rooms.

A loaded tractor passed under our phone line last week, tearing out about seven poles, one half mile of wire, etc. - so we were without phone service for a time. An estimate from the phone company places the cost of repair in the neighborhood of \$250.00. A little expensive for neglecting to ascertain the equipment would clear, instead of guessing.

PUBLIC SERVICES:

Of course with our large visitor gain the concession has had a good month. Some of the beautiful days, cold drinks sell almost as though we were in mid-summer. The Southwestern National Monuments Association sales have been very good, even though we are low on some items.

INTERPRETIVE SERVICE:

Ranger David did not return from annual leave until January 16th, and with Ranger Chittum leaving on the 10th, we were short on the interpretive service for the entire month. I do not believe that anyone wanted information, especially that couldn't have come up and contacted the ranger at the checking station. Sometimes this service is sketchy and often interrupted. Gene Mott can verify this, I am sure. It took us a half day to get in 30 minutes conversation.

INCREASE IN VISITORS:

Much of the three thousand increase in visitors is due to tourist increases since our Armed Forces Use does not show the entire gain.

It is not possible to say whether the above is a true or false statement. The statement is a generalization and cannot be proven true or false. It is a statement of opinion or belief.

1. *Journal of the American Medical Association*, 1997; 277: 1033-1037.

[illegible][illegible]

On the 1st of August, 1900, the following was received from the
British Consul at Hong Kong:

1. *Journal of the American Medical Association*, 1997; 277: 1001-1005.

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is a fact which has been recognized by the government and the people of the United States for many years. It is a fact which has been recognized by the government and the people of the United States for many years.

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The majority of the population of the United States is now living in urban areas, and this is a result of the process of urbanization, which has been going on since the beginning of the 20th century.

How much of our regular tourist travel might be the result of the Military in relative visiting, etc., is hard to determine. Winter weather in other sections as well as adverse road conditions, undoubtedly add much to the cause. The completion of US-54 and its all-paved route through New Mexico will no doubt give us an even greater increase next winter and the years to follow. It will bring them out the midwest faster than any other route.

VISITORS:

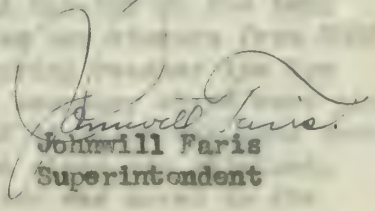

Construction Foreman Mott and Chittum, of the Southwestern National Monuments, were both in. Gene and Harold are both welcome at all times and we welcome the practical suggestions they always supply to our numerous questions.

PUBLIC HEALTH:

For the first time since we have tied into our new water supply, our tests have been returned marked 'Satisfactory'. We hope with our proposed chlorinating system to keep this condition current. With the current season of polio as heavy as it has been throughout the Southwest, our health authorities are looking at facilities in public use areas with a much more critical eye. We welcome these rigid inspections as they tend to increase the public confidence of our doing all possible to protect the health and safety of our visitors.

GENERAL:

We are looking forward to February with considerable hope for more accomplishments. Bill Featherstone, our new Supervisory Ranger, will be on hand to get well into the harness for Play Day - which date is April 11th this year. However, there is always much to be done in getting ready for the occasion and much to do aside from that. We promise Bill no idle moments at White Sands.

It was found that the following information was obtained from the records of the Department of the Interior, Bureau of Land Management, at Washington, D. C.:

Wupatki National Monument
Flagstaff, Arizona

Jan. 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Monthly Narrative Report, Wupatki and Sunset Crater National Monuments.

Weather:

With spring like weather all month it has been hard to realize it is supposed to be winter time. It has been very dry with only .01 inches of precipitation the entire month with a maximum temperature of 64 degrees on Jan. 18 & 19 and a minimum of 21 on Jan. 17.

Inspections:

On Jan. 15, Road Engineer, Tom Moran, Landscape Architect Charlie Carter and Construction Supervisor Harold Chittum visited Wupatki to make plans for the coming road work. The route of the road from highway 89 to Wupatki Ruin was gone over and also the new route for the proposed entrance road at Sunset Crater.

Maintenance and General Work.

Annual leave during the month has kept maintenance work to a minimum. The new 5000 gallon metal water tank was filled and tested and found to be allright. The area was landscaped and the top of the tank painted and the tank is now in use. This increases our storage from 3000 gallons to 8000 and will be a big help when the spring reaches its low point next July and August. A total of 240 cloth boundary signs were placed along the fenced part of our boundary. A total of 11 miles was gone over which leaves only a few miles left to do when more signs are obtained.

The small contact station at Sunset Crater was moved to its permanent location in the parking area.

Roads and Trails.

Maintenance Supervisor Gene Mott arrived with the second house trailer for the road crew on Jan. 14. Maintenceman Joe Bean and Mr. Mott spent several days converting the other trailer from electric appliances to propane equipment and Mr. Mott left the area Jan. 19 for Globe.

General Information

General Information

General Information

General Information

General Information

General Information

General Information

Interpretive Services.

At Wupatki there were 203 people in 60 parties contacted for an average time of 18 minutes per party.

With the snow at Sunset Crater about gone a few people made the trip around the nature trail in that area.

Travel:

With beautiful weather the entire month travel has more than doubled over the same period last year. Travel was recorded at Wupatki every day of the report period. At Wupatki 140 cars with 410 people were counted compared to 58 cars and 141 people for last January. At Sunset Crater 36 cars and 84 people entered the area compared to none for the same time last year. At Sunset Crater even though the road has been traveled, two snow drifts and deep mud have forced us to keep the "road closed" signs up.

Personnel.

Maintenanceman Joe Bean returned from Annual leave on Jan. 6.

Park Ranger William C. Bullard Jr. returned from annual leave on Jan. 19. Mr. Bullard received word of his transfer to the vacant Park Ranger position at Tumacacori National Monument and left Wupatki for his new assignment on Jan. 26.

Spring Flow.

Wupatki - 720 GFD - Same as last year this time
Heiser - 2700 GFD - Almost double this time last year.

March 12, 1953

MEMORANDUM

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - February 1953

General:

For historical purposes and because we believe there is widespread interest in the newest area of the Southwestern National Monuments, we are quoting in full Coordinating Superintendent Earl Jackson's excellent report on his first inspection of Coronado National Memorial:

"This, the first monthly report for Coronado National Memorial, assumes its place as one of the punctuation marks in that fabulous history that was started when Coronado's forces plodded their dusty way northward, more than four centuries ago.

"The first routine inspection from this station was made on February 7, 1953. The trip was made via Nogales, Patagonia, Sonoita, Elgin, Canelo, Lochiel, then eastward to Montezuma Pass. Return was by Canelo, Elgin, Sonoita, Patagonia, and the river road cut-off to Tumacacori.

"Of several possible routes, the most logical dry-weather route, for short mileage, is from Tumacacori via River Road, Patagonia, Little Outfit Ranch, Canelo, Montezuma Pass (83 miles), with a return over the route through Fry, Sonoita, Patagonia, River Road to Tumacacori, 96 miles.

"Coronado National Memorial area, although not clearly defined in boundary yet, because survey is pending, takes in about four and one-half square miles of land along the Mexican border at the extreme southern toe of the Huachuca Mountains, in pinon-juniper and upper grasslands terrain. A narrow dirt road, with turn-outs, bladed and fairly well maintained, crosses the area from east to west, going over a high ridge at Montezuma Pass (elevation 6,500 feet). Here, at a wide turn-out spot, with ample room for parking, is a superb scenic lookout point. One can see for many miles into Mexico, on a clear day.

"At the Pass I planted a sign, warning against destruction of natural features. Two larger name signs, made in Nogales, being painted and lettered at Tumacacori, will be planted at the approaches to the pass, on the next trip.

"Two and three tenths miles east of the pass I attempted to contact Miss Grace Sparkes, who is chairman of the Bisbee Chamber of Commerce's Committee on National Parks and Monuments, and who has actively pursued the objective of the Coronado National Memorial. She was absent.

"Two miles farther down the east slope of the mountain, acquaintance was made with Frank Zaleski, a cattleman, long interested in the idea of a national memorial area. Zaleski was very hospitable, and offered free use of saddle horses to Park Service employees for getting acquainted with our new area.

"The return trip was made back up over the pass and westward, to Canelo. Here, where a morning attempt to locate him had been unsuccessful, I was able to find and meet District Ranger Bob Schmitt, of the Forest Service, in whose district Coronado National Memorial lies. Arrangement was made to be accompanied by him on the next inspection of the area.

"On the next inspection trip advance arrangement will also be made to contact Grace Sparkes, since it appears she is a very busy woman who cannot be caught on the fly. She was sent a letter of regret that I had failed to find her, and replied with a very cordial letter.

"In general, Coronado National Memorial gives the appearance of a healthy vegetative area. Montezuma Pass offers a superb spot from which to have a nature trail, which could run along the ridge south of the pass to a low peak. It is not difficult to visualize a small museum at the pass, from which the trail could lead to an attractive trailside exhibit for the hardy visitors who wanted to make the climb and contemplate the vast panorama laid out to the west, south, and east, from the top of the peak.

(Sgd) Earl Jackson
Earl Jackson
Superintendent"

Weather

Generally warm but exceptionally dry during the early part of the month; cold, snows, high winds, and dust storms during the latter part -- this just about sums up the weather story for February. The latter part of the month definitely was not a good travel period.

Special Activities

Bandelier--Four in-service training meetings were held this month for the discussion of tort claims, concessions, clerical duties and health and safety. Tort claims were discussed by Regional Counsel Barton. His talk proved to be very interesting and instructive.

All employees attended a staff meeting on February 5 at which time attention to visitors, safety in handling storage batteries, and improvement of campground were discussed.

Cannon Ball Trailways, Inc., Albuquerque, New Mexico, plan to establish regular tours to Bandelier. An exploratory trip was made during the month. Twenty-eight persons, including tourist court operators, representatives of the Albuquerque Chamber of Commerce and the New Mexico Tourist Bureau were on the tour.

Casa Grande--Archeologist Jewell gave some lectures on the anthropological aspects of juvenile delinquency to the criminology class at Arizona State College, Tempe.

Chiricahua--Superintendent Cooke accompanied Mr. and Mrs. Hugh Miller on a trip to Cave Creek, where they called on the Eldon Healds. The recent Chiricahua land proposals were discussed with Mr. Heald.

Gran Quivira--The superintendent met with local ranchers and District Road Commissioners to discuss methods of improving Highway 10. A committee will meet with State Highway authorities at Santa Fe to discuss the problem in more detail.

Montezuma Castle--The big event during the month was the visit of the Phoenix Don's Club. This was the Club's first visit to this area. The visitors, 500 strong, arrived at the Well where they had lunch. While they were lunching, the superintendent explained the significance of the national monuments, and then introduced Ranger Sutton, who presented a talk on the geology of the area. After viewing the Well, the group went on to the Castle, and was given talks on archeology by Messrs. Pierson and Cook. The party came in five Greyhound busses, followed by seventy cars. This created somewhat of a parking problem, but everything moved along smoothly and the party went away apparently very pleased with its visit to Montezuma Castle.

Organ Pipe Cactus--The superintendent made one trip to Phoenix to procure supplies and to contact the Desert Botanical Garden. Ranger Kirk delivered a dump truck to Wupatki for use on the road project there.

Walnut Canyon--A delegation of the D.A.R. visited the area and formally approved the site chosen for the re-location of the Pioneer Women monument.

Official Visitors

Headquarters--Assistant Regional Director Miller and Mrs. Miller; Landscape Architect Harold Marsh; Highway Engineer Tom Moran; Architect Kenneth Saunders and Administrative Officer Carpenter; Archeologist Tommy Onstott.

Arches--Landscape Architect Carl Alleman.

Aztec Ruins--Messrs. Carpenter and Saunders.

Canyon de Chelly--General Superintendent Davis; Regional Chief of Concessions Management Koehler.

Casa Grande--Highway Engineer Moran; Archeologist Onstott.

Chiricahua--Assistant Regional Director Miller; Landscape Architect Marsh; Naturalist Arnberger.

Official Visitors - continued

Montezuma Castle--Messrs. Hugh Miller, Davis, Dale King; Engineer Moran.

Organ Pipe Cactus--Engineer Moran.

Saguaro--Engineer Moran.

Tonto--Messrs. H. Miller, Davis, Castellum, King; Archeologist Onstott; Landscape Architect Marsh.

Tumacacori--Messrs. H. Miller, Castellum; Engineer Moran; Archeologist Onstott.

Tuzigoot--Messrs. H. Miller, Davis, King; Engineer Moran.

Walnut Canyon--Messrs. H. Miller and Davis; Saunders and Carpenter.

White Sands--Engineer Smith and Charles Carter.

Wupatki--Engineer Moran; Messrs. Carpenter and Saunders.

Communications

Headquarters--Our radio was placed in operation the latter part of January. So far, the results haven't been too successful. Usually we can transmit messages to and receive messages from the Regional Office, and on most days are able to contact some of our areas. Rarely have we been able to contact all on any one day.

Chaco Canyon--This area is going modern -- it now has a dial telephone system which works twenty-four hours a day -- a far cry from the previous 8 to 12-1 to 5-none-on-week-ends-or-holidays-service.

General Publicity

Headquarters--The local paper carried an article concerning the visit to Gila Pueblo of Dr. Emil Haury and Dr. Ralph Linton, noted anthropologist from Yale University.

Mr. King made arrangements with two reporters from the Arizona Republic for a visit to Gila Pueblo, at which time they will gather information for an article about the Southwestern National Monuments.

Great Sand Dunes--A black and white picture of the Dunes appeared in one article and a brief description of the area was given in another article in the winter issue of Colorado Wonderland magazine.

Montezuma Castle--Forecasts of publicity-to-come: Rev. Charles Franklin Parker, noted Arizona Highways writer spent one day in the area gathering data for an article on construction details of the Castle; also, on the same day, representatives of the Woman's Home Companion took pictures for a fashion article to appear in the June issue. Using the Castle as a back-drop, they posed models, dressed in various feminine garb, along the ledge.

Tumacacori--The Arizona Republic, in its Sunday, February 15 issue, carried an article with a picture of the mission, entitled "Trip to Tumacacori National Monument Rewards Traveler with Early-Day Scenes."

Maintenance, Rehabilitation and General Work

Arches--The project of constructing new signs is almost completed, and some of the signs have been installed at the beginning of Courthouse Towers trail. A loading platform is being constructed in the utility yard.

Aztec Ruins--A very presentable picnic table was made from scrap lumber. It is hoped this will encourage visitors lunching in the area to leave their trash in the barrel provided instead of scattering it all over the place.

Maintenance, Rehabilitation and General Work - continued

Pandelier--A new telephone line was constructed to the quarters at the corral to provide communication with the saddle horse concessioner. New canales were constructed to replace several that had rotted out. A new aerial was installed to improve radio communication with Globe, but results to date have not been very satisfactory. A new dispensing stand for trail leaflets was constructed to be installed on the trail to Tsankawi Ruin.

Casa Grande--Some jobs accomplished other than routine included the dragging of the road and sewer fields, planting another section of the ocotillo fence, completing that project, and inspecting the roofs for leaks.

Chaco Canyon--A number of man-hours were spent driving out stock. Something over 80 head of cattle were driven off the three south sections and numerous horses from the same area and from the canyon proper.

Three days were spent checking and repairing the boundary fence -- 22 miles being patrolled and mended. In this distance, about 50 breaks, cuts, and broken down places were repaired.

El Morro--Several odd chores were accomplished including: placing cinders on the road, linseed oiling, staining and placing of a number of signs; also linseed oiling of the register stand base, the bench, the supporting member, the front window and door frames and the front door of the office.

Gran Quivira--Three thousand gallons of water were hauled from Mountainair to fill the cisterns. Water analysis reports recommend slight chlorination and this was done.

Great Sand Dunes--Again this month a great deal of time was spent painting the residence; a linoleum top was installed on the counter around the kitchen sink; two loads of wood were hauled from slash on the George White property.

Navajo--The Sandal Trail was checked for possible realignment and for repair as soon as the weather permits. A trip was made into the canyon to obtain measurements for a new duckboard walkway in the water tunnel.

Saguaro--General clean up of the Madrona Ranger Bunkhouse area, and cleaning the barn, blacksmith shop, and storage area occupied much time during the month. The exterior of Madrona Bunkhouse received one coat of paint and the interior was finished with a final coat of enamel in the kitchen. A larger pressure tank was installed at the pump, and the system is now functioning very well. Water line and electric cables were extended an additional 100 feet to the site of the proposed administration building.

Tonto--The spring improvement project has been completed and a good curb and cover put on the spring, which should meet the requirements of the U. S. Health Service. Some additional work will be required to make connections to the proposed houses and comfort stations.

Tumacacori--Some jobs accomplished during the month were installing a protective chain fence around the butane gas tank; applying a chemical treatment to some trees which had been weakened by root rot, in the residence area; rebuilding a bookcase in the office to make it more functional; filling pitted areas in the baptistry floor of the mission church and repairing and refilling some of the door closers on the museum building.

Tuzigoot--A new 3-control limit switch was installed in the plenum chamber of the museum heating unit with the result that the heating operation is much smoother and there should be a saving in fuel.

Maintenance, etc. - continued

Walnut Canyon--Mechanical trouble was responsible for most of the out-of-the-ordinary maintenance work performed. The automatic oil furnace in the ranger's residence went on the blink and had to be repaired, and the spray nozzle, filter and flues thoroughly cleaned.

White Sands--With Gene Mott's assistance, a great deal was accomplished during the month. The new sewage disposal system was completed and is now in use. The top of the water tank was painted with aluminum paint. A good start was made on the new cement base garbage units.

Wupatki--All road signs between Highway 80 and Wupatki were repainted, also one sign near Heiser and the register box and a few trail signs at Sunset Crater. About 150 letters were cut and taken to Superintendent Guillet at Walnut Canyon who is preparing the new entrance signs for Wupatki and Sunset Crater. A short power line was installed to feed the house trailer occupied by Construction Supervisor Chittum, and sewer and water line connections made.

Roads and Trails

Arches--A Schramm tractor was obtained from Tonto for use in the construction of the new Delicate Arch trail, which is now well underway. The final approach of the trail was revised by Mr. Alleman during his visit to Arches February 13-17.

Great Sand Dunes--Both the monument and the entrance road were extremely rough, due to the dry condition which prevailed throughout the vicinity and which was causing concern in the San Luis Valley.

Organ Pipe Cactus--Work on the headquarters and campground roads is progressing faster with better equipment. A heavy loader, which has speeded up hauling, was obtained from Saguaro, and the purchase of a jack-hammer is expediting rock work.

Saguaro--Additional base course material was applied to the picnic area spur. Engineer Moran was pleased to note how well this road has held up prior to surfacing, which has been set for early in May.

Tonto--The approach roads were rough most of the month. The excellent improvements being made on the Apache Trail between Tonto and Globe ceased. The roadside cleanup job at Tonto was started under the supervision of Mr. Marsh early in the month and excellent progress is being made. There is great improvement in the appearance of that section where the work has been completed.

Walnut Canyon--Cinder surfacing of both approaches to the monument, completed by the county, gives good all-weather roads as long as they are kept clear of snow.

Wupatki--Much time was spent getting ready to proceed with the improvement of the entrance road. Equipment assembled for this work included six dump trucks, one pickup, one International bulldozer. Two metal tanks were installed, one for 1000 gallons of diesel fuel and one for 550 gallons of gasoline.

A detour was made using the old entrance road from Highway 89 to the Earth Cracks. A cattleguard was loaned by the state highway department to be installed where the old road meets the highway. Two days of blading were required on the detour, which makes a very fine road to be used while the construction work is underway.

Concessioners

Bandelier--Two interested parties were interviewed concerning the operation of the Frijoles Canyon Lodge dining room during the coming summer. No commitments were made, and none can be made at present, as it has not been determined whether the operator from last year will return.

Canyon de Chelly--The superintendent made a trip to Window Rock with Mr. Davis and Mr. Koehler of the Region Three Office and with Mr. McSparron of the Thunderbird Ranch, to meet with representatives of the Bureau of Indian Affairs and members of the Navajo Tribal Council to discuss the future status of the McSparron concession contract in relation to ownership of the land and buildings on which the concession buildings are located.

Cooperation - Government Agencies

Saguaro--Final approval has been received to construct a lath house for the propagation of Saguaro seedlings. This project will be undertaken in cooperation with W. Craig Bryan of the Division of Forest Pathology, U. S. Department of Agriculture.

Cooperation-Non-federal Agencies

Aztec Ruins--A new information sign on Aztec Ruins is being placed at the intersection of their turn-off road and the main highway by the State Tourist Bureau.

Legislation

Saguaro--The superintendent reported on a special election to vote on county-wide zoning. The zoning ordinance passed by a large majority. This brought an end to the threats of adverse use of lands adjacent to the monument boundary. Pima County is the first in the state to take advantage of the enabling countywide zoning legislation.

Interpretive Service

Headquarters Staff--Both members of the headquarters staff were busy with a number of problems related to the interpretive program. Some of the more important matters handled were the revision of the fourth edition of the Lava Flow Trail, which was handled by Mr. Arnberger and is now ready for the printer. Mr. King revised the guide booklet for the Tonto Cliff Dwelling Trail, and it was given to a Globe printer for printing the second edition.

Some time was spent with Superintendent Jackson of Tumacacori, Superintendent Wilson of Arches, and Archeologist Onstott of the Region Three Office, discussing interpretive problems.

Mr. Arnberger reviewed the fee collecting policies in the National Park Service and conferred with Mr. Gastellum on this matter as it relates to the Southwestern National Monuments. Mr. Arnberger also made a two-day trip to Chiricahua with Landscape Architect Marsh of the Region Three Office, where they laid out an extension of the Massai Point Nature Trail.

On February 26 Mr. Arnberger presented a short, illustrated program to the Globe Lions Club on Arizona's National Monuments.

Aztec Ruins--The 16 mm film on "Southwestern National Monuments" was shown to the San Juan LH Club and to the Blanco Grade School.

Bandelier--A talk on "Vanishing Wildlife" was given by the superintendent to members of the Los Alamos Outdoors Association.

Interpretive Service - continued

Casa Grande--A lecture on the pre-history of Southwestern Indians was given to the Coolidge Lions Club by Archeologist Jewell.

Chiricahua--Two lantern slide talks were given: one by Superintendent Cooke to 28 guests at the Gadsden Hotel and one by Mr. Boileau to 41 school children.

Saguaro--The superintendent gave an illustrated lecture to 40 members of the Tucson Optimist Club, with a 20-minute question and answer period following.

The film "National Parks Wildlife" was shown to 175 members and friends of the Tucson Audubon Society. Most of those in attendance seemed to appreciate very much this excellent film.

Ranger Steele gave an illustrated lecture to a group of senior scouts and their leader at the Madrona Ranger Station.

Tonto--Archeologist Bengler gave a slide talk on Tonto and the Apache Trail to 60 members and guests of the Hiram's Club in Mesa and later received a very nice compliment on the talk from Mr. Paul Kidder, a member of the club.

Tuzigoot--A new, colorful orientation panel, with colored postcards of Southwestern Park and monument areas and an Indian country map, was completed and hung in the museum.

Tumacacori--To assist visitors more readily to visualize the extent of the old buildings east of the mission church, which have been marked only by low mounds, white stakes have been set up along the tops of the mounds to outline them.

To improve the interpretive program at Tumacacori, it has been recommended that a self-guiding trail through the church and grounds be put into use, with the guide fee changed to an admission fee payable at a turnstile separating the entrance lobby from the museum, patio garden and church and grounds.

Museum Activities and Exhibits

Headquarters--A PCP sheet for the construction of a wayside exhibit at the Overlook at Owachomo Bridge at Natural Bridges was prepared by Mr. Arnberger, recommended by General Superintendent Davis, and submitted to the Regional Director for approval.

While at Chiricahua, Mr. Arnberger reviewed the use of the Massai Point Orientation Station and preliminary plans were made for the rehabilitation of this structure so that it may serve a more useful purpose in the interpretive program.

A photograph of a Lyre Snake was obtained from Mr. Marvin Frost for use in the Montezuma Castle museum, which is being revised.

Aztec Ruins--A bundle of 21 ceremonial sticks was donated to the museum by Mr. A. C. Rampy of Vernal, Utah, who stated they were found about eight miles from the monument, along with some pottery. The sticks are well preserved, and if their pueblo origin and use can be verified by an authority, they will make an interesting display in the museum.

The lettering and installation of material in the first exhibit case was completed. The lettered material was brought out to the front of the case and tilted to a comfortable reading angle. Shades to stop the glare of the fluorescent lamps were made, and one installed in the first case. Knowing that an attractive museum story is one of the best interpretive aids, Mr. Maxey hopes to accomplish more work of this type in the museum.

Museum Activities and Exhibits - continued

Casa Grande--A skeletal burial display, to be incorporated in the case designed to introduce the Pueblo, is being prepared. It will appear in situ.

Tuzigoot--The pottery chronology case was done over. The bottom and sides of the case were painted with a flat rubber-base paint, giving a pleasing background for the exhibit.

Research and Observation

Headquarters Staff--Two excellent papers were reviewed by Mr. Arnberger. One, a manuscript by Dr. Sherwin F. Wood entitled "Conenose Bug, (Triatoma,) Occurrence and Annoyance in the Southwestern National Monuments", resulted from Mr. Wood's study of kissing bugs sent to him by our field personnel. This paper will soon be published in one of the technical journals. The other paper, "Geology of the Verde Valley" by Park Ranger Myron Sutton of Montezuma Well is an excellent one. Copies were requested for distribution to the Regional and Washington Offices!

Great Sand Dunes--Plant specimens returned with identifications from the Museum at the University of Colorado were all catalogued on herbarium file cards. The herbarium now contains 303 specimens and the total of known species in the monument is 258.

The cloud picture photography project which Mr. Bean has been conducting for General Electric Company is proving a success and eight more magazines of Kodachrome were sent to him. A letter from Dr. Schaeffer of General Electric states that the series of time lapse movies showing shadow changes on the dunes was excellent. Copies of this series will be furnished the monument in the near future.

Montezuma Castle--The monument insect collection was taken to the Arizona State College for identification. Identification according to family only can be made there -- for complete nomenclature the collection must be submitted to the U. S. National Museum. Three new birds were recorded at the Well: American Pipit, Northern Sage Sparrow, and Green-winged Teal.

Organ Pipe Cactus--It has been determined that the common Staghor-type cactus in the area is a new species. Visitors have reported seeing bands of peccaries numbering more than 30, and also as many as eight antelope at one time.

Loan Library

Accessions totaled 150, including 20 books, 41 periodicals and 89 separates.

A complete set of quadrangle maps on Arizona, New Mexico, Colorado and Utah has been received and will make an extremely valuable addition to the library.

A memorandum listing new books for the library was sent to the field and field personnel are urged to make the fullest use possible of our library facilities.

Southwestern Monuments Association

Probably for the first time all inventory warehouse control cards were checked against the monument and headquarters inventory warehouse cards. Considering the period of time posting has been done on these cards and the number of persons doing it, there were remarkably few changes.

Several valuable manuscripts which had been kept in the vault in the Regional Office were brought to Globe by Mr. Tom Varela.

Ruins Stabilization

Archeologist Vivian left Chaco Canyon on February 3 for Santa Fe where he was on duty all month working on the archeological report for House A, Gran Quivira. Mr. Richert remained at Chaco working on a backlog of reports and materials covering projects in the 1952 fiscal year.

Travel

While many areas continued to report large increases in travel over the corresponding period of last year, the over-all percentage increase was only five per cent. The early part of the month showed heavy visitation and the prospects for another record travel month were favorable. However, the weather played tricks and the latter part of the month was not conducive to travel.

Visitors

Headquarters Office--Dr. Emil Haury accompanied by Dr. Linton, noted anthropologist from Yale University; Park Naturalist Beatty, Glacier; and the following Region Three NPS employees -- Mr. and Mrs. Tom Varela; Ranger Zerbey, his father and mother, Mrs. Zerbey and Mrs. Wendell Bryce, Saguaro; Superintendent Wilson, Arches; Superintendent Sharp and Archeologist Wenger, Tonto; Ranger Barrel, Chiricahua; Clerk Viklund, Bandelier; Superintendent Cooke, Chiricahua; also, Superintendent and Mrs. Bryant, Grand Canyon.

Aztec Ruins--Ulrich R. Beeson, former director of education in New Mexico; Jack Williams, who has worked in a number of SWNMS.

Bandelier--Among visitors were Chrise Du Moire', Vienna, Austria; Wing Long Suzz, China; Mrs. Donald Nelson and Donna Nelson, Anchorage, Alaska; Mr. and Mrs. E. D. Arnold, Calgary, Canada.

~~Admission~~ Casa Grande--Dr. and Mrs. Emil Haury with Dr. and Mrs. Ralph Linton of Yale University; Dr. and Mrs. H. C. Bryant, Grand Canyon; Mr. Dan R. Hull; 30 New Yorkers, members of the Empire State Club; 35 fourth graders from Eloy.

Chiricahua--Mr. and Mrs. John D. Rockefeller, Jr. for a four-hour visit. The Rockefellers were pleased with the scenery and complimented the personnel on the upkeep of the area; Mr. and Mrs. James Conner, retired Forest Supervisor from South Dakota and Wyoming.

Montezuma Castle--Mr. and Mrs. Devereux Butcher.

Organ Pipe Cactus--Mr. and Mrs. Devereux Butcher, who were taking pictures and gathering material for an article.

El Morro--Some interesting visitors to El Morro during February were: Mr. Jeff Greer, Assistant to Gutzon Borglum when he was carving Mount Rushmore; Mr. C. H. Sternberg, retired curator of paleontology at the Canadian National Museum; and the editor of the Gallup Independent, who spent all of one Sunday afternoon on the area and was very much impressed by it.

Great Sand Dunes--Mr. G. VanLuren, Assistant Supervisor of the Rio Grande National Forest and family.

Saguaro--Dr. and Mrs. Charles Russell, Truro, Mass. -- a staff member of the American Museum of Natural History; Robert Bennett, Entomologist, Bureau of Entomology and Plant Quarantine, Albuquerque, N. M.; Mr. and Mrs. Earl S. Eddins, West Covina, California - Mr. Eddins was an early NPS employee and is a friend of Assistant Director Allen; Mr. Gerhart A. Gilbert, Mayor of Watertown, S. D.

Visitors - continued

Tonto--Mr. and Mrs. Bill Wright, Clarkdale, Arizona; Mr. Carl Eyring, Salt River Power District, Phoenix.

Tumacacori--W. P. Yeager, Border Patrol Chief for Arizona, accompanied by the Immigration Department Chief from Thailand; Mr. Gene Hunter, St. Louis-Post Dispatch, who took many pictures of the museum and of the old church; Ted Sayles, Director of the Arizona State Museum, and Dr. Marie Wormington, Denver Museum of Natural History.

Tuzigoot--Mr. Freeman Tilden; Mr. and Mrs. Devereaux Butcher; swimming team from Gustavus Adolphus College, St. Peter, Minnesota.

White Sands--Father Victor Stoner; David H. Rowland and family, Rocky Mountain; Assistant Superintendent Evans and Mrs. Evans, en route to Big Bend.

Wildlife Management

Headquarters Staff--The following problems concerned with wildlife management were handled by the headquarters staff:

A memorandum from Fandelier urging the stocking of beaver and big horn in that area was forwarded, with our comments, to the Region Three Office.

A memorandum was received from the Regional Office authorizing the Superintendent of Saguaro to appoint monument personnel to the job of tracking down and killing so-called "killer" lions within the monument. This authority came as the result of recent complaints of stockmen and sportsmen in the vicinity that predators were harbored within the area.

Forest Fire Control

Saguaro--A major revision of the Saguaro fire plan was undertaken by Park Ranger Zerbey. Changes were made in the text and in the step-up plan. The revised text was received in the S.M.S. office and forwarded to the Regional Director for final approval.

Insect and Tree Diseases

Fandelier--An inspection of insect damage to trees in this area revealed that a number of trees are being killed, but it was the consensus that the damage is not sufficient to warrant control at present. The situation will be watched closely this summer, and if there is a continued increase, some control measures may be necessary later.

Accidents

Chiricahua--Maintenance man Marble suffered a slight rupture while moving a light plant.

Tumacacori--Maintenance man Deubler suffered a painful injury when he slipped and fell at the base of the flagpole. X-rays revealed that no bones were broken, but he was ordered to stay in bed for a few days and then report for another checkup.

Personnel

Headquarters Office--Mrs. Inez Townsley reported for duty as Clerk-Typist in the Naturalist's office on February 16.

Aztec Ruins--Superintendent Homer Hastings of Chaco Canyon was assigned to temporary duty as Acting Superintendent pending the return of Mr. Townsend, who is on extended sick leave.

Personnel - continued

Tumacacori--Park Ranger William L. Featherstone's last day of duty was January 26. Park Ranger Wm. C. Bullard, Jr. arrived on the 27th of January to fill the vacancy created by Mr. Featherstone's transfer to White Sands.

Local Items

Chiricahua--Justice of the Supreme Court William O. Douglas, assisted by Lion Hunter Glen, did some lion hunting close to the north boundary of the monument. He succeeded in bagging a 146-pound lion.

Gran Quivira--The superintendent regretfully reported the death of Mr. W. H. Smith, Gran Quivira's first custodian, who started work in 1923, at one dollar a day. Mr. Smith was buried at Roundtop, ten miles north of the monument.

Tumacacori--Times change, even at Tumacacori, as evidenced by Mr. Jackson's "Footnote to History" --

"Written history for Tumacacori begins with Father Kino's first visit, in 1691.

"Tumacacori hasn't had a mayor since 1848.

"Tumacacori is leisurely. It only took 155 years of European civilization to obtain us a post office."

"Tumacacori, after 262 years of European civilization, now has Television, at the Tumacacori Bar, across the road from the national monument."

Poem of the Month

We believe many of our superintendents will find a chuckle or two in the following poem, submitted by Superintendent Cook of Montezuma Castle:

A Pause in a "Daze" Occupation

From my observations--if qualifications could be met--
I wouldn't be a monument superintendent for half the national debt.
He must be an interpreter, a statistician, and financier,
A lawyer, and administrator, and a consulting engineer.
He must be a civic leader, and a diplomat with finesse
to deal with employees, public, the officials, and the press.

There's a constant changing manual, referred to as "Park Law"
He must read, and know, and interpret without a single flaw.
Budgets, bids, finances--to keep the public wise
The monuments reverse the slogan--"They pay to advertise."

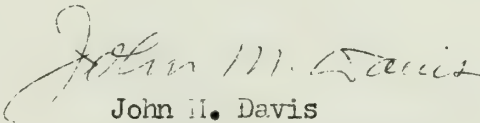

He must make a yearly budget to meet area needs
And if, like most all budgets, the income it exceeds,
Then revision is the order, and expenses he must pare
For he hasn't found the secret--to pluck money from thin air.

He can't plan for just the present but must future needs foresee
And trends in travel, and the visitors there may be.
If museums are overcrowded and bulging at the seams
He can't put kids on hatracks or hang parents from the beams.

He needs courage of his convictions his objectives to attain
And a sense of humor, to relieve terrific strain.
But if he's Park Service minded, and that work is his intent
He must travel through "Endeavor" to arrive at "Heart's Content."

And though his patience oft-times undergoes severest test,
His sense of values shattered when he can't achieve the best,
Of one thing I am certain, and I think you will agree,
A superintendent never suffers from what folks call "ennui."

No, the above isn't original, but has been changed slightly to
make it applicable.

John H. Davis

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
ARCHES NATIONAL MONUMENT
MOAB, UTAH

February 24, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Arches National Monument
Subject: Monthly Narrative Report for the Month of February, 1953

WEATHER: Extremely mild weather and warm sunny days prevailed throughout most of the month. There were two light snows and the latest big storm consisted of nothing but cold wind.

TRAVEL: A total of 640 people entered the area in 200 cars, an increase of 236% over the same period last year.

INTERPRETIVE SERVICE: 30 contacts were made at headquarters and most of these over the three day holiday. 195 people signed the registrar at the Wayside Exhibit.

TRAILS: Since we have the Schramm tractor which was obtained from Tonto, construction of the new Delicate Arch trail is well underway. Mr. Carl Alleman of the Regional Office revised the final approach of the trail when he was here February 13 - 17.

GENERAL: In our spare time we are constructing a loading platform in the utility yard.

ADMINISTRATION: Superintendent Wilson went to Tonto National Monument to pick up the Schramm tractor and enroute stopped at the SWM Headquarters at Globe to transact monument business. Also, a trip was made to Grand Junction for supplies and a 1 1/2 KW light plant that was overhauled. It will have to be returned and rechecked since it does not operate properly.

MAINTENANCE: A new oil per and pump was installed on the Schramm tractor. The oil pressure is now constant regardless of the grade the tractor is operated on.

SIGNS: The new signs are nearly completed. Some have been set up at the beginning of Courthouse Towers trail.

N.P.S. VISITORS: Carl Alleman, Region III Office, February 13, 14, 16 and 17.

PERSONNEL: Sup't. Wilson and family are visiting friends and relatives in New Mexico. He is on annual leave from February 16 to March 3.

SPECIAL AGENT IN CHARGE
WASHINGTON, D. C.

February 22, 1934

Memorandum

To: Chief of Bureau

From: Acting Superintendent, Grand National Monument

Subject: Grand National Monument, for the purpose of securing

information regarding the monument and the lands within its boundaries. The monument is located in the State of Nevada, and the lands within its boundaries are of great value to the people of the State.

It is requested that you cause the necessary information to be secured and reported to the Bureau as soon as possible.

Very truly yours,
Special Agent in Charge

Enclosed for the Bureau are two copies of the report of the Acting Superintendent of the Grand National Monument, dated February 18, 1934.

AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 February 1963

Memorandum

To: General Superintendent

From: Acting Superintendent Aztec Ruins

Subject: Report 1ml, Superintendent's monthly Narrative

WEATHER: The first of the month was warm and spring-like but toward the last of the month the cold wind spoiled the illusion. We have had only a trace of precipitation during the month. The low temperature for the month was 7 degrees and the high a pleasant 63 degrees.

OFFICIAL VISITORS: James F. Carpenter, and Kenneth E. Saunders of the Region Three Office stopped in February 12 and looked over the Superintendents residence.

MAINTENANCE: We have started work to put our restrooms in better shape for the coming season. All the cracks in the plaster have been patched and the walls prepared for painting. The job of painting the mens room is about half done and promises to look cleaner than it has for several years.

Scrap lumber was gathered up and made into quite a presentable picnic table. We hope this will encourage our visitors who bring their lunch to leave their trash in the barrel provided instead of scattered over the parking area.

COOPERATION: The State Tourist Bureau is replacing their informative sign on Aztec Ruins at the intersection of our turnoff and the main highway. Cars and trucks ran into the previous sign at least three times during the past year so we surely hope the new sign fares a little better.

ACQUISITIONS: A Mr. A. C. Pappy of Vernal Utah has donated a bundle of 21 ceremonial sticks to the museum. He states that they were found about 8 miles from Aztec Ruins along with some pottery. They are very well preserved and would make an interesting display if we can get an authority to verify their pueblo origin and use.

INTERPRETIVE SERVICE: We conducted 303 people in 130 parties through the ruins and had 35 people in 23 parties tour the

Museum and then take a quick look at the ruin.

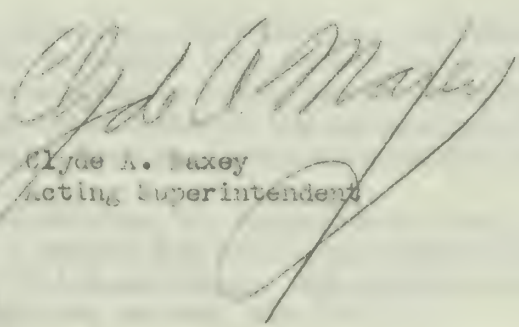

Our 16mm. film on The Southwestern National Monuments was shown to the Blanco Grade School the 19th. of February and to the San Juan County 44 Club the 20th. An illustrated lecture about the missions of Arizona and Northern Mexico was given to the San Juan County Knights of Columbus the 8th. of February.

MUSEUM ACTIVITIES AND EXHIBITS: We have completed the lettering and installation of material in the first exhibit case. The lettered material was all brought out to the front of the case and tilted to a comfortable reading angle for even bi-focals we hope. Shades to stop the glare of the fluorescent lamps were made and one installed in the first case. Would certainly like to get more of this sort of work done on the museum since a clear attractive museum story is one of our best aids in interpretation.

INCREASE IN TRAVEL: Travel continues to increase. During the month of February we had 38% more visitors than we had during the same period in 1952. In checking over our past records I find an even more startling increase in the money we have remitted for ticket sales. In comparing the same period this year with 1952 we have remitted 75% more money than in 1952.

VISITORS: Ulrich R. Beeson former state director of education visited the area February 9. Jack Williams who has worked in many of the southwestern areas stopped by to say hello the 18th.

PERSONNEL: After being alone here for the past three months it is with a good deal of enthusiasm that we receive the news that Superintendent Homer Hastings from Chaco Canyon will be temporarily assigned to this area. With the ever increasing visitation it will be good to have an experienced hand in the saddle for the next few months. Superintendent Irving D. Townsend is still on extended sick leave.

Clyde A. Maxey
Acting Superintendent

March 1, 1953

Memorandum

To: General Superintendent

From: Superintendent, Bandelier

Subject: Monthly Narrative Report, February 1953

Weather

The mild weather that prevailed all during ~~February~~^{January} was interrupted by 8.8 inches of snow on February 9 and 10. Generally cold weather lasted through the balance of the month. A total of 12.8 inches of snow was received that contained 9.4 inches of moisture.

Temperatures reached a maximum of 64 degrees on the 3rd and 4th and dropped to 2 degrees below zero on the 22nd.

Special Activities

A staff meeting was held on the third of February with all employees attending. Attention to visitors, safety in handling storage batteries, and improvement of campground were discussed.

Four in-service training meetings were held this month for the discussion of tort claims, concessions, clerical duties, and health and safety. The discussion on tort claims was conducted by Regional Counsel Barton and it proved to be very interesting and instructive.

Canyon Ball Trailways, Inc., Albuquerque, New Mexico plan to establish regular tours to Bandelier this summer and an exploratory run was made on the 16th. Twenty eight people including tourist court operators, representatives of the Albuquerque Chamber of Commerce, and the New Mexico Tourist Bureau were on the tour.

A request was received from Mr. Millhouse at Los Alamos for permission to construct a corral and stable privately owned horses in the Otowi section of the Monument. The regulations were explained to Mr. Millhouse and the request was denied.

The A.E.C. was requested to remove a section of woven wire fence in the Otowi section that has been abandoned and now serves no useful purpose. The fence is located at the old main gate.

General Publicity

The New Mexico Tourist Bureau is preparing a number of advertisements, that will appear in leading magazines, that features points of interest in New Mexico. Sandelier will be included in most of them.

Maintenance

Six new canales were constructed to replace those that have rotted out on several of the buildings.

A new telephone line was constructed to the quarters at the corral to provide communication with the saddle horse concessioner.

Radio communication with Southwestern Monuments headquarters at Globe, Arizona has been very poor and a new vertical aerial was installed in an attempt to improve reception. It has not proven to be very satisfactory so far and it will probably be necessary to make further changes.

A new dispensing stand for trail leaflets was constructed to be installed on the trail to Tsankawi ruin.

Interpretive Service

A total of 473 visitors were conducted on 54 tours of the ruins.

The Superintendent gave a talk on "Vanishing Wildlife" to 18 members of the Los Alamos Outdoors Association on the 26th.

A good many Los Alamos residents hiked to the falls in lower Frijoles Canyon following some publicity given to the hike by the Los Alamos Outdoors Association.

The preliminary draft of a new leaflet for the trail to Tsankawi ruins was prepared and sent to headquarters for review.

Concessions

Discussions were held with two interested parties on the operation of the Lodge dining room for the coming season. No decision has been reached yet as to whether the operator from last year will be allowed to return or not and therefore no definite commitment can be made at this time. The people who are interested are Mr. and Mrs. J. C. Spates who operate the school cafeteria at Los Alamos and Mrs. Leverton who manages the sandwich shop at the La Madera ski run near Albuquerque.

Travel

The cold weather during the latter part of the month caused a slight decrease in the travel with 1404 visitors as compared with 1464 for February last year.

General Information

The New South Wales Government is responsible for the management of the State's resources. It is the duty of the Government to ensure that the State's resources are used in a way that is consistent with the interests of the State as a whole.

Visitors

Visitors to Bandelier this month included:

Chris Du Moire', Vienna Austria
Mrs. Donald Nelson and Donna Nelson, Anchorage, Alaska
Arne Michaelsen, Anchorage, Alaska
Mr. and Mrs. E. D. Arnold, Calgary, Canada
Wing Long Suzz, China

Insect and Tree Diseases

The Superintendent attended a meeting at Los Alamos with Messrs. Bliss, Freeman and Hines, A.E.C. representatives and Messrs. Bomberg and Bennett from the Bureau of Entomology office, Albuquerque New Mexico to inspect the damage being done to trees by insects. An inspection was also made of the Otowi section of the Monument. Following this inspection Regional Forester Carlson and Forester Hatchiff made a detailed inspection of the Otowi section with the Superintendent and Supervisory Ranger. It was the consensus of opinion that although there are a number of trees being killed by insects that it is not sufficient to warrant control at present. The situation will have to be watched closely this summer and if there is a continued increase some control measures may be advisable next year.

Fred W. Binnewies

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

February 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Canyon de Chelly

Subject: Monthly Narrative Report for February, 1953

Travel: 86 visitors in 35 cars for February. This is about 26% over travel for the same period last year. Also, travel for the current calendar year is approx. 112% over 1952. Guide and contact work totaled 14 hours.

Weather: Frequent snow storms during the last half of the month and all nights stayed well below the freezing mark. High-low temperatures ranged from 68 to 0.

Roads: Passable but very muddy and slow at times. Due to heavy snow conditions the Saw Mill approach road, however, will not be open for at least two or three months. Monument roads are in good shape.

Trails: Five days of surfacing work was done on the White House trail. This trail is now in good condition.

N.F.S. Visitors: John Davis, Avril Koehler, and Coll. Freeman Tilden on February 12.

Soil & Moisture: 2500 pounds of various types of grass seed arrived during the month. This was picked up in Gallup and brought to Chinle for storage. Spring planting of this seed will be accomplished as soon as weather and soil conditions permit.

Maintenance: New National Park Service identification decals have been placed, with the original Department of the Interior decals, on all automotive equipment.

The road grader was overhauled and is now in good operating condition for spring and summer road work.

Also, a general cleanup continued around monument headquarters as time permitted.

REPORT OF THE COMMISSIONER OF THE GENERAL LAND OFFICE
TO THE SECRETARY OF THE INTERIOR

February 24, 1892

Washington

Dear Sir:

I have the honor to acknowledge the receipt of your letter of the 17th inst.

and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

I am, Sir, very respectfully,
Your obedient servant,
C. D. Loomis, Commissioner.

Very truly yours,
C. D. Loomis, Commissioner.

I am, Sir, very respectfully,
Your obedient servant,
C. D. Loomis, Commissioner.

Con't. from page 1.

Administration: On February 12 a trip was made to Window Rock with Mr. Davis, Mr. Koehler of the Region Three Office, and Mr. McSparron, operator of the Thunderbird Ranch. While at Window Rock we held a meeting with representatives from the Bureau of Indian Affairs, and members from the Navajo Tribal Council to discuss the future status of the McSparron concession contract in relation to the ownership of the land and buildings on which concession buildings are located.

Memorandum

To; The General Superintendent
Southwestern National Monuments,
National Park Service,
Tucson Arizona,

From; Homer J. Farr, Acting Superintendent
Capulin Mountain National Monument

Subject; Monthly Narrative Report;

VISITORS It is estimated that about Three hundred visitors this month, Extremely high winds and cold weather has prevailed most of the month, This makes a total of four thousand two hundred twenty five from October 1, 1952 to date and Twenty four thousand and seventy five for the fiscal year to date.

WEATHER

For the month has been one of the meanest for many months, Cold, cloudy not much snow but very disagreeable and windy, about three inches of snow thru the month,

Flora and Fauna

I have been unable to determine any material change in this since last month, All are doing alright,

Roads

Have been neglected thru the month and very little except some rock picking has been done,

Information pamphlets,

Ten have been mailed upon request and about fifty handed out,

Sincerely

Homer J. Farr,
Actg Superintendent,

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

February 25, 1953

MEMORANDUM

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for February, 1953

General: Weatherwise, Casa Grande has experienced all of southern Arizona's February moods. There have been dust storms, rain, high winds, freezing, and sunshine. Although there have been many pleasant days, it has been on the whole an unpleasant month, and is so reflected in our travel.

Most of the month has seen the highway bordering the monument under repair. The monument entrance has, at times, been very inconvenient to enter. During the better part of one day all south-bound traffic was shuttled right on by. This factor, combined with the weather, seems to account for the slight decrease in our travel as compared to last year.

Weather: .23 inches of rain fell on February 24. High temperature this month (reached several times) was 80 degrees, low 16 degrees. There have been two dust storms, and several days of high winds.

Interpretive Service: During the month 6,916 visitors arrived at Casa Grande. 4,263 of this population visited the ruin in 230 guided trips.

<u>Visitor Summary:</u>	<u>1953</u>	<u>1952</u>
February	6,916	7,263
Decrease	347	

Noteworthy Visitors:

January 29⁷ Dr. and Mrs. Emil Haury, with Dr. and Mrs. Ralph Linton (now of Yale) visited the monument, Dr. Linton

CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

February 25, 1923

MEMORANDUM

To: General Superintendent, NM

From: Superintendent, Casa Grande

Subject: Monthly Protective Report for February, 1923

During the month of February, 1923, there has been no unusual all night watches. The weather has been mild and clear, with little or no wind. There have been no fires, and no unusual signs of life. It has been as the whole as usual, and it is estimated to be about the same.

One of the main things that has been happening during the month of February, 1923, is the amount of work that has been done. The amount of work that has been done is about the same as last month, and it is estimated to be about the same for the next month. The amount of work that has been done is about the same as last month, and it is estimated to be about the same for the next month.

February 25, 1923. By: [Signature] Special Agent in Charge, NM

for the first time.

Opportunity was taken of Dr. Haury's visit to make preliminary arrangements for someday visiting the university and transferring their survey and site data to files of our own. It would be of great value to have such data on file here, particularly of sites in the area. Local visitors often report sites, for example, and we have no way of determining if those sites have received archeological attention.

Dr. Linton, who has been working in the "culture-personality" field for some time now (a far cry from his excavation of Pit House A at Mesa Verde, the first such to have been excavated), indicated having enjoyed Mr. Jewell's paper on a "Psychotic" Navaho which appeared in Human Organization last summer.

February 1 Approximately thirty New Yorkers of the Empire State Club.

February 6 Dr. and Mrs. H. C. Bryant from Grand Canyon. Thirty-five fourth graders from Eloy.

February 15 Engineer Moran (see Administration)

February 17 Archeologist Onstott.
The Superintendent renewed an old acquaintance from Yellowstone, Mr. Dan R. Hull. Now of 2136 California Street, San Francisco, California, Mr. Hull was the first landscape architect, and is a long time friend of our Regional Director.

February 18 Forty fourth-graders from Picacho.

February 22 Mr. Francis Cassidy, seasonal ranger at Mesa Verde, and a pipe line archeologist.

February 24 Mr. Dennis Murray (seasonal at Carlsbad, Montezuma Castle, and Casa Grande) and his sister.
Mr. and Mrs. Douglass H. Hubbard, Naturalist from Yosemite.

Administration and Protection: Thirteen requests for information were received.

The Adamsville was visited twice, and is undisturbed.

Engineer Moran, examining Casa Grande roads, recommended

On the 1st of May, 1900, the first of the
series of lectures was given by Mr. J. H. Paine,
of the University of California, on the subject
of "The History of the United States from
1776 to 1876." The lecture was well
attended and the speaker was highly
appreciated.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

that the cracks be filled. The highway department will advise us sometime this week if they shall be able to do this.

A Pima Indian, one of several who visits the maid for the Johnston family (the residents of our extra house), apparently drunk, rammed his car into some of the guard rails of the residential parking area. They were torn up and broken, with several bits of automobile scattered about. He has been told not to bring his car onto the monument, and will be required to pay for the repair of the parking area.

Museum: Work is being pursued at odd moments on the preparation of a skeletal burial display. This will be incorporated in the exhibit case designed to introduce the Pueblo. It will appear in situ.

Work continues in replacing olde and faded labels.

Public Relations: February 4 Mr. Jewell gave a slide lecture to the local Lions Club. This is a lecture which endeavors to give a thumbnail two thousand pre-history of southwestern Indians (the latter two thousand, of course) if it shapes up it will be presented to SWNM for general distribution.

Maintenance: In addition to routine, the road and sewer fields were dragged, another section of ocotillo fencing was planted, finishing that project, and all roofs were inspected for leaks.

Personnel: Mr. Severo was unhappily obliged to take three days off for a trip to Lordsburg. It was a funeral of a relative.

Promotion comes rapidly to Mr. Jewell in the Scouts; he is now the Explorer Adviser of the only such Unit in Coolidge.

Mr. Jewell has been giving some talks on the anthropological aspects of juvenile delinquency to the criminology class at Arizona State College, Tempe.

Although some family members are still ill with the flu, and accept for some hoarseness during the dust storms, all staff members are in good health.

A. T. Bicknell

and the agency is still. The agency department will receive the
information this week in the form of a letter.

A plan to bring the two agencies into closer contact has been
developed. This involves the exchange of information and the
establishment of a joint committee to study the problems of the
two agencies. This committee will be composed of representatives
of both agencies and will be charged with the task of making
recommendations to the two agencies on the basis of the results of
its study.

The committee will be organized as soon as possible and will
begin its work immediately. It will be held in the
office of the director of the agency and will be held on a
regular basis.

Chaco Canyon National Monument
Bloomfield, New Mexico

February 26, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for February, 1953

Weather The recorded high for the month was 64 on the fourth and the low was minus 4 on the nights of the 21st and 22nd. Most of the month the weather was fair with high winds and the average temperature was again in the forties. Since last report there have been seven snows totaling a depth of approximately 19 inches and with a moisture content of 65 hundredths of an inch.

Travel This month travel exceeded the previous high by nearly 50%. This is an all time high for Chaco Canyon for the month of February. There were 96 people in 29 cars. The previous high was 65 people in 23 cars for this period of last year.

Administration The superintendent spent some time going over the allotment ledger sheets in order to get them straightened out, and much time was spent on general office work.

One trip was made to Gallup to try to get telephone service and to pick up supplies from the General Services Warehouse.

General The line which provides water for the new residences had to be thawed out twice this month despite attempts to keep this line from freezing. After each pumping the line was presumably drained but still froze. A larger drain line was installed and it is hoped that this will help to keep the line open. Nothing more has been done at present due to lack of help and the weather conditions. We sincerely hope that this trouble can be alleviated this spring or summer so that next winter the personnel may have water without having to thaw out the line every time that the well is pumped.

Radio contact was established with Globe on the 4th, but due to interference from Mexican stations it is very hard to read them.

It seems that Chaco is going modern. We now have a dial telephone system which works all twenty four hours; except when the line is down. Before, the operator was in Crownpoint and had the normal 40 hour week, so that telephone service was 8 to 12 and 1 to 5 on weekdays with none on weekends or holidays. There was about a week before the swap over to dial when the monument was without telephone service; one of the linemen had forgotten to replace a fuse.

A trip was made to Durango to take the standby power plant from the new residences. It needed an overhaul and since then operates very good.

Requested pictures for stabilization justification were taken. These pictures show several of the major ruins during snow conditions.

Roads and Trails The main road through the monument was graded twice during the month by the Indian Service and the north approach road again graded by the county. This should set some kind of a record. Despite this attention however, the roads are back in poor condition due to recent snows. The S&MC tractor was operated five hours during the month in an effort to remove some of the debris left by the Indian Service operators.

Maintenance Routine maintenance was kept up during the month.

Protection A number of man hours were spent driving out stock. Something over 80 head of cattle were run off the south three sections and numerous horses from the same area and from the canyon proper.

Three days were spent in checking and repairing parts of the boundary fence. Twenty two of the forty miles of fence were patrolled and mended. In this distance an estimated 50 breaks, cuts, and pushed down places were repaired. The west boundary had the larger number due, no doubt, to the fact that it abutts Navajo lands. A large part of this side of the monument is hard to patrol because it is inaccessible by truck.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Weeds were burned along the fence in the south gap. This fence catches about all of the loose tumbleweeds in that area and then sand piles up in them. In some places stock could walk over the fence due to the excessive depth of the sand. There are several places remaining along the fence in the southwest sections of the monument where the same conditions prevail. These will be taken care of as soon as possible.

While patrolling fence a trip was taken to Kin Biniola and this section of the monument was found to be in good order.

Personnel. Superintendent Hastings was transferred to Aztec Ruins on a temporary assignment to take the place of Superintendent Townsend who is on extended sick leave. He moved on the 24th.

Robbery. On the 9th the Chaco Canyon Trading Post was entered and robbed. Superintendent Hastings, after a plea from the Navajo who was supposedly watching the place, went up to look over the post in order to report the happening to the owner. While he was inspecting it the family of the culprit drove up. They said that it had been their 14 year old son and that he was very sorry that he had broken in and wanted to return the stolen material. At present writing nothing has been heard about the outcome.

Dear Sir:
Reference is made to your letter of the 10th instant, in which you request information regarding the National Park Service's policy regarding the use of motor vehicles in the parks. The National Park Service's policy regarding the use of motor vehicles in the parks is as follows:

1. The National Park Service's policy regarding the use of motor vehicles in the parks is to encourage the use of public transportation, where available, and to discourage the use of private motor vehicles.

2. The National Park Service's policy regarding the use of motor vehicles in the parks is to encourage the use of bicycles, where appropriate, and to discourage the use of motor vehicles.

3. The National Park Service's policy regarding the use of motor vehicles in the parks is to encourage the use of horse-drawn carriages, where appropriate, and to discourage the use of motor vehicles.

Chiricahua National Monument
Dos Cabezas, Arizona

February 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Chiricahua

Subject: Superintendent's Monthly Narrative Report

General. The flu slowed the Chiricahua force down a little this month. The superintendent took 5 days sick leave, the ranger two days and the maintenance man two days. All seem to be recovered at the present time. The superintendent took four days annual leave, during which time he visited the new home of the SWM in the Gila Pueblo.

Weather. Weather on the whole has been too dry this winter. It snowed twice since last report. Yesterdays snow of four inches was quite general and undoubtedly kept some visitors away. A trail was broken to Nassai Point with the dump truck and several cars got through to see the scenery. One car got stuck and had to be pulled out by the superintendent, with the dump truck. Our chief complaint has been raw cold winds during the past ten days.

Inspections. Mr. and Mrs. Hugh Miller paid the monument a visit on January 26. With Superintendent Cooke they went to Cave Creek and called on the Weldon Healds. The recent land proposals were discussed and all seems to be quieting down at present.

Engineer Marsh and Mr. Arnbreyer spent some time at Chiricahua on February 9 and 10, and helped lay out an extension to the Natural history trail at Nassai Point.

Approaches to Monument. All approach roads remain in about the usual condition except the one over the mountain from Rodeo and Portal. This road has been closed by snow for the past two weeks and it looks like it would be another two weeks before it will be passable.

Interpretive Service. Don Boileau gave a lantern slide talk to a school group of 41. Superintendent Cooke gave the Chiricahua lantern slide talk to 28 guests at the Gadsden Hotel. Two conducted trips were made with a total of 11 visitors. 1446 visitors were contacted in the museum in 408 parties. 21 visitors made use of the

THE UNIVERSITY OF CHICAGO

THE UNIVERSITY OF CHICAGO

February 27, 1933

Dear Sir:

Very respectfully,

Very respectfully,

Very respectfully,

Enclosed for the Library of the University of Chicago are two copies of the report of the Committee on the Administration of the University of Chicago, dated January 1, 1933. The report is a summary of the work of the Committee during the past year, and is intended to be a guide to the University in its future development.

The report is divided into two parts. The first part is a general statement of the work of the Committee, and the second part is a detailed statement of the work of the various committees and sub-committees. The report is a valuable document, and it is hoped that it will be of great use to the University.

Very respectfully,
The University of Chicago

Foothill Forest Natural History Trail, and an estimated 75 made use of the Massai Point Natural History Trail.

Inquiries about the area are on the increase. 13 were answered during the month.

Travel. 1748 visitors came to Chiricahua this month. This is a loss of 213 from February of 1952, but still leaves us a net gain of 90 for the calendar year. The only thing we can think of to blame the loss of travel to is the flu epidemic.

Visitors. Mr. and Mrs John D. Rockefeller, Jr. spent about four hours on the monument on February 17. They seemed pleased with the scenery and complimented us on the upkeep of the area.

Mr. James Conner, retired Forest Supervisor from South Dakota and Wyoming, and Mrs. Conner called on the Cooke and spent a day on the monument.

Justice of the Supreme Court William O. Douglas did not visit Chiricahua but he did go on a mountain lion hunt embarrassingly close to our north boundary. Assisted by lion hunter Glen and dogs Mr. Douglas succeeded in bagging a 146 lb. lion. We believe and hope that they did not get on the monument during the chase.

Accidents. Maintenance Man Marble suffered a slight rupture while moving a light plant this week. Doctor thinks an operation will not be necessary.

Clair V. Cooke
Superintendent

NATIONAL PARK SERVICE

~~Tumacacori National Monument~~

~~Tumacacori, Arizona~~

CURV

February 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments

From: Superintendent, Tumacacori

Subject: Monthly Narrative Report for Coronado National Memorial for February, 1953

This, the first monthly report for Coronado National Memorial, assumes its place as one of the punctuation marks in that fabulous history that was started when Coronado's forces plodded their dusty way northward, more than four centuries ago.

The first routine inspection from this station was made on February 7, 1953. The trip was made via Nogales, Patagonia, Sonoita, Elgin, Canelo, Lochiel, then eastward to Montezuma Pass. Return was by Canelo, Elgin, Sonoita, Patagonia, and the river road cut-off to Tumacacori.

Of several possible routes, the most logical dry-weather route, for short mileage, is from Tumacacori via River Road, Patagonia, Little Outfit ranch, Canelo, Montezuma Pass (83 miles), with a return over the route through Fry, Sonoita, Patagonia, River Road to Tumacacori, 96 miles.

Coronado National Memorial area, although not clearly defined in boundary yet, because survey is pending, takes in about 4 $\frac{1}{2}$ square miles of land along the Mexican border at the extreme southern toe of the Huachuca Mountains, in pinon-juniper and upper grasslands terrain. A narrow, dirt road, with turn-outs, bladed and fairly well maintained, crosses the area from east to west, going over a high ridge at Montezuma Pass (elevation 6,500 feet). Here, at a wide turn-out spot, with ample room for parking, is a superb scenic lookout point. One can see for many miles into Mexico, on a clear day.

At the Pass I planted a sign, warning against destruction of natural features. Two larger name signs, made in Nogales, being ~~being~~ painted and lettered at Tumacacori, will be planted at the approaches to the pass, on the next trip.

Two and three tenths miles east of the pass I attempted to contact Miss Grace Sparkes, who is chairman of the Sisbee Chamber of Commerce's Committee on National Parks and Monuments, and who has actively pursued the objective of the Coronado National Memorial. She was absent.

It is a mail which is not only of the season, but also of the year. It is a mail which is not only of the season, but also of the year. It is a mail which is not only of the season, but also of the year.

Two miles farther down the east slope of the mountain, acquaintance was made with Frank Zaleski, a cattleman, long interested in the idea of a national memorial area. Zaleski was very hospitable, and offered free use of saddle horses to Park Service employees for getting acquainted with our new area.

The return trip was made back up over the pass and westward, to Pabelo. Here, where a morning attempt to locate him had been unsuccessful, I was able to find and meet District Ranger Bob Schmitt, of the Forest Service, in whose district Coronado National Memorial lies. Arrangement was made to be accompanied by him on the next inspection of the area.

On the next inspection trip, advance arrangement will also be made to contact Grace Sparkes, since it appears she is a very busy woman who cannot be caught on the fly. She was sent a letter of regret that I had failed to find her, and replied with a very cordial letter.

In general, Coronado National Memorial gives the appearance of a healthy vegetative area. Montezuma Pass offers a superb spot from which to have a nature trail, which could run along the ridge south of the pass to a low peak. It is not difficult to visualize a small museum at the pass, from which the trail could lead to an attractive trailside exhibit for the hardy visitors who wanted to make the climb and contemplate the vast panorama laid out to the west, south, and east, from the tip of the peak.

Earl Jackson
Superintendent

February 23, 1953

Memorandum

To: General Superintendent
 From: Superintendent, El Morro
 Subject: Monthly Narrative Report

This month, El Morro had 120 visitors who came in 37 automobiles. This is 10 per cent more than a year ago. 129 of these visitors took a trip around the Rock in 18 parties. 48 persons stayed around the stove and received an orientation talk. No one went over the top of the Rock - there is still too much snow.

The coldest this month was a minus 5 degrees and the warmest was 59 degrees Fahrenheit. It has been cold a good part of the month, but we only shoveled snow a few times.

The approach roads and the Monument road have remained in good shape throughout the month.

The new technician stopped by to tell us that he would be over to work on our radio in the near future, but that he has been busy getting acquainted with his own job so far. He will be on the air again before too long.

The editor of the Gallup Independent came out and spent all of one Sunday afternoon with us, and expects to be back again when the weather warms up. He was very much impressed with El Morro. Jeff Greer, assistant to Milton Borlum when he carved Court Rustmore, was in one evening. Mr. Greer also did a good deal of art work at Texas Western College. Mr. E. W. Sternberg, retired curator of paleontology at the Canadian National Museum, was in for a visit. All these were especially interested and interesting visitors.

In the way of maintenance, we accomplished several odd chores. One day, we hauled cinders and placed on the road. We erected two signs. In preparation for the coming travel season, we linseed oiled the register stand base, the bench, the supporting member, the front window and door frame and the front door of the office. Also, we gave one or more coats of linseed oil to the large entrance sign, seven other signs and miscellaneous objects. We stained the entrance sign and three other signs. DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Gran Quivira National Monument
Gran Quivira, New Mexico

February 25, 1933

Memorandum

To: General Superintendent
From: Superintendent, Gran Quivira
Subject: Monthly Narrative Report for February

Weather. This has been another forecaster's nightmare. Very pleasant weather occurred the first 10 days of the report period giving way to heavy snows, high winds and cold. Ten inches of snow was recorded on the 10th with high winds piling up drifts to 4 feet. Intermittent short snowfalls continued through the end of the month. Maximum temperature of 65 degrees was reached on the 5th, and a minimum of 4 degrees on the 12th.

Special Activities. The Superintendent met with ranchers and District Area Commissioners of the vicinity to discuss possible methods of improving Highway 10. A committee will meet with State Highway authorities at Santa Fe on the 26th to discuss the problem more fully.

Cooperation with the Red Cross Blood Program at Mountainair was extended by all monument personnel.

Unofficial trips were made to the two Quivira State Monuments to check on reported vandalism. No evidences were uncovered.

Local. We regret to report the death of Mr. F. J. Smith, former Custodian of the monument, who died at Alamogordo on February 1. Mr. Smith was Gran Quivira's first Custodian beginning work in 1923 at a salary of one dollar a day. The Superintendent expressed regrets from the Park Service and aided in funeral arrangements. Mr. Smith was buried at Mountainair, ten miles north of the monument.

Approach Roads. State Highway crews were extremely busy trying to keep the Mountainair road in passable condition during the storm period. The approach road from Carrizosa received no maintenance and was closed to travel for over a week.

the road would be of great benefit to the park and
to the people who visit it.

I am sure that the road would be of great benefit
to the park and to the people who visit it. I am
sure that the road would be of great benefit to the
park and to the people who visit it. I am sure that
the road would be of great benefit to the park and
to the people who visit it.

NPS Visitors. Archeologist E.O. Vivian was in on the 9th to pick up artifacts uncovered in last year's excavation. Mr. Vivian is in the process of correlating the findings of his last work here.

Maintenance. Three thousand gallons of water were hauled from Mountair to fill mountain cisterns. Water analysis reports were received recommending slight chlorination and this was accomplished.

Snow removal from roads and trails and minor repair to road culverts was also accomplished.

Travel. A slight decrease in travel was noted with 130 persons in 45 cars visiting this month as compared to 133 in 51 cars for last year. This decrease can be attributed to poor weather conditions. The Mountair Chamber of Commerce estimates that East-West travel through their city dropped 20 percent during February.

Interpretive Services. Guide service, information, and general interpretive service were provided all month to mount visitors. 42 persons in 20 parties used the self guide trail and the Superintendent guided 28 persons in 22 parties for an average of 25 minutes per party.

Maximum Temperature - 31° on February 11 and 12

Minimum Temperature - -2° on February 24

Precipitation - 2.44 in.

Ray B. Ringenbach
Superintendent

General Summary

A study was made of the work of the park during the month of February and a brief description of the work was given to the visitors in the visitor house of the park.

Work Done and Accomplished

A good deal of time was spent on the work of the park during the month of February. The work of the park was done in the following manner: The work of the park was done in the following manner: The work of the park was done in the following manner:

GREAT SAND DUNES NATIONAL MONUMENT

Alamosa, Colorado

February 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Great Sand Dunes

Subject: Superintendent's Narrative Report for February, 1953

Weather Conditions

Springlike weather for the first half of the month stimulated travel for a 162% increase over February of last year. Cold blizzard-like conditions then prevailed for the last part of the month. Concern about the lack of snow is felt throughout the San Luis Valley.

Maximum temperature - 51° on February 2 and 3

Minimum temperature - -8° on February 21

Precipitation - 0.14 inch (1.5 inch of snow)

General Publicity

A black and white picture of the Great Sand Dunes appeared in one article and a brief description of the dunes was given in another article in the winter issue of Colorado Wonderland magazine.

Maintenance and Rehabilitation

A great deal of time this month was spent painting. The walls of the dining room and ceiling and walls of the front bedroom were painted with rubber-base paint. The woodwork in the front bedroom was sanded and enameled. Much more time is required for preparation of the woodwork and walls than is required for the actual painting.

A linoleum top was installed on the counter around the kitchen sink.

Two loads of wood were hauled from the slash on the George White property.

The monument road was graded once but is becoming rougher due to lack of moisture. The two culverts from Armo in Denver were received.

THE UNITED STATES OF AMERICA

DEPARTMENT OF JUSTICE

Washington, D.C.

February 1, 1944

Mr. J. Edgar Hoover, Director

Federal Bureau of Investigation

Dear Sir:

Reference is made to your letter of January 27, 1944, in which you advised that you had received information from a confidential source that a certain individual was planning to travel to the United States for the purpose of conducting a certain activity.

Enclosed for your information are two copies of a letterhead memorandum dated and captioned as above, and one copy of a letterhead memorandum dated and captioned as above.

Very truly yours,

A copy of this letter is being furnished to the Bureau of Investigation for their information and for their use in the conduct of their investigation.

Very truly yours,

I am sure that you will find this information of interest and value in the conduct of your investigation.

Very truly yours,

Very truly yours,

The enclosed letterhead memorandum is being furnished to you for your information and for your use in the conduct of your investigation.

Approach Road

The entrance road is becoming rougher due to dry conditions.

Research and Observation

The plant specimens were returned with identifications from the University of Colorado Museum and have all been catalogued on herbarium file cards. Proper entries have also been made on the observation record cards. None of the plants have been mounted yet but I hope to do this during evenings in March.

Inventory of the herbarium made after cataloguing the returned specimens shows that we now have 303 specimens. A preliminary list of the vascular plants I made yesterday shows 232 species for which we have herbarium specimens. Several species for which we have reasonably certain field identifications raise the total of known species in the monument to 258. Copies of the check list are being sent to your office.

The cloud picture photography project we have been conducting for General Electric Company has evidently been a success for Dr. Schaeffer sent us eight more magazines of Kodachrome this month with a promise of more when these are exhausted. Dr. Schaeffer wrote that the series of time lapse movies showing shadow changes on the dunes was very good. General Electric will furnish us copies of this series in the near future.

Increase in Travel

An increase of 162% from 161 people in 1952 to 422 visitors this February resulted from the nice weather during the first half of the month. This gives us a 11.2% increase for the calendar year thus far.

Visitors

Mr. G. Van Buren, Assistant Supervisor of the Rio Grande National Forest, visited the Great Sand Dunes with his family.

(SIGNED)
Glen T. Bean
Superintendent

Section 1

The following text is being typed for the committee.

Section 2

The first paragraph of the report is as follows: The committee has the honor to acknowledge the receipt of the letter from the Secretary of the Department of the Interior, dated January 1, 1953, in which he requested the committee to conduct a study of the problem of the depletion of the fur seal herd in the Bering Sea.

The second paragraph of the report is as follows: The committee has the honor to acknowledge the receipt of the letter from the Secretary of the Department of the Interior, dated January 1, 1953, in which he requested the committee to conduct a study of the problem of the depletion of the fur seal herd in the Bering Sea.

The third paragraph of the report is as follows: The committee has the honor to acknowledge the receipt of the letter from the Secretary of the Department of the Interior, dated January 1, 1953, in which he requested the committee to conduct a study of the problem of the depletion of the fur seal herd in the Bering Sea.

Section 3

The fourth paragraph of the report is as follows: The committee has the honor to acknowledge the receipt of the letter from the Secretary of the Department of the Interior, dated January 1, 1953, in which he requested the committee to conduct a study of the problem of the depletion of the fur seal herd in the Bering Sea.

Section 4

The fifth paragraph of the report is as follows: The committee has the honor to acknowledge the receipt of the letter from the Secretary of the Department of the Interior, dated January 1, 1953, in which he requested the committee to conduct a study of the problem of the depletion of the fur seal herd in the Bering Sea.

RECEIVED
FEB 1953

Montezuma Castle National Monument
Camp Verde, Arizona

February 24, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report for February 1953

Weather: Until the last few days the weather was perfect, with warm sunny days and brisk nights. On February 19, it turned cold and windy, and minimum temperatures have fallen to 14 and 15 degrees. Days, although chilly, remain sunny. Again no moisture was recorded during this report period.

Special Activities: I spent most of January 30, going over the area with Messrs. Miller, Davis, King and Tilden. This being Mr. Miller's first visit to the area in several years, he was extremely interested in the changes and improvements that have been made. Administration was discussed with Mr. Davis, and problems regarding museums and interpretation taken up with Mr. King and Mr. Tilden.

On February 4, I made a trip to Clarkdale to find railroad iron for a cattleguard to be installed at the entrance road to Montezuma Well. Iron was found in the mines at Jerome, and the Smelter City Iron Works of Cottonwood hired to construct the cattleguard.

Pierson made a trip to Tusigoot on February 11 to avail himself of equipment there necessary for preparing display labels for the new section of the museum. Since then a jig-saw for completing the work has been received from Tonto.

While in Phoenix February 14 on personal business, I contacted the Coyner Crop Dusters to find if they might be interested in dusting the Sycamore Trees for Lacewing this spring. They expressed interest in the job, and a representative of the company is suppose to come to Montezuma Castle for further details next month.

The big event of the month was the arrival on Sunday, February 15, of the Don's Club of Phoenix for their first trip to this area. They arrived some 500 strong about 1:30 p.m. at Montezuma Well where they had lunch. During lunch period, I welcomed the group, explaining the significance of National Monuments and then introduced Sutton who presented a talk on the geology of the area. After viewing the Well, the group proceeded to the Castle where they were divided into two groups and given

Business Office Building
Room 1010, 1st Floor

February 19, 1953

Dear Mr. [Name]

Thank you for your letter of February 18, 1953.

I am sorry that I cannot give you a more definite answer.

At the present time, the situation is such that I am unable to give you a more definite answer. I am sorry that I cannot give you a more definite answer.

I am sorry that I cannot give you a more definite answer. I am sorry that I cannot give you a more definite answer.

I am sorry that I cannot give you a more definite answer. I am sorry that I cannot give you a more definite answer.

I am sorry that I cannot give you a more definite answer. I am sorry that I cannot give you a more definite answer.

I am sorry that I cannot give you a more definite answer. I am sorry that I cannot give you a more definite answer.

I am sorry that I cannot give you a more definite answer. I am sorry that I cannot give you a more definite answer.

Page 2:

talks on archeology by Pierson and me.

Since there were five Greyhound busses followed by seventy cars, our main job was parking vehicles so as not to cause a serious traffic jam. However, by sending the cars and busses up the hill to the Well in groups and by using the utility area for parking at the Castle, we were able to handle this problem nicely. In fact, all of us feel that the affair went off very smoothly, and that the Club went away completely satisfied with the manner in which they were treated.

Travel: Travel to the area again increased over 100 per cent when 2700 people in 785 cars visited the Castle and 1546 people in 391 cars went to the Well. This makes a total of 4,246 visitors to the monument. This large increase in visitors may again be attributed to excellent weather conditions and of course to arrival of the Dons Club.

Visitors: On February 5, Superintendent Cook of Chiricahua National Monument.

On February 16, Art. White and Jack Williams from Chaco Canyon.

On February 18, Highway Engineer Moran stopped by for a short visit to talk over road and trail problems.

On February 19, Mr. & Mrs. Devereux Butcher visited both the Castle and Well for the first time in many years.

On February 20, Jimmy Brewer from Tuzigoot came down to take pictures for the new 2-fold for the area.

Publicity: Charles Franklen Parker of Prescott, noted writer for Arizona Highways, spent most of February 18 in the area acquiring data for an article on construction details of the Castle. This office will check his article for accuracy before it is submitted to Arizona Highways.

Also, on February 19, representatives of the "Women's Home Companion" arrived to take pictures for a fashion article to appear in the June issue of the magazine. Their picture taking consisted of posing models, dressed in various female garb, along the ledge to the Castle, using the Castle as a back-drop.

Maintenance and General Work: At the Well, one of the bedrooms was painted, and most of the prehistoric irrigation canal at the museum dug out. At the Castle, some painting accomplished and directional signs touched up.

Museum: Exhibit work for the Castle museum is going ahead as rapidly as visitation permits. A multiplex is almost complete and labels, mounts and paintings are coming along nicely.

Page 3:

Research & Observation: The monument insect collection was taken to Arizona State College at Tempe where Dr. Wallace advised that time would permit him only to identify according to family. For complete nomenclature the collection must be submitted to the U. S. National Museum.

Three new birds were recorded at the Well. They are: American Pipit, Northern Sage Sparrow, and Green-winged Teal.

A Pause in a "Daze" Occupation:

From my observations--if qualifications could be met--
I wouldn't be a monument superintendent for half the national debt.
He must be an interpreter, a statistician, and financier,
A lawyer, and administrator, and a consulting engineer.
He must be a civic leader, and a diplomat with finesse
To deal with employees, public, the officials, and the press.

There's a constant changing manual, referred to as "Park Law"
He must read, and know, and interpret without a single flaw.
Budget, bids, finances--to keep the public wise
The monuments reverse the slogan--"They pay to advertise."

He must make a yearly budget to meet area needs
And if, like most all budget, the income it exceeds,
Then revision is the order, and expenses he must pare
For he hasn't found the secret--to pluck money from thin air.

He can't plan for just the present but must future needs foresee
And trends in travel, and the visitors there may be.
If museums are overcrowded and bulging at the seams
He can't put kids on hatracks or hang parents from the beams.

He needs courage of his convictions his objectives to attain
And a sense of humor, to relieve terrific strain.
But is he's Park Service minded, and that work is his intent
He must travel through "Endeavor" to arrive at "Heart's Content."

And though his patience oft-times undergoes severest test,
His sense of values shattered when he can't achieve the best,
Of one thing I am certain, and I think you will agree,
A superintendent never suffers from what folks call "ennui."

The above was found in a School Teachers Magazine, and I
have changed a few words to make it apply. No, things are not really
that tough.

JOHN O. COOK

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

February 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Organ Pipe Cactus
Subject: Monthly Narrative Report for February, 1953

Weather

Nice warm weather prevailed all month until February 23 when we experienced the worst sustained wind ever seen here. It did blow in a welcomed rain of .76 inches with snow above 3500 feet.

Special Activities

One trip was made to Phoenix by the Superintendent February 3 to purchase supplies and contact the Desert Botanical Garden.

Ranger Kirk delivered a dump-truck to Wupatki National Monument on February 6.

Inspections

Maintenance Engineer Moran spent February 16 on the area acquainting himself with roads and maintenance problems.

New Construction

Headquarters and Campground roads are now progressing faster with better equipment. Maintenance man Quinn and Laborer Brown brought the heavy loader from Saguaro January 27. This has speeded hauling considerably, and with the purchase of a jack-hammer we can handle our rock work.

County Legislation

At an election during the month county zoning was passed for Pima County, but we have not had an opportunity to find out its effect on this section.

Research and Observation

Our common Staghorn type cactus, with which we have been wrestling for years, was finally determined to be a new species so we now have another to work out.

Visitors reported seeing up to eight antelope on the loop road and several reports of peccaries up to over 30 in a band.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

February 28, 1932

MEMORANDUM

TO: General Superintendent, Yellowstone National Park

FROM: Superintendent, Grand Teton National Park

SUBJECT: Wildlife Survey Report for January, 1932

REPORT

It was again a very successful survey for the month of January. The results of the survey are as follows: The number of animals seen was 1,234. The number of animals killed was 567. The number of animals taken for skins was 234. The number of animals taken for study was 123.

Special Instructions

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals seen should be reported to the General Superintendent of the Yellowstone National Park.

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals killed should be reported to the General Superintendent of the Yellowstone National Park.

Instructions

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals taken for skins should be reported to the General Superintendent of the Yellowstone National Park.

The Superintendent

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals taken for study should be reported to the General Superintendent of the Yellowstone National Park.

Copy Instructions

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals seen should be reported to the General Superintendent of the Yellowstone National Park.

Approved and Forwarded

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals killed should be reported to the General Superintendent of the Yellowstone National Park.

The following instructions are given to the Superintendent of the Grand Teton National Park for the month of February, 1932: The number of animals taken for skins should be reported to the General Superintendent of the Yellowstone National Park.

Visitors

Mr. and Mrs. Devereux Butcher spent a week in the area taking pictures and gathering article material.

William R. Supernaugh
Superintendent

11/11/11

RECEIVED
11/11/11

February 27, 1933

Memorandum

To: General Superintendent

From: Superintendent, Saginaw

Subject: Monthly Narrative Report, February 1933

General

February was a generally warm and exceptionally dry month. No measurable precipitation occurred throughout the entire period. A "black blizzard" blew through this area on February 8. Visibility was reduced to less than one mile at times. The snow cover has practically disappeared on the plains and dry conditions are prevalent. A small amount of water is still running in the Saginaw River but this will undoubtedly cease shortly unless we receive good rains. Three inches of snow fell on February 24.

A few scattered red wildflower blossoms have been noted but most of the fall will defer any large scale blooming and as that of last year.

Visitor travel fell quite unexpectedly in February. The monthly total was well below that of January and of February 1932. Apparently, the mild winter in the eastern states is causing less people to travel to warmer climates. The tourist drop is noted in the monthly bulletin of the Bureau of Business Research of the University of Illinois.

Local Activities

Highway Engineer Moran visited Saginaw on February 15. Plans for surfacing the Saginaw were discussed. The job has been set for completion early in May.

Maintenance

During the time when much needed rehabilitation work was being accomplished on the Saginaw Warehouse, several elements of this work was temporarily deferred. Larger loads of lumber-lumber frames-harry have spent considerable time completing this general element.

Two hundred feed sacks were exchanged for six sacks of oats and two blocks of salt. The bar, which had been, and which was kept, closed from top to bottom. All salvable material was placed in protective storage. A fence will be constructed around the store area in the near future.

The exterior of the Salween Lighthouse received an coat of paint April the 20th and the interior was finished with a final coat of paint in the kitchen.

Numerous trail tools have been sharpened and fitted with new handles. Laborer Western worked one and one quarter mile of trail during the month.

Laborer-ladness Standberry has been working on his new outfit lately in preparation for the ensuing fire season. Several spades, cinches, etc. had to be purchased to replace worn and old outfit.

Fire Construction

Account \$11.00 - Utilities, a larger propane tank secured from the National Monument was installed at the camp. This increased air cushion helps relieve surge on the smaller propane tank and the system is now functioning quite well.

Water line and electric cables were extended an additional 100 feet to the site of the new and administration building. The definite selection of building site has been established and a contract will be put using the Resolving Falls in this respect.

Account \$11.14 - Laborer's infirmary, some additional work secured material was applied to the picnic area. Mr. Brown, laborer, was placed to work how well the road has held up prior to surfacing. Final date has been set for early in May.

Cooperating Government Agencies

Final approval has been received to construct a log house for the protection of the monument. The location will be determined in cooperation with U. S. Forest Service of the National Monument, U.S.A. It is already have a partial concrete slab for the floor and will utilize surplus materials for the balance of the construction. Mr. Brown has received plans to construct steps for the building.

Camp Facilities

A special election to vote for County Clerk, who was called and the order of business was by a large majority. The election of officers was moved to the monument boundary have been studied and the county is the first county in Arizona to this election of the county clerk and county legislator.

Observations

Reuben Gray procured a circular pressure tank from White House National Monument. This tank was set into the White House staff in an excellent and speedy job in loading the pressure tank and glass. The tank has already been installed in our water system which is now functioning perfectly.

Interpretive Services

Interpretive Service was rendered to 1,807 persons in 1,000 parties during February. The total contact time amounted to 100 hours for an average of 11 minutes per party. The review list will be submitted shortly as the members have an illustrated lecture to ten junior scouts and their leader, Gordon Clark, at National Monument Station on January 11.

The Superintendent gave an illustrated lecture to 60 members of the Tucson Unitist Club on February 6. A twenty minute question and answer period followed the lecture.

On February 10 the film "National Parks Wildlife" was shown to 175 members and friends of the Tucson Audubon Society. The showing was very much appreciated by all in attendance.

Observations

The first wildflower blossoms are quite small, scarce, and generally below par. Bladderbuds, which were so plentiful last year, are very scarce. The Penstemon about the office are in good shape and blossoming quite well. Lack of measurable rainfall since last December is believed to be the reason for such a poor showing of flowers.

Decrease in Travel

There were 2,076 visitors to National Monument during February. This is a decrease of 1,748 visitors from last month and a decrease of 1,074 persons from the corresponding month one year ago.

Visitors

- Jan. 29, Mr. Arthur J. Gilbert, Mayor of Marion, South Dakota.
" 29, Mr. John H. Hays, Member of Representative Hays, Santa National Monument.
" 31, Mr. and Mrs. Earl C. Johns, West Covina, Calif. - Mr. Johns was an early U.S.P.S. employee at Grand Staircase, Utah and friend of Assistant Director Thomas Allen.
Feb. 4, Mr. Robert Bennett, Entomologist, Bureau of Entomology and Plant Quarantine, Agriculture, U.S.
" 7, Superintendent and Mrs. Harold C. Hays, Grand Canyon National Park, Arizona.

- Feb. 11, Ranger Will Bullard, Tennessee National Forest.
" 12, Highway Engineer "James L. Ryan, Route 10, N.C.
" 12, Supervisory Ranger Carl Schaefer, Big Bend National Park,
Tr. and Tre, Charles Russell, Texas, Texas. Mr. Russell
is a member of the staff of the American Museum of
Natural History.

Forest Fire Control

Ranger Steele is undertaking a major revision of the Tennessee
Fire Plan. Changes will be recommended in the general part and in
the step-up plan. The revised text will be submitted shortly to the
Regional Forester for approval.

Personnel

Samuel E. Lauterio entered on duty February 8 as laborer.

Yellowstone National Park

Trail & Trails. The probable cleanup project was oriented under supervision of landscape architect Harold Marsh early this month, with later checks on progress by Mr. Marsh, and is progressing quite well. The small front end borrow road from certified forest on February 23 is making the job faster and easier, and will be very valuable.

A great improvement in appearance and in road drainage is evident in the section which has been worked on.

Water System. The spring improvement job has been completed, and a good curb and cover put on the spring. This should meet the requirements of the U. S. Health Service. Some work will be required to make connections to the proposed houses and comfort station.

Interpretation. Ranger Rear, archaeologist, and a few other people have been working on the ruins for the summer, and a leaflet about the self-guided extension of the trail into the cliff dwelling. Copy for the revised leaflet or booklet was submitted to the National Park Service, and is in the hands of the printer in Reno. We hope that this will result in raising standards of interpretation by getting across some of the basic information and freeing the interpreters for less routine conversation and information.

Activities on the 2nd area: Archaeologist Ranger, accompanied by Mr. Ranger, gave a slide talk on Tonto and the Apache Trail to a group of about 50 members and guests of the Alpine Club at Reno. He later received a very nice compliment on the talk from Mr. Fred Alder of the Alpine Club.

Local. Four Indian people were drowned in a snowdrift near Sunday Feb. 8, as a result of high winds and rough water.

General. May month. Ranger Rear received his permit to collect small mammals, and has started work on collecting and mounting specimens. Superintendent Mr. Linn. Linn made a trip to certified forest to bring back a tractor-loader. Superintendent Linnson of Linnson picked up the Linnson trail-tractor, Feb. 5. The permanent power lines were moved and brought up to a better standard.

A record number of visitors along with our other work, kept us quite busy this month, and as usual, we were able to accomplish only the most urgent projects and necessary maintenance.

All members of the families attended the L.N.P.S. meeting at Old Pueblo night of February 12.

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tumacacori
Subject: Superintendent's Monthly Narrative Report for February, 1953.

Weather: Rainfall was .59 of an inch, compared with a 15 year average of .63 for the vicinity. However, most of this moisture fell yesterday, so that extreme drouth conditions actually prevailed here through all of 1953 until February 24. Temperatures ran ed from a minimum of 14 to a maximum of 83 degrees.

Visitor Travel: This month: 6,986 persons.
Highest previous February: 7,484 persons, in 1952.
Percent decrease - - - - : 6.67
Last 12 months: - - - - : 44,559 persons
Previous 12 months: - - - : 45,671 persons
Percent decrease - - - - : 2.4%

Although visitor travel here shows some signs of more or less levelling off, with even a slight decrease under the previous February, we did set a new visitor record for a single day's attendance. On February 22 we had 516 visitors, of whom 196 went through the mission church and grounds on our 13 guided trips that day.

Visitors:

1-28 - 53 - Mr. W. F. Yeager, Border Patrol chief for the state of Arizona, accompanied by the immigration department chief from Thailand, who is studying border patrol procedures in this country.
1 - 31 - 53 - Mr. and Mrs. John Stratton, and Mrs. Iva Boatright, of the Southwestern National Monuments headquarters staff.
2 - 15 - 53 - Mr. and Mrs. Alan Vedder, of Southwestern Monuments Association, Globe, Arizona.
2 - 19 - 53 - Mr. Gene Hunter, of the St. Louis Post-Dispatch, took many pictures in the museum, and of the old church.
2 - 20 - 53 - Ted Sayles, Director of the Arizona State Museum, and Dr. Marie Wormington, of the Denver Museum of Natural History.
2 - 21 - 53 - Miss Nancy Coddanetto, of the S.W. National Monuments headquarters staff.

Inspections: 1 - 25 - 53 - Assistant Regional Director and Mrs. Hugh Miller, and Assistant General Superintendent Luis A. Castellum, of Southwestern National Monuments.

2 - 16 - 53 - Highway Engineer Thomas M. Moran, of

the Region Three office.

2 - 17 - 53 - Archaeologist Thomas Onstott, of the Region Three office.

Maintenance: Routine maintenance was kept current. This involved completion of dead weed cleanup from use and scenic areas, and irrigation, on a sustenance basis, of many of our plants. More fertilizing and pruning was done. A protective chain link fence was installed around the butane gas tank. Chemical treatment was given to some trees which are weakened from root rot, in the residence area. A fluorescent light installation was made in one room of residence #1. A tightening job was done on the pickup truck, which almost shook to pieces on an inspection trip to Coronado National Memorial area. A book case was made over in the office to be more functional. Broken burned adobe bricks of trails and walks were in part replaced with new ones, and pitted areas in the restored baptistry floor of the mission church were filled. Repairs and refills to some of the door closers on the museum building were accomplished.

Personnel: Park Ranger William L. Featherstone finished his last duty day here on ~~Jan~~ January 26, and departed with his family on the following day, to a promotion and new assignment at White Sands National Monument.

Park Ranger William C. Ballard, Jr., transferred in from Wupatki National Monument, to fill the vacancy created by Featherstone's departure. Mr. Ballard arrived on January 27, and was a "bachelor" for a couple of weeks, until joined the other day by his wife and children.

Accidents: On February 24 Maintenanceman Deuler was injured. There had been a snowstorm during the night, and just after he had finished putting up the flag, at about 7:15 A.M., a foot slipped out from under him on the snowy glaze, and he fell, landing severely with the bottom end of his spine on bricks of the flagpole base. He suffered severe pain, and we promptly sent him to a dealer for medical attention and X-rays. The report was that no bones were broken, but he was ordered to stay in bed for at least three days, and to report back for another medical check-up at the end of that time. At this writing, we don't know how long he will be "on the mend."

Museum and Education: To assist visitors more readily to visualize extent of old buildings east of the mission church, (structures now visible only by low mounds) we have set up some white stakes along tops of mounds to outline them.

Some work on the F.O. files has been done, although there has been very little time for anything during day hours, other than visitor contacts and guiding.

From one of our evening "staff meetings" resulted some specific proposals to ~~improve the interpretive program~~ make our interpretive program fit in with greater public visitation to our principal feature. Under the present system of mandatory visitor attendance on scheduled guided tours through the mission church and grounds, less than

it provides for the NATIONAL PARK SERVICE
Tuzigoot National Monument
Clarkdale, Arizona

February 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments

From: Superintendent, Tuzigoot National Monument

Subject: Report lml, February, 1953

There follows the narrative report of activities in this area for the month of February, 1953.

Weather

Generally clear, bright and warm. Moderate winds on the 8th; high winds and near-freezing temperatures on the 18th and 19th followed by several cold days; cold, with snow in the valley on the 24th.

Special Activities

Superintendent Brewer made a trip to Montezuma Castle to take photographs for the new Montezuma two-fold leaflet.

Archaeologist Burroughs is conducting a series of informal weekly sessions on Southwestern archaeology for a group of 15 residents of Clarkdale, Cottonwood and Sedona.

Official Visitors

Assistant Regional Director Hugh Miller and Mrs. Miller on the 30th.

General Superintendent John M. Davis on the 30th.

Naturalist Dale King and Mrs. King on the 31st.

NPS Collaborator Freeman Tilden on the 31st.

Regional Roads and Trails Engineer Thomas Moran on the 18th.

Maintenance and General Work

A new 3-control limit switch (Minneapolis-Honeywell Model LA401B) was installed in the plenum chamber of the museum heating unit to provide safer and more efficient operation. The old control did not provide for burner cut-off in case of fan failure. The new control eliminates this fire-hazard; in addition

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Tulsa National Monument
Tulsa, Oklahoma

January 25, 1941

Memorandum

To: Chief, National Park Service, Department of the Interior

From: Superintendent, Tulsa National Monument

Subject: Report on Survey, 1940

This report contains the results of a survey of the Tulsa National Monument made during the month of January, 1941.

Summary

The survey was made by the Tulsa National Monument staff and the results are as follows: The monument is in good condition and the survey was successful in obtaining the data required for the report.

General Findings

The monument is in good condition and the survey was successful in obtaining the data required for the report.

The monument is in good condition and the survey was successful in obtaining the data required for the report.

Special Findings

The monument is in good condition and the survey was successful in obtaining the data required for the report.

The monument is in good condition and the survey was successful in obtaining the data required for the report.

Conclusion

Recommendations

The monument is in good condition and the survey was successful in obtaining the data required for the report.

it provides for burner warm-up before the fan cuts in, making for faster and less expensive morning warm-up, and continues the fan in operation after the burner cuts out, utilizing all the residual heat in the chamber. The heating operation is considerably smoother with the new control, and should save on fuel.

The V-pulley on the furnace blower motor pulled loose and ran free on the shaft long enough to enlarge the hole. It was replaced with a new Gates pulley of tapered-hole design keyed to the shaft.

Strong winds, February 18 and 19, deposited an inch (more or less) of dust from the tailings pond in the museum; this was shovelled out on the 20th when the winds abated somewhat. The big blow also drifted sand, pebbles and even small boulders over parts of the trail and gathered clumps of tumbleweeds in most of the rooms, necessitating a general clean-up of the ruins area.

Window curtains, made by Helen Burroughs, were put up in the ladies rest room.

Ten Arizona Cypress trees, planted one year ago this month, are all living and growing at a normal rate.

Museum Activities and Exhibits

The pottery chronology case in the museum was done over. As an experiment, the bottom and sides of the case were painted with a flat rubber-base paint. The result is a highly pleasing background for the exhibit, the centering of attention within the case itself, and the elimination of some of the bad reflections.

A new, colorful orientation panel, with colored postcards of Southwestern Park and Monument areas and an Indian Country map, was completed and hung in the museum.

Since the announcement on January 30th that all Phelps-Dodge operations in Jerome would soon come to an end, we have been literally swamped with questions about the town. Superintendent Brewer's forthcoming pamphlet on Jerome will do much to alleviate this situation and will give us more time to interpret Tuzigoot.

Interpretive Service

Travel: 1589 visitors in 546 parties entered the monument as compared with 1007 last February and 1359, the previous high, in 1948. As usual, 100% of the 8-12 and 1-5 visitors were contacted in the museum, but 110 visitors in 45 parties arrived at times when the museum was closed and so were not contacted.

is evidence for human activity within the lake bed during the
last 100 years. The evidence is in the form of a small, dark, oval
object, about 1/2 inch long, and 1/4 inch wide, which was found
in the lake bed. The object is made of a dark, hard material,
and is surrounded by a thin layer of sediment. It is not
clear what the object is, but it is clearly not a natural
object. It is likely that it is a piece of human waste, or
a piece of debris from a boat. The object is not a threat
to the lake, but it is a reminder that human activity can
affect the environment.

The following is the names of the persons who were called to the witness stand in the case of the State vs. the Defendant, and the names of the persons who were called to the witness stand in the case of the Defendant vs. the State.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a genuine organization or a front organization for the Soviet Union.

10. The following information is available for the year ended 31 December 2014:

1. List of names of persons who have been arrested for the purpose of this investigation.

The final part of the report is a discussion of the results and their implications.

NPS Visitors: Mr. and Mrs. B. L. Graves, Rocky Mountain National Park, on the 28th.

Ranger Art White, Chaco, and Seasonal Ranger Jack Williams, on the 16th.

Seasonal Ranger John Barr, Petrified Forest, on the 16th.

Mr. And Mrs. Devereaux Butcher, NPS Association, on the 18th.

Other Agency and Organized Groups:

Mr. and Mrs. Charles Leake, Whipple Veterans Administration Center, on the 17th. Mrs. Leake is a granddaughter of the late John and Louisa Wetherill.

Group of Boy Scouts (15 in the party) from Phoenix, on the 1st.

The Donkey Club from Phoenix, scheduled to arrive at Tuzigoot on the afternoon of the 15th, did not materialize en masse. The group apparently got a late start from Phoenix, were still at Montezuma Castle at 5:00 p.m. Half a dozen parties stopped at Tuzigoot between 5:30 and 6:15.

Swimming team (12 in the party) from Gustavus Adolphus College, St. Peter, Minnesota, on the 20th.

Foreign: Travel this month included visitors from Canada (provinces of British Columbia, Alberta, Manitoba, Ontario and Nova Scotia), Switzerland, Argentina, England, Italy and South Africa.

Walnut Canyon National Monument
Flagstaff, Arizona

February 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Report of Activities at Walnut Canyon National Monument
during the month of February, 1953.

Weather Conditions

Unseasonably fine weather has prevailed thruout the month with some very cold nights but days warm and spring-like for the most part. there was only .17 inches of moisture that came in three light snow storms.

Administration

With Park ranger Spangle attending the FM radio training school in Washington thruout the month, the Superintendent has had to run the area single handed but has been able to keep all administrative matters current. Special use permits have been sent to all permittees and submitted to the regional office.

Maintenance

The automatic oil furnace in the Park ranger's residence went "on the blink" a few days after he left for Washington, but after a thorough cleaning of spray nozzle, filter and flues it is operating in fine shape. A drop in voltage on the power line during the early morning hours of February 22 caused the motor which operates the blower fan to burn out as this motor was not equipped with an automatic turn off. Smoke coming thru the hot air vents awakened me and I was able to cut the switch before any damage was done. I replaced the motor with one of my own until it can be repaired or replaced.

The dump truck UH-31804 was loaned to Supatki for the road construction job there. All roads were placed in shape before it was released. Ice was removed from some of the shaded spots along the Island trail.

Travel

Travel continued heavy with 919 visitors in 360 cars. Like January, this is the highest travel yet recorded for any February and shows an increase of slightly over 133 per cent over last year.

May 17, 1944

Dear Sir:

Enclosed for you are two copies of a letterhead memorandum (LHM) dated May 17, 1944, and captioned as above.

The LHM is being furnished to you for your information and for your use in the conduct of your duties.

Very truly yours,
[Signature]

Special Agent in Charge

The LHM is being furnished to you for your information and for your use in the conduct of your duties. It contains information which is being furnished to you for your information and for your use in the conduct of your duties.

Interpretive Activities

A total of 33 hours was spent in contacting 229 groups comprised of 604 visitors. It was not possible to contact all visitors but all facilities were available. Thirty eight states and five foreign countries were represented.

N.P.S. Visitors

- January 31. Assistant Regional Director Hugh Miller and Mrs. Miller.
General Superintendent John M. Davis.
- February 17 Superintendent Brueck and Harold Chittum, Tupatki
- February 22 Mr. and Mrs. Kenneth Saunders, Architect
Medray Carpenter, Chief Clerk

Approach Roads

The County completed the cinder surfacing of both approaches to the monument and we now have good all-weather roads as long as they are kept clear of snow.

General

A delegation of the Daughters of the American Revolution composed of Mrs. Walter Funke Sr., Mrs. Stanley Sykes, and Mrs. V.M. Slipper visited and formally approved the site chosen for the re-location of the Pioneer Women monument. (Interesting side light) Mrs. Sykes asked Mrs. Funke why they had to move it and for what purpose?

Meredith M. Chittum
Superintendent

INVESTIGATION

A trail of the case was found in connection with the case of the victim. It was not possible to identify all persons and all persons were interviewed. (The victim's name was not given.)

January 30, 1953. (The victim's name was not given.)
January 31, 1953. (The victim's name was not given.)

CONCLUSION

The investigation of the case was completed on January 31, 1953. The results of the investigation are as follows:

REMARKS

A copy of the report of the investigation of the case was sent to the Department of Justice on January 31, 1953. The results of the investigation are as follows:

WHITE SANDS NATIONAL MONUMENT
Alamogordo, New Mexico
February 23, 1953

MEMORANDUM

To: General Superintendent, SWNM
From: Superintendent, WSNM
Subject: Report No. 141 - Superintendent's Monthly Narrative.

Travel for February, 1953	Travel Year to Date
Visitors 11,655	Visitors 24,450
Cars 3,197	Cars 6,478

ARMED FORCES

Visitors 2,435	Visitors 5,033
Cars 692	Cars 1,379

There follows the report of activities at the White Sands National Monument for the month of February, 1953:

GENERAL:

The month as a whole has been rather cold, although a high of 82 degrees was recorded on January 29th, the low being 7 degrees on February 20th, giving us a variation range of 75 degrees for the period. There has been a lot of wind, but nothing like we will be getting in the next two months. We received .20 inches of rainfall, which has done little to alleviate the drought. In spite of a lot of cold and windy days, this month topped last February almost 3,000 visitors.

PUBLICITY & SPECIAL EVENTS:

Planning for both Play Day and the 4th of July have started, and both committees promise bigger and better celebrations than ever before. They expect 20,000 on the 4th of July, which seems like wishful thinking but last year they promised 15,000 and we laughed at them (we had 16,723) so this year we will not make any predictions.

Our weekly newscast over the Alamogordo Radio Station KALB is still going full blast and has more or less taken over by Bill Featherstone since he reported for duty.

MEMORANDUM

TO: The President

FROM: The Secretary of State

SUBJECT: The Secretary of State's report on the activities of the Soviet Union in the Far East

1. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

2. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

3. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

Summary of the Secretary of State's report

4. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

5. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

Details

6. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

Priority and Recommendations

7. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

8. The Secretary of State has the honor to report to you on the activities of the Soviet Union in the Far East during the period from January 1, 1951, to January 31, 1952.

Subject: Report No. 1ml - Superintendent's Monthly Narrative.

COMPLAINTS:

No complaints of any kind were received this month.

MAINTENANCE:

Gene Mott has been here most of the month and a good deal has been accomplished. The new sewage disposal system was completed and is now in use - the top of the water tank was painted with aluminum paint. They have a good start on the new cement base garbage units for this area's picnic grounds. Joe and Ray have helped Gene considerably and he has hired two Indians from Mes-calero to assist on the projects.

Joe has been kept busy on the roads with the winds and heavy travel that we have had. Our restrooms at Headquarters are going to get a much needed overhaul by an Alamogordo plumber who was the low bidder on the job.

INCREASE IN VISITORS:

The gain over the same period a year ago was 2,726 people, and would probably have been much greater if the Proving Grounds hadn't stepped up their rocket firing, forcing us to be closed quite a bit during the week. Armed forces groups are starting their squadron and company picnics once again - rushing the season, perhaps - but they have apparently enjoyed themselves (at least judging from the number of beer cans).

VISITORS:

Assistant Superintendent and Mrs. Evans, en route to Big Bend
Father Victor Stone
David H. Rowland and Family - Rocky Mountains
George Smith, Region III
Charles Carter, Region III
Ranger Ben Zerby and Family from Saguaro, to pick up water tank

PERSONNEL:

We were all happy to have the Featherstone's join us on the 29th. Bill took Harold Chittum's position. They are now as settled as they can be, living in a trailer with all their goods stored in the warehouse. We have quite a community now, with the three houses occupied; the two trailers taken up, and Leon over in the bachelor's quarters.

Most of the families have had rounds of flu, Bronchitis, Pleurisy, etc., but only one day of sick leave was taken all month.

Johnwill Faris
Superintendent

1. 2. 3.

1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 26

• **Attorneys** will be heavily armed and you'll need to control your own

RECEIVED
FEB 13 1953
U.S. DEPARTMENT OF AGRICULTURE
WASHINGTON, D.C.

1. *Chrysomelidae*

1. The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the Americas (CLA) in the United States. The Commission is therefore unable to determine whether the CLA is a legitimate organization or a subversive one.

**Wupatki National Monument
Flagstaff, Arizona**

February 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Monthly Narrative Report, Wupatki and Sunset Crater National Monuments.

Weather:

With the exception of a few scattered unsettled days the weather has been ideal for this time of the year. The maximum was 70 degrees on February 4th with a minimum of 12 degrees the night of the 22nd. It was still quite dry for winter time with only .36 inches of precipitation recorded for the month all in the form of snow.

The rain gauges over the area were measured for the Museum of Northern Arizona with very little precipitation noted for the last quarter.

Inspections:

On February 18, Tom Moran visited the area and went over the road project with Construction Supervisor Harold Chittum.

On February 22, Administrative Office James M. Carpenter and Landscape Architect Kenneth Saunders visited the area and went briefly over the coming quarters adjustments.

Maintenance and General Work:

Two broken ladder rungs at Wupatki Ruin were replaced this month. All the road signs between Highway 89 and Wupatki were repainted, one sign near Heiser and the register box and a few trail signs at Sunset Crater. The service porch in the Superintendent's residence was repainted and the plaster repaired. About 150 letters were cut out and taken to Walnut Canyon where Superintendent Guillet is preparing new entrance signs for this area and Sunset Crater. A short power line was installed to feed the house trailer occupied by Construction Supervisor Harold J. Chittum, a cess pool was dug for the sewer connection and the water line was hooked up.

With the lack of snow regular trips had to be made to Sunset Crater to clean the rest rooms and roadsides and check the trail and free booklets in the register box.

UNITED STATES DEPARTMENT OF JUSTICE
WASHINGTON, D. C.

Roads and Trails:

A lot of time has been spent this month in getting ready to start the improvement of the Wupatki entrance road. We have now received a pick-up, one International bulldozer, and four dump trucks. On February 23 we received our new Ford dump truck so that makes a total of 6 dump trucks to start the job as soon as two come out of the Forest Service shop. Two metal tanks were received and installed. One for 1000 gallons of diesel fuel and one for 550 gallons of gasoline. We now have a storage of 2000 gallons of gasoline and 2000 gallons of diesel.

Some clay plating has been done on the Wupatki road near the ruin. A detour has been made by using the old entrance road from Highway 89 to the Earth Cracks. It is going to be necessary to close the road past the Citadel ruin while this section is being worked on. The state highway department loaned us a cattle guard to install where the old road meets the highway. This road only required 2 days of blading and is going to make a very fine detour. The road work will begin in a short time now.

Interpretation:

At Wupatki there were 206 people in 71 parties contacted for an average time of 16 minutes per party.

Sunset Crater was open all month and a few people climbed to the top of the crater and about 130 people took the Lava Flow nature trail.

Travel:

With the continued mild winter the travel continues to boom. Wupatki showed an increase of 60% with a total of 205 cars and 553 people. This was 74 cars and 223 people of last February.

As near as I can tell from looking over the old records for Sunset Crater this has been the biggest February travel since records have been kept over the past 10 years. Travel totaled 310 cars and 895 people. This is all increase as last year the area was snowed in at this time. Travel over the loop drive between Sunset Crater and Wupatki has been quite heavy for winter time.

Public Health:

Water samples taken for Heiser have continued to come back with a negative return and we are hoping it will remain that way.

Spring Flow:

Wupatki - 860 GPD.
Heiser - 2700 "

April 10, 1953

MEMORANDUM

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - March 1953

General

Again this month we feel that Mr. Jackson's report on Coronado National Memorial should be quoted in its entirety. He is learning many interesting facts about our newest area, and we are sure you will be interested in reading these as written in his own individual style. His complete report is attached.

Weather

In many of the areas, March came in like a lion, but there were indications that it would depart like a lamb. Cold, stormy, windy days prevailed during the first of the month. Toward the end, mild, sunny days were the rule rather than the exception, and spring definitely was in the air.

Special Activities

Headquarters Office--The outstanding event at Gila Pueblo during March was the dinner in honor of Mr. Gordon Vivian, Saturday evening, March 7, in the Council Hall. At that time, Mr. Vivian was presented the Meritorious Service Award for his outstanding contributions to ruins stabilization and the related field of archeology. The presentation was made by General Superintendent Davis, and Mr. Vivian's accomplishments were lauded by Dr. Emil Haury, of the University of Arizona; Dr. Ernst Antevs, noted geologist; Mr. Odd Halseth, municipal archeologist of Phoenix; Mr. Tom Dodge, Superintendent of the San Carlos Apache Agency, Mr. Freeman Tilden, noted author and NPS Collaborator; and Naturalist Dale S. King. The entire proceedings were tape recorded and a copy of the recording presented to Mr. Vivian.

Prior to the night of the dinner, the Gila Pueblo Council Hall was beautifully decorated with a striking design, adapted from Indian pottery, under the direction of Naturalist King. Members of the staffs and their families donated much personal time to the accomplishment of this project, and all are justly proud of the results.

On the 10th, Mr. Davis called on Governor Pyle in Phoenix. The governor said he is very pleased to have the headquarters of SWNM back in Arizona and promised to stop by for a visit at the first opportunity.

Gran Quivira--Mr. Ringenbach attended two meetings held in the interest of improving State Highway 10.

Special Activities - continued

Montezuma Castle--Superintendent Cook attended the Region Three Fire Control Training Conference at Lake Mead. He reports that it was a very successful school and appreciates very much the opportunity to attend.

Tumacacori--At the Kenyon Guest Ranch, 3 miles north of Tumacacori, the winter guests formed a "Santa Cruz Historical Society" which has as its goal the establishment of a library with a detailed history of this part of the Santa Cruz Valley and especially of the old presidio town of Tubac. The Superintendent of Tumacacori was invited to be their first speaker and after a stimulating evening and a 45-minute talk on local history, he and Mrs. Jackson were made the first honorary members of the society.

Tuzigoot--A group of Jerome and Verde Valley residents have formed a Jerome Historical Society. The primary interest of this group will be the preservation of Jerome as an early western mining center. Superintendent Brewer was elected Chairman of the Executive Council of the Society.

Walnut Canyon--In addition to keeping his normal work current, Mr. Guillet has spent considerable time designing and constructing sign forms to be used in pouring six large concrete signs for Mupatki, Sunset Crater and El Morro.

Official Visitors

Headquarters Office--Assistant Director Tolson, accompanied by Mrs. Tolson and daughter, Pamela; Architect Saunders and Administrative Officer Carpenter.

Bandelier--Archaeologists Vivian and Onstott with Mr. Fred Wendorf, Laboratory of Anthropology, Santa Fe.

Chaco Canyon--Architect Carter, Highway Engineer Moran, and Soil Conservationist Balch.

Gran Quivira--Assistant General Superintendent Gastelum.

Walnut Canyon--Assistant Regional Director Hugh Miller; Forester Harold Ratcliff, Engineer Hugh Richardson, Chief Forester Bob Moore of the Washington Office, and Park Ranger Young of Bandelier, all en route to the Fire Training School at Lake Mead.

White Sands--Assistant General Superintendent Gastelum; Engineer Paul Ranke, Jr., Regional Office.

General Publicity

Headquarters Office--The Arizona Record, Globe, gave us

some fine publicity on the presentation of the award to Mr. Vivian. This consisted of a five column headline and a column and a half of news concerning the affair, accompanied by a picture of Mr. Davis making the presentation. Some publicity on this event was also carried in the Phoenix Gazette. "Arizona Highlights," a daily recorded broadcast over radio station KTVH in Phoenix featured a recording of the presentation ceremonies on Monday, March 16.

Bandelier--A very fine article by Nell Murbarger, of Costa Mesa, California, on Bandelier, appeared in the March issue of Natural History.

General Publicity - continued

Organ Pipe Cactus--In its Sunday edition, March 15, the Phoenix Republic carried a section on the Gila Bend-Ajo area, including a nice article on the monument.

Some rather unusual publicity was received by Organ Pipe Cactus over the week end of March 22 when a number of paintings by Artist Leese Mather were exhibited in the contact station. A notice was sent to the Ajo paper inviting the public, and several cars of local people came to view the paintings. Mr. Supernaugh believes most visitors received a very good impression of the area, as most of the pictures were of the rock country which few people see.

Maintenance, Rehabilitation, and General Work

Arches--The work of changing the sign system was almost completed during the month, as was the construction of a loading platform.

Aztec Ruins--An elevation sign has been constructed, and was to be installed just as soon as it was stained.

Bandelier--Considerable work was done on new signs for Cave Kiva, Snake Kiva, the entrance to the campground, and Tsankawi Ruin. Twelve trees were planted in the island of the parking area to replace some that had died.

Canyon de Chelly--All informational and directional signs were corrected to show the wording "National Park Service" and new highway signs were constructed and placed between monument headquarters and White House overlook.

Chaco Canyon--Several directional signs were laid out, and will be routed soon. Several days were spent on building removal, and this project is nearing completion.

Great Sand Dunes--A log bench was constructed and placed at the Dunes Overlook station on the Montville Nature Trail.

Saguaro--The old tent frame was rebuilt at Madrona, making it possible to house two additional men when they are employed on the lower trails. A dragbroom was constructed to use on the Loop Road when the chips are applied after oiling.

Tumacacori--A lot of time was spent making signs for Coronado National Memorial. Also, irrigating the patio garden consumed a good deal of time, as did some tree pruning, including some major surgery on the pepper tree in front of the museum which was broken by snow during the winter.

Tuzigoot--Working over the heating system took almost three days time.

Walnut Canyon--Routine maintenance work has been carried on, and in addition, much was accomplished on the signs for other monument areas.

White Sands--During the month a great deal was accomplished on the various projects such as the sewer system enlargement, the water system, plumbing in restrooms at headquarters and some plastering jobs.

Wupatki--A rock wall was built around the new 5,000-gallon metal water tank. This blends with the residence and the ruin and will serve to keep the water cooler by preventing the sunlight from warming up the metal. The new information station at Sunset Crater was painted on the inside, and the exterior wood gone over preparatory to painting.

Roads and Trails

Bandelier--The unpaved portion of the approach road was

graded by the State Highway Department and put into fairly good condition for spring travel. Temperature cracks in the paving to the checking station were patched in preparation for possible paving this spring.

Canyon de Chelly--All approach roads were in better condition than they have been for years because of recent bladdings by the Indian Service. Many detours are necessary between Ganado and Window Rock, however, because of the all-weather highway now under construction. This project may be completed by July 1.

Chaco Canyon--Messrs. Moran and Carter from the Regional Office spent three and a half days surveying the new road to be constructed from the present office to the new headquarters area. Several other road problems were discussed with them during their visit.
Gran Quivira--Approach roads caused irritation to monument visitors, with several parties reporting they spent from half an hour to three hours shoveling out of sand drifts on Highway 10 south of the monument.

Great Sand Dunes--Alamosa County has begun improvement of the road south to U. S. 160 so this road will soon be an acceptable alternate approach. The narrow rocky winding road above the Zapata Ranch is being widened and straightened.

Navajo--The monument roads were placed in good condition by the hauling and spreading of about 2 1/4 yards of dirt. The Shonto Hill road was also repaired by hauling about 1550 yards of dirt to cover the rough, rocky road bed. Work was started on widening Sanda Trail.

Tupaki--The Tupaki road construction project got underway on March 2. Entrance signs on Highway 89 were taken down and installed at the entrance to the detour.

Concessioners

Bandelier--The sub-concessioner who operated the Frijoles Canyon Lodge last summer will not return this year. Several other interested parties were interviewed and a decision is expected shortly.

Interpretive Service

Headquarters Office--The headquarters staff has been

engaged in such a variety of activities that it is impossible to give a complete picture of the work done. Aside from the routine duties, some of the more important accomplishments were:

The preparation by Mr. King for Mr. Davis of a statement regarding the national significance of Fort Bowie.

A review by Mr. Arnsberger of a manuscript on Rainbow

Bridge by Regional Naturalist Dodge for publication in a forthcoming booklet of the Zion and Bryce Natural History Association. Suitable photographs from our files were forwarded for illustrating the article.

Mr. Arnsberger corresponded with Mr. George Foster, Curator of the Meteor Crater Museum, offering suggestions as to availability of pictures to be used in preparing an orientation display on the Southwest.

Interpretive Service - continued

An excellent article prepared by Park Ranger Sutton giving a popular description of Montezuma Well was reviewed by Mr. Arnberger.

A survey of audio-visual equipment needs for Southwestern National Monuments was completed. This survey pointed up the complexity of the problem of supplying sufficient equipment to fill the needs in all of our field areas. Whereas a park or single area could perhaps be equipped for a comparatively small sum, the picture changes considerably when the needs of 26 areas are considered. This survey indicates that an expenditure of more than \$12,000 would be necessary to provide our areas with their minimum needs.

Mr. Arnberger is gaining a reputation locally as a speaker and was much in demand by various groups. On March 2 he gave a one-hour program at an assembly of the Globe High School attended by approximately 750 students. On the 17th he was the after-dinner speaker at a meeting of the Globe Optimist Club. On the 21st, he presented an hour-long program to a state-wide convention of Girl Scouts, at which about 60 Scouts and Scout leaders were present from throughout the state.

In addition to their regular duties, the interpretive staff spent many evening hours and week ends rehabilitating the patios and lily pond at Gila Pueblo. The plantings were considerably facilitated by donations from Mrs. Hogel, local greenhouse operator and ardent conservationist, who is also very much interested in the Southwestern National Monuments.

Bandelier--A new self-guiding trail to Tsankawi Ruin in the Otowi section was put into operation during the month.

El Morro--The superintendent gave a talk to the Ramah PTA one evening, at which the school principal was present. As a result of this talk, he was asked to speak before the Ramah High School Science Class.

Gran Quivira--The self-guiding facility is being used by an increasing proportion of visitors. Text for the self-guiding pamphlet was received from Naturalist King, but is being held until easel material is received from the Regional Office.

Organ Pipe Cactus--The self-guiding nature trail at Organ Pipe Cactus will be relocated when the new campground is constructed. Mr. Arnberger and Mr. Marsh from the Regional Office will visit the area soon to assist in laying out the new trail. Once the trail has been permanently located, it is hoped to put out a printed guide booklet similar to those being used in many other areas.

Saguaro--The superintendent gave an illustrated lecture on plants and animals of Saguaro at a regular meeting of the Tucson Lions Club, with 50 in attendance. From the lively question and answer period which followed, there was good evidence of appreciation.

Supervisory Park Ranger Steele gave an illustrated lecture on plants of Southern Arizona to an audience of 40 winter visitors at the Pioneer Hotel, and this lecture also was well received.

Tumacacori--During the month, more attention was given to the nature trail through the Spanish-type patio garden. The mimeographed trail guides are very popular, and many enthusiastic comments on the garden and the self-guiding features of its trails are received. Despite the fact that each leaflet has a request that it be returned and the box dispenser also has such a request on it,

Interpretive Service - continued - Tumacacori
the leaflets were disappearing almost as fast as they could be put
in the box. At Ranger Ballard's suggestion, some of the 8 by 5 $\frac{1}{2}$ "
leaflets were stapled to stiff cardboard backs, 8 by 10 $\frac{1}{2}$ " -- now the
visitors almost never carry one away after using it.

White Sands--Ranger Davis gave a talk on Archeology to
20 members of the AlamoGordo High School archeology club.

Museum Activities and Exhibits

Headquarters Office--The Tuzigoot museum prospectus was
reviewed, signed by the General Superintendent, and forwarded to
the Regional Office. This is one of the best prospects ever pre-
pared in the Southwestern National Monuments.
Casa Grande--Some revamping has been done in the modern
rooms and some Papago material which has been in storage was placed
on display. Work is nearly finished in the preparation of the
skeleton display and its exhibit case -- and again caliche has
proven to be a very valuable aid.

Chiricahua--The new Massat Point exhibit has been in-
stalled. Rebuilding the frame and installing the 40 X 60 inch plate
glass proved to be quite a task. A new glass-covered orientation
map has been built and installed in the museum.
A picture of the famous Indian Chief, Cochise, which appears
in a book "Death in the Desert" by Paul I. Wellman, was called to the
attention of monument personnel by a visitor from California. The
book was borrowed from the California State Library and a picture of
Cochise made for the museum.

Gran Quivira--A new fluorescent light fixture was installed
in the small exhibit case which completes the lighting arrangement
for all cases. Artifacts within the case were rearranged.
Montezuma Castle--A fine multiplex showing National Monu-
ments within the State of Arizona was completed and installed by
Pierson and Sutton in the new section of the Castle museum. A nice
frame, made by Jimmy Brewer, was built for the Paul Coze oil painting
of the Castle and donated by the Southwestern Monuments Association.
However, due to lack of space, this painting was loaned to Tuzigoot
for display there.

Research and Observation

Headquarters Staff--A request was received from the Univer-
sity of Arkansas for samples of Southwestern pottery types. This
was made the subject of a memorandum to the field. The collections
will be sent here, where they will be processed by Mr. and Mrs. King,
and made available for scientific institutions. Mrs. King is also
going through the extremely rich pottery dump at the back of Gila
Pueblo, searching it for rim sherds and typical samples.
An excellent preliminary check-list of plants from Great
Sand Dunes collected by Mr. Bean and identified by taxonomists at the
University of Colorado was received. A copy has been included in
the headquarters files and copies were forwarded to the Regional and
Washington Offices.

Research and Observation - continued

Headquarters Staff - continued--Two class "A" collecting permits authorizing the collection of common plants, rocks, and minerals at Tumacacori National Monument and Coronado National Memorial were processed and issued to Messrs. Jackson and Bullard.

The March issue of the Saguaroland Bulletin contains the published description of the new species of cactus discovered sometime ago by Mr. Supernaugh at Organ Pipe Cactus. This new member of the spiny clan has been given the name of Echinomastus acunensis.

Montezuma Castle--Areas of geological and archeological significance found in the lower section of the Verde Valley were photographed by Messrs. Sutton and Pierson. Some land snails collected sometime ago from drift brought down by Beaver Creek were identified by the California Academy of Sciences.

Miss Jean Pinkley of Mesa Verde sent the area a copy of the Mancos Times, Mancos, California, dated March 20, 1896, which carried an account of the finding of the small mummy on display in the Castle museum. This article, written by Richard Wetherill who actually discovered the mummy, has cleared up a lot of questions heretofore unanswered.

Saguaro--A new species of cactus was verified for the monument by Ranger Steele. It is Coryphantha vivipara var. aggregata, and has been added to the arboretum.

Tumacacori--The monument is benefitting from some research being done by a graduate student in the Anthropology Department, of the University of Arizona. This work is revealing some fascinating information about Tumacacori's population and its agricultural and livestock assets circa 1818 and 1820.

Also, Mr. Barton Wright, an archeologist on the staff of the Amerind Foundation, Dagoon, Arizona is engaged in some archeological exploratory excavations in the vicinity of Tumacacori. Mr. Jackson is looking forward with much interest to clarification of some archeological and, he hopes, historic horizons for his area from this work.

Loan Library

The appearance of the already attractive library was further enhanced by the hanging of the beautifully framed color pages from Arizona Highways, showing reconstruction of prehistoric scenes by Paul Coze. These pictures were framed by the staff at Tuzigoot, and are so attractive they catch the eyes of all visitors and bring forth many favorable comments.

Due to the generosity of Dr. Ernst Antevs the library is richer by 118 books, 107 separates, a series of Plateau from 1936 to 1952, 26 Medallion Papers (which were published by the Gila Pueblo under the direction of Mr. Gladwin and are now becoming quite scarce) and a complete series of the professional journal Ecology from 1936 to the present. This much appreciated gift from Dr. Antevs will strengthen greatly the library sections on geology, anthropology, and archeology.

The fifth edition of Poisonous Plants of the Desert

will be issued by July 1. First proofs of color photographs by Wyatt Davis, of Santa Fe, were received on the illustrations for the paper by Earl Jackson on the excavations of Montezuma Castle.

An author and an illustration in Tucson have been given the assignment to produce two booklets on animals of the Southwest

deserts and animals of the Southwestern Highlands.

The second edition of the Tonto trail booklet was received. It is the first booklet produced by printers in Globe and it is

an excellent job.

The Lollisard Specialty Company representative called

at our offices and four hours were spent with him on straightening out their account with the Association.

Ruin Stabilization

Archaeologist Vivian remained on temporary assignment in

the Regional Office until the 24th when he returned to Chaco Canyon. While in the Regional Office, he completed a draft of the

archaeological report for Gran Chivira. The artifacts from that

excavation were photographed and briefly summarized, but were left with Archaeologist Van Valkenburg who is making an exhaustive study

of them for inclusion in the final report.

Mr. Richert completed the dummy for the stabilization

report on the Lower Ruin at Tonto.

The new trailer house for use of the Mobile Unit arrived

during the month and is a very much appreciated addition.

Travel

Pleasant spring weather and early blooming wildflowers

combined to make March another record travel month, with a 33%

increase over the corresponding period last year. Arches showed

an increase of 325%; Montezuma Castle, 119%; Sunset Crater, 100%;

Talut Canyon, 266% and Tupatki 104%. On the record thus far, the

current travel year is off to a good start.

Visitors

Headquarters Office--Mrs. Randa Korns and Mrs. Margaret

Larragotte; Administrative Assistant Steve Leding and family,

Grand Canyon; Art White and Jack Williams, Chaco Canyon; George Sholl;

and Bob Cline, Big Bend; and Mrs. Hewitt Barton, Mrs. Hugh Miller,

Mrs. Tom Moran, Mrs. P. Patram and Mrs. Hugh Richardson, Santa Fe --

who also visited Tonto and Casa Grande, and seemed to be having lots

of fun wherever they went.

Aztec Ruins--Mr. and Mrs. Pinyon from Oregon -- This was

Mr. Pinyon's first return trip after having gone through the ruins

with a candle before 1900.

Bandelier--Superintendent and Mrs. Oscar Carlson, Mesa Verde;

Major L. H. Woolsten, British War Office, London England;

visitors from Germany, Sweden, Africa, Canada and Mexico.

Casa Grande--Mr. and Mrs. Freeman Tilden; 163 Telephone

"Monkeys," for a picnic and guided trip through the ruins.

Visitors - continued

Chaco Canyon--Superintendent and Mrs. Oscar Carlson, Mesa Verde; Mr. C. E. Bassell and Mrs. Otis Wetzel, State Land Office, Santa Fe.

Saguaro--Mr. and Mrs. J. R. B. Coleman, Chief, National Parks and Historic Sites Service, Canada; Mr. and Mrs. Freeman Tilden.

Tonto--Mrs. Wanda Kerns and Mrs. Margaret Larragoite, Regional Office; Mr. D. W. Peterson, U. S. Geological Survey, Globe; 70 North Phoenix High School students.

Tumacacori--Mrs. Kerns and Mrs. Larragoite; Mr. and Mrs. Freeman Tilden; Dr. Charles C. di Peso and Barton Wright, Amerind Foundation.

Tuzigoot--Two groups of Scouts from Phoenix; foreign visitors from Spain, Switzerland, France, England, and Canada.

White Sands--Gladys Swarthout and accompanist; Mr. and Mrs. Wm. L. Veffrey, St. Lawrence National Monument; 68 members of the Abilene Christian College Band.

Police Protection

Chiricahua--A long record of peace was broken on March 12 and the two following days when there was a series of thefts from campers in the area and from a cabin at the Faraway Ranch. The culprits were apprehended on the night of the 14th. There were two 16-year-old youths, well armed with high-powered rifles and knives. All loot taken from the area was recovered.

Saguaro--Two Javeline hunters were apprehended well inside the monument boundaries. They were arraigned and bound over to the U. S. District Court.

Soil and Moisture Control

Chaco Canyon--Sixteen thousand, eight hundred rooted willows and thirty-two hundred rooted cottonwoods were received from the nursery at Bernalillo on the 23rd and the S&MC crew of seven started to work on the 24th. Plans call for planting these and an additional 20,000 willow cuttings to round out the S&MC program for the year.

Mr. Balch was in the area for three days to get this program underway. He also took several pictures at the site of the proposed drop structure in the main Chaco Wash.

Personnel

Arches--Maintenance man Merle Winbourn resigned effective April 1 to accept an attractive business offer -- our best wishes go with him in his new work.

Casa Grande--Archeologist Jewell resigned and will return to California to work with juvenile delinquents.

Saguaro--As his farewell message from Saguaro, Superintendent King wrote the following: "This being my last report from Saguaro, I should like to express my appreciation to all the officers and employees of Region Three for their cooperation and courtesies during my assignment here. Especially those "unsung" people who have processed our personnel actions, purchase orders, and for assisting us to keep our property records in order. Their patience has helped us immeasurably in the administration of this national monument.

"My tenure of office here has proven to be one of the most interesting and stimulating of my career in the National Park Service."

"Both Norma and myself extend sincere good wishes to everyone in Region Three."

Thanks, Sam, for those kind words. We are sure you know that the best wishes of everyone in Southwestern National Monuments, and we are sure, in Region Three, go with you as you leave us for your new assignment.

Local Items

Archies--L. L. Taylor (Bish) a real friend of the National Park Service, left Moab to accept a six-year appointment as a member of the Industrial Commission of Utah -- he will be missed in this vicinity.

Aztec Ruins--Acting Superintendent Hastings received a label button and letter of commendation for ten years of cooperative service in taking weather observations in Arizona.

Great Sand Dunes--We all regretted very much to learn of the serious illness and death in Bisbee, Arizona, of Mrs. James F. Berner, sister of Superintendent Bean.

Montezuma Castle--All of the Castle personnel, including

wives and kids, took an active part in a Minstrel show sponsored by the Camp Verde Lions Club. Of course, the show was a success. Monument personnel also attended a joint meeting with the Cottonwood club which honored the District Governor. At this meeting, Pierson received special recognition from the Governor for his good work as Secretary of the local club.

Tonto--The Superintendent and Mrs. Sharp and Archeologist Wenger gave blood to the Red Cross Blood Bank in Globe. An unusual request -- a lady asked Mr. Wenger to watch her little boy, asleep in the car, and if he woke, to sing or croon "Back in the Saddle Again" --

March 25, 1953

MEMORANDUM

To: General Superintendent, Southwestern National Monuments

From: Superintendent, Tumacacori

Subject: Monthly Narrative Report for Coronado National Memorial for March, 1953

The second routine inspection of Coronado National Memorial was made by the superintendent and Ranger Bill Bullard, on March 24. We left Tumacacori at 9:00 a.m. in the government pickup truck, and returned at 6:15 p.m. Following a slightly different route to the one travelled last month, we made the trip in 163 miles for the round trip. We went from Tumacacori via the River Road to the Patagonia highway, then over the mountains to the southeast via Washington Camp, through Lochiel to our destination at Montezuma Pass. Return was down the east slope of the Huachucas, through Fry, past Fort Huachuca, through Sonoita, Patagonia, then back by the River Road to the Nogales-Tumacacori link of Highway 89.

The trip had been planned through Canelo, so that District Forest Ranger Bob Schmitt, of the Huachuca Division, Coronado National Forest, could accompany us and show us more clearly where boundaries were. For the second time it was impossible to connect with Schmitt for a joint trip.

By road to Montezuma Pass one crosses but one tiny corner of the Coronado National Memorial. However one can see out all over the area, save for the south face of Coronado Peak and some of its adjoining toe-end hills of the Huachucas. In fact, one can see so far that it almost makes one's stomach sag to think of the incredible vastnesses of prairie and oak-clad hills through which Coronado's forces marched.

We planted two handsome signs, made of framed one inch pine, with 4" posts at both ends. Letters were made of 1/8" masonite, 1 1/8" and 2" letter sizes, painted creamy white, against a stained dark-oak background color. One sign was planted at the roadside about 100 yards from Montezuma Pass on the west, the other about the same distance down from the pass on the east. The wording reads:

CORONADO
NATIONAL
MEMORIAL
United States Department of the Interior
National Park Service

"We are not too optimistic about how long these signs will last. For at the pass we found the sign (warning sign) planted there last month had met a sad fate. The sign board, two inches thick, was literally chopped to pieces from high power bullets. The heavy channel iron post on which the sign had been fastened was riddled with the same holes, and was almost cut in two from the bullets. Apparently the shooting was done with a standard army issue carbine, possibly by some sport from Fort Huachuca.

Scanning our area with field glasses gave a closer look than I had had before. Although the vegetative pattern looks essentially healthy, there is a uniform distribution of dead oak (a stunted tree species not identifiable in the field). This carries out a pattern which is familiar to us, for there are thousands of acres of range land in Santa Cruz county in which oak has died similarly. Despite all this dead oak, there is lots of live and healthy oak. Although drought is undoubtedly responsible for considerable oak kill, it is extremely likely that drought was simply an avenue for insect pests to finish many of the plants.

I don't know how much longer we can restrain our impulse to start getting an herbarium collection from the area, but at the present time, with so much demand on our money and time, it does not seem feasible to begin the systematic collecting that should be done.

"We drove the short distance east of Montezuma Pass to where Grace Sparkes lives. By pre-arrangement we found her in, and had a good talk with her and with her brother-in-law, Perry Bones, and a Mr. Jordan or Worthen, who has lived in the vicinity for some time. As many Park Service people know, Miss Sparkes is chairman of the Bisbee Chamber of Commerce's Committee on National Parks and Monuments, and of the Coronado International Commission of Arizona. She owns, in part, a lead and zinc mine a short distance from our boundary, northeast of the pass.

She deplored the vandalism to our sign, and said she and Mr. Jordan heard the gun fire at about dusk on the evening of March 21. They did not go up to the Pass to investigate, and do not know who did the shooting. In this border area it is not always too discreet to investigate gunfire at that hour of the day!

Although we sympathize with Miss Sparkes' natural desire to give wide publicity to our new Park Service unit, it was pointed out to her that from the field level we have deliberately refrained from splashing Coronado National Memorial in all the papers, because our present inability to offer frequent enough patrols to prevent vandalism would be all the more apparent if we induce a whole lot of additional people to come into the area now. I pointed out that once we have somebody stationed there, we will have every desire to let everybody know what we have to offer them, and asked if she shared my view.

Miss Sparkes conceded we had a point, from the protection angle, in soft pedalling the publicity, and that she would think it over and discuss it with Governor Pyle and the members of the Commission. But he also has the opinion that appropriations are going to be mighty hard to get for Coronado unless it can be proved the area is getting heavy

visitation.

Grace said that protection against vandalism to date under the Forest Service has been negligible. She didn't even know the name of the district Forest Ranger. However, she grasps, as readily as we do, the fact that no agency can give consistent protection from vandalism unless regular and constant patrols are possible. She pointed out one distressing problem which comes up just before Christmas every year; that apparently everybody in the border country goes up on our hills and chops himself down a nice Christmas tree. And we need all the trees we have, there!

A pleasant visit terminated, and Ranger Bullard and I headed back for Tumacacori.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
ARCHES NATIONAL MONUMENT
MOAB, UTAH

March 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Arches
Subject: Monthly Narrative Report for March, 1953

WEATHER: Continued mild, warm weather prevailed throughout the month. Only one light snowstorm occurred.

TRAVEL: A total of 960 people entered the area in 300 cars, an increase of 325% over the same period last year. Twenty-five states and four foreign countries were represented.

INTERPRETIVE SERVICE: Sixty-five contacts were made at Headquarters and 350 people apparently made use of the Wayside Exhibit, as this number signed the register. We estimate the Cove Nature Trail was used by 300 visitors. Twenty-seven requests for information were answered.

PERSONNEL: Merle Winbourn has resigned from his position as Maintenance man effective April 1. We all regret his departure, for his shoes will be hard to fill, but apparently he has been offered a business proposition which he cannot afford to turn down. We wish him all the luck in the world.

TRAILS: The Delicate Arch Trail project has been discontinued pending further field study by Regional and SWNM Headquarters personnel.

SIGNS: The Change over of our sign system is almost complete.

N. P. S. VISITORS: Ranger and Mrs. Ray Dobbins, Supervisory Ranger Monte Fitch, Colo. Nat'l. Mon; Supervisory Ranger Worthington, Mesa Verde.

GENERAL: Except for backfill the construction of the loading platform has been completed.

LOCAL NEWS: Loren L. (Bish) Taylor, a real amigo of the Nat'l. Park Service, especially Arches Nat'l. Mon., left Moab March 8, to accept the appointment as a member of the Industrial Commission of the State of Utah. Although the appointment is not a permanent one, 6 yrs., he will be missed by everyone in Moab.

Aztec Ruins National Monument
Aztec, New Mexico

March 24, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Aztec Ruins

Subject: Monthly Narrative Report for March, 1953

WEATHER: Five stormy periods throughout the report month slowed travel and brought a total of .67 of an inch of moisture. There was enough snow to cover the ground on March 3 and 20. Howling winds on March 19 and 20 filled the air with dust.

ADMINISTRATION: Hastings was on sick leave on March 11.

The Chaco Dodge pick-up was brought to Aztec Ruins after it was inspected by a mechanic and found to be in need of a major motor overhaul.

The Weather Bureau in Phoenix sent Hastings a label button and letter of commendation for ten years co-operative service in taking weather observations in Aztec.

PERSONNEL: The arrangement with James W. Corson, WAE Tour Leader, to work on Saturdays and Sundays was suspended on February 24.

Acting Superintendent Hastings has completed his first month at Aztec Ruins after an absence of eleven years. Most of his household goods were left in Chaco and he is campin, out in the Superintendent's residence at Aztec. Twenty-four hour electricity which comes at the flick of a switch is being enjoyed.

SOUTHEASTERN MONUMENTS ASSOCIATION: An inventory was taken of all items for sale and the records brought up to date.

VISITOR TRAVEL: There were 934 visitors in 283 cars. This was 152 more visitors than were counted in March, 1952. Six hundred and forty-six visitors took the full trip through the ruins in 108 groups and 165 people in 40 groups were given "quickie" glimpses of the ruins. These are the people who, because of insufficient time or bad weather, did not take the regular trip. Total for the first three months of 1952 was 1953 visitors while for 1953 it is 2324.

PUBLICITY: At the request of Larry McSwain, Editor, Gallup Independent an article on Aztec Ruins was written for the Ceremonial Edition and an article on Chaco is in preparation.

MAINTENANCE: Both restrooms were repainted and two new toilet seats were installed.

The drainage line on the north side of the monument was checked and found to be in working condition.

Some of the high brush in the patio behind the museum was removed. Dead weeds and leaves have been removed from the west section of the pueblo and the drainage tiles were cleaned.

Metal lath to cover the trash burning barrels was brought from Chaco. Also lumber for making another picnic table.

Work is being done on the drinking fountain which was about to topple over and for its entire length the drain is completely obstructed with roots.

An elevation sign was made and will be put up as soon as it is stained.

NATIONAL PARK SERVICE VISITORS:

March 2 - Walter Art White from Chaco

March 7 - Ron Watson and John Finkley from West Verde

March 15 Jack Williams enroute to Chaco

NON-PARK VISITORS: On March 13 Mr. and Mrs. Pinyon were here from Oregon. This was Mr. Pinyon's first return trip after having gone through the ruins with a candle before 1900.

Momer F. Hastings
Acting Superintendent

March 29, 1953

Memorandum

To: General Superintendent
From: Superintendent, Bandelier
Subject: Monthly Narrative Report, March 1953

Weather

The weather during March was generally mild with a few windy days. Temperatures ranged from a low of 8 degrees on the 4th to 75 on the 26th. .57 inches of moisture was received early in the month but the latter part of the month was very dry.

Special Activities

A staff meeting was held for all employees on the 2nd to discuss the roads and trails program for this spring, fish planting, transplanting trees in the parking area and nature trail, and the need for washable Park Service emblems.

Inspections

Archeologists Vivian and Onstott, with Fred Wendorf, Laboratory of Anthropology, made an inspection of Otowi and Rainbow House ruins on March 16 to work out a stabilization program for next year. The major project will be the stabilization of Otowi.

General Publicity

The March issue of Natural History magazine carried a very fine article on Bandelier by Nell Murbarger, Costa Mesa, Calif.

Maintenance

Temporary repairs were made on the roof of the equipment shed and the portal of the headquarters comfort station to prevent them from leaking.

Considerable work was accomplished on new signs for Cave Kiva, Snake Kiva, the entrance to the campground, and Tsankawi ruin.

The power winch was changed from the 6x6 to the Chevrolet 4x4.

Roads and Trails

The State Highway department graded the unpaved portion of the approach road and put it in fairly good condition for spring travel.

The maintenance crew used about 400 gallons of oil to patch the temperature cracks in the paving to the checking station in

preparation for possible seal coating this spring.

Twelve trees were planted in the island of the parking area to replace ones that had died out.

1000 gallons of MC-3 oil was purchased for use in surfacing the ruins trails. This project will get underway as soon as weather permits.

Concessioner

The Director has ruled that the sub-concessioner who operated the dining room at Frijoles Canyon Lodge last summer is unacceptable to the Park Service and will not be permitted to return this year. Several interested parties were interviewed but no selection has been made for a sub-concessioner for this summer. Mrs. Evelyn Frey returned to the Lodge on the 25th and a decision will be made in the next few days.

Interpretive Service

There were 802 visitors conducted on 85 tours of the ruins this month.

A new self-guiding trail to Tsankawi ruin in the Otowi section was put in to operation on the 17th.

Some difficulty is still being experienced with the tape breaking on the tape recorder and selectroslice. It is believed that this can be remedied by attaching a leader strip since most of the breakage occurs within the first few feet of tape. The recording and slides continue to be very well received and they are used at every opportunity.

Travel

Travel finally got back in to the plus column after showing a decrease under last year for the past four months. There were 1639 visitors as compared with 1315 last March. Total visitors for the calendar year is now 4020.

Visitors

Visitors to Bandelier this month included:

Dr. Ina Hanack, Bonn, Germany
Dr. Maria Dehnie, Berlin, Germany
Torvald Flojer, Dgursholm, Sweden
Bill and Anita Barber, Gold Coast, Africa
Mr. and Mrs. Claude Carbier, St. Lambert, Canada
Major L.H. Woolston, British War Office, London, England
Eddie Roybal, Mexico City, Mexico
Johnny Madina " " "
Ladden Martinez " " "
Mr. and Mrs. Glenn Haynes, Region Three Office
Mr. and Mrs. John Mosely, " " "
Mr. and Mrs. Jeffries, Maintenance, Ft. Laramie National
Historic Site.
Superintendent and Mrs. Oscar Carlson, Mesa Verde Nat'l Park.
21 seniors, Roy, New Mexico High school
12 Boy Scouts, Chama, New Mexico

proposition for possible seal hunting this spring.

Twelve teams were landed in the island of the parking area in replace ones that had died out.

XXXX gallons of NO-2 oil was purchased for use in unloading the various trailers. This project will get underway as soon as weather permits.

Construction

The Director has noted that the sub-contractors who operated the landing room at Port of Entry Lodge last season in unloading the various trailers and will be permitted to return this year. Several interested parties were interviewed on the subject of the work and the sub-contractors for this season. Mr. Smith they referred to the lodge on the 15th and a decision will be made in the next few days.

Investigative Service

There were 60 visitors recorded in the house in the winter this season.

A new self-feeding small to medium size in the house section was put in its operation on the 15th.

Some attention is still being given to the traps spreading on the traps and seal hunting. It is believed that this can be handled by a number of people and that the traps can be set in the first few days of the season. The trapping and other methods by which seal hunting can be used in every opportunity.

Travel

Travel finally got down to the low season after showing a decrease in the last year for the year. There were 100 visitors as compared with 110 last year. Total visitors for the winter year is now 100.

Visitors

Visitors to the house this winter include:

- Mr. and Mrs. Smith, Port of Entry
- Mr. and Mrs. Jones, Port of Entry
- Mr. and Mrs. Brown, Port of Entry
- Mr. and Mrs. White, Port of Entry
- Mr. and Mrs. Black, Port of Entry

Building Fire Protection

Supervisory Ranger Foy Young attended the Region Three Fire Control conference at Lake Mead from March 16 to 20. Emphasis was placed on building fire control this year.

March 16, 1938

Fred W. Binnewies
Fred W. Binnewies
Superintendent

Subject: Building Fire Protection Report for March, 1938

Summary: All people in the area were advised that there is a possibility of fire in the area and that they should be prepared to fight it. The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

Details: About 1000 people were present at the conference. The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

Notes: All fire control plans are in good shape. The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

Remarks: The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

Summary: The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

Remarks: The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

Summary: The fire control conference at Lake Mead was held from March 16 to 20. The emphasis was placed on building fire control this year.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

March 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Canyon de Chelly

Subject: Monthly Narrative Report for March, 1953

Travel: 88 people in 31 cars this month. This figure is slightly over that for the same period last year. However, the current calendar year shows an increase of about 64% over travel for the first three months in 1952. Guide and contact service totaled 21 hours.

Weather: About normal for this time of the year. Several days of high winds and occasional snow flurries. Total precipitation, however, amounted to only .19 of an inch. High-low temperatures ranged from 68 to 11.

Roads: All approach roads are in good shape. Recent bladings by the Indian Service have placed them in better condition than they have been in for years. Many detours, however, are necessary between Canado and Window Rock due to an all weather highway now being constructed. They hope to complete this job by July 1.

N.P.S. Visitors: Jack Wade and Earl Worthington from Mesa Verde N.P. and Monte Fitch of Colorado N.M. on March 22.

Signs: In accordance with current regulations all informational and directional signs have been corrected to show the wording "National Park Service" appearing above the lettering "United States Department of the Interior". Also, new highway signs were constructed and placed between monument headquarters and White House overlook.

Maintenance: The entire exposed exterior wood-work on the Sup'ts. residence and the administration building was given a coating of linseed oil. All automotive equipment was completely serviced and necessary repairs were made by monument personnel.

Administration: One trip was made to Gallup to obtain supplies for the changing of the tool room into a comfort station. 56 hours of annual leave were taken by the Superintendent during the month.

Memorandum

General Investigation

From: Special Agent in Charge, New York

Subject: Confidential Informant Report for March, 1953

Summary: The informant in New York City has advised that the subject of this report has been active in the past few months. The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

Details: The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

Comments: The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

Conclusion: The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

Recommendations: The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

Administrative: The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

Administrative: The informant has advised that the subject has been seen at various places in New York City, including the New York Public Library, the New York City Hall, and the New York City Court House. The informant has also advised that the subject has been seen at various places in New York State, including the New York State Capitol Building, the New York State Court House, and the New York State Prison.

-----CAPULIN NATIONAL MONUMENT,

March 27, 1953

Memorandum To; The General Superintendent
Southwestern National Monuments
National Park Service
Globe Arizona

From; Homer J. Farr, Superintendent
Capulin Mountain National Monument

Subject; Monthly Narrative Report,

VISITORS

Estimated to be four hundred fifty for the month, making a total of four thousand seven hundred twenty five since Oct 1st '52, and twenty four thousand five hundred twenty five for the fiscal year to date,

WEATHER

Has been rather mild for March, some wind but not excessive, no moisture has fallen, I would say we have had about from five to ten degrees warmer than our average March,

Flora and Fauna

Vegetation in the park is getting extremely dry and fire hazard is again with us, requiring considerable checking, cleaning and observation. We have an extra amount of nice deer this spring and they have come thru the winter very well,

Roads

have been maintained all thru the month and are today in fine shape, Except the dust,

Information Pamphlets,

Twenty two have been mailed upon request and about seventy five have been handed to visitors, We have a sufficient supply for the summer,

Very Respectfully,
Homer J. Farr,
Superintendent

CASA GRANDE NATIONAL MONUMENT

COOLIDGE, ARIZONA

March 25, 1953

MEMORANDUM

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for March, 1953

General: It has been a most salubrious month at Casa Grande, with only one day of rain and one day of unpleasant winds. Visitor rate continues to show a general increase.

Weather: .51 inches of rain fell on March 2. A dust storm occurred March 20. Maximum temperature 92 degrees, minimum 31 degrees.

Interpretive Service: During the month 5,326 visitors arrived at Casa Grande, 3031 of these visiting the ruin in 189 guided trips.

<u>Visitor Summary:</u>	<u>1953</u>	<u>1952</u>
March	5,326	6,149
Increase	177	

Noteworthy Visitors:

March 4 17 children from the Indian school at Sacaton. As usual these were 4th graders.

March 17 Art White and Jack Williams from Chaco.

March 18 Mrs. Bicknell entertained the following ladies from Globe: Mrs. Patraw, Mrs. Barton, Mrs. Miller, Mrs. Moran, and Mrs. Richardson.

March 19 Mr. and Mrs. Freeman Tilden

March 22 163 "Telephone Pioneers," enjoying a picnic and guided trips through the ruin.

Administration and Protection:

Thirteen inquiries were received, the Adamsville site inspected, and other routine matters disposed of.

There has not yet been time to prepare an estimate on the cost of repairing our entrance road. The engineer in charge of the construction work recently pursued on the main highway past the monument indicated that it would be a waste of time to patch the cracks in our road; the road has no substantial road-bed. However, it is planned to pursue this project this month.

Photographs have been taken showing some of our problem areas here, for example the erosion occurring to the compound walls. Mud is washing rapidly from under the wire covering, leaving a rather hideous spectacle of twisted and rusting wire.

Maintenance: Other than routine, the service truck has been painted.

Museum: Don Jewell has done some revamping in our modern rooms, placing on display some Papago material which had been in storage.

Work is nearly finished in the preparation of the skeleton display and its exhibit case. Again caliche has proven to be a convenient aid.

Mr. Jewell is preparing a summarizing report of our recent museum activities.

Personnel:

Ranger Clancy has been under the weather several times this month, suffering further siege of the flu. He has taken, however, only one day of sick leave.

Archaeologist Jewell has resigned his position here. He will return to California on April 3 to an earlier occupation of working with juvenile delinquents.

A. T. Bicknell
Superintendent

1. The Board shall have the authority to suspend or terminate the employment of any employee who is found to be in violation of the Code of Ethics.

The following is a list of the names of the persons who have been

NATIONAL PARK SERVICE
Chaco Canyon National Monument
Bloomfield, New Mexico

March 26, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for March, 1953

Weather

Numerous windy days with great variations in temperature have characterized the weather this month. Several dust storms have occurred which made outside work difficult if not just about impossible at times. The high for the month was 72 on the 25th and the low was 10 on the night of the 5th. A total of .44 of an inch of precipitation was recorded. This was in the form of sleet, rain, and snow. The first thunder storm of the year occurred on the 9th.

Travel

This month showed an increase as usual. A total of 114 people in 38 cars visited the area. This is the highest travel for March that has been recorded for Chaco. Of this number, 43 people took the tour through Pueblo Bonito in 11 trips and another 34 people were contacted in the museum and given orientation talks.

Administration

Daily duty was maintained except for lieu days and 16 hours annual leave. Sixteen requests for information were answered. Quite a bit of time was spent on filing and general office work and some time was spent on the catalogue file for the library.

General

The new trailer which the Mobile Unit purchased created quite a sensation not only with monument personnel but with the local Navajos as well. It is extremely nice and Mr. and Mrs. Richert are very proud of their new summer home. The trailer has now been put into use and at present is at Tuzigoot where the Mobile Unit is doing some work.

A rewrite of the rough draft for the proposed self-guided trail at the B C sites was started. It is hoped that this trail can be put into use before the heavy travel season begins.

Several directional signs were laid out. These are to be routed as soon as the router is returned. At present it is being used by the personnel at Aztec Ruins.

A total of five horses and burros were chased off the monument, but despite the best efforts one mule remains. This beast just takes to the arroyo and won't come out and since only one man is on duty an uneasy truce exists until reinforcements can be obtained.

A shadow board for the light plant shelter at the new residences was constructed and a new incenerator for the office was made.

Two men, Mr. C.E. Bassell and Mr. Otis Wetsel, from the State Land Office were in on the morning of the 11th. They were looking over land which Mr. Edward Sargent is exchanging for state lands to the east of the monument.

Roads and Trails

Both of the approach roads have been in reasonably good condition this month. The south road was graded by the Indian Service from the boundry to Seven Lakes.

One day was spent in filling up and grading a long mud hole in the road to the new residences. Three dump truck loads of fill were put in it and the S&MC tractor was used to level it.

Mr. Moran and Mr. Carter from the Regional Office spent three and a half days surveying the new road which is to be constructed from the present office to the new headquarters area. Several road problems were discussed with them while they were here.

One afternoon was spent checking the length and size of the culverts on the old road that the C.C.C. started building. These culverts are to be used on the new road.

Several culverts were cleaned and the tumbleweeds were burned from around them. The remaining culverts are scheduled to be cleaned this coming month.

Maintenance

Routine maintenance was kept up during the month.

Grounds

A total of two man days was spent on grounds cleanup this month. The high winds have made this job difficult and a continuing problem.

The Navajo crew spent several days on building removal and this project is nearing completion.

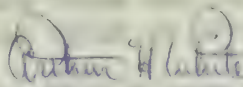

Soil and Moisture Control

Sixteen thousand, eight hundred rooted willows and thirty two hundred rooted cottonwoods were recieved from the hursery at Bernalillo on the 23rd and the S&MC crew of seven started to work on the 24th. Plans call for planting these and an additional 20,000 willow cuttings to round out the S&MC program for the year.

Mr. Balch was in the area for three days to get this program under way. He also took several pictures at the site of the proposed drop structure in the main Chaco Wash.

Visitors

- 11th- Mr. C.E. Bassell and Mr. Otis Wetzel, New Mexico State Land Office, Santa Fe.
- 19th- Mr. and Mrs. Ben Zerby, Saguaro National Monument
- 22nd- Mr. and Mrs. Jim Wilson, temporary ranger at Bandolier National Monument last summer.
- 23rd- Mr. Balch, Regional Office
- 23rd- Mr. Moran, Regional Office
- 23rd- Mr. Carter, Regional Office
- 24th- Superintendent and Mrs. O.V. Carlson, Mesa Verde, National Park

Chiricahua National Monument
Dos Cabezas, Arizona

March 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather. The first two weeks of this month were quite stormy, with rain, snow and high winds. The last two weeks have given us excellent weather and travel has been increasing.

New Construction. Ranger Barrel brushed out a new section for the Massai Point Nature Trail and did some rock removal and grading of same. It is now a fair foot trail, and we are working on a new guide sheet to cover the additional exhibits.

Approaches to Monument. All approach roads are now in fair condition. The Cave Creek road from Rodeo over the mountains was closed by snow until about ten days ago, but is now clear and dry.

Interpretive Service. 1186 visitors were contacted in the museum in 330 parties. Two auto trips and two hikes were made with visitors, consuming about 7½ man hours for the force. Twelve visitors were counted using the Foothill Forest Nature Trail and an estimated seventy-six made use of the Massai Point Natural History Trail.

Museum Activities and Exhibits. The framework for the new Massai Point Orientation Station exhibit has been worked over and the exhibit installed. Rebuilding the frame and installing the new 40 x 60 inch plate glass was a job which we are glad to have behind us.

A new glass-covered orientation map has been built and installed in the museum. It replaces the badly fingerprinted map which had been in use for many years.

Last month a California lady informed us that she had found a picture of Cochise in a book "Death in the Desert" by Paul I. Wellman. As we had previously known of no picture of this famous Indian Chief, we wrote to the California State Library in Sacramento and were very grateful to be able to borrow the book for a month. A picture has been made for our museum and we have enjoyed reading the book.

Chickadee National Monument
Don Edwards, Attorney

March 16, 1933

Memorandum

To: General Superintendent

From: Superintendent, Chickadee

Subject: Chickadee National Monument

Yesterday, the first two miles of this trail were walked along with me, and with others. The first two miles have been an excellent section and travel has been improved.

General Superintendent, Ranger District, and a few others, the first two miles of this trail and the road through the forest of some. It is now a fair foot trail, and we are now on a new line about to cover the additional mileage.

Improvement in Monument. All previous work has been in the direction of the trail. The trail has been improved in the direction of the trail. The trail has been improved in the direction of the trail. The trail has been improved in the direction of the trail.

Information Review. This review was conducted in the summer of 1932. The review was conducted in the summer of 1932. The review was conducted in the summer of 1932. The review was conducted in the summer of 1932. The review was conducted in the summer of 1932.

General Activities and Conditions. The progress for the summer was very satisfactory. The progress for the summer was very satisfactory. The progress for the summer was very satisfactory. The progress for the summer was very satisfactory. The progress for the summer was very satisfactory.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Increase in Travel. 1520 visitors came to Chiricahua this month. This is approximately 50% ahead of March of 1952. Travel for the calendar year to date is 4794 which is 14% ahead of last year at this date.

Visitors. Last month we reported that Justice of the Supreme Court William Douglas had killed a mountain lion a short distance north of Chiricahua. Since then we have learned that he was brought to the Monument for a short visit sometime after our working hours by one of the local lion hunters.

Professional color postcard photographer W.V. Boltens-tern and family visited the area on the 19th.

Personnel Clerk Stratton, Mrs. Stratton and some friends made a brief visit to Chiricahua March 24.

Police Protection. Our long record of peace was broken on March 12. On that and the next two days two families of campers were robbed of food and camping equipment, maps and first-aid kits were stolen from the museum, and the cabin of an employee at the Faraway Ranch was stripped bare. In spite of searches, patrols and roadblocks set up by members of the staff, and in spite of the able and willing assistance of Deputy Sheriffs from the nearest towns, the culprits were not apprehended until late on the night of the 14th. At that time Clayton Van Nobles and his Indian "wife" were captured near Elfrida. As the Deputy Sheriff who made the capture was seriously stabbed by Van Nobles, and as the pair was well armed with several high-powered rifles, we are not particularly sorry that they were captured by someone else. The two sixteen-year-old thieves are now resting comfortably in the County jail in Bisbee. No disposition of the case has as yet been made by the County authorities, but all loot taken from this area has been recovered.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tumacacori National Monument
Tumacacori, Arizona

March 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for Coronado National Memorial for
March, 1953

The second routine inspection of Coronado National Memorial was made by the superintendent and Ranger Bill Mullan, on March 24. We left Tumacacori at 9:00 a.m. in the government pickup truck, and returned at 6:15 P.M. Following a slightly different route to the one travelled last month, we made the trip in 163 miles for the round trip. We went from Tumacacori via the River Road to the Patagonia highway, then over the mountains to the southeast via Washington Camp, through Lochiel to our destination at Montezuma Pass. Return was down the east slope of the Huachucas, through Fry, past Fort Huachuca, through Sonpita, Patagonia, then back by the River Road to the Nogales-Tumacacori link of Highway 89.

The trip had been planned through Canelo, so that District Forest Ranger Bob Schmitt, of the Huachuca Division, Coronado National Forest, could accompany us and show us more clearly where boundaries were. For the second time it was impossible to connect with Schmitt for a joint trip.

By road to Montezuma Pass one crosses but one tiny corner of the Coronado National Memorial. However one can see out all over the area, save for the south face of Coronado Peak and some of its adjoining toe-end hills of the Huachucas. In fact, one can see so far that it almost makes one's stomach sag to think of the incredible vastnesses of prairie and oak-clad hills through which Coronado's forces marched.

We planted two handsome signs, made of framed one inch pine, with 4" posts at both ends. Letters were made of 1/8" masonite, 1 1/8" and 2" letter sizes, painted creamy white, against a stained dark-oak background color. One sign was planted at the roadside about 100 yards from Montezuma Pass on the west, the other about the same distance down from the pass on the east. The wording reads:

CORONADO
NATIONAL
MEMORIAL

United States Department of the Interior
National Park Service

We are not too optimistic about how long these signs will last. For at the pass we found the sign (warning sign) planted there last month had met a sad fate. The sign board, two inches thick, was literally chopped to pieces from high power bullets. The heavy channel iron post on which the sign had been fastened was riddled with the same holes, and was almost cut in two from the bullets. Apparently the shooting was done with a standard army issue carbine, possibly by some sport from Fort Huachuca.

Scanning our area with field glasses gave a closer look than I had had before. Although the vegetative pattern looks essentially healthy, there is a uniform distribution of dead oak (a stunted tree species not identifiable in the field). This carries out a pattern which is familiar to us, for there are thousands of acres of range land in Santa Cruz county in which oak has died similarly. Despite all this dead oak, there is lots of live and healthy oak. Although drouth is undoubtedly responsible for considerable oak kill, it is extremely likely that drouth was simply an avenue for insect pests to finish many of the plants.

I don't know how much longer we can restrain our impulse to start getting an herbarium collection from the area, but at the present time, with so much demand on our money and time, it does not seem feasible to begin the systematic collecting that should be done.

We drove the short distance east of Montezuma Pass to where Grace Sparkes lives. By pre-arrangement we found her in, and had a good talk with her and with her brother-in-law, Parry Bones, and a Mr. Worden or Worthen, who has lived in the vicinity for some time. As many Park Service people know, Miss Sparkes is chairman of the Bisbee Chamber of Commerce's Committee on National Parks and Monuments, and of the Coronado International Monument Commission of Arizona. She owns, in part, a lead and zinc mine a short distance from our boundary, northeast of the pass.

She deplored the vandalism to our sign, and said she and Mr. Bones heard the gun fire at about dusk on the evening of March 21. They did not go up to the Pass to investigate, and do not know who did the shooting. In this border area it is not always too discreet to investigate gunfire at that hour of the day!

Although we sympathize with Miss Sparkes' natural desire to give wide publicity to our new Park Service unit, it was pointed out to her that from the field level we have deliberately refrained from splashing Coronado ~~Memorial~~ National Memorial in all the papers, because our present inability to offer frequent enough patrols to prevent vandalism would be all the more apparent if we induce a whole lot of additional people to come into the area now. I pointed out that once we have somebody stationed there, we will have every desire to let everybody know what we have to offer them, and asked if she shared my view.

Miss Sparkes conceded we had a point, from the protection angle, in soft pedalling the publicity, and that she would think it over and discuss it with Governor Pyle and the members of the Commission. But she also has the opinion that appropriations are going to be mighty hard to get for Coronado unless it can be proved the area is getting heavy

visitation.

Grace said that protection against vandalism to date under the Forest Service has been negligible. She didn't even know the name of the district Forest Ranger. However, she grasps, as readily as we do, the fact that no agency can give consistent protection from vandalism unless regular and constant patrols are possible. She pointed out one distressing problem which comes up just before Christmas every year; that apparently everybody in the border country goes up on our hills and chops himself down a nice Christmas tree. And we need all the trees we have, there!

A pleasant visit terminated, and Ranger Bullard and I headed back for Tumacacori.

Earl Jackson
Superintendent

Report 1ml

March 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

This month, there were 140 visitors which is an increase of 35 per cent over a year ago. These people came in 41 automobiles, and 115 of these visitors took a trip around the Rock in 27 parties. Only 6 hardy souls went over the top of the Rock, and 35 persons sat around the war office and listened to an orientation talk.

We have had only two or three nice days this period. The rest have been mighty bad. The warmest was 55 degrees and the coldest was a 7 degrees below zero Fahrenheit. There was 1.40 inches of moisture, most of which fell as snow. Our snow shovel surely shows the use it has had this last winter and it has not been idle all this month.

As the men who installed our furnace left immediately after it began to operate, from time to time we have had questions to ask the Holland Furnace Company representative in Gallup. This month, at no expense to the National Park Service, he made a trip out here to acquaint us with some of the operating problems. A mighty nice gesture on the part of the man and the Holland Furnace Company.

The technician came by, again at no expense to the National Park Service, and spent several hours working over our radio. When he finished, he went out to his car radio and stated that we were coming in like a commercial broadcasting station. We have not been able to raise Globe or Santa Fe the last few days, but it may be because they are not expecting us, and also because of the terrific amount of static, the number of foreign stations and the like on the same band lately.

Spring clean up, paint up and spruce up is still going on. The rest room ceiling and walls were washed, the floor waxed several times, the place was generally cleaned up and the water turned in. We replaced one sign, at the Xuni cut-off, which had been knocked down. We painted the walls of the living room, the dining room and the hall of the superintendent's

residence, refinished the floors in the residence and the Office, and are now in the process of cleaning out the wareroom.

Six or seven man days were spent on the road. We have hauled and spread some cinders and spread other cinders already on the road so that there is one uniform coat over all the road. This is the first time we have been able to do this since early last fall because of the snow that we have had. The road is in excellent shape. The approach roads have been in good shape most of the month.

The Ramah PTA asked the superintendent to give a talk one evening, which he did. The Principal of the school was present and afterwards asked if the superintendent would give a talk to the Ramah High School Science Class which was due a few days later.

National Park Service visitors included Robert E. Moore, Mark E. Miller, Harold M. Cateliff, F. Young and William M. Richardson.

Gran Quivira National Monument
Gran Quivira, New Mexico

March 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Gran Quivira
Subject: Monthly Narrative Report for March

Weather. Rain and snow and general adverse weather were received the first half of the month giving way to high winds and warmer temperatures during the latter half. Maximum temperatures ranged from 37 to 64 degrees and minimum temperatures from 12 to 38 degrees. Moisture totalled 1.53 inches.

Inspections. Mr. Castellum spent the 19th familiarizing himself with the problems and needs of the area and discussing with the Superintendent all phases of monument operation.

Museum. A new fluorescent light fixture was installed in the small exhibit case which completes the lighting arrangement for all cases. Artifacts within the cases were rearranged pending the return of material now under study in the Regional office.

Special Activities. The Superintendent attended a road meeting with Highway Commissioners and Boosters of Highway 10 at Santa Fe on February 26.

Another road meeting of members of the Mountainair Chamber of Commerce, the Carrizozo Chamber of Commerce, and interested persons in the improvement of Highway 10, met at Gran Quivira on the 19th. The Superintendent attended.

Approach Roads. These roads were in variable condition this month. Several parties of monument visitors reported spending from a half-hour to three hours shoveling out of sand drifts on Highway 10 south of the monument. Poor road conditions have always been a source of irritation to the local citizenry and now that our summer visitor travel is beginning we can expect to hear similar complaints from them.

Superintendent, Grand Canyon

Subject:

Wildlife Management Report for 1933

Summary. This report covers the work of the Wildlife Management Section of the Grand Canyon National Monument during the year 1933. The work of this section has been directed toward the protection and management of the wildlife resources of the monument. The following is a summary of the work done during the year.

Game Management. The game management work of the section during the year 1933 has been directed toward the protection and management of the game resources of the monument. The following is a summary of the work done during the year.

Game Management. The game management work of the section during the year 1933 has been directed toward the protection and management of the game resources of the monument. The following is a summary of the work done during the year.

Interpretation. Guide services were provided to 93 persons in 25 parties for an average of 40 minutes per party and 27 parties totalling 62 persons used the self guide trail. The self guiding facility is being used by an increasing proportion of visitors especially on the week ends when it is only possible for the Superintendent to contact parties and provide interpretation at the museum.

The text for the self service pamphlet was received from Naturalist King during the month and is being held until easel exhibit material is received from the Region. The placement of additional markers and easel stands is being withheld pending integration of easel material and pamphlet text.

Travel. There were 165 visitors in 53 cars this month which is an increase of 58 percent over 1952. Out of State travel is increasing and we anticipate a heavy vacation travel this summer.

We have been informed that the Navajo Trail Tours will include Gran Quivira National Monument in a weekly scenic tour from Albuquerque.

Maintenance. A routing tool was obtained from Chaco Canyon and four new informational signs were routed, painted, and installed. Rock bases were provided for the new signs.

Road and trail maintenance and grounds cleanup were conducted periodically during the month.

A trash receptacle was painted, lettered and installed in the parking area.

Ray B. Ringenbach
Superintendent

GREAT SAND DUNES NATIONAL MONUMENT

Alamosa, Colorado

March 28, 1953

Memorandum

To: General Superintendent
From: Superintendent, Great Sand Dunes
Subject: Superintendent's Narrative Report for March, 1953

Weather Conditions

Cold windy weather for most of the month reduced travel below that of February. Only 2.9 inches of snow fell and San Luis Valley residents are becoming quite concerned over the lack of moisture.

Maximum temperature - 62° on March 25
Minimum temperature - 0° on March 4
Precipitation - 0.20 inch (2.9 inches of snow)

Maintenance and Rehabilitation

Painting of the walls of the back bedroom and the woodwork in the dining room was accomplished this month. This leaves only the woodwork in the bedroom yet to be painted on the interior of the superintendent's residence.

A log bench was constructed and placed at the Dunes Overlook station on the Montville Nature Trail. Considerable time was spent planing picnic tables in preparation for painting with linseed oil.

The monument road was graded once. It is still in poor shape, however, and little can be done with it until we receive some moisture.

Approach Road

The approach road from Highway 17 is in fair shape except for a stretch of three miles at the west end which is very soft.

Alamosa County has begun improvement of the road south to U. S. 160 so that this road will soon be an acceptable alternate approach. The narrow rocky winding road above the Zapata Ranch is being widened and straightened.

Research and Observations

All of the plant specimens collected last summer were mounted before I went on leave. This month I hope to type out the labels and finish up the job.

Increase in Travel

Travel increased 70% from 197 people last March to 333 people this month. This was still below the 422 visitors recorded for February, however.

Personnel

Mr. Ralph H. Taylor was entered on duty as laborer-leadman on March 5 as I found it necessary to take considerable annual leave due to the extended illness and death of my sister, Mrs. James E. Werner, of Bisbee, Arizona.

Montezuma Castle National Monument
Camp Verde, Arizona

March 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Montezuma Castle

Subject: Monthly Narrative Report for March 1953

Weather: Although cold and stormy the first part of the month, weather from March has been good. At present, day temperatures are beginning to read in the high 70's, and there is a feeling of spring in the air. Again very little moisture was recorded as only .71 of rain fell during the month.

Special Activities: During the week of April 15 - 21, I attended the Region Three Fire Control Training Conference held at Lake Mead. It was agreed by all present that this was a very successful school and that the trainees received a lot of valuable training in fire control methods. I feel fortunate to have been selected to attend.

Travel: Travel while slow the first few days of the month has been increasing steadily. 1,968 people in 656 cars visited the Castle and 1,096 people in 342 cars went to the Well. This totals 3,064 visitors to the area as compared to only 1,400 visitors for March of last year.

Museum Exhibits: A fine multiplex showing National Monuments within the State of Arizona was completed and installed by Pierson and Sutton in the new section of the Castle museum. Also erected was a bird feeding stand which is located just outside the museum window so that visitors may watch birds feed. Jimmy Brewer built a nice frame for the Paul Coze oil painting of the Castle which was donated recently to the museum by the SWMA. However, since we do not have museum space to properly display this painting, we have loaned it to Tuzigoot for display there.

Maintenance and General Work: Several small painting jobs were accomplished during the month. They are the shelter for the model and seating arrangement, the bedroom in Residence No. Two, and the museum floor.

The 400 gallon pressure and storage tank for the Castle water system again developed a leak and had to be welded.

Page 2:

Archeological Survey: Pierson and Burroughs of Tusigoot spent one day at the Well mapping part of the surface ruins for inclusion in the archeological base map for this area.

Forms necessary for listing and describing archeological research projects were received from the Regional Office. It is planned to accomplish this listing as time permits.

Research and Observation: For the monument slide file, Sutton and Pierson spent a day photographing areas of geological and archeological significance found in the lower section of the Verde Valley.

From the California Academy of Sciences, San Francisco, was received identification of land snails collected some time ago from drift brought down by Beaver Creek.

A copy of a newspaper account (Mancos Times, Mancos, Colorado) dated March 20, 1896 of the finding of the small mummy on display in the Castle museum was received from Miss Jean Pinkley of Mesa Verde. This account was written by Richard Wetherill who actually discovered the mummy. This information has cleared up a lot of questions which heretofore have remained unanswered.

Local Items: All of the Castle personnel, including wives and kids, took an active part in a Minstrel show sponsored recently by the Camp Verde Lions Club. Needless to say, with such talent, the show was a success. We also attended a joint meeting with the Cottonwood Club which honored the District Governor. At this meeting, Pierson received special recognition from the Governor for his good work as Secretary for the local club.

JOHN O. COOK

John O. Cook
Superintendent

Navajo National Monument
Tonaless, Arizona

March 26, 1963

Memorandum

To: General Superintendent

From: Superintendent, Navajo National Monument

Subject: Monthly Narrative Report for March 1963

Travel: There were 18 visitors during March of 1963 as compared with 2 visitors during March of 1962. The record high for March, at Navajo, was established in 1951 with 86 persons.

Weather: The month has been rather dry and not too windy. Only .29 inches of precipitation was recorded. The high temperature for the month was 65 degrees and the low was 9°.

Special Visitors: Mr. and Mrs. S. Ledding and family and Mr. and Mrs. Walker and family, all of Grand Canyon were visitors on February 28.

Roads: Approximately 244 yards of dirt were hauled and placed on the Navajo roads. We have, accordingly, been able to cover most of the bare rock sections of our road. Some time has been spent, and more time is necessary, to establish at least a partial drainage system to enable us to maintain the dirt fill road bed. Some culvert material has been ordered and will be installed as soon as possible in several of our worst washes.

The Shonto Hill road has also been repaired. Nearly 1,580 yards of dirt fill were hauled and used to cover the rough, rocky road bed. The finished job was not what we had hoped for because the Indian Service claimed lack of funds and time to haul the necessary gravel to surface the road. For a year or two the road should be in good condition even though it was not properly finished.

The repair of our roads and of the Indian Service road (Shonto Hill) was a result of cooperation between the Park Service and the Indian Service in pooling equipment and labor. It was an entirely satisfactory arrangement and no exchange of funds was involved.

Work has been started on Sandal Trail that will result in the widening of the trail in some places and removal of some of the rocks.

Maintenance: The Barco gasoline hammer failed to function and new recoil and piston springs and new piston rings were installed. The carburetion and electrical system were cleaned and adjusted.

The two Kohler light plants were serviced and adjusted. The gears in one of the magnetos became locked while the plant was in operation and needs some rather extensive repairs if not replacement.

Two days were spent digging up and thawing a frozen water line. Fortunately it was not the line that services the residence.

A trip was made to Wupatki to obtain our dump truck for use on our road project. When we arrived at Wupatki I learned that our truck was in Flagstaff. We went to Flagstaff to get it but it had not been repaired so we had to go back to Wupatki and borrow their truck. In the meantime the Navajo pickup developed trouble and had to be left for repair and a Forest Service pickup was borrowed. We arrived home with the Wupatki dump truck and had to repair its' leaking gasoline tank. Two days later the differential went out on the Forest Service pickup. We are now waiting for the Forest Service to bring our pickup home and haul theirs to town. This recital of events is not intended to be funny. When one is left 15 or 20 miles from home with no transportation and much time to reflect on the charges against the 282 Account it is pure tragedy.

The residence furnace and flue were cleaned and a fervent prayer made that this cleaning will suffice until we can discontinue using the furnace this spring.

Wildlife: The first chipmunk of the season made his appearance on March 12.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

WASH. D. C. 20540

Miscellaneous: Two of our local Indian traders, Mr. Bennett Hyde of Kayenta and Mr. Walter Scribner of Inscription House, are quitting the trading business and moving away from the Reservation. Both families were good neighbors and are going to be missed.

20 requests for information were answered.

"Flying saucers" were reported seen by local people on two successive days. They were not seen by anyone at Navajo. The Indians seem to accept the "saucers" as just "one of those things" but they are taking a dim view of the Nevada atomic tests which were seen and heard here.

John A. Aubuchon
Superintendent

The Superintendent's office is well before the Navajo's line in this regard as of August 15. This was confirmed with a trip to Navajo the morning.

The month has qualified to receive work with all personnel keep in mind and general maintenance.

The Construction

Work on the headquarters road will go on well, but has reached the point where a lot of work is required in order to make road of a through.

General Details

The Navajo Agency of March 12 arrived a letter on the 15th and the area including a very nice article on the monument.

We had an old man's story the weekend of March 12 which brought very favorable comments from all visiting the Navajo Agency. The man was in the area of the monument and he had his paintings to the agency. The man was in the area of the monument and he had his paintings to the agency. Organ Pipe Cactus National Monument
Ajo, Arizona

March 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments

From: Superintendent, Organ Pipe Cactus

Subject: Monthly Narrative Report for March, 1953

Weather

The weather has been excellent during the month. Showers during the first part of the month has produced considerable bloom on the desert. Warm days now are a warning that summer will soon be in this part of the country.

General

The Superintendent made a talk before the Hiram's Club in Mesa, Arizona on February 27. This was combined with a trip to Phoenix for supplies.

The month was confined to routine work with all personnel busy on contact and general maintenance.

New Construction

Work on the headquarters roads ~~are~~^{is} going well, but has reached the point where a lot of work is required in order to make much of a showing.

General Publicity

The Phoenix Republic of March 15 carried a section on the Gila Bend-Ajo area including a very nice article on the monument.

We had an art exhibit over the weekend of March 22 which brought very favorable comments from all viewing it. Artist Leese Mather has been painting in the area for the past two months and we hung his paintings in the contact station. A notice was sent to the Ajo paper inviting the public. Several cars of local people came to view and we believe received a very good impression of our area. Nearly all the paintings were of the rock country which few people get to see.

Research and Observation

With the flowering season on, a lookout is being kept for new plants and additions for the collection. A few new records have been found

and it is planned to work the canyons during the coming month.

Visitors

Visitors to the area this month included:

Nancy Oddonetto of the Globe Office, March 22

Ranger Bullard and family from Tumacacori National Monument, March 9 & 10

Ranger Steele and family from Saguaro National Monument, March 18 & 19

William R. Supernaugh
Superintendent

March 28, 1953

MEMORANDUM

To: General Superintendent
From: Superintendent, Saguaro
Subject: Monthly narrative Report, March 1953

General

A definite change took place in the climatic conditions at the beginning of March. Several good rains (with snow in higher elevations) occurred and the desert is again green and fresh. The rains during March were of such a soaking nature that many washes are running in the monument at present. Chino Creek is running well, reducing the possibility of water hauling to Madrona later on in the spring.

Some authorities are predicting that the March rains have come too late to bring out many flowers. It is still a bit early to tell as yet, but we are going on record for a good blossoming season.

Visitor travel held up good this month even with the inclement weather. A general decline in winter visitors to Tucson was noted this year. Motel and resort operators are experiencing very poor business.

The greatest single days travel to Saguaro for the month was Sunday March 22, with 946 visitors.

Special Activities

Word was received that the superintendent will report for duty at Joshua Tree National Monument on April 6.

New Construction

Construction was completed of a 12' X 18' lath house for the purpose of propagating saguaro seedlings for field studies for reforestation data. This project is under the direction of Mr. William C. Bryan, Pathologist, Bureau of Plant Industry.

New Construction (cont'd)

A dragbroom was constructed to specifications for use on the Loop Road when the chips are applied after oiling. This item was deleted from last months report.

Maintenance

The interior walls and floor of the office was painted.

A wire netting fence was erected using steel posts around the storage area at Madrona. Many of the posts in the old fence had rotted off allowing the fence to sag.

Sufficient salvage materials were found to rebuild the old tent frame at Madrona. This will make it possible to house two additional men when they are needed for work on the lower trails.

Interpretive Services

A total of 3,237 persons in 1,031 parties were contacted at the monument office and received interpretive service. This amounted to a total of 186.5 hours for an average of 11 minutes per party.

Supervisory Ranger Steele gave an illustrated lecture on plants of Southern Arizona to an audience of 40 winter visitors at the Pioneer Hotel. The lecture was very well received.

The superintendent gave an illustrated slide lecture on plants and animals of Jacuero National Monument at the regular meeting of the Tucson Lions Club on March 18. There were fifty in attendance and from the lively question and answer period which followed the lecture, there was good evidence of appreciation.

Observations

The wildflower display does not measure up to last year, but a fair to good display is current. Regular wildflower bulletins are being forwarded each week to the Richfield Oil Company in California. These data are used as part of their weekly broadcast by the Richfield Reporter.

The following flowers are in blossom at this time: Chis, Beadpod, Desert-Marigold, Jewel Flower, Paperdaisy, Phacelia, Desert Zinnia, Globe Mallow, Papago Lily, and a scattering of Owls Clover.

The Hedgehogs should be in blossom during the last two or three days in March. Ocotillos should blossom within a week of this writing.

A new species of cactus was verified for the monument by Ranger Steele. It is *Coryphantha - vivipara - var. aggregata*, it has been added to the arboretum.

A description was furnished to the Commission for the use of the law and the effect was applied after the fact. This item was released from the source agency.

Information

The Inspector-General and Chief of the Office was advised, a copy of the report was provided to the source agency. The source was advised that the report was being reviewed and that the source was being kept advised of the results of the review.

Additional information was provided to the source for the use of the law. This will be used to provide the source with the information needed for the use of the law. The source was advised that the information was being reviewed and that the source was being kept advised of the results of the review.

Administrative Review

A review of the report was conducted by the source agency. The review was conducted to determine if the report was accurate and if the information was reliable. The review was completed and the results were provided to the source agency. The source was advised that the information was being reviewed and that the source was being kept advised of the results of the review.

Additional information was provided to the source for the use of the law. This will be used to provide the source with the information needed for the use of the law. The source was advised that the information was being reviewed and that the source was being kept advised of the results of the review.

The Commission was advised that the information was being reviewed and that the source was being kept advised of the results of the review. The Commission was also advised that the information was being reviewed and that the source was being kept advised of the results of the review.

The Commission was advised that the information was being reviewed and that the source was being kept advised of the results of the review. The Commission was also advised that the information was being reviewed and that the source was being kept advised of the results of the review.

Travel

There were 7,004 visitors to Saguaro National Monument during March. This is an increase of 65 visitors over the corresponding month one year ago. This is significant in view of the fact that local motel operators report a decline of winter visitors as compared to the 1952 season.

Visitors

- Feb. 26, Ranger Al Henson and family, Organ Pipe Cactus Nat. Mon.
March 7, Superintendent Cooke, Chiricahua National Monument.
" 8, Mr. John Stratton, Mr. and Mrs. Boatright, Globe, Ariz.
" 9, Ranger Robert Barrel, Chiricahua National Monument.
" 13, J. R. B. Coleman and Mrs. Coleman, Chief National Parks and Historic Sites Service, Canada.
" 18, Mrs. Richard Hartsweldt, wife of Ranger-Naturalist Hartsweldt, Death Valley National Monument.
" 21, Freeman Tilden and wife, Globe, Arizona.

Police Protection

With the advent of Javeline hunting season, numerous daily boundary patrols are being conducted. Two hunters, Conrad and Joe Valdez, were apprehended well inside monument boundaries by Ranger Steele. They were arraigned on a charge of carrying unsealed firearms before U. S. Commissioner Thomas McKay and were bound over to the U. S. District Court. If we get a conviction in this case, it should go a long way in deterring future hunters from crossing monument boundaries.

Forest Fire Control

Telephone and radio batteries, also miscellaneous supplies have been ordered for the coming fire season. The telephone line will be repaired in April.

Laborer-Leadman Stansberry completed renovation of all pack equipment, making it serviceable for the coming season.

A smoke was reported on the east side of Rincon Peak by the Arizona Highway Patrol through the Pima County Sheriff's Office on February 26. A subsequent check with the MacKenzie Ranch revealed that no smoke was visible.

guilty of the crime of murder are as follows:
John Doe, Jane Smith, and William Brown. They
were found guilty of the crime of murder on the
1st day of January, 1900. The names of the
persons who have been found guilty of the crime
of murder are as follows: John Doe, Jane Smith,
and William Brown. They were found guilty of
the crime of murder on the 1st day of January,
1900.

Personnel

Shirley R. Andrus entered on duty as trail laborer on March 16. We will assist Laborer Western in working the lower part of the Pack Trail and Happy Valley Saddle Trail.

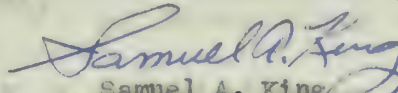

Miscellaneous

Employees of Saguaro National Monument contributed \$1.00 to the annual Red Cross campaign.

This being my last report from Saguaro, I should like to express my appreciation to all the officers and employees of Region Three for their cooperation and courtesies during my assignment here. Especially those "unsung" people who have processed our personnel actions, purchase orders, and for assisting us to keep our property records in order. Their patience has helped us immeasurably in the administration of this national monument.

My tenure of office here has proven to be one of the most interesting and stimulating of my career in the National Park Service.

Both Norma and myself extend sincere good wishes to everyone in Region Three.

Samuel A. King
Superintendent

Maintenance (Omitted under regular heading)

All directional signs both leading to and within the monument were repainted during the month. A new background color, reddish-brown was applied in all cases which makes the signs easier to read. However this color scheme blends with the landscape much better than black, formerly used, as the latter is too somber.

Discussion

ALL INFORMATION CONTAINED HEREIN IS UNCLASSIFIED
DATE 04-11-2010 BY 60322 UCBAW

THE ABOVE INFORMATION CONTAINS NEITHER RECOMMENDATIONS NOR
DISAGREEMENTS OF THE SECURITIES AND EXCHANGE COMMISSION

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United Kingdom regarding the proposed changes to the law of the United Kingdom in relation to the treatment of the British Commonwealth countries.

...and the

at present it will be some time before we can do.

Tonto National Monument
Roosevelt, Arizona

March 26, 1933

Memorandum

To: General Superintendent
From: Superintendent, Tonto
Subject: Report lml, narrative, Tonto, March 1933

A total of 3.7 inches of rain, mostly from February 28 through March 2, saved March from being completely dry. Warm weather began about March 23, and summer is nearly here.

Travel. 6079 cars with an estimated 21,266 persons crossed the Monument, of whom 4034 persons in 1067 cars availed themselves of interpretive services at the headquarters museum during March. This, as usual breaks all records for March, and is about a 60% increase over March last year, when we had 2479 visitors. We believe that this is a significant increase, as it occurs in one of our heavy travel months, with only slight weather factors affecting the travel.

Visitors, NPS & Special.

Mr. M. E. Peterson & family, U. S. Geological Survey, Globe.

Maude Kern and Margaret Carragoite, Region Three, Santa Fe.

Mr. John Stratton, Gila Pueblo, Globe.

Group of 70 North Phoenix High students supervised by Lorenzo Lisonbee and Mr. Clark of NPS, and under the aegis of Ben Nelson, U.S. Forest Service, and Jake West, Chief Hydrographer for Salt River Power District.

John Cook, Jr., Montezuma Castle.

Mesdames Davis, Patraw, Richardson, Miller, Moran, and Marton were conducted through the cliff dwelling by Archaeologist Wenger, March 16.

Assistant Gen. Superintendent Castellum, Mrs. Castellum and family, and Mrs. Castellum's brother Tom Cota and family, March 21.

General Superintendent Davis, Mrs. Davis, Jack Davis, Wayne Hanby, and Fred Guenther, Jr., March 24.

Mr. Horton Avery, Lowell, Michigan, March 25.

Roads. The road project shows good progress for the month, slowed somewhat by the loader being out of commission last week, due to wheel bearing out. Can't get parts here in a hurry. The section so far completed looks very good. Fast growing range plants are hiding some of the rocks on the uncompleted section.

1991 Annual Report of the Commission on the Status of Women

1. The first part of the report is a general introduction to the subject of the study. It discusses the importance of the study and the objectives of the research. It also provides a brief overview of the methodology used in the study.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the South (CLPS) in the United States. The Commission is therefore unable to provide any information on this subject.

1. The first of these is the fact that the

Personnel. Seasonal Ranger Krear was shifted to the road job on March 18, due to lack of funds for further ranger employment.

Interpretation. With the loss of the seasonal ranger services, we have dropped back to the sad old four-one-man-days per week schedule, in the face of an all time record travel here. Much of the interpretation is accomplished by use of the self-guided trail and ruins booklet, just placed in operation March 23, with good results.

We are trying to do a horseback job of interpretation and protection wherever it seems to be needed most at the time, along with maintenance, and a little supervision of the road crew. The booklet is a life saver.

If we discount completely the effect on personnel of making great numbers of repetitious ruins tours, we are still governed by that old law of physics - "a body may occupy only one position in space at one time".

Archaeologist Wenger has lettered quite a few good signs, interpretive, informational, and warning (to look out for snakes), and has lettered and placed a number of small temporary signs identifying the most predominant of the flowers blooming now.

Cooperation. The road crew gathered about 4 dozen deadly sculpturatus scorpions, which were delivered to Dr. Stahnke by Mr. Al Cooley, driver for Tanner Tours. This may be a way for us to help the anti-venin program occasionally in a small way.

General. Archaeologist Wenger & Capt. & Mrs. Sharp each gave blood to the Red Cross in Globe, March 3.

The Tonto staff attended the Meritorious Service Award presentation ceremonies and banquet for Gordon Vivian at Cila Pueblo.

Spring arrived here as usual, in about 3 days time, and the stoves were removed. This helps the overcrowded museum a lot.

Vandalism. Two nature trail stakes were pulled up and thrown down the hill, apparently just for cussedness. Were found by Mr. Wenger after a considerable search. No way of knowing whodunit.

Unusual Requests & Observations. One lady asked Mr. Wenger to watch her little boy, asleep in the car, and if he awoke, to sing or croon "Back in the Saddle Again", to lull the little varmint. Fortunately that Mr. Wenger was on duty, as the superintendent's singing would have scared him clear out of the county.

On a busy Sunday afternoon, a pair of ladies' briefs were found alarmingly on Picotillo branch right on the main trail. If this proves anything, it shows that the trail needs more careful observation.

NATIONAL PARK SERVICE
Tumacacori National Monument
Tumacacori, Arizona

March 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tumacacori
Subject: Superintendent's Monthly Narrative Report for March, 1953

Weather: Rainfall was 1.47 inches, compared with a 15 year average of .60 inches in this vicinity for March. There were no extremes of heat or cold, with temperature ranging from a minimum of 26 to a maximum of 86.

Visitor Travel: This month: 5,204 persons.
Highest previous March - : 5,488 persons, in 1951.
Percent decrease - - - - : 5.2%
Last 12 months - - - - - : 45,189 persons
Previous 12 months - - - : 44,757 persons
Percent increase - - - - : 1.0%

Visitors:

3-8-53 - Mrs. Eva Boatright and Mr. John Stratton, of our headquarters office.

Mrs. Wanda Kerns and Mrs. Margaret Larragoite, of the Region Three office.

3-10-53 - Ranger Bob Barrel, Chiricahua National Monument.

3-11-53 - Mrs. Sam King, of Saguaro National Monument.

3-18-53 - Acting Sup't. Arthur White, and Jack Williams, of Chaco Canyon National Monument.

3-19-53 - Dr. Charles C. di Peso and Barton Wright, of the Amerind Foundation, Flagstaff, Arizona.

3-21-53 - Mr. and Mrs. Freeman Elden.

3-22-53 - Troop 34, Nogales, Boy Scouts of America.

Maintenance: With heavy visitor traffic, and with Maintenanceman Deubler on sick list for nearly the entire month, maintenance of necessity was at a minimum level. Quite a bit of tree pruning, and some major surgery to a pepper tree in front of the museum which was broken by snow last month, was done. Some excess gravel was swept up from the parking area. A good deal of irrigating has been necessary in the last few days. Ranger Gullard doubled as an electrician when there was a complete power failure at Residence No. 2. Repairs were made to our record player in the museum, and repairs done on the view room model of the mission church. A warning sign was painted on the butane gas tank. A lot of time was necessary on cutting out masonite letters, painting them, painting two large signs, and applying letters, for Coronado National Memorial.

Enclosure

Enclosure
This memorandum is being submitted to the Special Agent in Charge, National Park Service, for his information and guidance. It is requested that you advise the Superintendent, Yosemite National Park, of any action taken by you in connection with this matter.

Publicity: The February 15 (Sunday) issue of the Arizona Republic had a 4 column illustrated article on Tumacacori by Gordon Shepard.

Although it has no bearing on this area, there was an excellent Sunday feature article on Mupatki, written by Jean Bullard, wife of our Ranger Bullard, which appeared in the Denver Post.

Cooperating Non Government Agencies:

On March 23 the State Highway Department, at our request, brought a rotary brush sweeper and cleared a great quantity of gravel from the center of our parking area, pushing it to the sides where it will be simple for us to load and haul to our stock pile.

Mission Church (Weather Damage to) On the morning of March 3, after some heavy rains, we found about a square foot of red-painted plaster had fallen from over the entry arch at the front of the mission church. This was an important part of an original recessed painted band of decoration. The plaster was so soft that it splattered into a thousand pieces. So far, the peculiar problems involved in any attempted stabilization of such thoroughly rotten plaster have defied our best thinking.

Personnel: One day of annual leave was taken during the month by Ranger Bullard.

Maintenanceman Deubler was absent on sick leave during the entire month, until returning to duty on March 23. He sustained an injury to the sacro-iliac region at the base of his spine, from a fall on February 24.

Museum and Education: At the Kenyon Ranch (a guest ranch 3 miles north of Tumacacori) winter guests have formed a "Santa Cruz Historical Society." Their object is to accumulate a library with as detailed history as possible of this portion of the Santa Cruz Valley, especially with reference to the old presidio town of Tubac, three miles north of here, and to have something interesting to do as they bask in our winter sunshine and take horseback trips to historic spots in the district. They have over \$200 in their "kitty," as dues from members, and have a very alert interest in our district. On March 20 my wife and I were invited to be their dinner guests for the evening, so that I could be their first guest speaker. After a stimulating evening and a 45 minute talk on local history to about 25 of the ranch guests, we were made the first honorary members of the society.

During the month we have given some more attention to our nature trail through the Spanish type patio garden adjoining the museum building. A number of trail stakes were re-located to serve to better advantage. We find the mimeographed patio garden trail guides are receiving a great deal of use, and we receive many enthusiastic comments on the garden and on the self-guiding features of its trails. One of our problems has been the sticky fingers which get hold of the trail guides. Visitors carried them away almost as fast as we could put the leaflets in the box which starts the trail, despite the fact that each leaflet has a printed request to return when through, and the box dispenser for them also has such a request on it. At Ranger Bullard's suggestion we stapled some of the trail guides by the

1. The following is a list of the names of the persons who have been identified as having been in contact with the subject of this investigation, and who have been identified as having been in contact with the subject of this investigation, and who have been identified as having been in contact with the subject of this investigation.

It is not to be denied that the fact that the Government has not been able to obtain the necessary evidence to prove the guilt of the accused is a serious matter. It is, however, not to be denied that the fact that the Government has not been able to obtain the necessary evidence to prove the guilt of the accused is a serious matter. It is, however, not to be denied that the fact that the Government has not been able to obtain the necessary evidence to prove the guilt of the accused is a serious matter.

[illegible]

1. The first of these is the fact that the majority of the population of the United States is of European descent. This is a fact which has been recognized by the government and the people for many years. It is a fact which has been recognized by the government and the people for many years. It is a fact which has been recognized by the government and the people for many years.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a legitimate organization or a subversive one.

The following information was obtained from the records of the United States Bureau of Census:

Name: [REDACTED]
Date of Birth: [REDACTED]
Place of Birth: [REDACTED]
Marital Status: [REDACTED]
Occupation: [REDACTED]

[The remainder of the document contains several pages of redacted text.]

back covers to stiff red card-board backs. We find that with the 6" by 5 1/2" trail guides on these 8" x 10 1/2" backs, the visitors almost never carry one away after using!

We are also using, for Southwestern Monuments Association post card sales, a rack for self-service and a coin slot. Dullard suggested this method, and we find it works quite well, with almost no thefts.

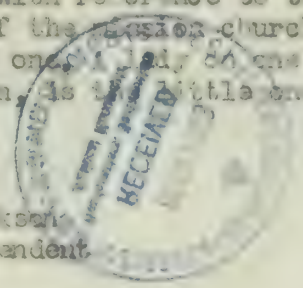

The sticky-finger problem is now acute in our rest rooms. For months we have used Leroy-lettered cards in the womens' rest rooms (the mens' room doesn't need them) which read "Please imagine this is your own bathroom and you are getting ready for a visit by your mother-in-law." There's nothing original about that text - we read it somewhere else a long time ago - but we find that by having one such card on the wall above the lavatory, and one fastened to the inside of each door which opens into the "thrones", the women visitors are much more inclined to help us keep clean rest rooms. Moreover, they come out of the rest rooms chuckling over the idea. However - - - word seems to have gotten around about our rest room labels, and now feminine visitors are helping themselves to the labels and taking them away as souvenirs!

Historical Research: Little research opportunity has come to the staff here this busy winter. However, we have benefitted from some work which is being done in the Bancroft Library by H.F. (Hank) Dobyns, a graduate student of the Anthropology Department, University of Arizona. He has been kind enough to send us copies of pertinent material from some microfilm he has taken. We are translating this data into our fact files as time allows, and find some fascinating information about Amerindian population and its agricultural and livestock assets circa 1815 and 1825.

Archaeological Research: Barton Wright, an archaeologist on the staff of the Amerind Foundation, Dagoon, Arizona, is engaged in some archaeological exploratory excavations on the Calabazas site, four miles south of here and north of the Calabazas school house, on private land, and some lesser work in cave sites of the district, also on private land. We look forward with much interest to some clarification of some archaeological and (we hope) historic horizons for this valley.

Chaff: Ranger Smith picked this one up, with reference to two brick-lined water storage reservoirs just southeast of the Lasasas church. One of the reservoirs is much larger than the other one. One of his guided trips said "If the big one is the cistern, is the little one for the brethren?"

Earl Jackson
Superintendent

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tuzigoot National Monument
Clarkdale, Arizona

March 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tuzigoot National Monument
Subject: Report lml, March, 1953

There follows the narrative report of activities in this area for the month of March, 1953.

Weather

Generally good travel weather, clear, bright and warm. A storm on February 28th and March 1st brought rain to the valley and snow in the mountains; an 8" fall of snow on Mingus hampered travel for a few days. Since the 19th, the spring weather cycle has set in, bringing strong afternoon winds and some cloudiness.

Special activities

Superintendent Brewer gave a talk before the Jerome City Council on the importance of preserving and presenting to the public the historical aspects of Jerome as an early western mining center. As a result of this talk, a group of Jerome and Valley residents got together and formed the Jerome Historical Society. Superintendent Brewer was elected Chairman of the Executive Council of the Society.

Archaeologist Burroughs continued his weekly sessions in Southwestern Archaeology with a local group. Superintendent Brewer gave a slide lecture on Southwestern Parks and Monuments to this group on the 27th.

Maintenance and General Work

The better part of three days was given over to working on the heating system. A worn 12" fan pulley set up so much vibration that it loosened both the fan and motor mounts. The whole fan mounting system was tightened down, bearings oiled, motor mounting bolts reset, new motor mounting block installed and new Gates tapered-hole fan pulley mounted.

This tree for the month of June, 1941.

and the

There are three main types of weather: clear, foggy and rainy. A weather forecast tells you what the weather will be like in the future. You can use a weather forecast to help you decide what to wear and what to do. For example, if the forecast says it will be sunny, you might want to wear a hat and sunglasses. If it says it will be rainy, you might want to take an umbrella. Weather forecasts are very important for many people.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the root cause of the problem. Once the causes of the problem have been identified, the next step is to develop a plan to address the problem. This involves identifying the actions that need to be taken to address the problem and determining the resources that are needed to implement the plan. Once a plan has been developed, the next step is to implement the plan. This involves taking the actions that have been identified in the plan and monitoring the progress of the plan. Finally, the last step in the process is to evaluate the results of the plan. This involves determining whether the plan has been successful in addressing the problem and identifying any lessons learned from the process.

Museum Activities and Exhibits

New frames were made for the Paul Coze painting of Tuzigoot and for the large colored photograph of the ruin, and both were rehung in the museum.

The museum prospectus was given final revision and was forwarded for Regional review and approval.

Interpretive Service

Travel: 1662 visitors in 588 parties entered the monument this month. Last year's total was 943, and the previous high, in 1948, was 1359. As usual, 100% of the 8-12 and 1-5 visitors were contacted in the museum, but 166 visitors in 55 parties arrived before 8:00 a.m., after 5:00 p.m., or during noon closings and so were not contacted.

NPS Visitors: Archaeologist Lloyd Pierson and family, Montezuma Castle, on the 3rd.

Ranger Myron Sutton, Montezuma Well, on the 17th.

Organized Groups: Explorer's Troop, Phoenix, (7 in party) on the 8th.

Boy Scout Troop 12, Phoenix, (20 in party) on the 21st.

Foreign: Travel this month included visitors from Canada (provinces of British Columbia, Manitoba, Alberta, Saskatchewan and Ontario), Spain, Switzerland, France and England.

Research and Observation

Three families of Say's Phoebes started building nests in the museum louveres. The nest in the north louver is far ahead of the other two. This is not due to greater industry on the part of one family, but rather to the fact that the gal in the north louver waits until the other two nests are temporarily unoccupied and then robs them of material for her own nest.

Several families of the Great Blue Heron were earlier observed nesting in two dead trees in the center of the tailings pond. Lately, however, they seem to have abandoned the old rookery and are building new nests in the two large cottonwood trees on the edge of the river south of the ruin.

Human Activities and Interests

The present study was the first of its kind, and the first of its kind in the world, and the first of its kind in the world.

The study was conducted in the field, and the results were published in the field.

Interpretive Summary

The study was conducted in the field, and the results were published in the field.

The study was conducted in the field, and the results were published in the field.

Summary and Conclusions

The study was conducted in the field, and the results were published in the field.

The study was conducted in the field, and the results were published in the field.

Miscellaneous

Superintendent Brewer made a frame for the Paul Coze original of Montezuma Castle.

Archaeologist Burroughs worked with Lloyd Pierson on the 20th mapping some of the ruins at Montezuma Well.

Archaeologist Burroughs went on annual leave for a week starting the 23rd.

J. W. Brewer, Jr.,
Superintendent

It's Official: Jerome is Ghost City and Darned Proud of It

The Jerome City Council has voted to go into the ghost business, proving perhaps that it all depends on who says you are dead.

Sensitive for years to such adjectives as "dead," "dying" and "ghostly," Jeromites, with the enthusiastic backing of their municipal officers, agreed Sunday to capitalize on their fallen status by turning their town into "the Williamsburg of the West."

And as the city fathers beamed approval, 50 townspeople formally launched the Jerome Historical

Society, to preserve all things of historic interest and proclaim the boom town of bygone days throughout the land.

Electing Johnie O. Moore as president and Jim Brewer as chairman of the executive council, the society announced it would establish a museum on the town plaza.

"Are We Dead?"

"Are we officially dead now?" asked Mrs. Henry Clark.

"Well," declared Mayor John McMillan, an undertaker, "the death certificate hasn't been issued yet."

Jerome is to be no mere ghost town, however. A place that bustled once with 15,000 people, Brewer insisted, must be a ghost city. Signs at both ends of town, he said, would make this clear.

Credited by McMillan with fathering the whole idea, Brewer outlined a plan whereby the entire town would become a huge "outdoor museum."

History Written

He said that tourists at Tuzigoot National Monument, where he is superintendent, had forced him into an interest in old Jerome by their thousands of questions about it. Eventually, he wrote a pamphlet on the town's history, soon to be published by the Southwest Monuments Association.

The society added luster to its roster of officers by naming Lewis Douglas, Jerome alumnus who was ambassador to Great Britain until recently, as honorary vice president.

Mrs. Clarence Beale was elected working vice president. Mrs. Clark was made treasurer and Mrs. Pete Yurkovich of Flagstaff was named secretary, to be assisted by Mrs. W. J. Wright.

Councilmen

Elected to the executive council in addition to Brewer were McMillan, Jim Haskins, Harry Vander, Howard Rogers, W. J. Wright and Dr. Joe Pecharich.

Moving at almost breakneck speed, the society was able to announce that counting a few pre-meeting sales it had signed up 95 members by the time the gathering broke up.

Associate memberships at \$1. would entitle holders to free admission to the museum for which C. J. Beale, representing Verde Exploration Co., offered to lease a Main St. building at \$1 per month. McMillan said the town would assume that obligation officially.

Active memberships at \$3. would be good for free admission and all society publications. The society agreed, however, to put nothing in the way of donations of as much as \$50,000.

Ghost Status

Most members and town councilmen alike seemed to feel that proclamation of official ghost status would not discourage interest in the town for other reasons.

The state legislature has expressed interest in establishment of a tuberculosis hospital there and the Indian Service is known to be considering it as the site for a new school.

Brewer suggested the museum include displays carefully tracing the growth of Jerome as a town. He said minor things such as "Uncle Harry's shaving mug."

Another meeting was set for 1:30 p. m. on Sunday.

Walnut Canyon National Monument
Flagstaff, Arizona

March 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Report of Activities at Walnut Canyon National Monument during the month of March, 1953.

Weather Conditions

The month of March came in "like a lion" and whether it goes out like a lamb remains to be seen. Some fairly high winds were prevalent and we had one twelve-inch snow, another of three inches and a rain storm. The weather in between was warm and Springlike and the snows quickly disappeared. Total moisture for the month was 1.19 inches. Some of the earlier wild flowers are beginning to bloom in the canyon.

Administration

Administrative duties have been kept current although a considerable amount of time was spent in designing and constructing sign forms to be used in pouring six large concrete signs for Wupatki, Sunset Crater, and El Morro.

Maintenance

Materials were purchased and hauled for the building of the sign forms and all have been constructed. They will be poured as soon as weather conditions permit as we have no heated building in which signs as large as those for El Morro can be handled.

One heavy snow closed our roads for one day as the Walnut equipment was on loan to Wupatki. The County Grader was unable to clear our service roads but I was finally able to devise a make-shift drag and keep them cleared with the pickup. Routine maintenance work has been carried on as needed.

Travel

We have had the heaviest travel yet recorded for the month of March with 1,348 visitors in 464 groups. This is an increase of over 266 and brings our travel year to date figure to 2,963 visitors which is an increase of over 190% over the corresponding period in 1952. Forty-one states were represented and of foreign countries there were visitors from Denmark, Canada, India, Holland, Costa Rica, and Switzerland.

March 17, 1953

Washington, D.C.

Dear Mr. [Name]

Thank you for your letter of March 10, 1953.

I am sorry to hear that you are unable to visit the monument during the month of March, 1953.

Sincerely,
[Signature]

The monument is open to the public every day of the year, and it is a beautiful place to visit. The monument is a great place to see the history of the United States. The monument is a great place to see the history of the United States. The monument is a great place to see the history of the United States.

Sincerely,
[Signature]

N.P.S. Visitors

March 14 - Assistant Regional Director Hugh Miller accompanied by Mr. Harold Ratcliff and Mr. Hugh Richardson of the Region three Office, Chief Forester Bob Moore of the Washington office and Park ranger Foy Young of Bendelier National Monument. Enroute to Fire School at Lake Mead.

March 14 - Chief Ranger Benson, Assistant Chief ranger McManus, and Maintenance man Burgess of Hot Springs National Park.

Interpretive Services

With the exception of a few days during which the trail was closed because of snow and ice most of the visitors took the Island trail trip. 46 hours and 45 minutes were spent in contacting 345 groups totaling 1045 visitors.

Wildlife Observation

The deer and wild turkey which have not been observed as often or in as great numbers as last year have been reported near our east boundary several times by visitors. Bobcat tracks were observed near the museum. Skunks are numerous.

1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 26

THE UNITED STATES DEPARTMENT OF JUSTICE
WASHINGTON, D. C. 20535

Wupatki National Monument
Flagstaff, Arizona

March 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Wupatki

Subject: Monthly Narrative Report, Wupatki and Sunset Crater National Monuments.

Weather:

The weather the first part of the month was quite unsettled with snow flurries and windy. The last part of the month turned off nice and warm with a maximum of 71 degrees on March 24 and a minimum of 12 degrees 5. Precipitation is still very low for this time of the year with only .32 inches for the month.

Publicity:

An interesting article by Ranger and Mrs. William C. Bullard on their life at Wupatki appeared in a recent issue of the Denver Post.

Maintenance and General Work:

A rock wall was built around the new 5000 gallon metal water tank. This blends in with the residence and the ruin and will keep the sunlight from warming up the metal and make the water cooler.

The new information station at Sunset Crater was painted on the inside, one coat of stain on the roof, windows and trim painted and the exterior wood gone over in preparation for painting.

Trips were made to Sunset Crater twice a week as travel has picked up suddenly due to very warm weather for this time of the year.

Roads and Trails:

The Wupatki road construction got under way on March 2. The entrance signs on Highway 89 were taken down and installed at the entrance to the detour and travel immediately started using the detour. Three dump trucks were used to haul material, and loads were dumped starting from Highway 89. Some of the old curves were straightened out with the grader and bulldozer, some trees pulled and in general work is going along in good shape. The latter part of the month has been spent in clearing loose rock and debris away from the road shoulders.

The writer has been told that the committee was organized to investigate the activities of the Japanese in the United States.

The four mile entrance road to Sunset Crater was bladed this month and the bad washboard smoothed out.

Interpretation:

At Wupatki there were 225 people in 76 parties contacted for an average time of 17 minutes per party.

Sunset Crater was closed with snow from February 28 to March 5 but open the rest of the time. Quite a few parties have climbed the crater and about 140 people took the Lava Flow nature trail.

Travel:

Travel continues to increase. Wupatki had 190 cars and 507 people which was 89 cars and 258 people over last March.

Sunset Crater had 350 cars and 942 people which was all increase as the area was closed this time last year.

An interesting highlight on the travel has been noted this month. I kept a fairly accurate count and all of the travel increase for Wupatki this month has been due to the back loop road being open. On one day out of 15 cars, 11 of them came down from Sunset Crater. That has been true of this winter's travel increase.

Travel took a terrific jump the past week and is now running more like last May. There were 9 days with over 10 cars with a high of 17 cars on the 15th which is very good for March.

Personnel:

Maintenance man Joe Bean was on annual leave March 9 & 10, Mr. Bean has not been feeling very well and started sick leave at noon on March 23 and is on leave at the time of this report.

Spring Flow:

In spite of an extremely dry winter the springs are holding up fine with Heiser about 1600 GPD ahead of last March.

Wupatki - 864 GPD Same as last year

Heiser - 3080 GPD 1600 GPD ahead of last year.

SUMMARY OF MONTHLY NARRATIVE REPORTS FOR APRIL - 1953

		Page No.
<u>Weather</u>	Dry and windy.	1
<u>Special Activities</u>	Saguaro to be featured in American Museum exhibit; Play Day at White Sands.	1-2
<u>Official Visitors</u>	Messrs. Patraw and Franke at Canyon de Chelly and Navajo; Mr. Gastellum visits a number of areas in northern Arizona and Utah.	2
<u>General Publicity</u>	Arches featured on front cover of <u>Life</u> .	3
<u>Maintenance Rehabilitation, & General Work</u>	Spring clean-up, refurbishing signs and generally readying areas for travel season consumed much time during month.	3-4
<u>Roads and Trails</u>	Bandelier approach road probably to be paved; right-of-way for Walnut Canyon approach road surveyed.	4-5
<u>Concessions</u>	Concession at Bandelier opened May 1; Thunderbird Ranch opened April 1 - several weeks earlier than normal.	5
<u>Interpretive Services</u>	Pictures furnished to film company in England for educational use; many interpretive leaflets processed.	5-6
<u>Museum Activities and Exhibits</u>	Diorama of Keet Seel under preparation at Navajo.	6-7
<u>Research and Observation</u>	Interesting observations on Capulin Mountain; Gila monsters prove intriguing to visitors, Saguaro.	7
<u>Loan Library</u>	Accessions total 107.	8

<u>Southwestern Mon. Assn.</u>	<u>Poisonous Dwellers of Desert</u> in fourth edition.	8
<u>Travel</u>	Continues to increase of preceding year.	8
<u>Ruins Stabilization</u>	Stabilization work accomplished at Tuzigoot.	8
<u>Visitors</u>	Samuel Sorin, noted pianist, at White Sands; large numbers of student groups visit areas.	8-9-10
<u>Ranger Service</u>	Ranger service at Saguaro highly complimented.	10
<u>Police Protection</u>	Aliens apprehended at Organ Pipe Cactus.	10
<u>Grazing</u>	Trespass stock a problem at Arches.	10
<u>Soil and Moisture Control</u>	S&MC program completed at Chaco Canyon.	10
<u>Forest and Building Fire Protection</u>	Dry conditions endanger several areas; fire control training meetings held.	10-11
<u>Insect and Tree Diseases</u>	Aerial spraying for tent caterpillars proposed at Bandelier.	11
<u>Accidents</u>	"Off trail" hiker breaks leg at Montezuma Castle.	11
<u>Personnel</u>	Maintenanceman Winbourn re-employed at Arches; Superintendent King leaves Saguaro.	11
<u>Local Items</u>	Gila Pueblo personnel enjoying beautiful spring season; new arrivals at Navajo.	12

May 11, 1953

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - April 1953

Weather

Superintendent Brueck of Wupatki reported "The Little Colorado River flow has completely dried up at this date. This time of the year should be the time when the river is reaching a peak but it is just a dust bowl right now." Briefly and concisely, this described the conditions which prevailed most of the month -- extremely dry, and windy.

Special Activities

Canyon de Chelly--An Easter egg hunt, co-sponsored by the Chinle Recreational Club and Park Service employees, was provided for 275 school children at one of the campground sites.

Great Sand Dunes--Superintendent Bean attended a meeting of the San Luis Valley Travel Association at which Lew Cobb, Director of the Colorado State Advertising and Publicity Department, was one of the speakers.

Montezuma Castle--Ranger Sutton was master of ceremonies at a program at the Arizona State College honoring Dr. Agnes Allen on her twentieth field trip into Grand Canyon.

Mr. Cook attended a meeting of the Verde District Little League in Cottonwood.

Navajo--A trip was made to Saguaro. En route back to Navajo, Superintendent Aubuchon visited the Gila Pueblo headquarters, and from there proceeded to Gallup, New Mexico, where he obtained a load of culvert for use in his area.

Saguaro--A group of technicians from the American Museum of Natural History spent two weeks here gathering material for a 25' x 15' x 18" diorama in a new series called the "Hall of American Forests" with the exhibit patterned on Saguaro to be titled "The Driest Forest in North America."

Tonto--Archeologist Wenger made two short field trips with Forest Ranger Ames to locate corners and boundary lines.

A traffic counter was installed on April 8 on the outgoing side of the parking area. This method of counting, using a standard average, appears to be quite accurate and certainly saves much valuable time and diverted attention.

Tumacacori--Superintendent Jackson and family, on personal time, went to Dragoon, Arizona, where he enjoyed a museum visit and archeological refresher course with Mr. and Mrs. Charles C. de Poso,

Special Activities - Tumacacori - continued

Director of the Amerind Foundation field activities. Upon returning to Tumacacori, Mr. Jackson held an evening staff meeting and passed on the high points of his gleanings. He reports that they are also finding the Foundation's archeological dig at Calabasas Ruin (4.7 miles south of Tumacacori) very interesting. An attempt to improve on Mr. Jackson's pithy style of writing would be presumptuous, so we give you his report on this work in his own words: "The aborigines who built pit houses at this site had some interesting ideas for attractive houses, but must have had a very erratic city engineer, who located some of the Pit houses right in the middle of a drainage line from an arroyo. And from the diversity of burial technique details we would infer the possibility the native population was far from a homogeneous group."

Tuzigoot--Superintendent Brewer attended several meetings of the Jerome Historical Society, and under his direction a historical museum is being established in the town of Jerome.

The class in the Southwestern Archeology, which is popular with a local group, is being continued by Archeologist Burroughs.

White Sands--Play Day is the special event for April at White Sands. This year it proved special in another way, bringing with it one of the worst wind storms ever experienced. As a result, the entire program had to be moved to Alamogordo. Despite this unfortunate turn of events, 5,020 people seemed to be enjoying themselves.

Official Visitors

Arches--Assistant General Superintendent Gastellum;
Landscape Architects Alleman and David Van Pelt.

Aztec Ruins--Regional Forester Carlson and Forester Bob Moore of the Washington Office.

Bandelier--Regional Forester Carlson and Forester Ratcliff, Regional Office, accompanied by Mr. Moore.

Canyon de Chelly--Assistant Regional Director Patraw;
Engineer Dick Franke.

Montezuma Castle--Assistant General Superintendent Gastellum;
Archeologist Al Schroeder; Mr. J. A. Hussey, History Division, Washington Office.

Navajo--Assistant Regional Director Patraw and Engineer Franke.

Organ Pipe Cactus--Landscape Architect Marsh and Naturalist Arnberger.

Saguaro--Highway Engineer Moran.

Tonto--General Superintendent Davis; Highway Engineer Moran;
Landscape Architect Marsh; Archeologist Schroeder.

Tuzigoot--Archeologist Schroeder.

Walnut Canyon--Regional Naturalist Dodge; Engineers Bradley, Wing, and Smith; Assistant General Superintendent Gastellum.

White Sands--Regional Engineer Lassiter and Mr. Verne Rowley, of the Washington Office; Highway Engineer Moran.

Wupatki--Regional Naturalist Dodge; Architects Saunders and Carter; Engineers Moran, Bradley and Smith.

General Publicity

Arches--A beautiful picture of Delicate Arch, by Josef Muench, appeared on the front cover of the April 13 issue of Life magazine. This is the first time, to our knowledge, that an attraction in one of our areas has appeared on the front cover of a magazine with the large circulation Life has. Since this issue appeared, a number of calls have been received from other national publications requesting detailed information on Delicate Arch and other points of interest both in and outside the monument. The travel section of the May issue of Sunset Magazine carried an article entitled "Utah's Famous Rock Windows", with pictures of Double Arch, The Windows section, and headquarters.

Bandelier--A booklet, Recreational Facilities in the National Parks and Monuments of the Western States, published by the Automobile Club of Southern California, contained a section on Bandelier.

Casa Grande--This monument was mentioned as "...one of the most imposing monuments to this ancient civilization (the Hohokam)" in the first of a series of articles on Arizona Indians by Jack Karie appearing in the Arizona Republic.

Navajo--The May issue of Sunset Magazine carried an article concerning a trip to the Navajo Reservation--and as a result of this, the superintendent has received an unusually large number of requests for information on Navajo and Rainbow Bridge. Galley sheets on an article by Dr. W. Sanborne on Scaffold House Ruin were checked. This article will appear in the May issue of Natural History.

Saguaro--Acting Superintendent Steele appeared on the "Tucson Newsreel" television program from station KOPO-TV, for an eight minute interview on the prospects of desert blooms and things in general at Saguaro.

Tumacacori--Dennis G. Cooper, Detroit, Michigan lecturer, took pictures and gathered material to be used in one of his television broadcasts. Avalon Daggett, Los Angeles, who takes movies for visual aid use in the schools in 17 states, took shots of the mission and the Kino statue for use in a one reel feature on this chain of missions, tentative titled "Father of the Southwest."

Maintenance, Rehabilitation and General Work

Arches--The area has a more photogenic appearance since Ranger Morris gave it a thorough cleaning and placed all outside storage on the newly constructed dock which is completely hidden by the utility yard fence--the visitor is no longer greeted by an oil can and coal pile.

Aztec Ruins--Entrance signs were given a coat of linseed oil. A new museum sign with six-inch letters is being completed and also a new sign for the parking area. Holes and cracks in the roof of the Great Kiva received an application of asbestos roof coating.

Bandelier--Museum floor was stained and varnished for the first time, which greatly improved the appearance of the museum. Dangerous limbs were pruned from trees in the campground and picnic area. The 20,000 gallon water reservoir was drained, cleaned, and placed in good condition.

Canyon de Chelly--New directional signs were constructed and placed at the White House overlook and trail.

Maintenance, Rehabilitation and General Work - continued

Chaco Canyon--The work of obliterating the old buildings, scheduled for this fiscal year, is rapidly nearing completion. Material from the walls of these buildings is being placed along the route for the new road, to be used for fill in the base.

Gran Quivira--Underground power line improvements were accomplished on the electric system. Fifty feet of new line were installed and electrical connections were transferred from residence to office meters. Minor repairs were made to the sewer pipe and the system traced out.

Great Sand Dunes--Preparations for the travel season, rehabilitation work, and office work kept the superintendent busy seven days a week.

Montezuma Castle--A plan for the installation of fuel oil for the Castle houses was approved and this work started. At report time oil had been piped into residence No. Two and progress was being made on the lines to Residence No. One.

Navajo--Five trailside benches were made and placed on the Sandal Trail. The water pumping system was serviced and a new duck-board walkway installed at the spring.

Saguaro--All pack and saddle stock were brought in from pasture and made ready for the coming fire season.

Improvements were made to the Madrona water system to cut pumping time and expense. When water is available, it is now possible to fill 16,000 gallons of storage in approximately 2 hours.

Tumacacori--With unusually dry weather, much time has been spent on routine watering in the patio garden and grounds plantings. Also, weeding and considerable pruning of frost-damaged shrubs and trees took considerable time. A routine maintenance check disclosed a precarious condition atop the sanctuary dome, which necessitated repairs. Ramps were constructed to replace some rather hazardous odd sized steps in the building.

Walnut Canyon--New trail markers, prepared by Mr. Guillet during the winter, were installed and are receiving much favorable comment. As time permits, the superintendent has been working on entrance signs for some of the monument areas as well as for Carlsbad Caverns.

Wupatki--The information station at Sunset Crater was given one coat of paint and the roof given the final coat of oil stain. Frequent trips have been made to the Crater to check the booklets in the register stand and to do general clean up work.

Roads and Trails

Arches--Progress on the Delicate Arch Trail has been rapid and the project is about two-thirds complete.

Bandelier--Twelve loads of gravel were hauled in preparation for oiling the ruins trails. The unpaved section of the approach road was inspected by State Highway Engineer Erwin, BPR Engineer Keller, and Assistant Regional Director Cornell. If the BPR approves, the road will be constructed on slightly lower standards so as to stay within available funds.

Casa Grande--The approach and service roads were oiled and sanded by the State Highway Department.

Roads and Trails - continued

Chaco Canyon--The north approach road was graded by the county grader and placed in good condition. Culverts from the old CCC road will be removed and stockpiled for future use on the new monument road.

Montezuma Castle--The trail to the model shelter was given another coat of bitumuls; the Sycamore Trail was patched and a section damaged by last winter's floods rebuilt; at the Well, the spur trail to the outlet was again resurfaced and the loop trail patched. The paved entrance road to the Castle was patched and drainage ditches for all Castle roads cleaned.

Navajo--Some culverts have been obtained to be installed as soon as possible. By controlling the drainage, it is hoped to eliminate most of the washing of the monument roads.

An extension of the Sandal Trail was built leading to the hilltop behind the superintendent's residence from which point the visitor has an awe-inspiring view of the surrounding country. Two benches were placed at strategic points for visitor use.

Organ Pipe Cactus--The headquarters roads and campground construction project has progressed rapidly and about all has been done that can be done prior to final staking.

Tonto--Good progress was made on the road project. The appearance and drainage along the completed section has been greatly improved.

Walnut Canyon--Messrs. Gastellum and Guillet met with Forest Service officials regarding the right-of-way for the proposed approach road and Mr. Bradley and his assistant, from the Regional Office, arrived to make a survey of this same road.

Concessions

Pandelier--The sub-concessioner for the dining room at Frijoles Canyon Lodge this summer will be Mrs. Leverton. She has spent considerable time getting the kitchen ready for opening the first of May. Mrs. Frey also has the cabins and the souvenir shop ready to open.

Canyon de Chelly--The Thunderbird Ranch opened for business on April 1 -- a month or six weeks earlier than usual -- in order to accommodate the ever-increasing number of visitors.

Interpretive Services

Headquarters Office--One of the interesting requests for photographs was from an educational film company in England. Mr. Arnberger selected a series of pictures illustrating desert conditions in three of our areas, and these will be used in a film strip on desert land forms being produced for use in the schools in England. A series of publicity photographs on Arches, Natural Bridges, and Rainbow Bridge was selected to be used in the booklet, The National Parks and National Monuments of Utah, which will be published by the Zion-Bryce Natural History Association. In this connection, Mr. Arnberger also made extensive corrections on manuscripts for Arches and Natural Bridges to be published in this booklet.

Correspondence was carried on with Chaco Canyon and Capulin Mountain regarding visitor participation in guided trips and usage of self-guiding trails.

Interpretive Services - Headquarters Office - continued

Compiling the semi-annual report of free publications took considerable time. A review of the field reports indicated that the supply of two-fold leaflets was critically low at Sunset Crater, Tumacacori, and Montezuma Castle, and an effort is being made to obtain a supplementary supply of leaflets from the Regional Office.

A booklet on back country use prepared by Organ Pipe Cactus is being processed and it is hoped to have it ready for distribution shortly after May 1.

Information was requested from the Regional Office regarding the specifications for natural history handbooks to be used by Ranger Barrel in the preparation of a handbook for Chiricahua.

Mr. Arnberger and Mr. Marsh from the Regional Office visited Organ Pipe Cactus for the purpose of locating the new nature trail and making a study of the interpretive need on the 40-mile Loop Drive. During a trip over the 40-mile loop, Mr. Arnberger secured pictures and information to be used in submitting a plan for the interpretive development of this drive.

The fourth edition of the guide booklet for the Lava Flow Nature Trail at Sunset Crater has been sent to the Killian Printing Company in Globe. This edition will consist of 8,000 copies and it is hoped to have it ready for distribution within the next two or three weeks. The revised text for the relocated self-guiding Massai Point Trail at Chiricahua was reviewed and this guide is now being mimeographed for its first year trail use. Photographs and information were requested from Great Sand Dunes to be used in publishing the first printed booklet for the Montville Nature Trail. This trail, first used last summer, was well received by visitors to the area. Five hundred copies of the guide leaflet for the Heart of Rocks Trail were prepared and sent to Chiricahua, as well as 1,000 copies of a leaflet entitled, What to See and Do at Chiricahua.

Chiricahua--Mr. Cook reports that the self-guided trails are proving very popular, and recently he has noted much more interest in these trails than heretofore. Other interpretive activities at Chiricahua included two automobile caravans to Massai Point, four guided hikes to Echo Canyon and one to the Heart of Rocks with a group of Sierra Club members. Two campfire talks were given.

Great Sand Dunes--The film, Flowers of the National Parks, was shown to the Parent Teachers Association of the East Alamosa Schools. Forty-six persons were present.

Montezuma Castle--Illustrated talks were presented by Archeologist Pierson to the Cottonwood and the Camp Verde Lions Clubs.

Walnut Canyon--Ranger Spangle gave a talk to 50 members of the Arizona State College science class.

Museum Activities and Exhibits

Headquarters--Mr. King spent considerable time preparing a statement concerning the future needs of the public use building at Tonto National Monument. This was prepared in conformance with the outline for museum prospectuses and part of it will eventually be included in the draft of the museum prospectus for that area.

Mr. King also corresponded with Bandelier regarding their suggestions for revisions of a case in the first museum room, "Area in Which These People Lived."

Museum Activities and Exhibits - continued

Navajo--The information case outside the museum building was reconditioned, waterproofed and new material added. Two photographic enlargements showing the use of the Pueblo Indian throwing and planting sticks were made by Ranger Kirk of Organ Pipe Cactus for use in the museum.

Superintendent Aubuchon has been working on plans for a diorama of Keet Seel. This has been offered by Mr. and Mrs. Warren H. Butts of California. The diorama will be made at no cost to the National Park Service. In addition to the diorama, Mr. and Mrs. Butts have offered to make a scale model of Keet Seel.

Research and Observation

Headquarters--Synoptic series of pot sherds were received from various field areas, and are being processed and placed in the master collection by Mrs. King.

A memorandum was sent to Father Victor Stoner concerning the authenticity of our story at Gran Quivira and Father Stoner promised his opinions after his next trip to that monument.

The final portion of Dr. Harold E. Enlow's preliminary report on the geology of Chiricahua was received. Chiricahua will have by far the best coverage of its geology of any of our areas when we receive Dr. Enlow's final report on which he is now working.

Mr. Arnberger spent one afternoon assisting Dr. Allen J. Lemin. Dr. Lemin is from England and is in this country on a teacher exchange arrangement and is at present conducting investigations on the chemical constituents of various species of cactus. This work is being financed by the American Heart Association in the hope that some of the cactus constituents will be useful in the treatment of heart disease. Arrangements were made for Dr. Lemin to collect and ship several boxes of cactus material from the vicinity of Globe.

Capulin Mountain--Mr. Farr reports that "very few of the oak leaves from the past year have been shed. Old timers here tell us this indicates a late spring -- well, of course, since we stop to think about it, we know they are right for we always have a late spring here at this altitude which is more than seven thousand feet at the foot of Mt. Capulin. All the animals in the Park have come through the winter in fine shape. I note that the Buck deer have just shed their horns -- and their hair is fast changing color to a much lighter shade. I count from ten to thirty every evening when I come home from work around the foot of the Mountain."

Chiricahua--Considerable work is being done by Ranger Barrel in connection with the herbarium, including card indexing and identification of specimens.

Gran Quivira--A group of artifacts which had been at the Regional Office under study were returned by Archeologist Van Valkenburgh, who also spent two days reviewing stone work from recent excavations. Mr. Ringenbach corresponded with Father A. Chavez, OFM, Jemez Pueblo, regarding the architecture of San Ysidro Mission.

Saguaro--Four Gila Monsters were found by monument personnel and proved to be very intriguing to visitors, many of whom secured movies and photographs.

Loan Library

Accessions totaled 107, including 11 books, 48 separates, and 48 periodicals.

A set of our old special reports was furnished to the Peabody Museum of Harvard University upon their request.

Southwestern Monuments Association

The editor of the magazine Wildflower was requested to list our booklets on Southwestern flowers in that widely-circulated periodical.

Five each of our flower booklets as well as Poisonous Dwellers of the Desert were donated to the San Carlos Apache Indian Agency schools.

The Rydal Press in Santa Fe was awarded the contract to print 15,000 copies of the fourth edition of Poisonous Dwellers of the Desert.

Much time during the month was spent teaching the Association work to Mr. Harry B. Boatright, who replaces Mr. Vedder when he leaves his position the first of May.

Ruins Stabilization

During the month Mr. Vivian spent most of his time compiling and making a final copy of the archeological report for Gran Quivira.

Mr. Richert and his crew of six completed the stabilization work at Tuzigoot and returned to the Chaco headquarters on April 20. Superintendent Brewer's report on the work accomplished there is as follows: "They completed the doorway into Room 14, rebuilt a couple of collapsed walls, stabilized a steep face of the hill which was being badly undercut, and did innumerable match-and-patch jobs throughout the ruins. We are indebted to Rick for a beautiful job of stabilization and an equally swell clean-up job at the finish."

Travel

Travel continues to increase over the corresponding period of a year ago. The percentage increase this month is 15 per cent. Almost every area experienced heavy visitation over the Easter week end. The Navajo Trail Tours brought one bus tour from Albuquerque and is planning to schedule weekly trip during the summer, to Gran Quivira National Monument.

Perhaps Navajo experienced the most unusual visitor conditions during the month. First, they had a 196% increase, and second five inches of snow on a day when 37 people were camping in the area's four camp sites. Despite the snow, two guided trips were made to Betatakin Ruins and coffee and cake were served all day long at the superintendent's residence.

Visitors

Headquarters--Superintendent John O. Cook and son, Montezuma Castle; Superintendent Brueck, Wupatki; Superintendent Aubuchon, Navajo; Misses Grace Metcalf and Eleanor Elasko, Region Three Office; Landscape Architect Harold Marsh, Regional Office; Supervisory Ranger Steele and family, Saguaro; Mr. C. Harold Higgins, trading post operator, San Carlos Apache Reservation; Mrs. Jean F. Williams,

Visitors - Headquarters - continued

Civil Service Inspector, San Francisco and Mr. John B. Bartley, Personnel Officer, Phoenix Area Office, Bureau of Indian Affairs; Archeologist Schroeder, Regional Office; Park Ranger Turney and Mrs. Turney, Bandelier; Mr. Weldon Heald, well-known writer; Dr. Colton and Mr. Bob Euler, Museum of Northern Arizona.

Aztec Ruins--Mr. and Mrs. Earl Morris; Dr. and Mrs. M. L. Cole, Eastern New Mexico University, Portales; Mrs. Charles Maddox and Mr. Sherman Howe, pioneer authority on the ruins.

Bandelier--Mr. and Mrs. Roubery, Vice-Consul from Sweden; Naturalist Wayne Bryant and party; 54 students from York College A'Capella Choir, York, Nebraska.

Canyon de Chelly--Josef Muench, who spent several days photographing area; also Devereux Butcher, gathering material for future publications; several organized groups including University of Nebraska Department of Geology and University of Denver, Department of Anthropology and Geology classes.

Chaco Canyon--Mr. Devereux Butcher; Drs. Hill, Stanley Newman, and Caseter, University of New Mexico.

Casa Grande--The usual spring treks of students brought 60 high school boys and girls from Globe; 75 from Phoenix; 63 members of the Brigham Young High School Band; 50 fourth graders from Eloy; and 25 grade school children from Picacho; Mr. Ben Quinn, Utah Parks Company.

Chiricahua--Mr. and Mrs. Ernest Hamlin Baker, cover artist for Time Magazine; Mr. and Mrs. Weldon Heald; Mrs. Ansel Adams, Naturalist Wayne Bryant, and other friends from Yosemite.

El Morro--Ansel Adams and Josef Muench on the same day, taking pictures for a magazine.

Gran Quivira--Mr. and Mrs. Charles G. Woodbury, member, NPS Advisory Board, Washington, D. C. with Mr. and Mrs. Maylon Hepp, Professor of Philosophy, Ohio University.

Great Sand Dunes--Mrs. Richard Van Valkenburgh and new husband, Santa Fe; a party of University of Nebraska students on a geology field trip; 83 people attended an Easter sunrise service held by the First Methodist Church of Alamosa.

Montezuma Castle--In this area also groups of school children helped swell the total; 40 from the Camp Verde School and 50 from the Beaver Creek school held egg hunts in the picnic area; 25 Boy Scouts from Los Angeles and 22 Explorer Scouts from Long Beach, on April 4; 16 students from De Paul University.

Navajo--Dr. Bertha Dutton, New Mexico State Museum.

Organ Pipe Cactus--Misses Grace Metcalf and Eleanor Elasko, from the Region Three Office; Miss Marion Steinmann, staff writer for Life magazine; Richard H. Paugh, Director of the American Museum of Natural History; Dean Tillotson and Aubrin Anderson.

Saguaro--Mr. and Mrs. Josef Muench; Miss Marion Steinmann; Misses Grace Metcalf and Eleanor Elasko; Dr. Walter Phillips, Botany Department, University of Arizona.

Tonto--Mr. and Mrs. H. M. Ratcliff, parents of Forester Ratcliff of the Regional Office; Park Ranger and Mrs. Les Earenfight, Joshua Tree National Monument, accompanied by Mr. and Mrs. John Stratton, of the Gila Pueblo headquarters; Charles Dock and family, Allegheny State Park, New York.

Visitors - continued

Tumacacori--Harry G. Chernin, Nogales mayor and General Ricardo of the Mexican Army; Mr. and Mrs. Julian Hayden, Tucson, a former archeologist who has discovered he can move more dirt as a contractor; Misses Metcalf and Elasko.

Tuzigoot--Dr. and Mrs. L. J. Lull, U. S. Indian Service, Phoenix and guest, Dr. A. H. Dehks, from Iran; Dr. Bertha Dutton; several groups of students and Boy Scouts; Israel and South Africa were among foreign countries represented.

Walnut Canyon--Harry Malm, feature writer for the New York Times, gathering material for articles on the National Park Service.

White Sands--Wayne Bryant and party; Samuel Sorin, noted pianist; a plant geography class from the University of Oklahoma and several busses of school groups, mostly seniors on the usual spring treks.

Ranger Service

Saguaro--Acting Superintendent Steele is highly complimentary of the fine service rendered by Park Ranger Zerbey since Mr. King's departure from Saguaro. He writes "His (Mr. Zerbey's) able assistance and contribution of extra hours to duty have meant the difference between an emergency get by service and normal operations."

We are very proud of the many fine rangers in our organization, and are pleased when their superiors note and comment on the fine service they are giving.

Police Protection

Organ Pipe Cactus--Two aliens were picked up and turned over to the Immigration Service. The fence along the International Boundary was cut and a car taken into Mexico, and other evidences of smuggling into Mexico were noted.

Saguaro--Consideration is being given to dropping the criminal charges against the two boys recently involved in a hunting violation case in order to avoid a jail sentence. However, the possibilities of forfeiture of the boys' guns were being explored, which, if done, would amount to a fairly sizable fine against them.

Grazing

Arches--Because of the lack of precipitation during the past winter, Superintendent Wilson has been faced with a trespass problem. Stock has been converging in the Salt Wash for water.

Soil and Moisture Control

Chaco Canyon--The major part of the Soil and Moisture Control work for this fiscal year has been completed. A total of 3200 rooted cottonwoods and 16,800 rooted willows have been planted. In addition, 35,155 cuttings were made from willows in the wash and planted. Moisture conditions were conducive to growth at planting time, but since then only .29 of an inch had fallen.

Forest and Building Fire Protection

Bandelier--Foresters Moore, from the Washington Office, and Carlson and Ratcliff, Regional Office, visited the area on April 2 and made some good suggestions concerning the location and organization of the forest fire fighting equipment. They also approved plans to provide fire hose houses.

Forest and Building Fire Protection - Bandelier - continued

Supervisory Ranger Young attended two one-day fire schools held by the Forest Service at Jemez and Santa Clara Pueblos on April 15 and 16.

Chiricahua--A big fire on the Coronado National Forest, which burned an estimated 5,000 acres, burned within 3 miles of the monument. Maintenceman Marble assisted the Forest Service for three days in the capacity of second cook.

Saguaro--Because of the dry conditions in the forested area, some of the trail workers were moved to Manning Camp where they are clearing the trails of snags and clearing communication lines in the event of an early emergency.

Planning for the local Fire Control and Personnel Training Conference is underway with tentative dates set for June 3-5.

Tonto--The grass and brush fire hazard is critical. Already one small man-caused grass fire has occurred, fortunately at the end of the parking area where it could not spread. Within 25 seconds between detection and attack, the fire had spread about ten feet against the wind.

An informal training session in grass and brush fire fighting, with the road crew participating, was held.

Wupatki--Superintendent Brueck attended a demonstration on fire line building with tractors and small one-man line builders. This was part of the program of a meeting of the Southwest Section of the Society of American Foresters, held at Fort Tuthill.

Insect and Tree Diseases

Bandelier--Plans were completed for the aerial spraying for the control of tent caterpillars which will be done on May 18, weather permitting, by the Pueblo Air Service, Pueblo, Colorado.

Accidents

Montezuma Castle--A woman visitor, about 65 years old, while climbing, off the trail, along the talus slope in front of the Castle, fell and broke her left leg. She was given first aid treatment and then taken to the Cottonwood hospital by ambulance.

Personnel

Arches--Merle Winbourn, who resigned early in April, was reemployed as maintenanceman on April 20.

Casa Grande--Archeologist Donald Jewell resigned April 3 and Mr. Fred R. Peck reported for duty as temporary ranger on the 22nd.

Organ Pipe Cactus--Park Ranger Kirk left on April 29 for his new assignment at Mt. Rainier National Park.

Saguaro--Superintendent King and family departed April 10 for his new assignment at Joshua Tree National Monument. Supervisory Park Ranger Steele is Acting Superintendent until the arrival of Mr. King's successor.

Seasonal Ranger Wendell Bryce was terminated April 11, after turning in his usual fine job during the winter season.

Wupatki--Equipment Operator Milford Waite from Petrified Forest, reported for duty with the road crew on April 5.

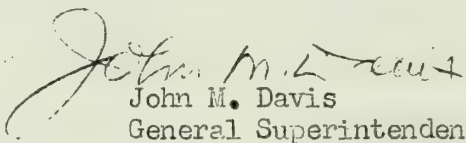

Local Items

Headquarters--All of us at Gila Pueblo are enjoying the beautiful flowers which springtime has brought. The hedgehog cactus, particularly, has been lovely, with as many as 13 blossoms appearing at one time on some of the plants. Nature has been ably assisted by some of the personnel in bringing beauty to our surroundings. Especial mention should be made of Luis Gastellum's pansies, tulips, stocks, and sweetpeas which made quite a spectacular floral display in front of his residence. Leslie Arnberger and Dale King are also enthusiastic gardeners, and we are looking to them to provide us with continuing beauty throughout the summer months.

Navajo--Seasonal Ranger and Mrs. Hubert Laughter are the proud parents of a new son -- name David Dwight.

Ironie note -- Mrs. Keith Fat, wife on one of the laborers, gave birth unattended to twins on April 10. At the time five Air Force doctors were visiting the area, wholly unaware of her need for medical attention.

Tonto--An 11-year-old girl stepped on a rattlesnake in a grassy area near the museum on a busy Sunday. Due to good luck and the trajectory of the child, she escaped uninjured.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Arches National Monument
Moab, Utah

April 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Arches National Monument

Subject: Monthly Narrative Report for the month of April, 1953
Arches National Monument

WEATHER: The mild warm weather of last month continued through April except for five days of high winds and a definite drop in temperature.

TRAVEL: As usual the big day of the year was Easter Sunday when 1680 visitors entered the area in 336 cars. Sometime between 1:30 PM. and 3:00 PM., the peak time of travel, the batteries in the traffic counter gave out and an undetermined number of cars were not counted. By actual count, for four hours, the average number of people per car was 5. During the rest of the month 1731 visitors entered the area in 539 cars and our total for the month was 885 cars and 3411 visitors. This is an increase of 31 % over the same period last year. Thirty-one states, one territory, and four foreign countries were represented.

INTERPRETIVE SERVICE: Approximately 50 % of the total visitors were contacted at the Wayside Exhibit and Headquarters. The register at the Wayside Exhibit was signed by 1720 people and we estimate that 1691 people used the Cove Nature Trail. Twice the Nature Trail cash box was robbed and as near as we can determine about \$12.00 taken. The first haul was made by ripping off the hasp and the second by prying up the front top.

PERSONNEL: Merle Winbourn, who recently resigned his position as Maintenance man, was reemployed on April 20, in the same position. We regret that his private business venture did not work out, but are mighty glad to have him back.

PUBLICITY: Life Magazine's April 13 issue featured a beautiful picture, by Josef Muench, of the Delicate Arch. We understand that this is the first time that an attraction in one of our areas has appeared on the front cover of a magazine with the widespread circulation that Life has. This front cover splash seems to have set off an Atomic Chain reaction, for in the past week a number of calls have been received from other national publications requesting detailed information on Delicate Arch and other points of interest both in and outside of the monument.

In the Travel section of Sunset Magazine, May issue there appears an article entitled, "Utah's famous rock windows" with pictures of Double Arch, The Windows Section, and Headquarters.

Direct Agency assistance does not extend to the extent of the above.

1941: As usual the day of the year was fairly busy and the
Electric started the work in 1941 with a number of new
5:00 PM, the first of the year, the first of the year
year and an extraordinary number of cars were not counted, as usual
counted for the year, the average number of people per car was 1.1, being
the year of the month of the year started the work in 1941 and the
total for the month was 100 cars and 111 passengers, this is an increase
of 11% over the same period last year, 1940-41, and 1941-42,
and 1942-43, compared with 1941-42.

There is a very large number of people who are very much interested in the progress of the country and who are very much interested in the progress of the country and who are very much interested in the progress of the country.

[illegible][illegible]

TRAILS: Progress on the Delicate Arch Trail has been better than we had even hoped for, since work was started again, after the method of realignment was agreed upon by Messes. Gastellum, Alleman, and Van Pelt. We estimate that it is almost $2/3$ complete and another two weeks will see the shooting job finished.

ROADS: Our roads, within the monument are in worse shape than they have ever been, due to lack of moisture and practically no maintenance during the last three months.

N. P. S. VISITORS: Assistant Superintendent, Luis Gastellum, and Architects Carl Alleman and David Van Pelt.

GRAZING THESSPASS: Due to very little precipitation during both winter and spring, all catchbasin waterholes have dried up in the last month and stock from all directions are converginh on Salt Wash for water. By April 30 all stock is supposed to be taken off the adjacent BLM grazing land which will end this use in the monument. Little can be done except constant riding, for which funds are not available; however some control should be worked out for future dry years.

GENERAL: Ranger Morris has cleaned out and remodled all storage rooms. He has also placed all outside storage on the newly constructed dock which is completely hidden by the utility yard fence. Nothing can change the "Old CCC " look of the place, but atleast the visitor is not greeted by an oil barrel and a coal pile.

Bates E. Wilson
Bates E. Wilson
Superintendent

AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

April 24, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Aztec Ruins

Subject: Monthly Narrative Report for April, 1953

WEATHER: There was .97 of an inch of moisture for the report month and several days with high winds and dust. A storm beginning on April 6 brought snow and slick roads in mountains on the north and east. The maximum temperature for the month was 80° on April 21 and the minimum was 19° on April 18. Considerable damage resulted to early blooming fruit.

ADMINISTRATION: A general information article on Chaco was completed for the ceremonial edition of the Gallup Independent.

The monument is being kept open for nine hours on Saturdays and ten hours on Sundays.

Pictures were taken of the unsatisfactory storage conditions for artifacts. With the shelves fitted around the air ducts for our furnace, it was not possible to get pictures with satisfactory perspective.

On April 14 a six man crew for the Bureau of Land Management requested and was given tentative permission to establish a camp on the monument for several months.

VISITOR TRAVEL: Travel for the month totaled 1415 visitors in 426 cars. This was 231 more visitors or 19 per cent more than were counted in the same month last year. Total travel for the year is 3739. One hundred and sixty-five trips were made through the ruins for 1048 visitors and 173 visitors were given "quickie" glimpses of the ruins in 54 groups.

PERSONNEL: Ranger Maxey is scheduled for promotion to District Ranger and transfer to Grand Canyon about June 1.

MAINTENANCE: The entrance signs were given a coat of linseed oil. A new museum sign with six inch letters is being completed and a new free parking area sign is being made in the hope that people making their first visit will not be frightened away by the somewhat

forbidding appearance of the main entrance.

More weeds and leaves have been burned from the south side of the ruin and the irrigation ditches are being cleaned.

Asbestos roof coating was applied to the cracks and holes in the roof of the Great Kiva.

NATIONAL PARK SERVICE VISITORS: Sture Carlson and Bob Moore, Foresters, were here on March 29.

On April 1 Supt. and Mrs. Carlson from Mesa Verde stopped for their first visit to Aztec Ruins.

Assistant Superintendent Fred Fagergren and family from Mesa Verde made their first visit on April 5.

Art White was here from Chaco on April 8.

On April 16 Supt. and Mrs. Aubuchon from Navajo stopped for a short visit.

Ranger and Mrs. Foy Young and son from Bandelier camped over night on April 18.

REMARKABLE VISITORS: Mr. and Mrs. Earl Morris stopped on March 27 enroute to Phoenix.

Dr. and Mrs. F. L. Cole from Eastern New Mexico University at Portales visited the ruins on April 14. Dr. Cole was the principal speaker at the Chamber of Commerce annual banquet on April 13.

Mrs. Chas. Maddox and Sherman Howe, pioneer authority on the ruins, visited the monument on April 14. Mrs. Maddox was obtaining information for a paper to be presented before the San Juan Basin Folklore Society.

Homer F. Hastings
Acting Superintendent

April 29, 1953

Memorandum

To: General Superintendent
From: Superintendent, Bandelier
Subject: Monthly Narrative Report, April 1953

Weather

The weather during most of April was mild following a cold snap that started on the 8th and during which temperatures reached 16 degrees on the 12th. The high temperature for the month was a warm 32 on the 26th and which contributed to the heaviest travel ever recorded for a day in April.

Rain occurred on only two days and amounted to .17 inches which is considerably under normal.

Special Activities

This was a month of leave taking in an effort to get in short vacations before digging in for the heavy travel season. The Superintendent went to South Dakota to visit his parents from the 2nd to the 12th.

Supervisory Ranger Young spent the 17th to 19th at Mesa Verde, Aztec, and Chaco Canyon and Ranger Turney took a trip to Carlsbad and points south from the 22nd to the 30th. Mr. Young's planned leave was interrupted when he was summoned to jury duty and had to spend several days in court at Bernalillo, New Mexico.

An inspection of the unpaved portion of the approach road was made April 17 by State Highway Engineer Erwin, District E.F.R., Engineer Keller, Assistant Regional Director Cornell and the Superintendent to determine possibilities for lowering the standards sufficiently so that the road may be constructed with available funds. The consensus of opinion was that the road could easily be constructed on slightly lower standards if the Bureau of Public Roads will approve it.

Maintenance

The museum floor was stained and varnished. It had not been finished before and the general appearance of the museum is considerably improved.

The 20,000 gallon water reservoir was drained, cleaned, and placed in good condition.

Considerable work was accomplished on pruning dangerous limbs off of trees in the campground. The job will be completed after

April 27, 1971

Memorandum

To: General Management

From: Department of Agriculture

Subject: Monthly Narrative Report, April 1971

Summary

The weather during most of April was quite favorable with some rain on the 1st and 2nd. The crops are growing well. The soil is moist and the plants are healthy. The weather was a little dry on the 15th and 16th, but the crops are still growing well.

The weather on the 17th and 18th was very dry. The crops are still growing well, but the soil is becoming dry. The weather is becoming more favorable again.

Special Activities

There was a lot of work done in the field. The crops are being planted and the soil is being prepared. The weather is becoming more favorable again. The crops are growing well.

Department of Agriculture is working on the 17th and 18th. The crops are being planted and the soil is being prepared. The weather is becoming more favorable again. The crops are growing well.

In the report of the Department of Agriculture, it is stated that the crops are growing well. The weather is becoming more favorable again. The crops are growing well.

Conclusion

The weather is becoming more favorable again. The crops are growing well. The weather is becoming more favorable again. The crops are growing well.

The 17,000 gallons of water were used for the crops. The weather is becoming more favorable again. The crops are growing well.

Comments: The weather is becoming more favorable again. The crops are growing well. The weather is becoming more favorable again. The crops are growing well.

the leaves come out and the dead limbs become more obvious.

The floor in the lodge comfort station and eight fire places in the cabins were painted.

Concessions

Mrs. Leverton, who was selected as the sub-concessioner to operate the lodge dining room, spent considerable time getting the kitchen cleaned up and now has it in good shape to open for business the first of May.

Mrs. Frey also has the cabins and souvenir shop ready to open.

Roads and Trails

The shoulders along the half mile of the entrance road that was paved last fall were sloped, the ditches filled, and it now has a more finished appearance.

Twelve loads of gravel were hauled in preparation for oiling the ruins trails. The gravel and oil will be mixed in a cement mixer and will be placed on the trails in a mat that is approximately 1½ inches thick.

Publicity

The pamphlet "Recreational Facilities in the National Parks and Monuments of the Western States" published by the Automobile Club of Southern California contained a section on Bandelier and it was reviewed for accuracy. We extended our congratulations to the Club for publishing such a fine booklet.

Interpretive Service

A total of 1782 visitors were conducted on 130 tours of the ruins. A few of the trips were very large with more than 80 visitors which is unusual for this time of the year.

Travel

Travel continued to show a decided increase over last year with 4657 visitors as compared with 3920 last April. There were 836 visitors on Sunday April 26 which set a new record for daily travel in April.

Visitors

Visitors to Bandelier this month included:
Mr. and Mrs. Roubery, Vice Council from Sweden.
Administrative Officer and Mrs. Carpenter with some of their relatives.
54 students of the York College A&C Capella Choir, York, Nebraska.
Naturalist Wayne Bryant and Mrs. Adams, concessioner, Yosemite National Park.
Foresters Robert Moore, Washington Office, Stu Carlson and Harold Ratcliff, Region Three office.

Forest Fire Protection

Forester Robert Moore from the Washington office and Regional Foresters Stu Carlson and Harold Ratcliff made a general inspection of

the leaves came out and the dead limbs became more conspicuous.

The floor in the lodge contains sections and eight five
pieces in the ceiling were painted.

Decorations

The decorations were made in the lodge and were made
to operate the lodge which were, again, made in the lodge

the area on April 2. They made some good suggestions concerning the location and organization of the forest fire fighting equipment and approved of the plans to provide fire hose houses as soon as time and funds will permit.

Supervisory Ranger Young attended two, one day, fire schools held by the Forest Service at Jemez and Santa Clara pueblos on April 15 and 16.

Insect and Tree Diseases

Plans were completed for the aerial spraying for the control of tent caterpillars. Pueblo Air Service, Pueblo, Colorado will do the spraying on May 18, weather permitting.

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

April 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Canyon de Chelly
Subject: Monthly Narrative Report for April, 1953

Travel: 963 visitors in 189 cars this month. This figure exceeds by far any April since the monument was established. The previous high was 681 for April of 1952. Also, the current calendar travel year shows an increase of about 45% over 1952. There were 195 overnight campers which was exceptional for this time of the year. Guide and contact service totaled 85 hours.

Weather: Several days of hard winds resulting in severe dust storms. Total precipitation amounted to only .33 of an inch. Moisture so far this year is much below that of 1952. 1.63 inches compared with 3.63. High-low temperatures ranged from 81 to 18.

Roads: All approach roads are in good shape. 20 miles of monument roads were well bladed and they are in very good condition.

N.P.S. Visitors: P. P. Patraw and Dick Franke on April 20.

Organized Groups: Organized groups during the month included the following:

- 29 - from the Ganado Mission High School on March 30.
 - 20 - YMCA members from Los Angeles, Calif., on March 31-April 1.
 - 30 - Seventh Day Adventists, Southern Calif., on April 1 - 2.
 - 19 - University of Nebraska (Dep't. of Geology) on April 5 - 6.
 - 40 - from St. Michaels High School on April 19.
 - 16 - University of Denver (Dep't. of Anth. & Geo.) on April 19-20.
- Most of these were overnight campers and were given special lectures by the Superintendent.

Noteworthy Visitors: Josef Muench, noted photographer, arrived on the 17th and spent several days photographing the area. Also, Reverex Butcher was here on the 21-22 gathering material for future publications.

Signs: New directional signs were constructed and placed at the White House overlook and trail.

Concession: To accommodate the ever increasing number of visitors the Thunderbird Guest Ranch opened for business on April 1 instead of the customary May 1 or 15.

UNITED STATES DEPARTMENT OF JUSTICE
WASHINGTON, D. C.

April 26, 1952

Memorandum

To: General Board of Supervisors

From: Department of Justice, Bureau of Prisons

Subject: Monthly Narrative Report for April, 1952

Final: The visitation in the month of April, 1952, was held on April 24th at the Federal Reformatory for Women at Alderson, West Virginia. The visiting list was 101 for April of 1952. Also, the average number of visits per inmate was 1.14. There were 113 visits in April, 1952, which was an increase of 10 visits over the month of March, 1952. The total number of visits for the year to date is 1,142.

Summary: The visitation in the month of April, 1952, was held on April 24th at the Federal Reformatory for Women at Alderson, West Virginia. The visiting list was 101 for April of 1952. Also, the average number of visits per inmate was 1.14. There were 113 visits in April, 1952, which was an increase of 10 visits over the month of March, 1952. The total number of visits for the year to date is 1,142.

Notes: All reports must be in good shape. In order of importance, the first three are the most important.

1. The visitation in the month of April, 1952, was held on April 24th at the Federal Reformatory for Women at Alderson, West Virginia.

Capulin Mountain NATIONAL MONUMENT

Capulin, New Mexico,

April 24, 1953

19.....

To: The General Superintendent
Southwestern National Monument,
National Park Service
Globe, Arizona,

From: Homer J. Farr, Superintendent
Capulin Mountain National Monument,

Subject: Monthly Narrative Report,

VISITORS,

There was approximately nine hundred visitors to the mountain this month, making a total of one thousand nine hundred fifty for the year to date,

Very Dry, Cold and very windy, much cooler than March, however we did get about half inch of rain last night,

Flora and Fauna.

I note very few of the old leaves from the last year has been shedded, old timers here tell us this indicates a late spring, well of course since we stop to think about it we know they are right for we always do have a late spring here at this altitude which is more than seven thousand feet at the foot of Mt Capulin and of course they are right, All the animals in the park have come thru the winter in fine shape, I note that the buck deer have just shed their horns making them all look like does, and their hair is fast changing color to a much lighter shade, I count from ten to thirty every evening when I come home from work around the foot of the mountain,

have been in fair condition thru the month, some snowdrifts taking place all the time but this is overcome by much melting,

Sincerely,
Homer J. Farr,
Superintendent,

CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

April 25, 1953

MEMORANDUM

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for March, 1953

General : According to the March issue of the Arizona Business and Economic Review, ".... for the second consecutive month, the winter tourist season has failed to meet trade expectations based on last year's record operations." This monument reflects the trend; travel showed a very slight decrease in comparison with last April's figures.

Casa Grande was mentioned as ".....one of the most imposing monuments to this ancient civilization (the Hohokam)" in the first of a series of articles on Arizona Indians by Jack Kerie appearing in the Arizona Republic.

Our visitation this month included people from all 48 states plus Wales, Hawaii, Japan, Sweden, India, and Egypt.

Weather : .05 inches of rain fell on April 22. Maximum temperature 94 degrees (on the 20th), minimum temperature 31 degrees (on the 13th). This month saw several windy days.

Interpretive Service: During the month 5,245 visitors arrived at Casa Grande, 3,162 of these visiting the ruins in 234 guided trips.

<u>Visitor Summary:</u>	<u>1953</u>	<u>1952</u>
<u>April</u>	5,245	5,282
<u>Increase</u>	0	
<u>Decrease</u>	37	

Noteworthy Visitors and Special Groups:

March 27 60 high school children from Globe.
March 30 75 school children from Phoenix.

April 25	16 Brownies from Florence

Administration and Protection: Eight requests for information were received. The Adamsville site exhibits no signs of recent vandalism.

Museum: One exhibit case was revamped.

Maintenance: Maintenance man Lopez varnished the floors and calcosined the walls of the residence vacated by Mr. Jewell.

It has not been necessary as yet to install coolers.

The State Highway Department oiled and sanded cracks in the approach and service roads. In addition, we spent several days removing surplus aggregate on the parking area in front of the museum.

Personnel: Archeologist Donald Jewell resigned C.O.B. April 3; Fred R. Peck, Temporary Ranger, reported for duty on April 22. Mr. and Mrs. Peck and daughter Suzie are a welcome addition to the staff.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chaco Canyon National Monument
Bloomfield, New Mexico

April 26, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for April, 1953

Weather

Again numerous days of high winds and blowing sand and dust have characterized the weather for Chaco for the month. Quite a number of the dusty days have been on heavy travel days which has cut down visitor participation in the interpretative program. The high for the month was 78 on the 21st and the low was 6 on the night of the 8th. A total of .29 of an inch of precipitation, in the form of snow, sleet and rain, was recorded for the month.

Travel

A total of 218 people in 68 cars visited the area this month. While this is not an increase over this period of last year, we did not have the Crownpoint Indian School picnic which boosted the total last year. Guided tours of small groups consumed much time this month. With the exception of the weekends, tours seldom consisted of more than three people.

Administration

Daily duty was maintained throughout the month except for lieu days and a total of 40 hours annual leave. Eight requests for information were answered and much time was spent on contact and general office work.

Soil and Moisture Control

This month saw the completion of the major part of the Soil and Moisture work for the fiscal year. A total of 3200 rooted cottonwoods and 16,800 rooted willows have been planted. In addition

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Grand Canyon National Monument
Bismarck, New Mexico

April 26, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Grand Canyon

Subject: Monthly Narrative Report for April, 1953

Summary

Again numerous signs of black rot and blight were noted last month. The weather on Grand Canyon was fair, with a number of the daily days being in heavy rain. The high snow water percentage in the meteorological service. The high for the month was 73 on the 11th and the low was 4 on the 17th. A total of 1.77 of an inch of precipitation, in the form of rain, sleet and snow, was recorded for the month.

Travel

A total of 218 people in 40 cars visited the monument. While this is not an increase over the period of last year, we should note the Department of the Interior which houses the Grand Canyon. United States of South America and the Grand Canyon. With the exception of the weather, some visitors consisted of some local people.

Investigation

Daily duty was maintained throughout the month except for one day and a total of 40 more animal hours. Other animals for investigation were observed and some time was spent in making and General Office work.

Wild and Endemic Animals

This month the weather was fair and the Grand Canyon was visited by 218 people. The weather was fair and the Grand Canyon was visited by 218 people.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

to these, 35,155 cuttings were made from willows in the wash and planted. At planting time moisture conditions were conducive to growth but since that time only .29 of an inch of moisture has fallen.

Grounds

With the completion of the Soil and Moisture Control work the Navajo crew was switched over to Grounds cleanup. The remaining work on the complete obliteration of the old buildings scheduled for this fiscal year is rapidly nearing completion. Only a little work remains. A lot of the material from the walls of these buildings is being placed along the route for the new road, and will be used for fill in the base.

Due to the numerous days of high wind, plus the increase in picnickers, a large amount of time had to be devoted to area cleanup.

Maintenance

Routine maintenance was accomplished during the month.

Roads and Trails

The north approach road was graded by the county the latter part of the month and it seems to be in good condition. It had previously been extremely rough in places due to the fact that the high winds had blown away the softer sections of the surface.

The roads in the monument were patrolled and all paper, cans, etc., were picked up. The road from the headquarters area to the new residences was dragged to eliminate a number of low sand piles which had blown over the road.

The remaining culverts along the main road were cleaned and tumbleweeds burned from around the ends.

Work will start on the removal of the culverts from the old CCC road about the 26th. These are to be stockpiled for future use on the new monument road.

Wildlife

The first rattlesnake and the first bull snake of the season were observed. We hope that this is not the start of a bad summer for rattlers.

April 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Monthly Narrative Report

Weather. Dry weather was broken by only one rain, which fell on April 22 and 23. .39 of an inch of precipitation broke a long drouth and was very welcome from a fire protection viewpoint.

Maintenance. A road oil trailer spray outfit was obtained from Casa Grande to facilitate the upkeep of our road.

Thomas N. Grigg has been employed as a trail laborer for the past two weeks. It is planned to place him on the Sugar Loaf fire lookout by May 1.

Approaches to Monument. All approach roads are in fair condition.

Interpretive Service. 2129 visitors were contacted in the museum in 506 groups. 2 automobile caravans were conducted to Massai Point with a total of 64 visitors, consuming $1\frac{1}{2}$ hours per group. 5 guided hikes were made with a total of 72 visitors. Four of these were our regular Echo Canyon hikes on Sunday and the fifth was a Heart of Rocks hike with 19 Sierra Club members. Two campfire talks were made to a total of 43 visitors.

For some reason visitors have taken a sudden interest in our Foothill Forest Trail. 80 took this selfguided trail during the month and several compliments were received. An estimated 126 made use of the Massai Point selfguided Nature Trail. This trail has been revised and relocated and can be placed in operation in the new location as soon as the mimeographed guide sheets are received.

Research and Observation. Ranger Barrel has been working on the card indexing and identification of our herbarium. In connection with this work he has been corresponding and obtaining lists from Bill Reed who did considerable work on our herbarium with the cooperation of the American Museum of Natural History. This work was done during Mr. Reed's work here as a temporary ranger and later in connection with his college work.

Increase in Travel. 2526 visitors came to Chiricahua this

UNITED STATES

DEPARTMENT OF THE INTERIOR

month. This establishes an all time high for April and is 543 or 23% ahead of the previous high which was established last April. We have a total of 7320 for the calendar year which is 18% ahead of last year at this time.

Visitors. Mr. and Mrs. Ernest Hamlin Baker, cover artist for Time Magazine.

Mr. and Mrs. Weldon Heald, writers of conservation articles and good friends of the Park Service.

Naturalist Wayne Bryant from Yosemite and friends including Mrs. Ansel Adams, operator of the curio shop at Yosemite and wife of the famous photographer, Ansel Adams.

Paul McCreary and family, guide at Carlsbad Caverns spent several days with Ranger Barrel but had to cut their trip short due to one of the children becoming ill with measles.

Ranger and Mrs. Tarney from Pandalier.

Police Protection. Claton Van Nobles, the thief of Chiricahua, was tried at Bisbee and sentenced to serve a term of one to three years at Florence for stabbing a deputy sheriff after being arrested and handcuffed. He was tried only for the attempted murder and is still subject to trial for the thefts.

Forest Fire protection. On April 7 a mancaused fire started on the Chiricahua Mountain range south of the monument. It defied control by the Coronado National Forest force until April 19. The Forest Service estimated it at 5000 acres and stated that it was the biggest fire on the Coronado since 1920. As it burned within three miles of the monument we commenced to feel rather uneasy. Maintenance man Harpole was loaned to the forest Service for three days as second cook.

It was planned to put a fire control aid on Sugar Leaf Lookout on April 27 but the recent rain has relieved the situation and the date has been postponed until May 1.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

April 26, 1953

Memorandum

To: General Superintendent, S. W. N. M.
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for Coronado National Memorial for April, 1953

No inspection trip was made this month to Coronado National Memorial, because of shortage of funds in our Activity 1 accounts.

We learn, from a letter of April 6 from Grace Sparkes, Chairman of the Coronado International Monument Commission of Arizona, and a good friend of the National Park Service (she lives only about a mile east of the area), that "Comments from folks over the Pass are complimentary of your new signs." Those are the signs we planted last month at the approaches to Montezuma Pass.

Miss Sparkes also advises the Forest Service is starting construction of a culvert to replace a bridge ~~acrossing~~ across Montezuma Creek, on the approach road east of our area. The old bridge had suffered considerably from wear and tear.

Concerning our suggestion of last month that we go a little easy on publicity for Coronado National Memorial until the National Park Service can offer frequent enough patrols to prevent vandalism, the following quotation is given from Grace's letter:

"Enjoyed your visit thoroughly. Have talked informally with President John Caldwell and Mrs. Frances Cover, president and acting secretary of the Bisbee Chamber of Commerce re: publicity and advertising of the Coronado National Memorial as outlined by you; also Mr. Frank Zaleski. We merely exchanged ideas. I plan in the near future to see the folks at the Montezuma Guest Ranch and then perhaps to hold a meeting of our National Parks and Monuments Committee of the Bisbee Chamber of Commerce to discuss this from various angles."

I would like very much to sit in on one of those committee sessions, and shall plan on wangling an invite from Miss Sparkes to do so. But I would much rather wait until the Service has some tangible action under way for Coronado National Memorial. I know if I sat in on a session, they would ask me to say something, and it is our experience that when you sit in with such a group you want to be able to talk in terms of something other than mere generalities.

Department of the Interior

Subject: National Park Service Report for the year 1931-1932

By Inspector John W. Smith and John W. Smith, Jr., Special Agents in Charge of the National Park Service, U. S. N. P.

The report for the year 1931-1932 shows a general increase in the number of visitors to the National Parks. The total number of visitors for the year was 1,234,567, compared with 1,123,456 for the year 1930-1931. This increase is due to a number of factors, including the opening of new parks, the improvement of existing parks, and the general increase in the number of people who are able to afford to travel.

The report also shows a general increase in the number of people who are interested in the National Parks. This is shown by the increase in the number of people who are interested in the National Parks, and the increase in the number of people who are interested in the National Parks.

The report also shows a general increase in the number of people who are interested in the National Parks. This is shown by the increase in the number of people who are interested in the National Parks, and the increase in the number of people who are interested in the National Parks.

Report Lml

April 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, El Morro
Subject: Monthly Narrative Report

There were 405 visitors to the Monument this month. This is 27 per cent better than a year ago. They came in 121 automobiles. Of these visitors, 312 took a trip around the Rock in 57 trips. 44 of these visitors went over the top of the Rock in 12 parties; 125 of them received an orientation talk in 38 parties and two persons spent the night in the campground.

The coolest was 10 degrees and the warmest was 72 degrees Fahrenheit, and there was .88 of an inch of moisture.

The superintendent took two weeks annual leave, and ever since then has been trying to catch up and keep current!

We linseed oiled all the outside woodwork of the residence, the rest of the office and the patio; painted and linseed oiled two signs; painted the fire tool box and the outside fire extinguisher box a bright red. We washed both trucks, polished the pickup and put decals on them -- it finally got warm enough to do so. We erected two new signs.

Our road has received some attention, and the job of placing the trails in shape for the ensuing summer is progressing nicely.

In an unusual circumstance, we had Ansel Adams and Josef Muech in on the same day at the same time taking pictures for the same magazine!

NATIONAL PARK SERVICE

Gran Quivira National Monument,
Gran Quivira, New Mexico

April 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report for April

Weather. We had extremely high winds and a great fluctuation in temperatures. Two inches of snow and rain were received in a freakish flurry on the 23rd for a total of .76 inches of moisture, immediately followed by warm sunny days with temperatures in the low seventies. A maximum temperature reading of 78 degrees was recorded for the 21st and a low of 15 degrees occurred on the 12th.

Visitors. Mr. and Mrs. Charles G. Woodbury, Member, N.P.S. Advisory Board, Washington, D.C. for a half day on March 28, accompanied by Mr. and Mrs. Maylon Hepp, Professor of Philosophy at Ohio University.

Special Activities. Fire fighting techniques of Indian crews at Jemez Pueblo were observed on April 15. The Superintendent accompanied Forester Ratcliff and U.S. Forest Service representatives to the one day session.

The morning of the 16th was spent in the Regional office on general monument business.

Two road meetings of the Highway 10 Boosters group were attended this month. Current State priority lists indicate that Highway 10 South from Mountainair to Gran Quivira will be paved or partially paved sometime during the 1954 fiscal year. This will offer a paved approach road into the monument.

Utilities Maintenance. Underground power line improvements were accomplished on the electric system. Fifty feet of new line were installed and electrical connections were transferred from residence to office meters.

Maps and drawings of the sewer system were obtained from Engineer Lassiter and minor repairs to sewer pipe were made and the system traced out.

NATIONAL PARK SERVICE
Grand Canyon National Monument,
Grand Canyon, New Mexico

April 22, 1922

Memorandum

To: Director, National Park Service
From: Superintendent, Grand Canyon
Subject: Grand Canyon National Monument, New Mexico

Summary. The Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

History. The Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

Geological Description. The Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

The monument of the Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

The Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

Administrative Description. The Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

The Grand Canyon National Monument, New Mexico, is a public land of the United States, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is situated in the Grand Canyon of the Colorado River.

Roads and Trails. Several loads of gravel were stockpiled preparatory to replacing some 150 feet of macadam trail, and routine maintenance on road and trail surfaces was conducted all month.

Approach Roads. These roads were in reasonably good condition this month as State maintainers bladed from both North and South.

Research. Archeologist Van Valkenburgh returned a group of artifacts which had been at the Region under study and spent the 9th and 10th reviewing stone work from recent excavations.

Correspondence was carried on by the Superintendent with Father A. Chavez, OFM, Jemez Pueblo, regarding the architecture of San Ysidro mission.

Interpretation. With the exhibit material completed and on hand we should be able to install the three easels soon. Stands are being revised to accomodate the new size exhibit.

The text for the new trail pamphlet was returned to the Naturalist with no recommended changes. Mimeographed self guiding instructions are being used pending the receipt of the new leaflet.

Self guiding facilities were used by 245 persons for an average of 25 minutes per trip. Guided tours were given to 27 parties of 138 people for an average of 50 minutes per trip. 307 of the 353 visitors recorded were contacted and 300 of these were given some interpretation at the museum.

Travel. From all early indications this is going to be Gran Quivira's heaviest travel year. Visitation increased 51 percent again this month as 353 persons in 108 cars entered. One bus tour from Albuquerque came this month as part of the Navajo Trail Tour trips and with pleasant weather this summer we anticipate their weekly scheduling.

Ray B. Ringenbach
Superintendent

Police and Justice. Several cases of armed robbery
and possession of weapons were reported in various parts
of the city. The police are working to bring these cases
to a speedy conclusion.

Education. The school year is well advanced
and the students are making good progress. The
board of education is pleased with the results.

Health. The health department is
conducting a campaign to improve public health. They
are distributing pamphlets and holding lectures on
disease prevention.

Public Works. The city is working to
improve its public works. The board of public works
is planning to build new streets and bridges.

Fire Department. The fire department
is well equipped and ready to respond to any
emergency. They are conducting regular drills
to keep their skills sharp.

Police Department. The police department
is working to keep the city safe. They are
conducting patrols and investigating crimes.
The chief of police is confident that the city
is in good hands.

City Council. The city council is
meeting regularly to discuss city business.
They are planning to build new streets and
bridges. The council is also working to
improve the city's public works.

Mayor. The mayor is working to
improve the city. He is planning to build
new streets and bridges. He is also working
to improve the city's public works. The
mayor is confident that the city is in good
hands.

GREAT SAND DUNES NATIONAL MONUMENT

Alamosa, Colorado

April 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Great Sand Dunes

Subject: Superintendent's Narrative Report for April, 1953

Weather Conditions

Windy cold weather restricted travel considerably for most of April. Two nice Sundays, however, kept the loss in travel to only 1% from that of April, 1952. A seven inch snow on March 30 and other light showers of snow and rain helped the moisture situation somewhat although the entire San Luis Valley is still relatively dry.

Maximum temperature - 66° on April 21

Minimum temperature - 6° on April 12

Precipitation - 1.36 inches (including 11 inches of snow)

Special Activities

On April 6 I attended the meeting in Monte Vista of the San Luis Valley Travel Association at which Lew Cobb, Director of the Colorado State Advertising and Publicity Department, Mark U. Watrous, Colorado State Highway Engineer, and Charles Shumate, Administrative Engineer of the Colorado State Highway Department, spoke.

Maintenance and Rehabilitation

Preparations for the travel season, rehabilitation work, and a minimum of office work kept me busy for 10 to 12 hours a day, seven days a week this month. Water was turned into the picnic area water system and the entire system cleaned out. Water was also turned into the checking station comfort stations and they are in operation. Replacement of a wornout section of pipe in the picnic area water system required some time as the old pipe there is an off-size (just slightly less than 1 3/4) and I had to rig home-made connections in order to put in the 1 1/2 inch new pipe. Gene Mott would laugh at my combination candlewick, permatex, lead wool, and bell reducer joints -- but they hold water.

UNITED STATES

WILSON, GEORGE W.

WASHINGTON, D. C.

April 10, 1900

Dear Sir:

Very

Truly

Yours very truly,
George W. Wilson

Enclosure

I have the honor to acknowledge the receipt of your letter of the 4th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, however, unable to give you any definite answer at this time.

Very truly,
George W. Wilson

(Signature of George W. Wilson)

Respectfully,
George W. Wilson

I have the honor to acknowledge the receipt of your letter of the 4th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, however, unable to give you any definite answer at this time.

Very truly,
George W. Wilson

I have the honor to acknowledge the receipt of your letter of the 4th inst. and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. I am, however, unable to give you any definite answer at this time.

Painting again took considerable time as I painted the interior woodwork in the back bedroom and laundry room of the superintendent's residence, the window wells throughout the residence, the interior woodwork and window wells in the checking station comfort stations and office, and the floors in the comfort stations. The exterior woodwork along the front of the superintendent's residence was also painted with one coat.

The entrance road was graded twice and is in somewhat better shape as a result of the moisture received during the month. The resumption of picnicking and camping created quite a bit of cleanup work.

Approach Road

The approach road from State Highway 17 has been in good shape all month except for the first three miles at the west end which is still soft.

Alamosa County worked the entire month on the road south to U.S. 160. The road was closed for most of the month due to the road work but is now passable although very soft.

Interpretive Service

On April 24 I showed the Region Three Office film on "Flowers of the National Parks" to the Parent Teachers Association of the East Alamosa Schools. Forty-six people were present.

Research and Observation

A few labels were placed on the newly mounted herbarium specimens -- nothing else was done in this line.

Decrease in Travel

Travel decreased 1% from 878 visitors in April 1952 to 847 people this April due to the inclement weather. This still leaves us with a calendar year increase in travel of 36%.

Protection

Trespass horses came down from the Upper Medano on one occasion and a half day was spent removing them.

Visitors

Mrs. Richard Van Valkenburgh introduced her new husband to us on April 4.

School groups visiting the monument included a group from Center High School and a party of University of Nebraska students on Great Sand Dunes.

During the last few years, the
interior of the house has been
restored. The main walls are

John F. Kennedy
President of the United States

Montezuma Castle National Monument
Camp Verde, Arizona

April 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report for April 1953

Weather: Again it has been dry and at times windy. Only .05 inch of rain was recorded during this report period. A cold snap occurring on April 9 and lasting for several nights caused some damage to fruit crops in the Valley. However, warmer temperatures during the later part of the month have caused the trees and bushes in the area to start turning green.

Travel: It has been heavy and steady all month with more people visiting the area during Easter vacation week than on any previous week in history. For the month, 4,997 people in 1,518 cars visited the Castle and 1,981 people in 602 cars went to the Well. This totals 6,978 visitors to the areas as compared to 4,674 visitors for April of last year. In fact, it is only 95 less visitors than were recorded for August of last year.

Interpretation: Interpretive work was given full priority during the Easter rush. Talks were scheduled hourly at the model and were for the most part well attended. On the later part of the month, most contacts were made in the museum.

Visitors: April 1, 40 Camp Verde School children held an Easter egg hunt in the picnic area.

April 2, 80 pupils and adults from the Beaver Creek School District also had an egg hunt in the picnic area.

April 3, 35 school children from Skull Valley, Arizona used the picnic area and were given a special talk on the Castle.

April 4, 25 Boy Scouts from Los Angeles, Calif.

April 4, 22 Explorer Scouts from Long Beach, Calif.

April 9, 16 Students from De Paul University.

Official Visitors: Mr. Luis Gastelum from Globe stopped by for a short visit on April 13.

Mr. & Mrs. J. A. Hussey, History Division, Washington Office, paid a visit on April 17.

Mr. Al. Schroeder of the Regional Office was by on April 23.

Navajo National Monument
Tonaalea, Arizona

April 27, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report for April, 1953

Travel: We've had it! The larger areas may not understand but a certain amount of confusion results when we get 50 persons in one day plus 5 inches of snow. 37 people camped in our campground (4 campsites) that night. In spite of the snow there were two guided trips to Betatakin and coffee and cake were served at the superintendent's residence all day long.

Weather: The high temperature for the month was 73 degrees and the low was 12. There was .72 inches of moisture recorded here.

Roads: All roads are in good condition. We have just obtained some culvert material to be installed as soon as possible. We anticipate eliminating most of the washing of our roads by controlling the drainage.

An extension of the Sandoz Trail was built leading to the hill top behind the superintendent's residence from which point the visitors have a wonderful view of the surrounding country. Two benches were placed at strategic points for visitor use.

Special Visitors: Supt. and Mrs. J.W. Brewer of Tuzziefoot.

Dr. Bertha Dutton, New Mexico State Museum, Santa Fe, N.M.

Ass't. Reg. Dir. P.P. Patraw and Engineer Dick Franke, of Region Three Office.

General: Five trailside benches were made and placed for use on the Sandoz Trail and its extension. (see Roads)

The hours between 8:00 pm and 10:00 pm one night were spent making a roadside repair of a rented Forest Service pickup. Our own pickup was returned to us at the same time. All our equipment is now in running condition with the exception of the jeep which needs a new starter switch.

A few of the stormy days were spent working over the area files and storage space. Walls were washed and floors cleaned and waxed in the superintendent's residence and the area office. The bathroom was partially painted and will be finished soon. The kitchen stove was thoroughly cleaned.

Spring cleanup was performed throughout the area - new garbage cans were painted and placed in use and the old ones repainted.

A trip was made to Saguaro to obtain a stake truck to be assigned to Supatki. On the return trip I visited the spacious new Southwestern National Monuments headquarters at Globe then went to Gallup to pick up a load of culvert material for Navajo.

One trip was made to Supatki and Flagstaff. This was the first official trip to Flagstaff since January 20th.

The water pumping system was serviced and a new duoboard walkway was installed at the spring. A tool and storage locker was placed near the spring to give us moisture-proof storage.

Museum: The information case outside the museum building was reconditioned, waterproofed and new material added. Two photographic enlargements were made by Ranger Louis Kirk (Organ Pipe) for use in the museum. These enlargements show the use of the Pueblo Indian throwing and planting sticks.

We have been working on plans for a diorama of Keet Seel for display at Navajo which has been offered by Mr. and Mrs. Warren H. Butts of California. Mrs. Butts is a professional sculptress and he is an engineer for Lockheed. The diorama is being made at no cost to NPS and in addition they have offered to make a scale model of Keet Seel. We have postponed work on the model until we have more display space.

Publicity: An article in the May issue of NPS concerning a trip to the Navajo Reservation has brought attention to Navajo and Rainbow Bridge National Monuments. We have answered 25 requests for information on Navajo and Rainbow Bridge this month.

Galley sheets were checked for accuracy for an article by Dr. S. Sanborne on Scaffold House Ruin. The article is to appear in the May issue of NATURAL HISTORY.

A lot of the things that were written over the time that
and showed some. It is not the same as the other

Personnel: A son was born to Seasonal Worker and Mrs. Robert Laughter. The new baby has been named David Dwight.

Laborer and Mrs. Keith Fat are parents of twins born April 13. Mrs. Fat was alone at the time so delivered both babies herself. We had five Air Force doctors visiting Navajo at the time but unfortunately didn't know of Mrs. Fat's need for attention.

ROAD REPAIR OF FAMOUS SCOTT'S HILL

LEWIS NATIONAL PARK

Organ Pipe Cactus National Monument
Ajo, Arizona

April 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Organ Pipe Cactus
Subject: Monthly Narrative Report for April, 1953

Weather

Spring has come to southern Arizona as normal alternating between cool and hot days. High winds have pulled most of the moisture out of the ground and even though a small shower of .11 inches occurred April 22, the desert is now very dry. High for the month was 89 degrees, low was 37.

General

Landscape Architect Marsh and Naturalist Arnberger spent April 16 and 17 in the area assisting in the location of the natural history trail and in making an interpretive outline for the 40 mile loop road.

New Construction

Headquarters roads and campground construction is progressing very well now with nearly all done which can be accomplished until final staking is done.

Interpretive Service

All members of the staff were kept busy over the Easter holiday period with very heavy travel. Several college groups visited the area requiring special attention in the way of nature walks and lectures.

Travel

With the coming of warm weather travel has decreased rapidly the latter part of the month. Only a few campers remain with new ones now usually limited to overnight stops only.

Visitors

Visitors this month included:
Grace Metcalf and Eleanor Blasko of the Region Three Office
Dean Tillotson and Aubrin Anderson
Marion Teinmann - Staff writer for Life Magazine

Visitors (continued)

Richard H. Paugh - Director American Museum of Natural History
Dr. and Mrs. Phillips - University of Arizona

Protection

The fence was out along the International Boundary and a car was taken into Mexico. Other evidence was seen where smuggling into Mexico had taken place.

Two illegal aliens were picked up and turned over to the Immigration authorities.

A Peccary was hit by a car on the highway and had to be disposed of.

Personnel

Supervisory Ranger Henson was absent four days on leave due to the death of Mrs. Henson's grandmother.

Ranger Kirk will leave this area April 29 on leave and enroute to his new station at Mount Rainier National Park.

April 25, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Saguaro

Subject: Monthly Narrative Report, April 1953

General

April was a dry, windy month with temperatures slightly below normal. A few light showers occurred on April 22 but the balance of the month saw no precipitation. Conditions are very dry in the forested area at this time. Fire weather forecasts were initiated by the U.S. Weather Bureau on April 21 due to the extremely dry conditions throughout the state.

Chiminea Creek is still running at a slow rate. We are endeavoring to keep the water storage tanks full in the event of a continuing dry period.

Visitor travel during April was substantially below that of the corresponding month in 1952.

Wildflowers are beginning to cure and increasing numbers of cactus blossoms are in evidence. The hedgehog cactuses were at their height during the middle of the month. A few prickly pear and scattered Saguaro blooms are boosting the display.

Special Activities

A group of technicians from the American Museum of Natural History spent two weeks at Saguaro gathering material for one 25' X 15' X 18' diorama in a new series of exhibits called the "Hall of American Forests". The exhibit patterned on Saguaro National Monument will be titled "The Driest Forest in North America". Mr. Richard N. Pough was leader of the group from the museum staff.

Highway Engineer Moran visited the area on April 8. Plans for oiling the looproad were discussed and equipment for this job was lined up from a local contractor.

April 10, 1938

Memorandum

To: General Department

From: Acting Superintendent, Bureau

Subject: Manila Executive Council, April 1938

Summary

There was a fire, which caused some damage to the building, on April 10, 1938. The fire started in the kitchen and spread to the dining room. The cause of the fire is under investigation. The fire caused some damage to the building, but no one was injured. The fire was extinguished by the fire department. The cause of the fire is under investigation.

Chinese Consul is still working at a slow rate. We are endeavoring to keep the water storage tanks full in the event of a water shortage.

Visitors arrived during April and substantially all of the corresponding work is done.

Eligibility for the position of Vice and Executive Director of the Bureau is under investigation. The position of Vice and Executive Director of the Bureau is under investigation. The position of Vice and Executive Director of the Bureau is under investigation.

Special Activities

A group of students from the American Bureau of Physical Education is visiting the Bureau. The group is under the supervision of the American Bureau of Physical Education. The group is under the supervision of the American Bureau of Physical Education.

The Bureau is planning to hold a conference on April 15, 1938. The conference is to be held in the Bureau building. The conference is to be held in the Bureau building.

Supervisory Park Ranger Steele was appointed Acting Superintendent April 10 pending the arrival of Superintendent John Lewis from Bryce Canyon National Park.

General Publicity

We were honored by a visit of staff correspondent Marion Steinmann of Life Magazine. Miss Steinmann is gathering preliminary information for a forthcoming article in "Life's" history of the world series. This article will be on the Sonoran Desert.

Acting Superintendent Steele appeared on the television program "Tucson Newsreel" from station KOPO-TV. The eight minute interview was on the prospects of desert blooms and things in general at Saguaro National Monument.

Maintenance

All pack and saddle stock were brought in from pasture, trimmed, given distemper shots, and shod in preparation for the coming fire season.

Maintenance was completed on the main Pack Trail between Madrona Ranger Station and Manning Camp. This trail is now in the best of shape and it is hoped our other important trails can be brought up to standard in the near future.

Modification and improvement of the Madrona water system cuts pumping time and expense. A permanent concrete foundation was poured for the pump and the 2" pipe laid to replace the 1" line. A distribution system was erected above the tanks allowing flow into three of the tanks at one time. We can now fill 16,000 gallons of storage in approximately 2 hours when water is available. The only thing left to be desired in this system is more storage capacity and a purification system.

County Legislation

A county ordinance was passed which would punish violators for dumping trash along highways with a \$100 fine and 30 days in jail. It is hoped that this ordinance will tend to discourage citizens from this practice. Approach roads to the monument have been posted to this effect.

Accessions

We received a portable gasoline driven tool grinder from Mesa Verde National Park.

Experiments with these fluids was continued under supervision
and in further the subject of experiments was held from time
to time during the year.

General Results

As was shown by a study of their composition, these fluids
of the nature of the fluids in general is generally considered
for a long time in the history of the world.
This is the case with the fluids in general.

In the experiments made in the laboratory
the results were as follows: The fluids in general
and the progress of the fluids in general is shown
in the following table.

and the results were as follows: The fluids in general
and the progress of the fluids in general is shown
in the following table.

Interpretive Services

A total of 3,042 persons in 936 parties were afforded interpretive service at monument headquarters. A like number of persons toured the Cactus Forest using the self guided trail leaflet. This amounted to a total of 190 hours contact time for an average of 12 minutes per party.

Observations

A total of four Gila Monsters have been found by monument personnel during the past month. The monsters were a great source of interest to visitors, many of whom secured movies and photos of their actions.

The first White-winged Dove of the season was observed April 15.

Decrease in Travel

There were 6,226 visitors to Saguaro National Monument in April. This is a decrease of 778 persons from last month and a decrease of 1,704 visitors from April 1952.

Visitors

- Mar. 31, Dr. Walter Phillips, Botany Dept., Univ. of Arizona.
Mr. and Mrs. Whitney Eastman, 4450 Lake Harriet, Minneapolis, Minnesota.
Mr. and Mrs. Josef Muench, Santa Barbara, California.
- Apr. 6, Dr. G.J. Klein, Extension Poultry Husbandman, Univ. of Massachusetts, Amherst, Mass.
Richard N. Pough, Matthew Kelmenoff, and Feidoun Jalayer, American Museum of Natural History, New York City.
- Apr. 8, Thomas Moran, Region Three, Santa Fe, N.M.
- " 11, Miss Marion Steinmann, Life Magazine, New York City.
Miss Grace Metcalf and Miss Eleanor Blasko, Region Three, Santa Fe, N.M.
- " 12, Mr. Busan, Bureau of Land Management, Phoenix, Ariz.
- " 19, Dr. and Mrs. Lemmon, Wayne University, Detroit, Mich.
- " 22, Superintendent Aubuchon, Navajo National Monument.

Ranger Service

Park Ranger Ben Zerbey is to be commended on his very excellent assistance with the work overload created by the absence of a superintendent. His able assistance and contribution of extra hours to duty have meant the difference between an emergency get by service and normal operations.

Police Protection

Assistant U.S. Attorney Oliver Hamilton called this office regarding the hunting violation case of Conrad and Joe Valdez. Mr. Hamilton indicated he was considering dropping the criminal charges against the

boys to avoid a jail sentence. He plans to check into the possibilities of forfeiture of the boys' guns, which in effect would amount to a fairly sizeable fine.

Forest Fire Control

Trail hands Western and Andrus were moved to Manning Camp because of the dry conditions in the forested area. They are clearing all trails on top, of snags and clearing up communications lines in the event of an early emergency.

Planning for the local Fire Control and Personnel Training Conference is underway with tentative dates set for June 3, 4, and 5.

Personnel

Superintendent Samuel A. King and family departed for Joshua Tree National Monument on April 10. We wish him every success in his new assignment.

Word has been received that Asst. Superintendent John G. Lewis of Bryce Canyon National Park has been selected for the position of Supt. at Seguro and is scheduled to report for duty May 15. We are looking forward to his arrival.

Wendell A. Bryce was terminated from the Seasonal Ranger position on April 11. Wendell turned in his usual fine job at Seguro this winter and we wish him every success.

Grover E. Steele
Acting Superintendent

very to state a full statement. It also to show that the possibility
of formation in the same way, which is what would be a
likely outcome.

Tonto National Monument
Roosevelt, Arizona

April 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tonto
Subject: Narrative Report lml, Tonto, April 1953

Weather. Dry, windy, about 15 hundredths rain since early March. April had a good many cool days, warming at last of month.

Fire Hazard. Grass & brush fire hazard already bad, due dry spring. One small man-caused grass fire at Tonto, April 25, presumably caused by cigarette or match. This was fortunately in the island at end of parking area, could not go anywhere. With a time of about 25 seconds between detection and attack, the fire had spread about ten feet against the wind.

Travel. 9,710 cars with an estimated 34,020 visitors (3.5 per car) crossed the Monument, of whom 4813 persons in 1310 cars availed themselves of interpretive services at the headquarters museum. This as usual breaks all records for April, and is a gain of 1200 over last April, for about a 40% increase. This is also an increase of 749 over March this year.

we have had 18,865 visitors for the first four months this year.

Visitors, NPS & Special. Mr. & Mrs. H. M. Ratcliff, parents of Forester Alvin Ratcliff, from Walden, Colorado.

Twenty-two members of the Sierra Club, from California.

Alan and Barbara Vedder, Gila Pueblo, Globe.

June Chiefly and Sophia Hallisey, Arapaho Indian girls from Riverton Wyoming, to visit road crewman Jerry Jones.

General Superintendent Davis and Engineer Moran, to inspect road project.

Mr. Dennis Glen Cooper, photographer, lecturer, friend of NPS.

Landscape Architect Harold Marsh, on April 14, 15, 16, 20, 21.

Charles Dock and family, Allegheny State Park, New York.

Personnel Officer John Stratton & Mrs. Stratton; and Ranger & Mrs. Les Earenfight, of Joshua Tree National Monument.

Archaeologist Al Schroeder, Santa Fe.

Mr. & Mrs. Charles Davis and family, San Diego, Cal. Mr. Davis is a nephew of General Superintendent Davis.

Road Project. The tractor-loader was repaired after more delay caused by wrong parts being sent, and good progress was made during the month. The appearance and drainage of the road are greatly improved on the completed section. This project may be finished in 2 or 3 weeks. The loader is to be returned to Petrified Forest April 27, and a loader rented from Hagen in Globe. Use of a loader is the key to progress on this job.

Rattlesnakes. On Sunday, April 19, busy day as usual, an eleven year old girl stepped on a rattlesnake in a grassy area near the museum. Due to good luck and the trajectory of the child, she was not bitten. This happened while the Tonto staff, both of them, were occupied with visitors in the ruins and elsewhere, so we did not actually see the incident.

Ranger Bob Krear became the first person at Tonto to kill a rattlesnake with a snowshoe, same day. That happened to be the only weapon he had handy. This event stopped traffic along the road, with Arizonans showing the greater interest in the snowshoe.

Milestones. The traffic counter was received and installed on April 8, on the outgoing side of the parking area. This method of counting, using a standard average, seems to be quite accurate, and saves a great amount of time and diverted attention.

General. A pickup load of surplus or worn-out equipment was taken to Gila Pueblo for survey, transfer or sale. Some time has been high-graded from interpretation to try to carry out other responsibilities, such as cleanup, preparation of fire equipment, and maintenance.

An informal training session in grass and brush fire fighting, with experimental and preventive burning, was carried out, with the road crew participating. More road signs were put up. Office work was kept to where we could see out over it, as nearly current as usual.

The record number of visitors requires most of our time, and all work is accomplished on a hit and run basis.

Archaeologist Wenger and Ranger Krear took the Park Ranger examination in Globe, April 7.

Archaeologist Wenger made two short field trips with Forest Ranger Ames, locating corners and boundary lines.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

April 26, 1953

Memorandum

To: General Superintendent, S. W. N. M.

From: Superintendent, Tumacacori

Subject: Superintendent's Monthly Narrative Report for April, 1953

Weather: Rainfall was a mite on the skinny side, with only .06" precipitation, compared to a fifteen year April average for this vicinity of .43". Maximum temperature of 89 occurred on March 27 and April 20. Minimum temperature was 25, on April 12th.

<u>Visitor Travel:</u> This month:	5,121 persons.
Highest previous April - :	4,850 persons, in 1939.
Percent <u>increase</u> - - - - :	5.6%
Last 12 months - - - - :	45,642 persons
Previous 12 months - - - - :	44,829 persons
Percent <u>increase</u> - - - - :	1.8%

Visitors:

3/26/53 - Mayor Harry G. Chernin, Nogales, and General Ricardo, of Mexico's army.

3/29/53 - 30 people of a high school group from Crem, Utah.

3/31/53 - Anthony Don, former seasonal ranger, Grand Canyon.

4/1/53 - 26 people from Covington Jr. High, Los Altos, California.

4/2/53 - 12 people from schools of Provo, Pleasant Grove, and Garland, Utah.

4/5/53 - Mr. and Mrs. Julian Hayden, of Tucson. Julian is a former archaeologist, who has discovered he can move more dirt as a contractor than as an archaeologist.

4/10/53 - Eleanor Bloom and Grace Metcalf, of the Region Three office.

4/13/53 - Supervisory Ranger and Mrs. Bill Featherstone and kids, of White Sands National Monument, for an evening visit. Bill is another successful alumnus of the Jackson School for Park Ranger Advancement.

4/15/53 - A group of 4 from the Santa Cruz Valley School.

4/16/53 - Dr. and Mrs. John A. Hussey, of the Washington office, transferring to Region Four.

Publicity: Dennis G. Cooper, Detroit, Michigan, lecturer and photographer, was in, taking pix and getting material to use in one of his television broadcasts.

Avalon Daggett, of Avalon Daggett Productions, Inc., of Los Angeles, California, took movie shots of the mission and the Kino statue. She takes movies for visual aid use in schools of 17 states. She is preparing a one reel feature on the missions of this chain, with a tentative title "Father of the Southwest."

Maintenance: With unusually dry weather, a high percentage of time has been necessary simply on the routine of watering the patio garden and grounds plantings. Along with this has gone a good deal of weeding, and some pruning. The huge oleanders in the patio garden were pretty badly nipped at the ends by frost, and we have given them the most drastic cutting back they have ever had. As new shoots rise up well, we will gradually cut out all of the old stalks back to base level. Ranger Bullard performed some major tree surgery on wind-damaged mesquites and on mesquites which drooped too low over the service entrance driveway. Some young mesquites, and seeds, were planted in the new parking island west of the parking area. Minor adjustments were made to our pumping system. Chemical treatment to allay root rot was given to some of the grounds trees in the residence area. Another set of low steps in the museum building was replaced by a ramp. (If people won't watch their steps as they walk, we must attempt to keep their spines intact, anyway.) A case to hold the approved print of the butane gas system was made and installed on the fence around the system. New, heavy wooden covers were made for some of the valve boxes on the grounds. Some of the museum building locks were repaired. One sign for the grounds was made. Completion of the task of removing great quantities of gravel from our new parking area roadway was effected, and the material added to our stockpile.

Museum and Education: Ranger Bullard lettered and set up a sign on the mission grounds which tells the visitors the elevation above sea level.

Ranger Smith has done a lot of work this month on completion of the re-organizing of our filing system. He has also completed the research and lay-out plan for a multiplex display, which, when completed, will show photographically the sources for the mission architectural features which were used in construction of the museum building here.

Mission Church (Damage To): High wind on Tuesday, April 21, broke off between one and two square feet of original lime plaster from the top of the wall of the two-story room section of the convento east of the mortuary chapel. Such damage, from wind and rain, will continue to be frequent, until we get a shelter over these ruins.

Mission Church (Repair to): On a routine maintenance check we discovered that a precarious condition existed on top of the sanctuary dome. The "lantern" on top of the dome, which consists of a tiny dome resting on columns, and probably wouldn't weigh over three or four tons, had become somewhat eccentric. Several years ago we replaced with concrete a missing column of the lantern, and now we find the portion of the dome supported by the column has widened a previous crack until it is so loose the dome portion can be moved back and forth with the hands. Such condition would ~~not~~ not augur well if a violent storm hit, so we put a very tight belt of heavy construction wire around the base of the lantern dome, securely holding the broken part against the parent structure. The wire is invisible from below.

A horizontal wooden door at the top of the passage which leads from the baptistry to the belfry had whipped loose from its fastenings because of

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

winds. The catches for this are now anchored in expansion shields in fresh concrete, and should stay for a while.

General: The superintendent and family, on personal time, went to Dragon, Arizona to the Amerind Foundation and had a very enjoyable and very intensive museum visit and archaeological refresher course for a half day with Charles C. di Peso and his wife. Mr. di Peso is the director of the Foundations field activities. Upon returning to Tumacacori we had another evening staff session and attempted to pass on the high points of our gleanings.

We have also found the Amerind Foundation's archaeological dig at Calabazas Ruin (4.7 miles south of here) very interesting. Barton Wright is running this dig, and is in the midst of some very interesting pit houses and burial areas. The aborigines who built pit houses at this site had some interesting ideas for attractive houses, but must have had a very erratic city engineer, who located some of the pit houses right in the middle of a drainage line from an arroyo. And from the diversity of burial technique details we would infer the possibility the native population was far from a homogeneous group.

A good deal of attention has been necessary this month to complete reports on housing materials and utilities available in this district, and on maintenance and rehabilitation needs here.

Earl Jackson
Superintendent

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tuzigoot National Monument
Clarkdale, Arizona

April 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tuzigoot National Monument
Subject: Report lml, April, 1953

There follows the narrative report of activities in this area for the month of April, 1953.

Weather

Generally clear and bright, but with strong afternoon winds. Windy and cold from the 7th through the 12th. A brief but violent storm on the 14th brought a little rain to the valley and slushy snow in the mountains.

Special Activities

Superintendent Brewer attended several meetings of the Jerome Historical Society. Under his direction, the Society is setting up an historical museum in Jerome.

Archaeologist Burroughs continued his sessions in Southwestern Archaeology with a local group.

Official Visitors

Archaeologist Al Schroeder on the 24th.

Maintenance, Rehabilitation and General Work

Archaeologist Roland Richert and six Navajos of the Stabilization Mobile Unit arrived March 26th to do some much-needed work on the ruin. They completed the doorway into Room 14, rebuilt a couple of collapsed walls, stabilized a steep face of the hill which was being badly undercut, and did innumerable match-and-patch jobs throughout the ruin. We are indebted to Rick for a beautiful job of stabilization and an equally swell clean-up job at the finish. The Mobile Unit pulled out for Chaco early on the morning of the 20th.

and also a little bit of the other side of the mountain.

Abstract—The purpose of this study was to determine if there were differences in the prevalence of musculoskeletal disorders among different types of jobs. The subjects were 600 employees from a large manufacturing company who had been employed at least one year. They completed a questionnaire about their work activities and symptoms of musculoskeletal disorders. The results showed that the prevalence of musculoskeletal disorders was higher among workers in jobs that required heavy lifting, repetitive motions, and awkward postures than among workers in jobs that did not require these activities.

...the ... of the ...

The blower on the heating system began vibrating again. A section of the air duct was removed to give access, the thrust collars on the fan shaft were reset and the whole mount tightened down once more.

Interpretive Service

Travel: 3374 visitors in 1088 parties entered the monument this month. Last year's total was 2389; the previous high, in 1950, was 2482. Apparently the Easter Vacation period from March 28th to April 5th set most of California in motion; travel for that week alone totalled more than 1600 visitors. As usual, 100% of the 8-12 and 1-5 visitors were contacted in the museum; 268 visitors in 86 parties arrived before 8:00 a.m., after 5:00 p.m., or during noon closings, and so were not contacted.

NPS Visitors: Supt. Fred Brueck and family, Wupatki, on the 10th. Steve Leding and family, Grand Canyon, on the 11th. Historian and Mrs. J. A. Hussey on the 17th. Mr. Hussey was formerly with the Washington office and was recently transferred to Region IV.

Organized Groups: Methodist Youth Group, Glendale, California, on the 2nd. 13 members in the group.

Boy Scout Group, Long Beach, California, on the 3rd. 24 in the group.

Group of 16 students from DePaul University on the 9th.

The Earth Science Club, Los Angeles City College, on March 29th.

Reportworthy: Dr. and Mrs. L. J. Lull, U. S. Indian Service, Phoenix, on the 12th, and their guest, Dr. A. H. Dehka, from Iran, working in this country with the State Department on tropical medicine.

Dr. Bertha Dutton, Museum of New Mexico, Santa Fe, on the 23rd.

Foreign: Travel this month included visitors from Canada (provinces of Alberta, British Columbia, Ontario and Saskatchewan), Alaska, Argentina, England, Iran, Germany, Israel and South Africa.

Research and Observation

Of the three Say's Phoebes previously reported, only one continues nesting in the museum louveres. One young bird broke out of its shell on the 25th.

The history of the building system began with the
idea. A number of the first were removed to give access
the street which on the first floor level and the whole
was designed from above.

Development of the building

Walnut Canyon National Monument
Flagstaff, Arizona

April 27, 1953

Memorandum

To: General Superintendent
From: Superintendent, Walnut Canyon
Subject: Narrative Report of Activities at Walnut Canyon National Monument during the month of April, 1953

Weather Conditions

Winds occurring during the last month were, in the opinion of many old-timers of the region, the heaviest they had seen in many years. The general dryness of the area contributed to heavy dust storms.

Our total of .06 inches of moisture mostly came in one snow during the latter part of March when we had .3 inches of snow with a moisture content of .03 inches

Administration

Administrative duties have suffered somewhat from the pressure of heavy visitation and the many other urgent jobs that needed attention. Assistant General Superintendent Castellum and Superintendent Guillet met with Forest Service officials regarding right-of-way for the proposed approach road.

Mrs. and Mr. Walter Funke Jr. visited the monument on matters pertaining to the re-dedication and moving of the Pioneer Mother Marker and notified me that their next project for the local chapter of the D.A.W. was to preserve the old log cabin at Walnut Canyon as a historic site with its possible use as a museum for pioneer relics.

Maintenance

The new trail markers prepared by the superintendent during the fall and winter were all installed along the Island trail. A large number of favorable comments have been received. The trail was cleaned of loose rock and rubble that had fallen during the winter and minor repairs made. As time permitted work was done on the El Morro, Sunset Crater-Muroski, and Carlsbad Caverns signs and emblems. Two of the large El Morro signs have been poured but lack of equipment for moving these signs which weigh around 1200 lbs. each has made it difficult. Several of the smaller emblems were poured in testing for color and mix and they have turned out well. The large Emblem for Carlsbad has been poured and is curing in the form. Some added work was necessary as the masonite letters cut by Superintendent Brueck were all too large and it has been necessary for us to re-cut all of them.

The following conclusions were obtained from the records of the Bureau of the Census, Department of Commerce, for the year 1934:

Recommendations

The following recommendations were obtained from the records of the Bureau of the Census, Department of Commerce, for the year 1934:

Travel

As with every month so far this travel year, April's travel was the heaviest yet recorded for this month. An increase of 56% was shown over last April when the weather was much more conducive to travel. The 2,935 visitors this month brought our total for the year to 5,898 which is an increase of 112 % over the 2780 visitors during the corresponding period last year. Twelve foreign countries, two territories and forty five states were represented.

Interpretive Services.

A total of 90 hours was spent in contacting 774 groups comprising 2,374 visitors. One outside lecture was presented to 50 members of the Science class at Arizona State College by Ranger Spangle.

N.P.S. Visitors

- March 26 - Ranger Freeman and family - Yellowstone National Park
- Archeologist and Mrs. Poland Richert and stabilization crew from Chaco Canyon.
- April 4 - Ranger Veir and family - Petrified forest
- April 7 - Ranger Sutton - Montezuma well
- April 8 - Regional Naturalist Natt Dodge
- April 13 - Regional Landscape Architect Carter, Engineers Bradley and Wing, Assistant General Superintendent Gastelum, Superintendent Brueck and Foreman Chittum from Flagstaff.
- April 14 - Engineer George Smith.

Visitors, Other

Harry Malm, feature writer with New York Times visited the area on April 24. Mr. Malm is gathering material for articles on the National Park Service.

Plans and Surveys

Engineer Willard Bradley and his assistant, Kitt Wing arrived April 13 and started the survey of the proposed approach road. A line which by-passes the sections covered with mining claims has been established and the new route seems feasible.

Meredith M. Guillet
Superintendent

GENERAL:

There follows, the report of activities at the White Sands National Monument for the month of April, 1953: -

The month of April is always outstanding for 'Play Day', and such case was true again this year, but in a different manner. Play Day was one of the worst days we have ever experienced from the standpoint of wind. Exceedingly heavy winds made it necessary to move the entire program to the City Park and High School Athletic Field in Alamogordo. Visibility was limited and the State Police requested everyone to drive with their lights on. In spite of this fact, we had 5,020 people in 963 cars, with no accidents of any kind, and aside from disappointment in the weather, every one seemed very happy. - Everyone but Joe, that is. Heavy winds mean lots of work for him on the roads, and he has been plenty busy this month. Gene Mott moved on to other fields with our funds becoming exhausted.

INSPECTIONS:

The recent safety inspection by Engineer Franke was received and corrections on this inspection are in progress at present and we are correcting every feature within our means. Some of them,

Subject: Report No. 1m1 - Supt's. Monthly Narrative (continued)

of necessity, must await an allotment of funds for correction.

PUBLICITY:

White Sands received a nice play in several of our leading magazines under the New Mexico State advertisements. Then, too, in the press we received considerable mention in criticism by the Carlsbad Chamber of Commerce, over White Sands receiving more publicity than Carlsbad Caverns, when it was the State's greatest attraction, etc. For this month I see that the same ads give Carlsbad a good play and do not even mention White Sands, so I guess the Carlsbad Chamber of Commerce, at least, is happy now.

COMPLAINTS:

There were no complaints in spite of the heavy winds, and rough roads.

MAINTENANCE:

Gene has completed all his work within the fund allowance and has moved on to other fields. It is hoped we can finish our rehabilitation projects by the end of this month. Some painting, and odds and ends, will complete our sewer system extension, picnic area development, Comfort Stations, and our water systems, with the exception of the chlorinator house and installation.

Road maintenance has been extremely difficult due to excessive winds. We have been fortunate in having received our new blade and shovel combination and it was given a good workout on the first day. We have great hopes for this unit getting us by, but we shall miss the No. 12 blade and little doubt exists in my mind but that our roads will reflect this change. We shall make every effort to do the job with the Galion and it is a wonderful little machine. It had better be good because it has a tremendous job to do, and continued heavy winds are forecast over a ten day period.

INCREASE IN VISITORS:

This year's April is our best. We only show a gain of 1,359 visitors in 260 cars over last April, but when you consider that this increase is in spite of a 2,350 drop on Play Day, the gain is quite impressive. This, too, in spite of heavy winds of several days duration and on several occasions.

of necessity, they must be placed in the hands of the people.

THEORY

This book contains a series of essays on the theory of the state, and on the theory of the law. It is a book of the highest importance, and one which every student of the law should read. The author is a distinguished jurist, and his views are of the highest authority. The book is written in a clear and concise style, and is well illustrated by numerous examples. It is a book which every student of the law should read, and one which every jurist should consult.

CONCLUSIONS

There is no doubt that the theory of the state is a subject of the highest importance, and one which every student of the law should read. The author is a distinguished jurist, and his views are of the highest authority. The book is written in a clear and concise style, and is well illustrated by numerous examples. It is a book which every student of the law should read, and one which every jurist should consult.

THEORY

One of the most important of the theories of the state is the theory of the social contract. This theory is based on the idea that the state is a contract between the people and the government. The people agree to give up certain rights in return for the protection of the government. This theory is of the highest importance, and one which every student of the law should read. The author is a distinguished jurist, and his views are of the highest authority. The book is written in a clear and concise style, and is well illustrated by numerous examples. It is a book which every student of the law should read, and one which every jurist should consult.

Another important theory of the state is the theory of the divine right of kings. This theory is based on the idea that the king is appointed by God, and is therefore not subject to the law. This theory is of the highest importance, and one which every student of the law should read. The author is a distinguished jurist, and his views are of the highest authority. The book is written in a clear and concise style, and is well illustrated by numerous examples. It is a book which every student of the law should read, and one which every jurist should consult.

CONCLUSIONS

The theory of the state is a subject of the highest importance, and one which every student of the law should read. The author is a distinguished jurist, and his views are of the highest authority. The book is written in a clear and concise style, and is well illustrated by numerous examples. It is a book which every student of the law should read, and one which every jurist should consult.

Subject, Report No. 1ml - Supt's. Monthly Narrative
(continued)

VISITORS & GROUPS:

Mr. & Mrs. Hussey, of the Washington Office, stopped over enroute to his new assignment in Region IV.

Wayne Bryant, son of Dr. & Mrs. Bryant, Superintendent of Grand Canyon National Park, was in with a party among whom was Mrs. Ansel Adams, wife of the famed Ansel Adams, Photographer.

Ralph Lassiter was in with Verne Rowley, from the Washington office.

Tom Moran witnessed a demonstration put on by the Allis-Chalmers people with their new blade. He dropped in later to see the performance of our new Gallion blade with the bucket attachment.

Ethel Mae Bratten, Personnel Officer, Bureau of Indian Affairs, from Albuquerque, N. M., was a very interesting visitor.

Samuel Sorin, noted pianist, was also included among our visitors.

Several school busses, most of them senior groups, stopped over along with the Plant Geography class for the University of Oklahoma.

SPECIAL ACTIVITIES:

Ranger Davis gave the Lucero school group a talk on our sands in the museum, and it was very well received from reports reaching me later.

Play Day, of course, is the special event for April and this year the winds were so terrific that it was necessary to move the entire affair into town. We dropped down in attendance by two-thousand, three hundred and fifty people, but we feel that we were remarkably fortunate in getting the five thousand and twenty people that we did, considering the type of day we had.

WEATHER:

Heavy winds prevailed throughout the month. The high temperature was 88 degrees on the 21st, with a low of eighteen degrees on the 15th of the month. Rainfall was virtually nil.

CONCLUSION:

Supervisory Ranger and Mrs. Featherstone, Lynn and John, are on vacation, enjoying the beauties of the West Coast. Bill thought that he had better take his leave before heavy travel hit us. So, with only 25,000 this month, we shall be looking forward to a bigger May than ever before, as well as a thousand odds and ends we hope to complete.

John Will Paris
John Will Paris
Superintendent

GENERAL INFORMATION

At a meeting of the Board of Directors, held on 10/1/71, the following was discussed: The Board of Directors, at its meeting of 10/1/71, discussed the possibility of having a new building built on the site of the old building, which is now being used as a parking lot. The Board decided to have a study made of the site and to have a plan drawn up for the new building. The Board also discussed the possibility of having a new building built on the site of the old building, which is now being used as a parking lot.

The Board also discussed the possibility of having a new building built on the site of the old building, which is now being used as a parking lot. The Board decided to have a study made of the site and to have a plan drawn up for the new building. The Board also discussed the possibility of having a new building built on the site of the old building, which is now being used as a parking lot.

President

Wupatki National Monument
Flagstaff, Arizona

April 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Monthly Narrative Report, Wupatki and Sunset Crater National Monuments.

Weather:

Very dry conditions with high winds have been general the entire month. Since January 1 to date we have only had .76 inches of precipitation with .05 inches recorded during April. A maximum of 85 degrees was recorded on March 25 with a minimum of 26 on the 9th. The winds have been blowing fairly steady with very few calm days and at Winslow, Arizona velocity of 68 MPH were recorded one day which is not far from this area.

Inspections:

On April 3, Tom Moran and Kenneth Saunders visited the area to go over the road project.

Regional Naturalist Natt Dodge on April 9.

Assistant General Superintendent Luis Castellum on April 15.

Willard Bradley, Charlie Carter and George Smith visited Sunset Crater on April 16.

Charlie Carter and George Smith spent April 17 & 18 at Wupatki surveying the new road alignment through the Citadel area to the Earth Cracks.

Maintenance & General Work:

With travel almost triple what it was in March maintenance work has had to take a back seat in order to give as much time as possible with visitors.

The information station at Sunset Crater was given one coat of paint on the outside and the roof given the final coat of oil stain. Frequent trips were made to Sunset Crater to check the booklets in the register stand and general clean up work.

A new door had to be made for the light plant building at Heiser. The entire Heiser area, inside and out was given a general spring cleaning.

1943, 12 15

Roads and Trails:

Equipment operator Milford Waite from Petrified Forest arrived on April 5 for duty with the road crew.

Due to continuous breakdowns of the front end loader the work on the new construction has been very slow. Some plating had to be done over the bad rocky places on the detour and parts of the loop road to Sunset Crater that were going to pieces are in the process of being plated with white dirt. The combination of the driest spring for years and more visitors than ever before is keeping us busy just trying to keep our old road in condition for cars.

Interpretation:

At Mupatki 776 people in 244 parties were contacted for an average time of 15 minutes per party.

Paul Coze's painting on Sunset Crater was received this month and will be displayed in the information station at Sunset Crater.

Travel:

Travel took a terrific jump over last month with a very high count during the week before Easter when the California schools were out. This just happened to be one of our fair spells of weather so travel really boomed and ran about 100 people a day during the first part of that week.

Wupatki recorded 469 cars and 1432 people which was 86 cars and 350 people over last year.

Sunset Crater had a total of 1176 cars and 2937 people which was 106 cars and 260 people ahead of last April.

Visitors:

Deveroux Butcher and wife visited the area April 18 & 19.
Superintendent James Brewer & wife from Tuzigoot April 19
Supervisory Park Ranger Paul Steel & family from Petrified Forest on April 26.

Forest and Building Fire Protection:

All fire extinguishers were checked, recharged and tagged during the month. I had each wife actually operate the fire extinguisher in her residence in order to acquaint them with the operation of the small hand extinguishers.

On April 25 I attended a demonstration on fire line building with tractors and small one man line builders. This was part of the program of the meeting of the Southwest Section of the Society of American Foresters held at Fort Tuthill and was very interesting and worthwhile.

Public Health:

Water samples taken at Wupatki and Heiser Springs during the month were returned and showed no contamination.

Local Items:

The Navajo families living on the monument are preparing to take their sheep off our lands until next November. One herd has gone and the other 2 families are in the process of moving.

The Little Colorado River flow has completely dried up at this date. This time of the year should be the time when the river is reaching a peak but it is just a dust bowl right now.

Spring Flow:

Wupatki - 720 GPD This is 2806 GPD under last year
Heiser - 2700 GPD This is 1300 GPD more than last year.

SUMMARY OF MAY 1953 MONTHLY NARRATIVE REPORT
FOR
SOUTHWESTERN NATIONAL MONUMENTS

		<u>Page</u>
<u>Weather</u>	Windy dusty, dry.	1
<u>Special Activities</u>	General Superintendent Davis and Safety Engineer Ahern visit number of areas; Superintendent Davis get acquainted in Tucson vicinity.	1-2
<u>Official Visitors</u>	Dr. Porter of Washington Office on first visit to Southwest.	2-3
<u>Status of Private Land</u>	State land exchange prospects brighter at Saguaro	3
<u>General Publicity</u>	Delicate Arch continues to be cover page material; Montezuma Castle makes big-time magazines.	3-4
<u>Maintenance, Rehabilitation, General Work</u>	Grounds cleanup completed at Chaco Canyon; roadside cleanup nearly complete, Tonto.	4-5
<u>New Construction</u>	Canyon de Chelly and Organ Pipe Cactus jobs nearing completion; bids awarded for work at Saguaro, and Tumacacori.	5
<u>Roads and Trails</u>	Dusty roads cause inconvenience here and there; Wupatki project progressing nicely.	6-7
<u>Cooperating Government Agencies</u>	Soil Conservation nursery donates plants for completion of Tumacacori program.	7
<u>Accessions</u>	Tuzigoot library receives BAE bulletins	7
<u>Interpretive Services</u>	Ranger Sutton provides program for headquarters staff; nature trail relocation at Chiricahua.	7-8
<u>Museum Activities and Exhibits</u>	Casa Grande museum receives fine old picture; progress being made on Montezuma Castle museum.	8
<u>Research and Observation</u>	Field area cooperation solicited in kissing bug research.	8

<u>Southwestern Mon. Association</u>	Second edition, <u>Flowers of the South- western Mesas</u> , received.	10
<u>Ruins Stabilization</u>	Mr. Richert to Aztec Ruins to repair roofs of prehistoric structures.	10
<u>Travel</u>	Continues to increase--big increase over May 1952.	10
<u>Visitors</u>	Radio Hams, 200 strong, at Montezuma Well; many foreign visitors at Wupatki.	11
<u>Police Protection</u>	Illegal possession firearms case dis- missed in Tucson.	11
<u>Soil and Moisture Control</u>	Plantings seem to be doing well, Chaco Canyon.	12
<u>Forest and Building Fire Protection</u>	Fire school at Bandelier; dry condi- tions increase fire hazard.	12
<u>Tree Diseases and Insects</u>	Aerial spraying at Bandelier for tent caterpillar.	12
<u>Accidents</u>	Disregard of signs cause accidents, Tumacacori; Wupatki visitor breaks hip in fall.	12
<u>Personnel</u>	New chief clerk at headquarters; John G. Lewis reports as superintendent, Saguaro.	13
<u>Local Items</u>	Mrs. Bicknell proud owner fine new gas range; local fire calls attention to vulnerable position of Tuzigoot.	13

Memorandum

To: Director

From: Acting General Superintendent

Subject: Monthly Narrative Report-Southwestern National Monuments -
May 1953

Weather

Wind, dust storms, very little or no precipitation -- with these few words we tell the weather story for the month of May. Although travel continued to boom, many superintendents thought their visitation on some week ends was reduced somewhat by severe dust storms and high winds.

As usual at this season of the year, the countryside was beautiful, and the desert flowers particularly were of much interest to visitors viewing them for the first time.

Special Activities

Headquarters--General Superintendent Davis accompanied Mr. Ahern of the Washington Office and Mr. Richardson of the Regional Office on an inspection trip to a number of the monument areas. Mr. Gastelum went to Tonto with these gentlemen and Mr. Mott accompanied them on their visits to several of the monuments in northern Arizona and New Mexico.

Mr. Ahern appeared to be well pleased with the work monument personnel has done to eliminate hazardous conditions, particularly in the use of LP-gas. We greatly appreciate Mr. Ahern's visit to so many of our areas and his constructive suggestions for improving safety conditions, all of which we will endeavor to put into effect as soon as possible.

Mr. King answered two rather unusual letters: one from a gentleman in Superior, Arizona, who wrote concerning a graveyard of giants who knew how to temper copper; the other from a lady in California who wished to have an unnamed cliff dwelling in Arizona made a national monument, but who does not wish any particular credit except to be named as the proponent of the idea. And she did not want the dedication ceremonies to be held until late in June as her children would be in school until that time!

Mr. Arnberger made two trips to Tucson for the purpose of bringing back to Gila Pueblo surplus equipment and materials which had been moved from here to the University of Arizona and which they have subsequently found they do not need.

Special Activities - continued

Arches--Superintendent Wilson made a four-day ruin-mapping trip into the Salt Creek section of the Needles area with Jack Rudy, Archeologist of the University of Utah and the local Explorer Scout Post. Mr. Rudy will do a number of salvage excavations during the summer under the direction of Dr. Jesse D. Jennings.

Bandelier--One of the highlights of the month was the donation of labor by members of the Los Alamos Outdoor Association to assist with maintenance work. Ten members came to the area on May 2. They constructed three fireplaces in the campground and widened part of the horse trail. They plan to return for another day of work on June 6.

Chiricahua--During the visit of Dr. Porter of the Washington Office, Naturalist King from headquarters, and Superintendent Jackson, Tumacacori, an auto trip was made to Massai Point. Later Messrs. Cooke and Barrel accompanied them to Old Fort Bowie.

Great Sand Dunes--Superintendent Bean attended the monthly meeting of the Alamosa County Commissioners to give them travel figures and related information, which will be used in an attempt to get a half-mile test section of a new concrete road mix put out by a Denver cement company. If this test section is put in, it will be in the worst section of the approach road about 3 miles east of State Highway 17.

Saguaro--The superintendent devoted two days to "get acquainted" visits in and near Tucson, during which he met many of the people connected with local civic bodies and cooperating governmental agencies. General Superintendent Davis and Naturalist Arnberger spent May 25 and part of the following day in the area going over various operating problems with Mr. Lewis. They were pleased to find that after only one week at Saguaro, Mr. Lewis had an excellent grasp of the problems there and that he was showing great enthusiasm for his new work.

Walnut Canyon--Superintendent Guillet met with Forest Service officials to discuss the requirements for making a right-of-way application for the proposed approach road. He also attended a meeting of the newly organized Northern Arizona Western New Mexico chapter of the Federal Safety Council as a representative of the Southwestern National Monuments.

White Sands--Ranger Featherstone led a Chamber of Commerce group to Gran Quivira and reported a very successful caravan. This trip is considered by the Chamber of Commerce as one of the highlights of its tours.

Official Visitors

Headquarters--Mr. Frank Ahern, Washington Office; Hugh Richardson, Regional Office; Highway Engineer George Smith; Regional Forester Carlson; Regional Landscape Architect J. Miller and Mr. Warren J. Oblinger; Dr. Charles W. Porter, Washington Office.

Arches--Landscape Architect Van Pelt, Regional Office.

Bandelier--Mr. Schnettler, Chief, General Services, Washington Office and Administrative Officer Carpenter, Regional Office.

Official Visitors - continued

Canyon de Chelly--Archeologist Tommy Onstott.

Casa Grande--Safety Engineer Ahern, Washington Office and Engineer Richardson, Regional Office, accompanied by General Superintendent Davis; Dr. Charles W. Porter, Washington Office and Naturalist King, Headquarters Office.

Chaco Canyon--Archeologist Onstott; Mr. Ahern and Hugh Richardson.

Chiricahua--Dr. Porter and Mr. King.

Coronado National Memorial--Dr. Porter, Mr. King and Superintendent Jackson.

El Morro--Engineer J. Diehl; Landscape Architect Alleman; Archeologist Onstott.

Gran Quivira--Messrs. Ahern, Richardson and Mott; Drs. Erik Reed and Porter.

Great Sand Dunes--Architect Kenneth Saunders.

Montezuma Castle--Highway Engineer Smith; Landscape Architect Miller; Messrs. Ahern and Richardson.

Organ Pipe Cactus--Messrs. Ahern and Richardson; Regional Landscape Architect Miller.

Saguaro--Messrs. Davis, Ahern, and Richardson; Naturalists King and Arnberger, accompanied by Messrs. Fowler and Bryan of the Division of Forest Pathology; Engineer George Smith; Messrs. J. Miller and Oblinger.

Tonto--Assistant General Superintendent Castellum, accompanied by Mr. J. Miller and Mr. Oblinger, to meet Mr. Shannon and Frank Gullidge of the Salt River Power District; Messrs. Davis, King and Porter; Engineer Smith; Messrs. Ahern and Richardson.

Tumacacori--Messrs. Ahern, Richardson, Jr. Miller and Oblinger; General Superintendent Davis, Dr. Porter and Mr. King.

Tuzigoot--Messrs. Ahern, Richardson, J. Miller and Oblinger.

Walnut Canyon--Messrs. Ahern, Richardson, J. Miller, Oblinger; Regional Engineer Lassiter.

White Sands--Messrs. Ahern, Richardson, and Mott; Highway Engineer Moran and Architect Carter.

Wuptaki--Messrs. Ahern, Richardson, J. Miller, Oblinger; Engineers Bradley and Wing and Regional Engineer Lassiter.

Status of Private Land

Saguaro--Heartening news which may expedite the state land exchange was received. This was that the Bureau of Reclamation cannot hold a withdrawal on lands on the Yuma Mesa which were to be included in the state land exchange.

General Publicity

Arches--Delicate Arch continues to be "cover page" material. It appeared on the front cover of the Utah Oil Company's Torch and on the magazine section of the May 17 edition of the Salt Lake Tribune.

Casa Grande--Two articles, one in the Arizona Republic, the other in the Los Angeles Times, described the monument for potential visitors.

General Publicity - continued

Chiricahua--A very fine article entitled "A Day at Chiricahua" by Weldon and Hyllis Heald appeared in the June issue of Desert Magazine.

Gran Quivira--The annual Chamber of Commerce tour from Alamosa received wide publicity in the Alamosa, Albuquerque, and El Paso press and over the radio stations in these cities. Monument travel figures were carried in the local press, and Radio Station KJHR in Albuquerque broadcast April travel statistics.

Great Sand Dunes--Mr. F. M. Reck, editor of the Ford Times, visited the area in connection with an article on Great Sand Dunes which will be published in that magazine in the near future.

Colorado newspapers gave good coverage to a release by Mr. Bean on the appearance of Medano Creek at the lower parking area. Montezuma Castle--Concerning the meeting of the "Radio Rams" at Montezuma Well, Mr. Cook writes: "The publicity derived from use of Montezuma Well May 8-10 by amateur radio operators is not to be minimized. Their broadcasts reach throughout the western states and in some cases to other parts of the world. About six months of inter-station broadcasting is required to complete arrangements for this annual affair, and since the Well and its location is repeatedly broadcast, there is created a widespread interest in the area. Because of its central location and good facilities, Montezuma Well has been designated for future meetings of the Arizona Net."

Montezuma Castle received some very colorful publicity in the June issue of Woman's Home Companion (page 34), when the Castle was shown as the backdrop for a model in a bloomer play suit. Also in this same issue, Ranger Sutton is shown on page 100 in a very bright short-sleeved sports shirt (sorry to report that his identity is not made known). Another big-time magazine, the Saturday Evening Post, May 30 issue, mentioned Montezuma Castle in an article entitled "Tourists Who Act Like Pigs." It includes a paragraph on why the Castle was closed -- not because of tourists who act like pigs, but because it was wearing out.

Tumacacori--Photographs were taken of the View Room model of Tumacacori Mission Church for use by the Tucson Chamber of Commerce in its publicity folder on southern Arizona which will be distributed during a forthcoming teachers' convention in that city.

Wupatki--A nice picture of Wupatki Ruins appeared in a recent Sunday issue of the Arizona Republic.

Maintenance, Rehabilitation, and General Work

Arches--An information sign for headquarters being made by Ranger Morris is almost complete, and work on a similar one to be erected on State Route #93 by the Lions Club has progressed nicely. These signs will answer many questions visitors ask regarding the area.

Maintenance, Rehabilitation, and General Work

Aztec Ruins--The elevation sign installed over the doorway into the museum has been receiving much favorable comment. The museum was improved by the installation of reflector lights in two cases, and a new glass was installed over the burial in the ruins. A new picnic table was constructed.

Chaco Canyon--The grounds cleanup project was completed with the exception of dragging. All remaining evidences of former buildings have been removed.

Great Sand Dunes--The rehabilitation project is 95% complete. Work finished during the month included patching of the stucco on all permanent buildings and the painting with cement paint of the patio fences which were constructed from concrete blocks.

Montezuma Castle--A new stand, consisting of a Kennesaw Mountain-type box mounted on native stone, to hold trail guide booklets, was installed at the base of the Montezuma Well loop trail. A similar register stand was erected at the Well museum.

Tonto--The roadside cleanup job is nearing completion. The residence road is being built up with surface material and will be graveled as far as the proposed residences.

Tumacacori--The mission trail was seal coated with emulsified asphalt and gravel, and the driveway to the residence area was given patch treatment. Six Arizona Ash and one Pepper tree were planted on the grounds.

Walnut Canyon--As time permitted, work on the construction of signs for Wupatki, El Morro, and Carlsbad Caverns was accomplished. A base was constructed for the Pioneer Woman marker near the parking area. Installation of this marker will be completed when the D.A.R. gets around to moving it from its present location.

Wupatki--The new diesels caused some trouble and required some time for repairs. Parts were furnished free by the factory, as the plants are still fairly new.

New Construction

Canyon de Chelly--The rest room project was completed, with a couple of minor exceptions. Mr. Bright's report on this job was "Thanks to the very able supervision and work by Gene Hott the changing of the tool room into rest rooms was completed ahead of schedule. They are now in use and all that remains to be done is some exterior painting and necessary landscaping. All should be complete in every detail within the next 10 to 12 days. Needless to say, much favorable comment is being received from the visiting public."

Organ Pipe Cactus--Road development is nearing completion. Engineers Bradley and Wing arrived to complete the survey and to give engineering assistance. All roads are ready for final gravel, but little can be done until rains come to pack it down.

Saguaro--Bids on Unit #1 of the Administration Building were opened at Gila Pueblo on May 20. The low bid was submitted by the Frontier Construction Company of Tucson and was accepted.

Tumacacori--Work on constructing the metal shelter over the corridor east of the mission sacristy started on May 19. The low bidder for this job was the Young Steel Buildings, Inc., of Tucson.

Roads and Trails

Arches--Approach road #93 has been turned over to the county for maintenance, and its crew has already done a good job of shale plating and drainage on about two miles.

Bandelier--Invitations to bid on oiling the campground and residential roads were distributed to several contractors. Oiling of the ruins trails was started.

Canyon de Chelly--All approach and monument roads are in fair condition, but dusty. The all-weather highway between Window Rock and Ganado is progressing nicely and should be completed within the next 60 days.

Chaco Canyon--The south approach road is in reasonably good shape but the north one is in its usual shape -- rough. Several parties have been stuck there. Most of them get out by themselves, but a few have walked four miles to the monument for assistance.

Chiricahua--All approach roads were in good condition with the exception of the Bowie road. Farming development along this route has made a dust bed of it, causing several cars to become stuck and resulting in an unpleasant drive for all who travel the road.

El Morro--The trail over the top of the mesa has been completely reworked and is in excellent condition.

Gran Quivira--Superintendent Ringenbach reports that the roads and trails maintenance work received concentrated attention during the month. Some of the accomplishments included the replacement of 160 feet of macadam trail from the parking area to the office; leveling and packing with 4 tons of dirt and rock the roads in the immediate headquarters area; cleaning culvert boxes; and repainting cattle guard piers.

Great Sand Dunes--The approach road from State Highway 17 was kept in good condition by the county. The approach from U. S. 160 was improved and was in the best condition it has ever been.

Montezuma Castle--Regional Landscape Architect Miller visited the area to locate the site and approve construction of a foot trail to make accessible some caves located at the base of the Castle. Considerable time was spent with county officials in an effort to coordinate the seal coating of the entrance road with similar work to be done by the county.

Navajo--Toward the end of the month all monument roads and the approach roads had a lot of sand blown on them and some visitors were getting stuck.

Saguaro--Highway Engineer George Smith supervised the oiling of the Cactus Loop Road. The road was closed three days for application of the prime oil, but portions were kept open during the oil sealing job. Many favorable comments on the new road are being received from visitors. Superintendent Lewis comments that it is a pleasure to report one more monument "out of the dust."

Wupatki--The road work showed a lot of progress. From Mr. Brueck's report we quote, "The take-off at Highway 89 has been moved about 1/2 mile south in order to stay within the monument boundaries. The long curve near the Citadel has been eliminated by realigning the road to cut off the curve and shorten the distance and make a nice approach to go up the hill near the Citadel. Quite a bit of material has been hauled and dumped along the right of way. We have received a

Roads and Trails - continued

Wupatki - continued

large Cat. No. 12 road grader and a Cat. loader and dozer and a stake truck that is being used as a utility truck for the crew."

Cooperating Governmental Agencies

Tumacacori--The Soil Conservation nursery in Tucson donated a number of plants to assist in the completion of the grounds planting program.

Accessions

Tuzigoot--One copy each of BAE Bulletins 32, 41, and 65 were donated to the area library by Mr. Willard Hoagland of Clarkdale, formerly with the Laboratory of Anthropology in Santa Fe, New Mexico.

Interpretive Services

Headquarters--The Interpretive Section of the Master Plan Development Outlines for White Sands and Natural Bridges were reviewed. Minor changes were made in the two-fold leaflet for Sunset Crater, and it was submitted to the Regional Office for inclusion in the printing program. Text for the back-country booklet for Organ Pipe Cactus was mimeographed and a very attractive cover prepared in the Regional Office. A numbered memorandum was prepared for distribution to the field areas stressing the importance of personal contact in our dealings with monument visitors.

Five hundred copies of the guide leaflet for the Massai Point Trail at Chiricahua were mimeographed. The new edition of the Gran Quivira trail booklet was received and proof was checked on the guide booklet for the Lava Flow Trail at Sunset Crater. Two hundred copies of a field check list of birds which is distributed to interested visitors at Saguaro were mimeographed.

Mr. Arnberger gave an illustrated talk on the Southwestern National Monuments to a meeting of the Miami Literary Society. The program, attended by 30 ladies from the Globe-Miami area, was well received.

Approximately 25 members of the Globe Woman's Club visited Gila Pueblo and were taken on a tour of the buildings and grounds by Mr. Davis. They showed great interest in the work of the National Park Service, and particularly in the work of our organization.

While visiting the headquarters office Ranger Myron Sutton presented a delightful evening program for the members of the staff and their families. Mr. Sutton has made some bird call recordings at Montezuma Well that are very fine. He also showed his excellent cloud pictures. After viewing these, I am sure we will all have greater appreciation of the beauty of the clouds during our hoped-for summer showers.

Bandelier--The superintendent gave a talk on "Conservation of Wildlife" as part of a general assembly program on conservation at the Los Alamos High School.

Chiricahua--Ranger Barrel took a hike down Echo Canyon with a group of 30 boys, and Superintendent Cooke took Photographer Weber and two others on the Heart-of-Rocks loop. Mr. Weber took

Interpretive Services - continued

Chiricahua - continued

movies and other pictures for travelogue television showing. A lantern slide talk was given at the Elfrida High School by Ranger Barrel to a group of 55 students. He also gave a half hour camp-fire talk to a group of 70 men and boys who made an overnight stop in the campground.

The relocation and staking of the Massai Point trail has just been completed. It now starts at the orientation station, circles the hillside and ends at the upper end of the Massai Point parking area. A stand has been placed at the beginning of the trail to distribute leaflets and a box at the end for recollecting them. This arrangement, it is believed, will give much better check on bona fide hikers, as probably only those definitely interested in the nature trail will take the guide leaflets.

Gran Quivira--Three easel exhibits were provided for the mission trail trip. A special orientation talk and guided trip were given the Alamogordo Chamber of Commerce tour. Over 90 per cent of all visitors were contacted and given some interpretation in the museum.

Great Sand Dunes--The Half-Century Club of Alamosa was given a talk on the "The National Park Service, Its History and Objectives."

Tumacacori--Another Multiplex display, consisting of floor plans of Tumacacori and several other missions of the chain, is being prepared by Rangers Bullard and Smith. This will give visitors an idea how the layout and size of Tumacacori compared with the others.

Mrs. S. A. Phipps, Conservation Chairman, California Federation of Women's Clubs, Los Angeles District, paid Ranger Bullard one of the finest compliments for the quality of his guide talk that the superintendent has ever heard. Mr. Jackson adds "There's no getting around it, Bullard really has a way with the public--a way that they like."

Tuzigoot--Superintendent Brewer gave a talk at a business men's breakfast on the National Park Service.

Wupatki--Two small glass display cases have been placed in the information station at Sunset Crater, and monument personnel are securing various specimens of lava formations in order to give visitors some idea of the natural features of the area.

Museum Activities and Exhibits

Casa Grande--Dr. C. W. Barrett of Pasadena, California, donated a fine old photograph of Casa Grande, taken by Ed. Scheiffelin, in the 1880's. This picture is now framed and hanging in the museum.

Montezuma Castle--Rapid progress was made on the new section of the Castle museum. Mr. Pierson completely redesigned the case containing bugs and snakes, and it is drawing many favorable comments from visitors. Mr. Sutton completed the geological display, and this, too, is most attractive.

Research and Observation

Headquarters--The Saguaro propagation project was discussed with Messrs. Gill and Fowler of the Division of Forest Pathology and Regional Forester Carlson. As a result of this

Research and Observation - continued

Headquarters - continued

discussion and a subsequent meeting at the University of Arizona with Mr. Fowler and Mr. Craig Bryan, additional information was obtained on the studies to be carried on, and it is hoped that a mass of valuable information will be gathered that will be of assistance in the future management of Saguaro National Monument.

Dr. Sherwin F. Wood, noted authority on kissing bugs, requested our cooperation in securing material for his studies of the kissing bug and its relation to human disease. Our field men were requested to send specimens and information to Dr. Wood.

A very interesting manuscript on the ants of Organ Pipe Cactus written by William Steel Creighton was copied and copies placed in the headquarters library and one sent to the area for its library.

Copies were also made of the final section of Dr. Enlow's report on the geology of Chiricahua for the headquarters and the area libraries.

Coronado National Memorial--Some interesting comments were made by Mr. Jackson concerning his May inspection trip to this area. These were: "About five miles west of Coronado National Memorial we saw the first specimen of the Pronghorn Antelope that I have seen in this county. And in a little canyon, which offers the only running water east of the Santa Cruz, we saw a fine specimen of a snake which belongs to the Racer or Coachwhip group. Later, unable to key the snake by memory to any species description in reptile books, I wished we had captured the specimen."

Gran Quivira--Flowers, annuals, and other plants were collected and pressed for future identification and inclusion in the herbarium. "Rattlesnake observations continue. The stomach contents of a three-foot prairie species revealed a half mature cottontail rabbit--it doesn't seem possible," Superintendent Ringenbach reports.

Montezuma Castle--Archeologists Pierson and Burroughs of Tuzigoot spent a day at the Well completing the mapping of surface ruins for an archeological base map. Sixty-five species of birds were observed, four of them new at the Well and one an almost new record for the Castle (Gray Vireo - last reported in 1916 by Jackson and Taylor, as being common then). Because of the dry season, the flowers were not as spectacular as usual, but several were collected for the Layman's herbarium. Flower heads and pressed specimens of Amsinckia and Cryptantha were shipped to the University of California to be used in chromosome research.

Organ Pipe Cactus--Drs. Muller and Tucker of the University of California spent April 28 and 29 checking on the range of the oak which they have been studying. All oak found in the area were the new species they had described earlier.

Saguaro--Wildlife photographers Bill and Claire Anderson secured some movies of the Arizona Gray Fox family at Madrona Ranger Station. They are taking wildlife pictures for the Encyclopedia Britannica education film series and for Walt Disney Studios.

Research and Observation - continued

Tumacacori--An interesting piece of digging is being done on the east side of Tubac where a Spanish period site, which may be the location of the old mill (water operated) is being excavated. The excavation hasn't progressed far enough as yet to prove very much.

On May 12 Maintenance man Duebler observed an interesting sight--he saw a Round-tail Ground Squirrel chasing a Road-runner! He watched the little animal pursue the Road-runner for about 200 feet down a path, snapping at the bird's tail!

Wupatki--Superintendent Brueck reports that for the first time since he has been at Wupatki deer and antelope have been seen close to Wupatki Ruin. He thinks this may be due to the water holes drying up elsewhere and the animals are being forced to use the monument springs.

Southwestern Monuments Association

The second edition of Flowers of the Southwest Mesas was received. Ten thousand copies were printed this time. The letterpress printing brings out the illustrations in considerably better form than did the offset press work.

Mr. King made arrangements to have the Association publications listed in the Publishers' Trade List Annual and Index and also in another listing called Available Books.

The supply of Poisonous Dwellers of the Desert reached a low level at headquarters, but the areas cooperated fully by sending in their surplus supply.

Mr. Alan Vedder completed his duties with the Association on May 1 and he and Mrs. Vedder left for Santa Fe the following day.

Ruins Stabilization

The first part of the month was spent sorting records from Tuzigoot and making selections of photographs to be printed for the final report. On May 6 Mr. Richert left for temporary assignment at Aztec Ruins, where he will be concerned primarily with repair of prehistoric roofs suffering from moisture and excessive weight. Eleven rooms had been prepared for reroofing, which in some cases involved removal of as much as 400 cubic feet of dirt placed over the roof in recent years in attempts to stop the leaks. Minor repair and patching had also been accomplished in 9 additional rooms subject to moisture damage.

Mr. Vivian continued work on the Gran Quivira reports, including photographing and making prints of material forwarded by Archeologist Van Valkenburgh who is studying minor artifacts.

Travel

A 31 per cent increase over May of last year was recorded despite unfavorable weather during part of the month, and especially on one or two week ends. Seems it takes more than a dust or wind storm to deter the traveling public, once the car has started to roll.

With the arrival of warmer weather, campgrounds are again proving popular with nature lovers and overnight campers.

Visitors

Headquarters--Adrey Borrell and Lawrence Compton, Soil Conservation Service; Ranger Myron Sutton; 25 ladies from the Globe Woman's Club.

Bandelier--Mr. Deveraux Butcher --taking pictures. He also showed particular interest in the problem of protecting the Otowi section of the monument.

Canyon de Chelly--Alexander Eliot, Associate Editor of Time, who toured all canyons for the purpose of photographing the ruins, pictographs, and other points of interest in the monument.

Casa Grande--Mr. R. P. Alexander, Piedmont, California - Mr. Alexander worked with Dr. J. W. Fewkes in 1907 during the excavation at Spruce Tree House, Mesa Verde; Artist Paul Coze.

Great Sand Dunes--District Ranger Jim Folkestad and family, Gunnison National Forest; F. H. Reck, editor of Ford Times; Forest Recreation and Wildlife Management senior students from Colorado A. and M.; one Scout Troop for an overnight hike.

Montezuma Castle--200 persons representing the Arizona Radio Net (Ham Operators) held annual convention at Montezuma Well; 30 members of the Prescott Chamber of Commerce on a goodwill tour.

Navajo--Howard Borman, member of the Navajo Tribal Council; Dr. and Mrs. S. Clifford Evans, Department of Archeology, U. S. National Museum, Washington, D. C.

Saguaro--Mr. Allan Watkins, USFS, Albuquerque; Margaret O. BBergh, U. S. Geological Survey, Washington, D. C.; Russell Soden, Tucson Sunshine Climate Club.

Tumacacori--Mrs. S. A. Phipps, Conservation Chairman, California Federation of Women's Clubs, Los Angeles District; Adrey Borrell, SCS, Albuquerque, New Mexico; Walker A. Tompkins, novelist.

Tuzigoot--Bob Euler, Curator of Anthropology, Museum of Northern Arizona; Messrs. F. W. Clark and E. V. Clark, GAO, Los Angeles.

Walnut Canyon--Dr. Kraus, Munich, Germany, head of Nature Protection for Bavaria.

Wupatki--We are always pleased to have visitors from other countries and Wupatki had a representative group from various parts of the world. Countries represented included: Chile, Brazil, Switzerland, Iran, Belgium, Austria, England, New Zealand, Canada, and our own territories, Alaska and Hawaii.

Police Protection

Saguaro--The case of illegal possession of firearms inside the monument boundary (mentioned in last month's report) was not prosecuted by the U. S. Attorney, and the boys' firearms were subsequently returned. It is hoped that this case will not become a precedent. The dismissal stemmed from a lack of understanding on the part of the U. S. Attorney's Office in Tucson regarding applicable statutes.

Soil and Moisture Control

Chaco Canyon--The .64 of an inch precipitation helped the S&MC program considerably. Two checks were made on the plantings and nearly all of the rooted stock seems to be doing well. It is still too early to determine whether or not the cuttings which were planted are going to survive. Another good rain or two would make a lot of difference between survival and dying.

Forest Fire Protection

Bandelier--The annual forest and building fire control training session was held from May 5 to May 7. Larry Hamilton of the Forest Service attended the meetings and helped with the instruction.

Chiricahua--Mr. Thomas Griggs was placed on the Sugar Loaf Lookout May 1 and so far has located one fire on the adjoining Forest Service land. Monument personnel were on guard for an afternoon as the fire was less than a mile from the monument with a high wind blowing. However, the Forest Service controlled it after about 30 acres burned and the Chiricahua staff breathed easy again.

Saguaro--The fire tower was manned on May 4 and radio communication established between the various lookouts, headquarters, and the Forest Service lookout on Mt. Digelow. Conditions in the forested area were very dry. A training school with the trainee group made up of all protection personnel is to be held early in June.

Tree Diseases

Bandelier--Aerial spraying for tent caterpillars was accomplished. Weather conditions were nearly ideal for the spraying, and it is believed good results were obtained. The spraying was observed by Messrs. Bongberg and Bennett of the Bureau of Entomology who made recommendations for future sprayings.

Accidents

Navajo--A truck containing 15 Navajo Indians was involved in a serious accident on the Shonto Hill. One man was killed and several more required medical attention.

Tumacacori--Two ladies sustained painful injuries in the Patio Garden because of openwater drains. Apparently they were too interested in other things to read the warning signs. "Since people will not read signs," Mr. Jackson plans either to cover the drains or put grates in them.

White Sands--Ray Rixty injured his hand while unscrewing a large lid cover on the tank truck. The injury was painful and required several trips to the doctor.

Wupatki--Newton S. Nicholas, an operator for the road crew, sprained the instep of his right foot when he slipped off a step.

Mrs. Grant Cordrey of California missed the step coming down into the office and fell, breaking her hip.

Personnel

Headquarters--Darrell D. Crumley, Chief Clerk, entered on duty May 25, by transfer from Crater Lake.

Bandelier--S. J. Thomas, seasonal ranger, entered on duty May 9, and Fire control aids Harry Venn, Patrick Cordero, and Manuel DeVargas, on May 1.

El Morro--David M. Brugge appointed seasonal ranger, effective May 20.

Gran Quivira--Laborer Doyle B. Chaney, terminated April 25, because of change of residence. WAE laborers Clyde H. Fulfer and Garvice T. Jobe, employed.

Navajo--Hubert Laughter, seasonal ranger, employed, effective May 20.

Saguaro--John G. Lewis, Superintendent, effective May 18; Mack A. Andrus entered on duty as Fire control aid May 3; Laborer Irvin Western, terminated April 24.

Tonto--Seasonal ranger Robert Krear, terminated April 30, and left for an interesting assignment with the U. S. Fish and Wildlife Service in the Pribilof Islands; Laborer Jerry Jones, resigned May 9.

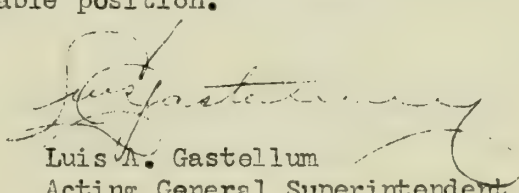

Wupatki--Seasonal ranger Henry L Newell enter on duty May 8.

Local Items

Casa Grande--Mrs. Bicknell is the proud owner of a new \$400 O'Keefe and Merritt gas range, awarded to her by the Arizona Public Service Company, when a cake she entered in a contest won first place. Congratulations!

Tonto--Mrs. Gilbert Wenger entered the Globe hospital on May 25 for a thyroid operation. She returned home May 31 and is recovering nicely.

Tuzigoot--Messrs. Brewer and Burroughs joined a fire-fighting group which attempted to save the milk house of the Clarkdale Dairy. Because of the unavailability of water, the attempt was unsuccessful. This experience brought home sharply the fact that Tuzigoot is in the same vulnerable position.

ARCHES NATIONAL MONUMENT

May 24, 1953

Memorandum

To: General Superintendent

From: Superintendent, Arches National Monument

Subject: Monthly Narrative Report for the month of May, 1953, Arches National Monument

WEATHER: One rain fell at headquarters, but high winds caused it to make a detour of the rest of the monument. This is the second month without a measurable amount of precipitation and the high winds during the passed month have added to the extreme dryness.

TRAVEL: A total of 979 cars entered the area carrying 3105 visitors. This is an increase of 21 % over the same period last year. Thirty-two states and six foreign countries were represented.

INTERPRETIVE SERVICE: Work on the Delicate Arch trail and signs has taken up most of the time of all three of us, however we did manage to personally contact 190 people at headquarters and 182 at the Wayside Exhibit. The register at the Wayside Exhibit was signed by 1100 visitors and we estimate that the same number used the Cove Nature Trail. One guided tour was made with 40 in attendance. Twenty-seven requests for information were answered.

PUBLICITY: Delicate Arch's cover-page-appearance seems to be catching, for this month we find it on the cover of the Utah Oil Co's "Torch" and also on the magazine section of the May 17 issue of the Salt Lake Tribune.

DELICATE ARCH TRAIL: The new approach trail was made passable during the first week in May and was inspected by Landscape Architect Van Pelt on May 11, at which time he suggested widening in a few places. Work was held up by complications in purchasing dynamite and caps, but was today resumed and it is hoped that the blasting job will be completed very soon.

ROADS: During the last two weeks, Maintenance man Winbourn has done as good a job as possible in smoothing our roads. Lack of moisture and maintenance during the winter has severely handicapped him on this job. Approach road # 93 has been turned over to Grand County for maintenance and the county crew has already done a very good job on about two miles of shale plating and drainage.

1970s. The program was a major success in the field of education and was a major step in the development of the program. The program was a major success in the field of education and was a major step in the development of the program. The program was a major success in the field of education and was a major step in the development of the program.

Aztec Ruins National Monument
Aztec, New Mexico

May 24, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Aztec Ruins
Subject: Monthly Narrative Report for May, 1953

Weather: Cold weather continuing beyond the middle of May slowed travel. Several snow storms on surrounding mountains made approach roads slick and some cars got stuck in the snow on Wolf Creek and Red Mountain passes. All fruit including apples is reported to be frozen. The Animas River which should now be nearing flood stage has little more than the usual flow in late summer. A few flowers including phacelia and mentzelia are in bloom but there is only a scanty showing for spring. Maximum temperature for the report month was 87° on May 22 and the minimum was 26° on May 11.

Administration: An inventory was taken of all equipment in preparation for Ranger Maxey's transfer to Grand Canyon.

A shipment of 20,000 new tickets was received. These are printed Admission instead of Guide tickets.

Personnel: Selection of a seasonal ranger and of a temporary ranger to replace Mr. Maxey has been accomplished. Mr. Maxey has accepted transfer to Grand Canyon and promotion to District Park Ranger effective June 1.

Juan Jacques was hired as laborer on May 18 and has been helping with the janitor work, weed control, and ditch cleaning.

Visitor Travel: A total of 1871 visitors came in 507 cars. Of these 1453 people were guided through the ruins in 190 groups. Ninety-two visitors in 25 groups saw the ruins in "quickie" trips without taking the full tour. Visitors for the month were 237 below the count for May, 1952 but for the calendar year the count is 567 ahead of the same period last year.

Maintenance and General Work: A new drain was made for the drinking fountain.

Our elevation sign was installed over the doorway into the museum and has received favorable comment.

The letterhead memorandum dated May 11, 1933, is being referred to the General Superintendent, Santa Fe National Monument, Santa Fe, New Mexico, for his consideration and action.

Reflectors for lights in two museum cases were installed.

A new glass was installed over the burial in the ruins.

Scrap lumber was used by Ranger Maxey to construct a new picnic table.

Ruins Stabilization: Archeologist Michert and a crew of 6 Navajos arrived from Chaco on May 6. They have concentrated on the removal of dirt piled up on the protective coverings over original ceilings and the weatherproofing of these coverings. A complete report on this work will be submitted by Mr. Vivian from Mobile Unit headquarters.

Loose pictures in our ruins stabilization report were fastened down with dry mounting tissue.

Southwestern Monument Association Business: A display was made of the pictures in our Aztec Ruins picture packs.

In preparation for Ranger Maxey's departure a complete inventory was taken of all items for sale.

Newsorthy Visitors:

SANTA FE, NEW MEXICO

May 28, 1953

Memorandum

To: General Superintendent
From: Superintendent, Bandelier
Subject: Monthly Narrative Report, May 1953

Weather

The weather was unusually cool and stormy for the first part of the month with temperatures around freezing and below. The low was 22 degrees on the 3rd. A total of 1.09 inches of moisture was received in the form of snow and rain.

During the latter part of the month the weather reversed itself and became hot and dry with temperatures reaching 91 on the 22nd.

Special Activities

One of the highlights of the month was the donation of labor by members of the Los Alamos Outdoor Association to assist with maintenance work. Ten members came to the area on May 2 and they constructed three fire places in the campground and widened part of the horse trail that parallels the foot trail above the campground. Snow in the afternoon interfered with their activities or the group would have accomplished more than they did. They plan to return for another day of work on June 6.

Since maintenance funds have been extremely limited this year the services of the Association are greatly appreciated and provides a means of accomplishing some urgently needed work that would otherwise have to be deferred. So far as we know this is one of the very few instances in the Park Service that an organized group has made such a contribution.

The Atomic Energy Commission has been conducting a series of tests once a week at the technical area nearest to the Bandelier headquarters. It has been necessary to stop traffic over the approach road for approximately one half hour before each test. No damage has resulted this month although some of the explosions have been severe enough to open windows that were not securely latched.

We were very pleased to have Deveraux Butcher, Field Executive for the National Parks Association, spend two days in the area on April 29 and 30. He took a good many pictures and was particularly interested in

the problems of protection of the Stowi section of the Monument.

Master Plan

Mr. Van Pelt has started on the revision of the master plan and he spent most of the day on the 27th. going over building locations on the ground.

Maintenance

The sewer line that carries effluent to the spray system was found to be broken in several places and it was necessary to repair it before putting the spray system in to operation.

The chloro feeder for the water system was repaired and installed toward the last of the month.

Some roof repair work was necessary when leaks developed in the lodge kitchen during the rains and snow the first of the month.

Approach Road

The State Highway department nearly completed the survey of the unpaved portion of the approach road in preparation for construction this fall. The survey is to reduce the standards somewhat from those originally planned by the Bureau of Public Roads.

Roads and Trails

Oiling was started on the ruins trails. The oil and gravel is being mixed in a cement mixer and hauled to the trail in the power buggy. By using this method it is expected that a good patte will be obtained and one that will stand up under all weather conditions.

Invitations to bid on oiling the campground and residential roads were delivered to several contractors in order to get this work completed prior to the end of the fiscal year.

The painting of parking stripes on the headquarters parking lot was about half complete by the end of the month and will be finished in a few days.

Concessions

The approval of the sub-concession agreement for the operation of the dining room by Mrs. Velma Leverton, Espanola, N. Mex. was received on May 13.

Mrs. Frey reported 54 guests and 74 lodgings for the month and a total of \$1120.40 gross revenue from the dining room. The unsettled weather and lack of telephone service for about one week cut down on the number of guests that might otherwise have stayed at the lodge.

Approved and for witness hereby and its execution by me, the said _____

The painting of the interior of the building is in the style of the 19th century. It is a very fine work of art, and it is a pity that it is so little known. The painting is in the style of the 19th century, and it is a very fine work of art. It is a pity that it is so little known.

The delivery of the 2000-2001 season was 1.5 million tons, a record for the company. The company's 2000-2001 season was 1.5 million tons, a record for the company.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the solution was successful. If the solution was successful, the final step is to document the results and share the information with others. If the solution was not successful, the final step is to identify the reasons for the failure and determine if the solution needs to be revised.

Interpretive Service

There were 1897 visitors conducted on 139 tours of the ruins.

The Superintendent gave a short talk on "Conservation of Wildlife" to the Los Alamos high school as a part of a general assembly program on conservation on May 15.

Travel

The cold, unsettled weather during the first half of the month caused a slight decrease in travel with 5610 visitors as compared with 5725 for May of last year.

Visitors

Visitors for the month included the following groups:

- 18 Girl Scouts, Los Alamos, N. Mex.
- 24 students, St Joseph high, Parkview, N. Mex.
- 47 students, Espanola high, Espanola, N. Mex.
- 27 students, Tierra Amarilla, N. Mex.
- 150 students, 8th. grade, Los Alamos, N. Mex.
- 38 students, El Rancho, N. Mex.
- 14 students, Monticello, N. Mex.
- 12 Safety Patrol, Albuquerque, N. Mex.
- 34 students, Adama State College, Alamosa, Colo.
- 25 students, W. Las Vegas High, Las Vegas, N. Mex.
- 15 students, St. Michaels college, Santa Fe, N. Mex.
- 15 students, St. Francis school, Santa Fe, N. Mex.
- 19 students St. Michaels high, Santa Fe, N. Mex.
- 153 students, Pojoaque Jr. High, Pojoaque, N. Mex.
- 104 students, Pojoaque High, Pojoaque, N. Mex.
- 42 students, Allison James school, Santa Fe, N. Mex.
- 30 students, Tucumcari Jr. High, Tucumcari, N. Mex.
- 16 Boy Scouts, New Mexico School for the Deaf
- 235 students, Highland High, Albuquerque, N. Mex.

Mr. Schnettler, Chief of General Services, Washington Office and Mr. Carpenter visited the area on May 22.

Ranger Service

Mr. S. J. Thomas was entered on duty on May 7 as a seasonal ranger. He will work on weekends until May 30 when he will go on full time status.

Fish Cultural Activities

1120 rainbow trout from 6 to 10 inches in length were stocked

1. Introduction

There were 1975 students enrolled in the course at the time.
The department began a study into the effectiveness of
teaching in the late 1960s and early 1970s. A general survey
program was conducted in 1975.

2. Method

The study was conducted using a survey of the students.
A total of 1975 students were surveyed in 1975. The survey
was conducted in the form of a questionnaire.

3. Results

The results of the study are as follows:

- 1. The majority of students (85%) were male.
- 2. The majority of students (75%) were from the United States.
- 3. The majority of students (65%) were from the University of California.
- 4. The majority of students (55%) were from the University of California, Berkeley.
- 5. The majority of students (45%) were from the University of California, San Diego.
- 6. The majority of students (35%) were from the University of California, Los Angeles.
- 7. The majority of students (25%) were from the University of California, Santa Barbara.
- 8. The majority of students (15%) were from the University of California, San Francisco.
- 9. The majority of students (5%) were from the University of California, Irvine.
- 10. The majority of students (1%) were from the University of California, Merced.
- 11. The majority of students (0.5%) were from the University of California, Riverside.
- 12. The majority of students (0.5%) were from the University of California, San Jose.
- 13. The majority of students (0.5%) were from the University of California, Stanislaus.
- 14. The majority of students (0.5%) were from the University of California, Sutter.
- 15. The majority of students (0.5%) were from the University of California, Yuba.
- 16. The majority of students (0.5%) were from the University of California, Santa Cruz.
- 17. The majority of students (0.5%) were from the University of California, San Francisco State University.
- 18. The majority of students (0.5%) were from the University of California, San Francisco State University.
- 19. The majority of students (0.5%) were from the University of California, San Francisco State University.
- 20. The majority of students (0.5%) were from the University of California, San Francisco State University.

The results of the study are as follows:
The majority of students (85%) were male.

4. Conclusion

The study found that the majority of students were male.
The study found that the majority of students were from the United States.
The study found that the majority of students were from the University of California.

5. References

The study was conducted using a survey of the students.

in the Hito de los Frijoles, about a mile above headquarters, on May 18. About 200 came down stream to the swimming hole and provided very good fishing for a few anglers on the opening day of fishing season, May 23.

Forest Fire Protection

A new forest fire tool trailer was constructed for use with the jeep that is much lighter and has more convenient arrangement of tools than the old one. It will allow quicker getaway and faster travel to a fire.

The annual Forest and Building Fire Control training meeting was held for all employees from May 5 to 7. Forest Service ranger Larry Hamilton attended two sessions and helped with the instruction on May 6.

Fire Control Aides Harry Venn, Patrick Cordero, and Manuel DeVargas entered on duty on May 1.

Insect and Tree Disease

The aerial spraying for the control of tent caterpillars was accomplished on May 18. Weather conditions were nearly ideal and it is believed that good results were obtained. Messrs. Longberg and Bennett Bureau of Entomology, observed the spraying and placed dye cards to determine drop size and distribution across the path of flight. They recommended that in the future the plane ought to fly at a height of about 200 feet above the trees to give better dispersion of the insecticide.

Accidents

A serious accident was narrowly averted when a rear axle broke on a panel truck as it was approaching the top of the hill leading down in to Frijoles canyon. The driver managed to turn off of the road and was stopped by a small pinion pine tree. The truck belonged to Technical Service Co., Albuquerque, N. Mex.

Fred W. Minnewies

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

CANYON DE CHELLY NATIONAL MONUMENT
CHINLE, ARIZONA

May 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Canyon de Chelly
Subject: Monthly Narrative Report for May, 1953

Travel: 520 visitors in 183 cars this month. Although, this figure is lower than that for the previous month of April, there was an increase of approx. 46% over the same period of 1952. Also, the current calendar travel year shows an increase of about 47% over 1952. There were 69 overnight campers. Guide and contact service totaled 94 hours.

Weather: This has been an extremely dry and windy month. In fact, hard dusty winds prevailed just about every day. Only one shower of .19 of an inch fell on the 19th. Total precipitation since the first of January has amounted to only 1.85 of an inch.

Roads: All approach and monument roads are dusty but in fair condition. The all-weather highway now under construction between Window Rock and Ganado is progressing nicely, and should be completed within the next 60 days.

N.P.S. Visitor: Archeologist Thomas Onstott, Regional Office on April 29.

Noteworthy Visitor: Alexander Eliot, Associate Editor of Time magazine on May 21-22. Mr. Eliot was given a personally conducted tour in all canyons for the purpose of photographing the ruins, pictographs, and other points of interest in the monument.

Signs: New informational and directional signs were made and placed at monument headquarters.

Rest Room Project-CXC-231: Thanks to the very able supervision and work by Gene Mott the changing of the tool room into rest rooms was completed ahead of schedule. They are now in use and all that remains to be done is some exterior painting and necessary landscaping. All should be complete in every detail within the next 10 or 12 days. Needless to say much favorable comments are being received by the visiting public.

Capulin Mountain NATIONAL MONUMENT

Capulin New Mexico,

May 27th 1953

Memorandum To: The General Superintendent,
Southwestern National Monuments
National Park Service
Globe Arizona,

From: Homer J. Farr, Ranger,
Capulin Mountain National Monument

Subject: Monthly Narrative Report,

Visitors: We have had approximately fifteen hundred visitors to the Volcano this month, which brings the total to Three thousand four hundred fifty Jan 1 to May 31. this year,

Weather: was very cold and damp up until about May 20, with one and 85/100 inches of moisture since that date there has been nothing but high dry winds and extra warm,

Flora and Fauna:

Gambles oak has just now began to leave and the Mountain Mahogany has fairly well leaved out, The Gooseberries, wild currants, and wild cherries all are now in full bloom, It is possible that we may have some pinon nuts this year but it is still a little too early to tell for sure, all fauna is doing fine, we hope to have a wonderful crop of deer this year, we have forty does and eleven bucks this should give us a good start,

Roads and Trails,

have been maintained in splendid condition thru the month,

Very Respectfully,
Homer J. Farr,
Ranger,

CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

May 25, 1953

Memorandum

To: General Superintendent, SWNM

From: Superintendent, Casa Grande

Subject: Monthly Narrative Report for May, 1953

General: The first part of the month was unusually cold, windy, and dusty, all of which made the local cotton farmers very unhappy but no more so than the personnel at this area. It is very difficult to speak to large groups of visitors during a howling sand storm. Our new Archeologist, Fred Peck, received a fine introduction to southern Arizona by standing on the museum porch and watching it blow by.

The city of Coolidge again held Cotton Days from the 12th to the 17th. Cotton Days is a promotion staged by the local merchants to stimulate business and arouse interest in cotton, already the basis of this county's economy.

The Superintendent's wife, Bina, entered a cake in a contest sponsored by the Arizona Public Service Co. and won first place. Her prize was a \$400 O'Keefe and Merritt gas range. The stove was installed in the Superintendent's residence on the 21st.

Weather: Summer officially arrived toward the end of the month with daytime temperatures 100 degrees. The last part of April and the first of May were cold and windy. The drought continues and unless we get some rain soon this part of the country will be in bad shape.

Memorandum

To: Chief, National Park Service
From: Superintendent, Casa Grande National Monument
Subject: Archaeological Excavations at Casa Grande

Summary: The first part of the work was to clear the site of all debris and to excavate the lower part of the tower. The second part was to excavate the upper part of the tower and to clear the site of all debris. The third part was to excavate the lower part of the tower and to clear the site of all debris. The fourth part was to excavate the upper part of the tower and to clear the site of all debris. The fifth part was to excavate the lower part of the tower and to clear the site of all debris. The sixth part was to excavate the upper part of the tower and to clear the site of all debris. The seventh part was to excavate the lower part of the tower and to clear the site of all debris. The eighth part was to excavate the upper part of the tower and to clear the site of all debris. The ninth part was to excavate the lower part of the tower and to clear the site of all debris. The tenth part was to excavate the upper part of the tower and to clear the site of all debris.

The site of the tower is a small area of land, about 100 feet square, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill. The tower is a small, square, adobe building, about 10 feet high, and is situated on a hill.

Interpretive Service: During the month 3933 visitors arrived at Casa Grande; 1922 of these visiting the ruins in 172 guided parties.

| <u>Visitor Summary:</u> | <u>1953</u> | <u>1952</u> |
|-------------------------|-------------|-------------|
| May | 3,933 | 3,103 |
| Increase | 830 | |
| Decrease | | |

Our visitation this month included people from all 48 states in addition to Sweden, Israel, Argentina, Germany, and New Zealand.

Noteworthy Visitors and Organized Groups:

| | |
|----------|---|
| April 26 | 33 8th graders from Tempe. |
| " " | 32 Cub Scouts from Florence. |
| " " | 11 members - church group from Morena. |
| " 29 | 48 members of the Littleton school, Littleton, Ariz. |
| " 30 | Mr. R.P. Alexander, Piedmont, California. Mr. Alexander worked under Dr. J.W. Fewkes the first season of excavation in 1907 at Spruce Tree House, Mesa Verde. |
| " " | Mr. Ahern, Washington Office, Mr. Richardson of Region Three, and General Superintendent Davis on official business. |
| May 6 | 48 members of Glendale H. S., Glendale, Arizona. |
| " " | 17 schoolchildren, Young, Arizona. |
| " " | Dale King and Dr. Porter of the Washington Office on official business. |
| " 10 | Paul Coxe, 2 French generals, and a member of the U.S. State Dept. |
| " 15 | Ranger Myron Sutton from Montezuma Well. |

Maintenance: Mr. Lopez installed coolers at the Administration Bldg., completed the removal of pea gravel from the parking area, and cleaned and graded shoulders on the entrance road. The oil stoves were removed from the residences and Administration Bldg., cleaned, and stored.

The balance of time was spent on routine clean-up and maintenance.

Donations: Through the kindness of Dr. C.W. Barrett of Pasadena, Calif., we obtained a fine old photograph of Casa Grande, taken by Ed Scheiffelin in the 1880's. The picture was framed and is now hanging in the museum.

Publicity: Two articles, one in the Arizona Republic, the other in the Los Angeles Times, describe this monument for the potential traveler.

Flora: Our Saguaro and Ocotilla are in bloom this month.

Chaco Canyon National Monument
Bloomfield, New Mexico

May 24, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for May, 1953

Weather

More of the same as last month; snow, rain, and high winds. Two snows occurred during the month, on the 2nd and 11th. Rains fell on the 28th, 4th, 11th, 15th, 17th, and 18th. A total of 13 heavily overcast days and 14 days of very high winds with the usual blowing sand and dust have played havoc with the area in general. A total of .64 of an inch of precipitation was recorded. The high for the month was 85 degrees on the 22nd and the low was 8 degrees on the 30th of April. The first part of the month was characterized by low temperatures.

Travel

A total of 346 people in 89 cars visited the area for the month and of this number, 192 went through Pueblo Bonito in 27 trips. Another 119 people were contacted in the museum who didn't take the guided trip due either to rain, wind, or dust, or a combination of the three, or to a lack of time.

Administration

Daily duty was maintained throughout the month except for some of the lieu days. Seventeen requests for information were answered. Quite a bit of time was spent with the crew removing the culverts from the old CCC road.

Soil and Moisture Control

The .64 of an inch of moisture this month has helped the S&MC program considerably. Two checks were made on the plantings and nearly all of the rooted stock seems to be doing well. It is still too early to determine whether or not the cuttings which were planted are going to survive. Another good rain or two would make a lot of difference between survival and dying.

Grounds

The work on the Grounds Cleanup has been practically completed. "11 remaining evidences of the former buildings have been removed and the area needs to be dragged to complete work.

Due to the continued high winds plus the growing number of people using the picnic grounds quite a bit of time has to be spent policing the picnic ground and the area/ to the east of it.

Maintenance

Most routine maintenance work was accomplished during the month. Numerous "spring projects" have been long delayed because of lack of time to complete them.

Roads and Trails

No work has been done during this report period on either the north or south approach roads outside of the monument boundry. The road to the south is in reasonably good shape with only a little sand in a few places. The road to the north is in the usual shape - rough. The "sand pile" just across the Escavada Wash to the north is becoming increasingly difficult to negotiate due to the continued winds. Several visitors have been stuck in the sand there. Most of these people get out by themselves but a few have walked the four miles to the monument to get help. Work is scheduldd to be done by monument personnel th s week to attempt to alleviate this condition somewhat.

Monument roads were the subject of quite a bit of work this month. The north section was graded and dragged twice while the road to the south was dragged twice in an effort to eliminate some of the tumble-weeds growing in the road. This section of the road was not bladed due to both lack of time and personnel.

A total of 505 feet of culvert, ranging in size from 18 to 42 inches, was removed from the old CCC road the first part of the month. This material was stockpiled in Mocking Bird Canyon for future use. Several culverts were not removed due to the amount of overburden.

During a few odd moments some of the weeds were cut from the trail through Pueblo Bonito and also from some of the rooms and kivas in order that visitors could be shown the floor features in them.

Wildlife

The House Finches have returned in force. Quite a number of them are seen at the drinking fountain behind the office. Mourning Doves have been observed most of the month and the Scaled Quail are seen in pairs. Two Golden Eagles were seen flying over and the Turkey Vultures have returned. Just what the latter find to eat around here is beyond me since conditions are such that the jackrabbits usually pack their lunch.

On the night of the 16th a bobcat was seen in the mouth of Mocking Bird Canyon and three bull snakes have been seen during this report period. One was on one of the high walls in the southeast section of Pueblo Bonito and caused a lot of comment from visitors. Another attempted to join an orientation talk in the museum and needless to say, caused a bit of commotion among the visitors.

A few spring blossoms are out. Mallow and the Crimson Hedgehog are in bloom in limited numbers.

Personnel

Labor Foreman Jack Williams was terminated on the 15th and was scheduled to report to Canyon de Chelly on the 16th. On the way to Gallup on the 16th the rear axle housing of his jeep broke when he was about to Crownpoint, and the vehicle had to be towed to Gallup for repairs. This has caused quite a bit of delay, which isn't over yet, and in the meantime Jack has received an offer from Carlsbad. Guess everyone has his troubles.

Visitors

April 27th- Archeologist Onstatt

May 6th - Regional Safety Engineer Richardson, accompanied by Mr. Ahern of the Washington Office and Gene Mott from Globe.

May 8th -Mr. Zimmer and Mr. Moore from the State Highway Dept. in Santa Fe.

8th - Lindreth Training School, Lindreth, N. Mex. - 24 pupils

13th -(also 14th and 16th) Dr. Bertha P. Dutton from Santa Fe and her archeology group.

21st - Boy Scout Troop 49 Crownpoint

21st - Boy Scout Troops 250 and 251 from Ft. Defiance, Arizona

23rd - Gallina High School with 26 pupils

Forgot to mention Supervisory Ranger Foy Young and family last month.

Arthur H. White
Act'g Superintendent

Chiricahua National Monument
Dos Cabezas, Arizona

May 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather. Weather has been dry all month, although it almost rained one day. By using a little imagination we measured .01 inch in the rainfall. This May has been the windiest and coldest that the employees of Chiricahua can recall. It is thought that a number of bad dust storms slowed travel down considerably.

Inspections. Dr. Porter from the Washington Office, Naturalist King from the General Superintendent's Office and Superintendent Jackson from Tumacacori made an overnight stop at Chiricahua. While here they made the auto trip to Massai Point and then, accompanied by Ranger Barrel and Superintendent Cooke, examined the ruins of Old Fort Bowie.

General Publicity. A report has been received that Weldon Heald has an article on Chiricahua in the last issue of Desert Magazine. A copy of the magazine has not been received to date.

Maintenance. Marble has continued with the oiling of the road ditches and patching of the surface. This has proved to be a time consuming job and will probably not be completed until additional labor help can be secured next fiscal year.

Laborer Leadman and Summer Ranger Boileau has done an excellent job of painting and fixing up the improvised bachelor quarters - mostly on his own time and with left over paints. He is now on vacation and is bringing back a bride on June 1. Perhaps the last item should be reported under construction rather than maintenance. Anyway we now realize why he did such an outstanding job of dolling up his quarters.

Approaches to Monument. All approach roads are in fair condition with the exception of the Bowie road. Farming development along this road has made a dust bed out of it for several miles, causing some cars to get stuck and resulting in an unpleasant drive for all cars traveling the road.

Interpretive Service. Our regular scheduled Sunday afternoon conducted hikes into Echo Canyon were continued with two extra hikes.

UNITED STATES

Ranger Barrel took a hike down Echo Canyon with an organization of 30 Mormon boys. Superintendent Cooke took Photographer Weber and two others on the Heart of Rocks loop. Mr. Weber is taking movies and other pictures for travelogue television showing.

A lantern slide talk was given in the museum. Unfortunately the campers nearly all left after the show was announced and a neighborhood dance attracted all of the guest ranch visitors and neighbors so the attendance was only five counting the Superintendent and Ranger. However the show lasted 2 hours, 1 hour NPS and 1 hour guest showing, and many excellent pictures were seen by those attending. At the request of the teachers, a lantern slide talk was given at the Elfrida High School by Ranger Barrel to 55 students. Ranger Barrel also gave a half hour car fire talk to 170 Mormon boys and men who made an overnight stop on the campground.

The Foothill Forest Natural History Trail at Headquarters was used by 24 visitors at an average of 3/4 hour per trip. An estimated 94 people made use of the Passai Point Natural History Trail. Relocation and staking of this trail has just been completed. It now starts at the orientation station, circles the hillside and ends at the upper end of the Passai Point parking area. A stand has been placed at the beginning of the trail to distribute leaflets and a box at the end for recollecting. With this arrangement it is thought we will now have a much better check on boni fide nature trailers, as it is thought that only those definitely interested in the nature trail will now take the guide sheets.

Increase in Travel. A new record was established for the month of May with 2202 visitors. This is 422 above May of 1952 and 397 above the previous high of 1951 May. The travel for the calendar year is now 1522 which is 1553 ahead of last year at this time or nearly 20%. Campground use was large with 602 extra visitor days on the campground.

Forest Fire Protection. Thomas Griggs was placed on the Sugar Loaf lookout on May 1. So far he has located one fire on the adjoining National Forest land. This fire kept us on guard for an afternoon as it was less than a mile from the monument with a high wind blowing. However the Forest Service controlled it by nightfall with about 30 acres burned and began to breath easy again.

NATIONAL PARK SERVICE

May 26, 1953

Memorandum

To: General Superintendent, S. W. N. M.

From: Superintendent, Tumacacori

Subject: Monthly Narrative Report for Coronado National Memorial for May, 1953

The inspection trip was made this month on May 11, at which time the writer accompanied Mr. Charles Porter, Chief, Preservation Branch, History Division, Washington Office, and Dale S. King, Naturalist, Southwestern National Monuments. We went in a Headquarters car, and followed the dusty route from the Nogales-Sonoita highway via Washington Camp to Lochiel and east paralleling the border to Montezuma Pass.

About five miles west of Coronado National Memorial we saw the first specimen of the Pronghorn Antelope that I have seen in this county. And in a little canyon, which offers the only running water east of the Santa Cruz, we saw a fine specimen of a snake which belongs to the Racer or Crackwhip group. Later, unable to key the snake by memory to any species description in reptile books, I wished we had captured the specimen.

I saw no change in the appearance of the terrain in the Coronado National Memorial area, except that everything was a little drier and dustier than before. The attractive signs which Ranger Bullard and I had planted at the approaches to Montezuma Pass in March were in very good condition, having stood for nearly two months with only three bullet holes to mark the attention of vandals!

Going down the east slope of the Huachuclas from Montezuma Pass we stopped in and had a nice chat with Miss Grace Sparkes, chairman of the Coronado International Monument Commission of Arizona. Nothing of particular moment transpired. As we were leaving Miss Sparkes asked me to send her a bit of a biographical sketch on Mr. Porter and Mr. King, so she could accurately refer to them in the Bisbee Chamber of Commerce's news leaflet to its members, and this data was later mailed back to her.

From Coronado National Memorial we continued on to Bisbee and Tombstone, then over to Chiricahua National Monument, and next day to Fort Bowie.

May 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, El Morro
Subject: Monthly Narrative Report

There were 493 persons who came to El Morro this month as compared to 375 for a year ago. This is a 31 per cent increase. Of these visitors, 360 took a trip around the Rock in 81 parties, 204 listened to an orientation talk, and 27 visitors went over the top of the Rock in 8 parties.

The weather this month has been cold, sometimes wet and very windy. Hardly a day has passed that the wind did not blow hard. This has cut down possible visitor travel considerably. The warmest was 81 degrees and the coolest was 19 degrees Fahrenheit. There was .30 of an inch of moisture.

The approach roads have been passable throughout the month, but are very rough. The Monument road is still in good shape.

David W. Brugge entered on duty as seasonal ranger on May 20. He is a graduate of the University of New Mexico. He seems to like his work and is taking hold very well.

With an average of about three trips per day around the Rock, most of the time has been spent guiding, keeping the place clean and doing paper work. Other than the few days the seasonal ranger has been on duty, I have had it to myself.

The trail over the top of the mesa has been completely reworked and is in excellent shape. The bridge on the lower trail is being repaired and some work was done on the road.

Jack Diehl and Carl Allemen spent several days locating and surveying the new campground site. Tommy Brstott was in for a brief visit.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Gran Quivira National Monument

Gran Quivira, New Mexico

May 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report for May

Weather. High winds continued throughout the month but weather was generally pleasant. Temperatures varied from a maximum of 89 degrees on the 24th to a minimum of 22 degrees on the 11th. Two inches of snow fell on the 3rd in a fast flurry that melted a few hours later. Moisture content leveled off this month with but .47 of an inch recorded.

Publicity. Alamogordo, El Paso and Albuquerque newspaper and radio coverage was extended to the annual Chamber of Commerce tour to Gran Quivira.

Monument travel statistics were carried in local newspapers, and Radio Station KTER, Albuquerque, broadcast travel statistics for the month of April.

Inspections. A general safety inspection of the area was conducted by Messrs. Frank L. Ahern, William H. Richardson, and Eugene T. Mott, on the 7th. No serious safety violations were noted and their constructive suggestions were appreciated.

Drs. Erik Reed and Charles W. Porter on a general inspection of the mission and village sites on the 7th.

NPS Visitors. Tour Leader Paul McCrary and family, Carlsbad Caverns, on the 18th.

Personnel Changes. Laborer Doyle B. Chaney was terminated on April 25 - change of residence.

Messrs. Clyde H. Fulfer and Garvice T. Jobe were employed as WAE laborers on May 9 and 11 respectively.

Roads and Trails. Maintenance and repair to roads and trails were concentrated on this month. Replacement construction

of 160 feet of macadam trail from parking area to office was accomplished. The Skousen Construction Company donated six tons of small chipped rock to replace the sand covering on our trails and this was hauled with area equipment and spread. Roads in the immediate headquarters area were leveled and packed with 4 tons of dirt and rock and culvert boxes were cleaned. Cattle guard piers were repainted and trail inclines grouted.

Research and Observation. Flowering annuals and other plants were collected and pressed for future identification and inclusion in our herbarium.

Two small coveys of quail were observed in the mission area, and are believed to have wintered here.

Rattlesnake observation continues. Stomach content of a three foot prairie snake revealed a half mature cottontail rabbit - it doesn't seem possible.

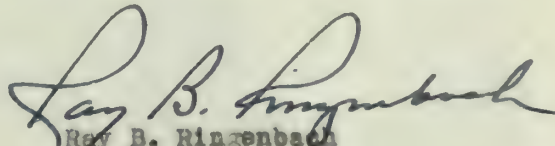

General Maintenance. Informational signs in headquarters and mission area were given a coat of linseed oil and re-lettered. Both storage sheds were cleaned out and some temporary shelving provided.

Interpretation. Three easel exhibits were provided for the mission trail trip and sites were located for additional stakes for use when the new self guide pamphlet is received.

A special orientation talk and guided trip was provided to the Chamber of Commerce tour from Alamogordo on the 17th. About 40 people were in attendance.

Over 90 percent of all monument visitors for the month were contacted and given some interpretation in the museum. Nineteen guided parties made the mission trip for an average of 52 minutes per party and 97 parties used the self guide facility.

Travel. An increase of 9 percent in travel was recorded for the month. Visitors totalled 440 in 130 cars. No bus trips were scheduled.

Ray B. Ringenbach

GREAT SAND DUNES NATIONAL MONUMENT

Alamosa, Colorado

May 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Great Sand Dunes

Subject: Superintendent's Narrative Report for May, 1953

Weather Conditions

The coldest windiest May on record restricted travel greatly and hampered maintenance and rehabilitation work. Precipitation of 1.36 inches improved the moisture conditions considerably.

Maximum temperature - 76° on May 22 and 23

Minimum temperature - 15° on May 2

Precipitation - 1.36 inches (including 4.0 inches of snow)

Special Activities

On May 5 I attended the monthly meeting of the Alamosa County Commissioners to give them travel figures and related information for their use in attempting to get a half-mile test section of a new concrete road mix put out by a Denver cement company. This test section if plans materialize would be in the worst section of the approach road about three miles east of State Highway 17.

Inspections

Architect Saunders of the Region Three Office visited us on May 10 and 11. Particular attention was given to maintenance and rehabilitation problems. Kenny gave us a great deal of help in planning our future work.

General Publicity

Mr. F. M. Reck, Editor of the Ford Times, visited here on May 15 in connection with an article on the Great Sand Dunes to appear in the magazine in the near future. Several glaring errors in the article were shown Mr. Reck - in several cases the truth made a much more interesting story than did the fabrications of the author who

UNITED STATES DEPARTMENT OF JUSTICE
ALBANY, NEW YORK

May 17, 1934

Memorandum

To: General Investigation

From: Investigation, New York Office

Subject: Investigation of activities of the New York Office

Re: New York Office

The subject of this report is the New York Office of the Federal Bureau of Investigation, which is a part of the United States Department of Justice. The New York Office is one of the largest and most important of the field offices of the FBI. It is located in New York City and has a long and distinguished history.

The New York Office has been active in the investigation of a wide variety of crimes, including the investigation of the activities of the New York Office. The New York Office has been active in the investigation of the activities of the New York Office. The New York Office has been active in the investigation of the activities of the New York Office.

probably had never visited the monument.

Good coverage by Colorado newspapers was given to a press release I gave last week to press representatives in Alamosa on the appearance of Medano Creek at the Lower Parking Area.

Maintenance and Rehabilitation

The rehabilitation project is now 95% complete. This month the stucco on all permanent buildings was patched, the patio fences built from concrete blocks, and fences and buildings painted with cement paint. The woodwork on the back porch of the superintendent's residence was given a coat of adobe brown paint.

A burnt umber and linseed oil treatment was given to several sign posts and to the bench at the Dunes Overlook on the nature trail.

The entrance road was graded once a week and is in good condition for a road consisting mainly of rocks. Two large loads of gravel were put at the Lower Parking Area in spots badly eroded last summer.

Approach Road

The approach road from State Highway 17 was kept in good shape by Alamosa County. The snow and rain helped this road and also enabled them to improve the approach road from U. S. 160 so that it is now in the best condition it has ever been.

Interpretive Service

A talk outside the area on "The National Park Service, Its History and Objectives" was given on May 8 to 11 members of the Half-Century Club from Alamosa.

Research and Observations

Deer have been quite numerous along the eastern side of the monument as the shrubs leafed out during the month. This is the season here when the deer come down from their favorite ridges to take advantage of the earlier growing season near the dunes. According to our fact file, the growing season is just three weeks later than it was last year.

The remainder of the herbarium specimens were labeled this month to finish up that job.

Increase in Travel

A 2% increase in travel to 1528 visitors occurred in spite of the miserable cold windy weather. This was quite remarkable as some days we had no visitors at all because of the bad weather. The increase is mainly due to the increased use by school groups, many of which come to use the Nature Trail

The annual travel is now 3353 people as compared to 2830 this time last year.

Visitors

Mr. and Mrs. Kenneth M. Saunders of the Region Three Office were the only National Park Service people to visit the Great Sand Dunes in May.

Other newsworthy visitors in May included District Ranger Jim Folkestad and family of the Gunnison National Forest and Mr. F. M. Reck, Editor of the Ford Times.

School groups visiting the monument included the Forest Recreation and Wildlife Management Senior students from Colorado A. & M. on their annual field trip. The Waverly Christian School, the Woodland Park Junior High School, the San Luis Public School Third Grade, the Ortiz Public School, the Redwing Public School, the Stanley Elementary School, and the Letterman's Club of Saint Mary's High School of Walsenburg held picnics at the Great Sand Dunes. Girl Scout Troop No. 7 of Alamosa and the Westminster Club of the Presbyterian Church in Alamosa also visited the area during the month. Boy Scout Troop No. 287 of Monte Vista made an overnight hike on May 23.

Personnel

Mr. Robert E. King entered on duty as seasonal ranger for weekend duty only on May 3.

(SIGNED)

Clay T. Bean
Superintendent

Montezuma Castle National Monument
Camp Verde, Arizona

May 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report, May 1953

Weather: May, usually a nice month in the Valley, has not measured up to past seasons. It has been cold and windy all month. Although 1.26 inches of rain did fall during this report period, weather conditions in general may be considered dry.

Travel: Travel, as it always does, fell off some as compared to last month. Nevertheless, a substantial gain over May of last year was recorded when 3,740 people in 1,185 cars visited the Castle and 1,774 people in 555 cars went to the Well. This totals 5,514 visitors to the area as compared to 4,267 visitors for May of last year.

Interpretation: Due to limited personnel, most contacts were again made in the museum buildings. Exceptions were on Sundays or when large organized groups arrived. Talks were then given at the lecture area.

Official Visitors: April 28, Highway Engineer George Smith of the Regional Office.

May 3, Messrs Ahern of the Washington Office and Richardson of the Regional Office.

May 11, Mr. Jerry Miller of the Regional Office.

Visitors: April 28, Ranger and Mrs. Jack Turney from Bend-
lier.

April 30, Fred Clatworthy and family, pioneer photographer of Rocky Mountain National Park.

May 2, The Boatrighs and Strattons from Gila Pueblo.

May 2, 25 Boy Scouts from Mesa, Arizona.

May 8 & 10, 200 persons representing Arizona Radio Net (Ham Operators) held their annual convention at Montezuma Well.

May 20, 30 members of the Prescott Chamber of Commerce on a good will tour of the Valley.

May 24, Supt. Guillet and family of Walnut Canyon and Mr. and Mrs. Platt Cline of Flagstaff.

Page 2:

Publicity: The publicity derived from use of Montezuma Well May 8-10 by amateur radio operators is not to be minimized. Their broadcasts reach throughout the western states and in some cases to other parts of the world. About six months of inter-station broadcasting is required to complete arrangements for this annual affair, and since the Well and its location is repeatedly broadcast, there is created a widespread interest in the area. Because of its central location and good facilities, Montezuma Well has been designated for future meetings of the Arizona Net.

Inspections: A fire hazard inspection of all monument facilities was made on May 2 in company with Messrs. Ahern and Richardson. Details of this report will be included in the Report of Annual Inspection of Fire Hazards.

Museum Exhibits: Work progressed on the new section of the Castle museum. The case containing bugs and snakes was completely redesigned by Pierson and is drawing many favorable comments from visitors. The geological display, with the exception of one picture, was completed by Sutton. This too is very attractive. Both Pierson and Sutton have been working on a Lyman's herbarium which is proving popular with visitors, especially during this flowering season.

Several Apache artifacts were secured on loan from Howard Wingfield of Camp Verde. This display is slated for installation next month.

Sutton completed relabeling herbarium folders.. He also typed new catalog cards, giving each an index number. This has brought our herbarium, which was already in good condition due to work of Jackson, Hastings and others, up in tip-top shape.

Tree Diseases: A trip to Grand Canyon was made on April 28 to return a spray-rig for the purpose of spraying the Cottonwoods for control of tent caterpillar and the Sycamores for lace-bug. This job was accomplished the following week and so far has proved effective.

Maintenance and General Work: A new stand to hold trail guide booklets was erected at the base of the Montezuma Well Loop Trail. The box is a sort of Kenesaw Mountain affair and is mounted on a stand made from native stone. A new register stand similar to the one at the base of the trail was also erected at the Well museum. This latter stand is large enough to hold register sheets.

To repair leaks, the west side of the Castle museum was re-covered with roofing paper. Water as a result of this leaky roof caused some minor damage to the interior of the museum.

The following is a list of the names of the persons who have been appointed to the various committees of the Board of Directors of the United States National Bank, for the year ending December 31, 1900.

Page 3:

A surplus cooking range from Grand Canyon was installed in residence No. One. Although this range still does not meet fire safety standards, it is a definite improvement over the stove it replaced.

In residence No. Two, the living room was painted. Also, the evaporative coolers were connected to the houses and museums.

Roads and Trails: On May 11, Landscape Architect Miller located the site and approved construction of a foot trail to make accessible some caves located in the cliff at the base of the Castle. Work is about one-half complete on this trail.

Highway Engineer Smith arrived April 28 to check the entrance road in preparation for seal coating. Considerable time was spent conferring with County officials in an effort to coordinate this job with seal coating work to be done by the County. To date, details have not been worked out.

Archeological Survey: Pierson and Burroughs of Tuzigoot spent a day at the Well completing mapping of the surface ruins for an archeological base map for this area.

Research and Observation: Birds this month have been almost as plentiful as visitors (people). 65 species were observed, four of them new records for the Well and one almost a new record for the Castle. New records at the Well are: Cassin's Vireo, Western Willet, Black-throated Gray Warbler, and Spotted Sandpiper. At the Castle, a Gray Vireo was observed. This bird was last reported in 1916 by Jackson and Taylor as being common then.

The flowering season has not been spectacular this year because of dry weather, but a considerable variety has been collected for the Layman's herbarium. Flowering heads and pressed specimens of *Amsinckia* and *Crytantha* were shipped to the University of California where they will be used in chromosome research.

More Publicity: Just called to my attention is The Woman's Home Companion for June 1953. This edition has a picture of Montezuma Castle as a back drop for a model in a bloomer play suit. The title of the page is the Bloomer and the Blazer. Also appearing in the same magazine under the title of Just Made for Lazy Days is Ranger Sutton who models a short-sleeved sports shirt. These pictures were taken last spring.

The Saturday Evening Post for May 30, has an article entitled "Tourists who Act like Pigs" by H. Smith. This article includes a paragraph on why Montezuma Castle was closed; not because of tourists who act like pigs, but because it was wearing out.

John O. Cook
Superintendent

NAVAJO NATIONAL MONUMENT

TONALEA, ARIZONA

May 29, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report for May, 1953

Travel: We have just established a new record of travel for May at Navajo. This month we had 211 visitors. Ranger Laughter has suggested that the exceptionally strong and persistent winds from the southwest might have blown some of the visitors up this way from highway 66. It could be, I suppose, since locally the high winds and Atomic bomb tests have been credited with every other deviation from the norm.

Weather: Strong spring winds have lasted a little longer than usual and have long since worn out their welcome. The temperatures for the month range from a high of 71 degrees to a low of 21 degrees. Only .03 inch of moisture was recorded.

Special Visitors: Mr. Howard Gorman, member of the Navajo Tribal Council, was a visitor in the area May 1.

Mr. and Mrs. Richard Van Valkenburgh, of Santa Fe, were here May 5.

Dr. S. Clifford and Betty Evans, Department of Archeology, U.S. National Museum, Washington, D.C. visited here May 8.

Roads: Five culverts were installed and the remaining one will be put in use as soon as we can get to it. Our own roads and the approach roads were in very good condition during the first two weeks of this month. Since then a lot of sand has blown on the roads and some of our visitors have been getting stuck. The ground is very dry and not much can be done for our roads until we get some rain.

General: The water gauge on our storage tank was repaired and the markers were repainted. The Kohler light plants were tuned and checked. All outside water taps were turned on for use. The hydrant near the museum was moved to a new location. A sign was made and installed indicating the elevation of the headquarters area. All our picks were sharpened. The water pump was serviced and a work bench installed nearby for use during pump repairs.

We have started collecting stone for raising the walls of the water pump generator house. I don't know when we will get funds to complete this project but we want to be ready when we do.

1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 26

1944, June 10, 1945, 1946, 1947, 1948, 1949, 1950, 1951, 1952, 1953, 1954, 1955, 1956, 1957, 1958, 1959, 1960, 1961, 1962, 1963, 1964, 1965, 1966, 1967, 1968, 1969, 1970, 1971, 1972, 1973, 1974, 1975, 1976, 1977, 1978, 1979, 1980, 1981, 1982, 1983, 1984, 1985, 1986, 1987, 1988, 1989, 1990, 1991, 1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 262

1. The following information is being furnished to you for your information:

Travelers have just assembled a new record of travel for the year 1914. This record, we had all visitors, and it was a very good one. The record shows that the country is very rich in natural resources, and that the people are very intelligent and progressive. The record also shows that the country is very beautiful, and that the people are very friendly and hospitable. The record is a very good one, and it is a very good record of the country's progress in the year 1914.

These birds were all shot in the same place and were all of the same species. They were all shot in the same place and were all of the same species. They were all shot in the same place and were all of the same species.

Small Visitor: Small Visitor, member of the family, called
 Council for a visitor in the same way.
 Small Visitor: Small Visitor, member of the family, called
 Council for a visitor in the same way.
 Small Visitor: Small Visitor, member of the family, called
 Council for a visitor in the same way.

Five delivery vans were installed and the remaining one will be put in use as soon as we can get in the car and make the delivery. There were no very good conditions during the first two weeks of the month. There was a lot of rain and the ground was very wet and some of the deliveries have been getting stuck. The ground is very dry and the weather can be a problem for our trucks until we get some rain.

General: The water pump on our bridge tank was repaired and the
tanks were repaired. The boiler light tanks were fixed and checked.
All boiler water tanks were fixed on the way. The light tank on the way
was fixed in a new location. A light tank was fixed in the
the operation of the bridge tank. All the tanks were repaired.
The water pump was repaired and a new boiler light tank was
fixed on the way.

to have been collected about the same time as the
other two specimens, however, I don't know when we will find it.

NAVAJO MONTHLY NARRATIVE REPORT FOR MAY, 1953
DEPARTMENT OF THE INTERIOR

Personnel: Mr Hubert Laughter was terminated as Laborer Lead-man on May 19 and he entered on duty as Seasonal Ranger May 20.

Accidents: A rather severe accident occurred on the Shonto Hill May 9. There were 15 Navajo Indians in a truck that turned over on the hill. The driver of the truck lost control while trying to shift into a lower gear at a rapid rate of speed and no brakes. One man was killed and several were hospitalized.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Organ Pipe Cactus National Monument
Ajo, Arizona

May 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Organ Pipe Cactus
Subject: Monthly Narrative Report for May, 1953

Weather:

A suggestion of summer is now here, though the month has been exceptionally nice for this time of year. High for the month was 97 degrees with a low of 41 degrees. No rain fell and the desert is very dry.

Inspections:

A Fire and Safety Inspection was made of the area on April 28 by Frank L. Ahern, Hugh Richardson and General Superintendent Davis.

Regional Landscape Architect Miller and Landscape Architect Oblinger made an inspection of the road development May 8 and 9.

New Construction:

The road development is nearing completion. Engineer Bradley and Aide Wing arrived May 9 to complete survey and give engineering assistance. All roads are now ready for final gravel, but little can be done on parts until rains come to pack it down.

Research and Observation

Dr. Muller and Dr. Tucker of University of California spent April 28 and 29 checking on the range of the oak which they have been studying. All oak found in the area were the new species they described earlier.

Travel:

Our usual drop in travel with the coming of summer was noted. It has not been quite such a sharp drop as in former years, but from now on we can expect little visitation. So far we have only had one night without a camper which is very good for this season.

10. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of Nevada:

U.S. DEPARTMENT OF JUSTICE
FEDERAL BUREAU OF INVESTIGATION

The first step in the development of a new product is the identification of a market need. This is often done through market research, which can be conducted in a number of ways. One common method is to conduct surveys or focus groups with potential customers. Another method is to analyze sales data from existing products. Once a market need has been identified, the next step is to develop a concept for a new product that meets this need. This is often done through brainstorming sessions with a team of designers and engineers. The final step in the development process is to create a prototype of the new product. This can be done using a variety of materials and techniques, depending on the nature of the product. Once a prototype has been created, it can be tested to see if it meets the market need and if it is feasible to produce on a large scale.

Mr. Ladd was accompanied by several of his staff and by a number of other persons who were not identified. The group was seen to enter the building and to go to the top floor. The building is the headquarters of the Federal Bureau of Investigation.

The above is a copy of the original document, as it appears in the original file. It is a copy of a letter from the Secretary of the Department of the Interior, dated March 1, 1890, to the Commissioner of the General Land Office, regarding the application of the Act of March 3, 1879, to the lands of the State of Texas.

UNITED STATES

DEPARTMENT OF THE INTERIOR

Personnel:

With the transfer of Ranger Kirk, we have been one man short this month on the ranger force.

Laborer Brown is taking one week annual leave.

William R. Supernauth
Superintendent

The weather was unusually cold and windy throughout the month of May. There was one period of almost no wind on May 10th. The remainder of the month was dry. Approximately one half of the stock was killed on the plateau elevations on the side of Mt. Mansfield. The remainder stayed on the lower slopes.

My investigations will prevail throughout the forested area. The creek flow at various Ranger Station has stopped and water is generally being used from the stream banks. It is very possible that water will have to be hauled to the lower slopes for some time.

Forest was good throughout the month with no great loss of wood as was the case of last May.

The friendly deer hunters were at their best during the month and the woods. The hunters and trappers will be at their best about the end of May.

Special Instructions

May 20th - Mr. Kirk was absent on his annual leave. Mr. Supernauth was in charge of the office during his absence. Mr. Kirk was absent for 10 days.

May 25th - Mr. Kirk was absent on his annual leave. Mr. Supernauth was in charge of the office during his absence. Mr. Kirk was absent for 10 days.

May 30th - Mr. Kirk was absent on his annual leave. Mr. Supernauth was in charge of the office during his absence. Mr. Kirk was absent for 10 days.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

May 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Saguaro

Subject: Monthly Narrative Report, May 1953

General

The weather was unseasonably cool and windy throughout the month of May. There was one period of showers on May 15 and 16, but the remainder of the month was dry. Approximately two inches of sleet and snow fell in the higher elevations on the night of May 15 and the temperature dropped to 24° at Vica Tower.

Dry conditions still prevail throughout the forested area. The creek flow at Madrona Ranger Station has stopped and water is presently being used from the storage tanks. It is very possible that water will have to be hauled to Madrona during the summer.

Travel was good throughout the month with the total just about equal to that of last May.

The Prickly Pear blossoms were at their peak during the second week of the month. The Chollas and Saguaros will be at their best about the end of May.

Special Activities

May 20 and 21 were devoted to "get acquainted" visits in and near Tucson. The following civic body and cooperating governmental agency people were met:

May 20, William H. Woods, Supervisor, Coronado National Forest.
Dan Childress, Assistant Supervisor, Coronado National Forest.
Herman Tickel, Resident Special Agent-in-charge, Federal Bureau of Investigation.
Joseph Thomas, Superintendent, Catalina Prison Camp, Department of Justice.
F.C. Coff, Civil Aeronautics Authority, Tucson Airport.

Russell Soden, Financial Secretary, Sunshine Climate Club, was a May 22 visitor. Mr. Soden explained the aims and objectives of the club he represents.

Inspections

Chief Safety Engineer Ahern, accompanied by Regional Safety Engineer Richardson and General Superintendent Davis, conducted a safety inspection of monument facilities on April 27.

Status of Private Lands

Heartening news on the state land exchange was received during the month when it was learned that the Bureau of Reclamation could not hold a withdrawal on lands on the Yuma Mesa which were to be included in the exchange.

Maintenance

The primary trails were cleared to Manning Camp, Mica Tower, and all secondary lookouts. Telephones at all fire detection points were serviced.

New Construction

The Cactus Loop Road was oiled in its entirety during May. Highway Engineer George Smith supervised the project. Oil was delivered and applied by Arizona Refining Co. of Phoenix, and hauling and application of the cover material by Hunziker Construction Company of Tucson. The road was closed on May 11, 12, and 13 for application of the prime oil to the road. Portions of the road were kept open for the duration of the oil sealing job. We have received many favorable comments from visitors concerning the new road and we are pleased to report that one more monument is "out of the dust".

Bids on construction of the new Saguaro Administration Building were opened in Globe on May 20. The low bid was submitted by Frontier Construction Co. of Tucson, the same company which constructed Residence #19. We are not positive at this time whether any of the bids will be accepted. There were eleven bids received which shows the large amount of interest on the part of local contractors.

Interpretive Services

A total of 3,715 visitors in 1,107 parties were contacted at monument headquarters and used the Cactus Forest Drive Booklet. This amounted to a total of 170.4 hours contact time for an average of 9 minutes per party.

Observations

Bill and Claire Anderson, wildlife photographers, were able to secure some movies of the Arizona Gray Fox family at Madrona Ranger Station. The Andersons are photographing wildlife for the Encyclopedia Britannica educational film series and for Walt Disney Studios.

Travel

There were 6,388 visitors to Saguaro National Monument during May. This is an increase of 162 visitors from last month and decrease of 511 visitors from the corresponding month one year ago.

Police Protection

The case of illegal possession of firearms inside the monument boundary by Conrad and Joe Valdez was not prosecuted by the U.S. Attorney. The boys' firearms were subsequently returned. It is altogether possible that the Valdez case, while unfortunate, will not become a pattern. The dismissal stemmed from a lack of understanding on the part of the U.S. Attorney's office in Tucson regarding applicable statutes.

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tonto National Monument
Subject: Narrative Report, 1ml, Tonto, May 1953

Weather. Dry, windy. No rain since early March. Cool until last week and a half. 94° on 23rd. High fire hazard.

Travel. 3721 visitors availed themselves of interpretive services at headquarters this month. This shows a seasonal decrease from April, but is compared with 2860 for May last year, or about a 28% increase. 25,931 persons in 7409 cars crossed the Monument as shown by the Apache Trail counter.

Visitors, NPS & Special.

Ranger & Mrs. Jack Turney, Bandelier, April 27.

Mr. & Mrs. Henry Dusterdick, Tucson, brother of Mrs. Wenner, May 2.

Naturalist & Mrs. Les Arnberger and family, Assistant General Superintendent & Mrs. Castellum & family, & Mr. & Mrs. Francisco Cota, parents of Mrs. Castellum, May 3.

Forest Ranger Charles Ames, Salt River District, Engineer Cleve Ketchum, and Forester Nick Chapman, U. S. Forest Service, May 6.

Mr. Shannon & Frank Gualledge, Salt River Power District, Mr. Castellum Warren Oblinger & Engineer Jerry Miller, May 11, to check power line location.

Ranger Duane Graf, North Rim, Grand Canyon, May 11.

Field trip of School of Forestry, Montana State University, 10 students, with Mr. Melvin Morris, Professor of Forestry, Supervisor Fred Leftwich and Ranger Ames, May 13.

General Superintendent Davis, Naturalist King, and Mr. Charles Porter, Chief of Preservation Branch, NPS, Washington, May 13.

Tonto Basin grade school group, 23 persons, May 14.

Mr. & Mrs. Rudy Mack, Gila Pueblo, May 14.

Engineer George Smith, Region Three, May 19.

Ranger Myron Sutton, Montezuma Castle, May 21.

Mr. & Mrs. Martin Wenger, parents of Archaeologist Wenger, May 24.

Robert Sharp, brother of Superintendent Sharp, May 25.

UNITED STATES

DEPARTMENT OF THE INTERIOR

Inspections. Chief of Safety Division Frank Ahearn, Engineer Hugh Richardson, and Assistant General Superintendent Castellum, made a thorough inspection of the Monument on May 2. Steps have been taken to correct whatever hazards could be corrected without funds and by personal effort, and plans made to carry out the rest of Mr. Ahearn's suggestions as quickly as it can be done. We were pleased to have Mr. Ahearn's thorough and genuinely interested inspection of the area.

Personnel. Seasonal Ranger Robert Krear was terminated c. o. b. April 30, and left for the Pribiloff Islands to make a fur seal study for the U.S. Fish & Wildlife Service. Laborer Jerry Jones resigned May 9, and has a job as transitman with the Forest Service.

Roadside Cleanup Project. With the gradual attrition of numbers of the labor crew, several breakdowns of the loader rented from Iagen, the clutch having to be replaced in the Dodge truck, and the usual difficulties that go with projects, progress has not been as great as last month. However, the job is nearing completion and should be done in another week or two.

The residence road is being built up with surface material, and will be graveled as far as the proposed residences, and considerable cleanup work done as far as funds permit.

Wildlife. Ten javelina were sighted on the entrance road, and a young bobcat. Gila monsters have been seen from time to time. A pair of ravens hatched in a nest right above the cliff dwelling are about ready to fly.

Flora. Most of the wildflowers are through blooming. Saguaro cactus are well started to bloom, apparently a week or so early.

General. The winter busy season is over, the summer busy season starting. Longer hours of daylight for visitors to come in, high fire hazard, fewer man hours available, and many special visitors arriving, all take time.

Mrs. Wenger entered the Globe Hospital May 25 for a thyroid operation. Mr. Wenger's parents plan to be here awhile to take care of the children. Mrs. Sharp is in Denver for the last half of the month. Under those conditions schedules are upset, and operations are more difficult.

NATIONAL PARK SERVICE

May 25, 1953

Memorandum

To: General Superintendent, S. W. N. M.

From: Superintendent, Tumacacori

Subject: Superintendent's Monthly Narrative Report for May, 1953

Weather Conditions: The month was dry, cool, and extremely windy. In 40 years in this state I have never seen such a windy month of May. (Note: take this with a grain of salt - anybody who has lived in Arizona for 40 years is constitutionally unable to tell the truth about the weather, unless he reads it from an official record).

Our records show a maximum temperature of 97 degrees on May 22, and a minimum of 31 degrees on May 10. The latter figure is the latest frost date since we began keeping records here, in 1946. Precipitation was zero, compared to a 15 year May average for this vicinity of .13".

Special Activities: On May 11 and 12 the superintendent accompanied Dr. Charles Porter, Chief of Preservation Branch, History Division, Washington Office, and Mr. Dale S. King, Naturalist, Southwestern National Monuments, on an inspection trip to Coronado National Memorial. On this trip he had the privilege of accompanying them via Chiricahua National Monument to the site of old Fort Bowie, where a detailed examination of this fascinating site was made. To Fort Bowie we were accompanied by Superintendent Cooke and Ranger Barrell, of Chiricahua National Monument.

Inspections: April 29 - Chief Safety Engineer Frank L. Ahern, General Superintendent John Davis, and Engineer Hugh Richardson, of the Region Three Office, made a detailed inspection, with emphasis on safety features.

May 7 - Regional Landscape Architect Jerome C. Miller, and Landscape Architect Warren Oblin er, of the Region Three Office.

May 10 - Dr. Charles Porter, History Division, Washington Office, and Dale S. King, Naturalist, Southwestern National Monuments.

General Publicity: Photographer Bill Sears took pictures of the View Room model of Tumacacori Mission Church. These pictures are for use by the Tucson Chamber of Commerce, in a publicity folder on southern Arizona which they will use during a forthcoming teachers' convention in that city.

Maintenance: Routine maintenance was kept current, with dry weather and windy weather involving a great deal of grounds watering. Parking stripes were ~~re-painted~~ re-painted on the parking area. One set of steps in the museum was replaced by a ramp, for visitor safety. The mission trail was seal-coated with emulsified asphalt and gravel, and the driveway to the residence area was

Memorandum

To: Chief, National Park Service

From: Superintendent, Grand Canyon National Park

Subject: Grand Canyon National Park, Arizona

General Situation - The Grand Canyon National Park, Arizona, is one of the most spectacular and beautiful natural wonders of the world. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

Geological Features - The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

Vegetation - The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

Wildlife - The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

Recreation - The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

General Remarks - The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

Recommendations - The Grand Canyon is a great natural wonder, and it is one of the most beautiful and spectacular of the world's natural wonders. It is a great natural amphitheater, with a main canyon over 4,000 feet deep, and a series of smaller canyons branching off from the main one. The canyon is a great natural laboratory, with a variety of geological formations and a rich and varied flora and fauna.

given patch treatment. All the giant Oleander plants in the patio garden were cut back to about a foot above ground, at the recommendation of Regional Landscape Architect Jerry Miller. This, so the plants could grow uniformly into a lower and more attractive canopy. 6 Arizona Ash and one Pepper Tree were planted on the grounds.

New Construction: Young Steel Buildings, Inc., of Tucson, were low bidders on the free-standing metal shelter to be built over the corridor east of the mission sacristy. On May 19 they poured concrete footings for the shelter, and today erected the steel members on which the metal roof will be fastened.

Cooperating Government Agencies: The Soil Conservation Service nursery in Tucson gave us a number of free plants to assist in completion of our grounds planting program.

Interpretive Service: During the month a total of 1199 visitors went on 210 guided trips through the mission church and grounds, for an average of 40 minutes per trip. 3,799 persons received combined information and interpretation service at the registry desk, museum, or patio garden.

One of the finest compliments for quality of the guide talk that we have ever heard was paid to Ranger Bullard the other day. Mrs. S. A. Phipps, Conservation Chairman, California Federation of Women's Clubs, Los Angeles District, had just finished going through on one of Bullard's trips, and when she returned to the museum she introduced herself and then proceeded to give out eulogies, encomiums, and panegyrics on Bill until he was almost blushing. There's no getting around it, Bullard really has a way with the public - a way that they like.

More fact file work was done during the month, and Rangers Bullard and Smith have almost finished another Multiplex display - an assigned task which consisted of making floor plans of Tumacacori and several other missions of the chain, so as to give visitors an idea how layout and size of Tumacacori compared with the others. Smith had the tedious task of working up scale drawings, magnified, from photographs of plans, and Bullard did the lettering for the exhibit and figured an ingenious device of using a plan of Tumacacori drawn on a plastic sheet, which will hang by a chain at the side of the display, and will be used by the visitor as a transparent overlay for size comparison with other plans.

The project of bringing a good set of photographs of the mission church up to date, while we have a good camera on loan here, has been taken care of by Ranger Bullard.

Research and Observation: A very interesting piece of field work is being done on the east side of Tubac, three miles north of here, by Jose Guaydacan. He is excavating a Spanish period site which he thinks may be the location of the old mill (water operated). He looked the site over, and took photographs, but as yet the site isn't completely enough uncovered to prove very much, at least to the lay eye. He has located the "feeder ditch" and its connection to a basin shaped stone and lime-mortar depression which adjoins a line of stone and mortar wall foundations. If the story unfolds

to something really coherent, we will try to produce a drawing and a detailed report later.

A very strange observation was made here by Maintenance man Deubler on May 12. He saw a Round-tailed Ground Squirrel chasing a Road-runner! He watched the little animal pursue the road-runner for about 200 feet down a path here, snapping at the bird's tail.

Increase or Decrease in Travel:

| | |
|---|-----------------|
| Visitors this month - - - - - | 3,967 |
| Visitors this month last year - - - - - | 2,524 |
| Percent Increase - - - - - | 57 |
| Highest May travel prior to 1953 - - - - - | 2,761, in 1951. |
| Percent Increase over May of 1951 - - - - - | 43 |

We know of no particular reason for the fantastic rate of visitor increase. Some increase can be accounted for by increasing Mexico traffic as pavement pushes farther down the west coast of Mexico, and by the fact that a year ago our parking area was undergoing radical alterations by the State Highway Department, and by the fact that the weather has been so dry and cool all month, but the over all increase is far above our expectations.

Visitors: April 25 - Mr. and Mrs. Kittledge A. Wing. He is of the local Three Office engineering staff.

April 26 - Walker A. Tompkins, novelist.

Adrey Borell, formerly of M.P.S., for many years with the Soil Conservation Service.

May 3 - A group of 31 from the Ajo, Arizona, high school.

May 9 - Cub Scout Pack #31, Nogales, Arizona, with 27 kids.

Also, on this date, in the evening, the annual American Association of University Women's picnic at Tumacacori was held in the picnic grounds.

May 18 - Mrs. S. A. Phipps, Conservation Chairman, California Federation of Women's Clubs, L. A. District.

Park Ranger Myron Sutton, of Montezuma Well.

Wild Life and Fish Cultural Activities: Tumacacori now has the distinction of having provided from its patio garden fish pond the gambusia (dwarf native surface feeding live-bearing fish) with which the Headquarters pool at Globe has been stocked. For a moment we were not certain which heading to report this fish transfer under, but after reflecting that "Wild Life and Fish Cultural Activities" would really give very apt reference to a transfer of these fish from a plebian Tumacacori background to a chance for far better absorption of culture at Globe, we were then content.

Accidents: On April 23 Mrs. John Phillips of Nogales sustained a painful fall in the Patio Garden, because of open water drains. On May 1 Mrs. James Mack, of Tucson, was similarly injured. In both cases the ladies were simply too interested in other things to read the sign which warns of need for caution. Since people will not read signs, we are going to either cover these drains or put grates in them.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves determining whether the problem has been solved and whether the resources have been used effectively.

Approved and signed on behalf of the President of the University of Cambridge:

UNITED STATES
DEPARTMENT OF THE INTERIOR

Public Health:

During the month Carlos Jury, County Health Officer, looked at our fly situation and said it was bad, and tested our water and found it was good.

We hired a local man from Nogales to bring his rig and pump out our septic tank. It was the first time, to our certain knowledge, in at least 8 years, that the tank had been pumped. We don't believe the tank had ever been pumped before, in the 21 years of its existence. The pumper opined that the tank probably wouldn't need pumping again for at least 8 years.

On May 22 a well drilling operation was started on private property just south of our boundary, scarcely 100 yards from our well. The driller was to drill down to 150 feet, and to install a 6" casing. If that new well becomes a producer and functions as an irrigating well, we can foresee the probability that such might cause an acute water problem for this national monument.

Earl Jackson
Superintendent

Special Activities

Supervisor visited several times during the month to inspect the monument. He was accompanied by several employees. They inspected the well and the surrounding area. They also inspected the septic tank and the water supply.

Supervisor visited several times during the month to inspect the monument. He was accompanied by several employees. They inspected the well and the surrounding area. They also inspected the septic tank and the water supply.

Supervisor visited several times during the month to inspect the monument. He was accompanied by several employees. They inspected the well and the surrounding area. They also inspected the septic tank and the water supply.

General Remarks

Chief Game Warden Frank Murphy, Game Warden, and several other Game Wardens, Inspectors, and others, were present during the month.

Supervisor visited several times during the month to inspect the monument. He was accompanied by several employees. They inspected the well and the surrounding area. They also inspected the septic tank and the water supply.

Administrative, Informational and General Work

Supervisor visited several times during the month to inspect the monument. He was accompanied by several employees. They inspected the well and the surrounding area. They also inspected the septic tank and the water supply.

UNITED STATES

NATIONAL PARK SERVICE
Tuzigoot National Monument
Clarkdale, Arizona

May 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
Superintendent,
From: Tuzigoot National Monument
Subject: Report lml, May, 1953

There follows the narrative report of activities in
this area for the month of May, 1953.

Weather

About half clear and bright, half cloudy and cold. Two
inches of snow fell on Mingus Mountain on April 28th. The week of
the 11th through the 18th was particularly cloudy and cold. High
winds every afternoon and many mornings during the month.

Special Activities

Superintendent Brewer has been very active with the
Jerome Historical Society museum. Many nights during the month
he recruited a crew from Jerome, Clarkdale and Cottonwood to
work on installations and exhibits.

Superintendent Brewer gave a talk at a business men's
breakfast on the National Park and Recreation areas in this region.

Archaeologist Burroughs finished up his sessions in
Southwestern Archaeology.

Official Visitors

Chief Safety Engineer Frank Ahern, Washington Office, and
Safety Engineer Hugh Richardson, Region Three, on the 3rd.

Architects Jerome C. Miller and Warren Oblinger, Region
Three, on the 11th.

Maintenance, Rehabilitation and General Work

Daily high winds brought most of the tailings pond into
the museum and necessitated considerably more-than-usual cleanup.
The wind also broke the rope on the flagpole and a new one had to
be fished through.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Washington, D. C.

July 11, 1917

Memorandum

To: Chief of National Park Service
From: Assistant Secretary of the Interior
Subject: Report on the condition of the National Park Service

There is a general feeling of optimism in the National Park Service at the present time.

Summary

The National Park Service has been very active in the past few years. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act.

Special Information

The National Park Service has been very active in the past few years. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act.

Official Report

The National Park Service has been very active in the past few years. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act.

Recommendations

The National Park Service has been very active in the past few years. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act. It has been successful in securing the National Park Service Act, and in securing the National Park Service Act.

Interpretive Service

Travel: About May 1st the travel pattern made its annual shift from southern California and southern Arizona to more northern and mid-western travel with the usual May slump. In spite of the high winds and generally not-too-good weather, the May travel this year is higher than any previous month of May. 2422 visitors in 861 parties entered the monument this month. Previous high was 1952 with 1848 visitors. As usual, 100% of the 8-12 and 1-5 visitors were contacted in the museum; 252 visitors in 103 parties arrived before 8:00 a.m., after 5:00 p.m. or during noon closings, and so were not contacted.

NPS Visitors: Jack and Betty Turney of Bendelier, on the 28th.
George Murphy, Regional Office, on the 29th.
Mr. and Mrs. Stretton, Mr. and Mrs. Boatright,
Globe Office, on the 3rd.
Engineer Willard Bradley, Regional Office, on
the 8th.
Temporary Ranger Newell and family, Sunset
Crater, on the 20th.

Reportworthy: Mr. Bob Euler, Curator of Anthropology, Museum
of Northern Arizona, Flagstaff, on the 26th.
Boy Scout Troop 57, Mesa, Arizona, (16 boys and
2 Scoutmasters) on the 2nd
Messrs. F. W. Clark and E. V. Clark, General
Accounting Office, Los Angeles, on the 10th.
Messrs. C. T. Sullivan, NFS, Washington, and
E. R. Huber, NFS, Albuquerque.
Mr. Wayne Cook and family, NFS, Clarkdale, on
the 24th.

Boy Scout Troop 221, Phoenix (14) on the 10th.
Foreign: Travel this month included visitors from Canada,
Hawaii, Norway, Holland, New Zealand, England, Germany and
Switzerland.

Research and Observation:

The first snakes of the season were observed May 6th;
seen were a bull snake and an Arizona King Coral.

A few Brewster's Snowy Egret were noted on the Verde
River and Peck's Lake the last week in April. A flock of 34 were
spotted on Peck's Lake on May 2nd. The last ones were seen May 6th.
Apparently they were just passing through.

Other transients noted on Peck's Lake early this month
were a Black Bellied Tree Duck and a Black Crowned Night Heron.

Interpretive Remarks

These items are the result of a review of the records of the various departments and agencies of the Government, and are intended to provide a general summary of the information available. The items are arranged in alphabetical order of the names of the departments and agencies. The items are intended to provide a general summary of the information available, and are not intended to provide a detailed account of the activities of the various departments and agencies.

General Remarks

Summary of Information

The items are arranged in alphabetical order of the names of the departments and agencies. The items are intended to provide a general summary of the information available, and are not intended to provide a detailed account of the activities of the various departments and agencies.

The items are arranged in alphabetical order of the names of the departments and agencies. The items are intended to provide a general summary of the information available, and are not intended to provide a detailed account of the activities of the various departments and agencies.

Personnel

Archaeologist Burroughs was on annual leave from the 11th through the 15th.

Archaeologist Burroughs will be transferred to Wupatki National Monument on the 29th of this month.

Local Items

Fire destroyed the milk house of the Clarkdale Dairy, a mile from Tuzigoot, on the 4th. Messrs. Brewer and Burroughs joined the fire-fighting group and rendered such assistance as was possible. Local fire companies from Clarkdale, Cottonwood and Jerome were unable to save the building because of the unavailability of water. This brings home more sharply the fact that Tuzigoot is in the same vulnerable position.

Accessions

One copy each of BAE Bulletins 32, 41 and 65 were donated to the Tuzigoot Library by Mr. Willard Hoagland, a resident of Clarkdale. Mr. Hoagland was formerly with the Laboratory of Anthropology in Santa Fe.

Heard in the Museum

The outstanding question of the month came from the little Helen Hokinson lady who had been through the museum and the ruin and then came back into the museum to ask "Were the roofs removed so we could look down in?"

J. W. Brewer, Jr.,
Superintendent

Introduction

The purpose of this report is to provide a summary of the findings of the study conducted by the research team.

The study was designed to investigate the relationship between the variables mentioned in the title of this report.

Methodology

The data for this study was collected from a series of experiments conducted over a period of six months. The participants were selected from a pool of volunteers who met the criteria for the study. The experimental design was a randomized controlled trial, which allowed for the comparison of the effects of the intervention group with the control group. The data was analyzed using statistical methods to determine the significance of the findings.

Results

The results of the study indicate that there is a significant difference between the two groups. The findings suggest that the intervention group showed a higher level of performance compared to the control group. This result is consistent with the hypothesis of the study.

Conclusion

The study has provided valuable insights into the relationship between the variables under investigation. The findings have implications for the field of research and may lead to further studies in this area.

Salut Canyon National Monument
Flagstaff, Arizona

May 25, 1935

Memorandum

To: General Superintendent

From: Superintendent, Salut Canyon

Subject: Monthly Narrative Report

Weather Conditions

The high winds that were so prevalent in April have continued on thru May with an average of three days every week. One storm during the last of April brought a total of 1.13 inches of rain and snow. Several light storms during the month have made a total of 1.27 for the report period.

Administration

The Superintendent met with Forest Service officials to discuss the requirements for making application for right-of-way for the proposed approach road.

On April 13, I met with the newly organized Northern Arizona-Western New Mexico chapter of the Federal Safety Council as the member designated to represent Southwestern National Monuments. This meeting was conducted at Happy Jack, Arizona and an inspection was made of forest operations of the Laginaw-Manistee Lumber Company and the Forest Service in that area.

Maintenance

One Navajo laborer has been used during the month in order to get needed maintenance done and to assist with the construction of the concrete signs for Mupathi and El Horro. Three El Horro signs were poured but will have to be done over as the alphabet which was to have been used was not received by this area. The windows and screens on the Museum and administration building as well as the Superintendent's residence were re-painted. All signs were repainted and repaired. Roads and trails have received some repair which is continuing.

All branches and obstructions have been removed along the seven miles of telephone line and some repair work accomplished as time permits. The letters have been cut and forms prepared for pouring the El Horro signs which will be done when we can find the time. The signs for Carlsbad Caverns were poured and painted.

A base has been constructed for the Pioneer Women Monument near our parking area and the installation of this marker will be completed when the D.M.M. gets around to moving it from its present location.

UNITED STATES DEPARTMENT OF AGRICULTURE
BUREAU OF PLANT INDUSTRY

WASHINGTON, D. C.

January 10, 1917

Mr. J. H. ...

Dear Sir:

I have the honor to acknowledge the receipt of your letter of the 1st inst.

and in reply to inform you that the same has been forwarded to the proper authorities for their consideration.

The authorities have not yet reached a decision on the matter, but it is expected that a final decision will be reached within a few days. I will be glad to advise you of the result as soon as it is known.

I am, Sir, very respectfully,
Your obedient servant,
[Signature]

Very truly yours,
[Signature]

I am, Sir, very respectfully,
Your obedient servant,
[Signature]

I am, Sir, very respectfully,
Your obedient servant,
[Signature]

I am, Sir, very respectfully,
Your obedient servant,
[Signature]

A new telephone has been placed near the location of the I.A.S. Bureau.

Superintendent Brown has finally decided to stop trying to get the building fire alarm in operation but it still needs some work. Repair of the automatic switcher on the air furnace in Building No. 1 was also action lined.

As time permits we are working on the safety measures that were recommended by Messrs. Allen and Richardson during their recent visit. We do not have available funds to make all of the changes at the present time.

Travel

Travel continues to show a sizeable increase over last year and our travel year to date is 66.4 percent over last year. Our total of 2,711 visitors has kept us "bumping" to try and keep up with other cities.

Interpretive Services

Practically all of Ranger Squares like Curley the hawk was used on contact and interpretive work and each of the Superintendents. A total of 64 hours was spent in exhibiting 2,011 people in 167 groups.

GENERAL:

There follows the report of activities at the White Sands National Monument for the month of May 1953: -

Winds - In checking back I quote: "May 1949 - May has brought us exceptionally heavy winds, as was the case a year ago. May 1950 - The month of May has been exceedingly windy with some dust storms that probably equal or exceed anything ever experienced in this section of the country. May 1951 - Late heavy winds have prevailed during the month and undoubtedly cut into our attendance. May 1952 - Our weather has been quite varied with a lot of wind thrown in; in fact, more wind than many of us like." After specific remarks on winds every year for the past five years, I hesitate to say too much, but I must say that May this year has been no exception and we have had heavy and frequent winds. These in several instances over a week-end and the result shows up in our travel figures. May this year shows a drop of about a thousand visitors. A number of these, I feel certain, are from the schools

Details

There follows the report of activities in the White House
National Bureau for the month of May 1953:

There - in October 1953, I wrote: "May 1953 - May 1953
an exceptionally busy month, and the first of the year.
The month of May has been remarkably busy with many events.
That probably went on several occasions, and especially in the
at the meeting. May 1953 - I have been with many people during the
month and especially with many people. May 1953 - I have been
has been quite busy with a lot of work. I have been with many
that way at the time. After spending several days with many
the past few years, I decided to say no more, but I will say that
May 1953 has been an exceptional and very busy month and I hope
well. There is a great deal of work to be done and I will be
up in the next few days. May 1953 has been a very busy month
together. A number of things, I have written, and I will be writing

usually visiting the area and Senior Class trips. While we have had a number of these groups, I think the number from Texas and Oklahoma and New Mexico especially are less than normal this year. High for the month has been 91 on the 20th and the low was recorded on the 3rd and read 25.

SPECIAL ACTIVITIES

Ranger Featherstone led a Chamber of Commerce group to Gran Quivira on May 17 and reports a very successful caravan. Superintendent Ringenbach gave them a very good tour and played the part of a perfect host. This is the only one of several Chamber of Commerce trips where the National Park Service leads the caravan and while it is not always the best attended, due to the distance involved, it is considered by the Chamber of Commerce as one of the highlights of their tours. Our appreciation to Ray for his kindness always to this tour.

INSPECTIONS

A visit from none other than Frank Ahearn, Park Service Safety Engineer, resulted in an inspection of safety conditions in the area. Accompanying Mr. Ahearn was Hugh Richardson, our Regional Safety Engineer, and Gene Mott, our SWRM supervisor of construction. We were happy to have these men visit us as well as the information on some of our Safety shortcomings.

GENERAL PUBLICITY

Never do we lack entirely for publicity; always the weekly radio plugs by Ranger Featherstone; the local press is always anxious for any news from the Sands. This month considerable publicity has been given to the Gran Quivira trip headed by Featherstone.

COMPLAINTS

The only complaints to our knowledge were verbal and requesting that we turn off the winds.

MAINTENANCE

Rixsy has been working and virtually completed the repainting of our headquarters area toilets. Joe's month's work can be summed up in a single word - wind. Traffic pitting has been evident throughout the month and this is extremely hard to combat. We have managed to keep the roads open. The loop was closed a couple of times for a short duration.

usually visiting the area and Senior Class trips. While we have had a number of these groups, I think the number from 1950 and 1951 and the Senior Class trip was the largest. The Senior Class trip was the largest and the low was recorded with the Senior Class trip of 1950 and the low was recorded on the 2nd and 3rd.

STUDENT ACTIVITIES

Senior Class members had a number of projects going on during the year. They had a very successful year. They had a very good year and played the part of a good team. This is the only one of several projects of the Senior Class. When the National Park Service has the money and while it is not always the best solution, due to the distance involved, it is considered by the National Park Service as one of the best ways to their money. This is a suggestion to the National Park Service to have the money always in this way.

STUDENT ACTIVITIES

A small group of students from the Senior Class, Park Service, had a project in the National Park Service. They had a very good year and played the part of a good team. This is the only one of several projects of the Senior Class. When the National Park Service has the money and while it is not always the best solution, due to the distance involved, it is considered by the National Park Service as one of the best ways to their money. This is a suggestion to the National Park Service to have the money always in this way.

STUDENT ACTIVITIES

There are no more projects for students; always the same way. They had a very good year and played the part of a good team. This is the only one of several projects of the Senior Class. When the National Park Service has the money and while it is not always the best solution, due to the distance involved, it is considered by the National Park Service as one of the best ways to their money. This is a suggestion to the National Park Service to have the money always in this way.

STUDENT ACTIVITIES

The only complaints for our students were about the weather. They had a very good year and played the part of a good team. This is the only one of several projects of the Senior Class. When the National Park Service has the money and while it is not always the best solution, due to the distance involved, it is considered by the National Park Service as one of the best ways to their money. This is a suggestion to the National Park Service to have the money always in this way.

UNITED STATES
DEPARTMENT OF THE INTERIOR

INCREASE OR DECREASE IN TRAVEL

May dropped about a thousand people compared to the same month last year. This is directly due to heavy winds over a couple of weekends. A continuation of these winds and our June travel will show a decrease as well.

VISITORS

We were fortunate in having several Park Service friends visit us this month:

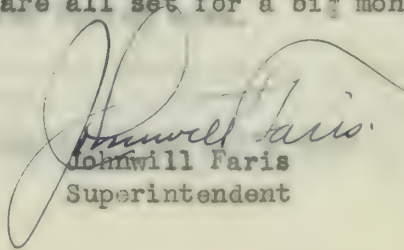

Frank Ahearn - Washington Office, NPS
Hugh Richardson - Region Three
Tom Moran - Region Three
Charlie Carter - Region Three
Jack and Betty Turney - Bandelier
Paul and Jane McCrary - Carlsbad Caverns
Gene Mott - SWNM
Paul Steel, Ray and Vera Schaffner and Harold Chittum,
all former rangers at White Sands

We were certainly tickled to have three of our former rangers visit with us and we want it well understood that any former employee will always be most welcome "home".

ACCIDENTS

Ray Rixey, in unscrewing a large lid cover on our tank truck bruised his hand. It was quite painful and required several visits to the doctor.

So with extra tour hours in June we are all set for a big month to follow.

John Will Faris
Superintendent

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. This is a serious omission, as the Commission is required to report on the activities of all groups and individuals who are active in the United States and who are engaged in activities which are aimed at the overthrow of the Government of the United States.

1. The first group of people who are interested in the study of the history of the United States are the people who are interested in the history of the United States.

1. The first step is to identify the problem. This involves understanding the nature of the problem, its scope, and its impact.

It is a very beautiful building, and it is a very beautiful building.

NATIONAL PARK SERVICE
Wupatki National Monument
Flagstaff, Arizona

May 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Wupatki

Subject: Monthly Narrative Report, Wupatki and Sunset Crater National Monuments.

Weather:

The drouth continues in this area with no precipitation recorded for the month to date. This brings the total precipitation for the first five months of this year to only .86 inches. Maximum temperature was 91 degrees on May 22 with a minimum of 30 degrees on May 2.

On the whole, the weather has been terrible all month with terrific winds and dust storms and cold.

Inspections:

We had quite a few official visitors this month.

Safety Engineer Frank Ahern and Hugh Richardson on May 4.

Regional Engineer Ralph Lassiter on May 5.

Mr. Willard Bradley and Kit Wing were in the area on May 7, and 18th to check over a new alignment off Highway 89. They visited Sunset Crater May 19 to 21 to survey the boundary of the private land and stake out the new road alignment for that area.

Regional Landscape Architect Jerome Miller and Landscape Architect W. J. Oplinger visited the area and went over the road alignment on May 13. They also inspected the Heiser Spring area.

Publicity:

A recent saturday issue of the Arizona Republic had a nice picture of Mukoki Ruins.

Maintenance and General Work:

The information station at Sunset Crater was given the final coat of outside paint, the trim painted again, two steps built in front of the door and the inside repainted. Two panes of glass were replaced. The Army type trailer at Sunset Crater was painted on the inside. The propane system was brought up nearer to our standards by building a concrete base for the propane tanks and moving them 25 feet away from the trailer. The old refrigerator from Heiser was put in operation and is working fine at Sunset Crater.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
WASHINGTON, D. C.

May 14, 1934

Mr. J. Edgar Hoover, Director, Federal Bureau of Investigation, Washington, D. C.

Dear Mr. Hoover:

Reference is made to your letter of May 10, 1934.

Enclosed for you are two copies of a report on the investigation of the alleged activities of the "Black Legion" in the Chicago area.

Sincerely,
W. A. Rorer, Chief of Bureau

The report was prepared by the Chicago Office of the National Park Service, under the supervision of Mr. J. Edgar Hoover, and is being furnished to you for your information. It contains a detailed account of the activities of the "Black Legion" in the Chicago area, and is being furnished to you for your information.

Very truly yours,
W. A. Rorer, Chief of Bureau

It contains a detailed account of the activities of the "Black Legion" in the Chicago area, and is being furnished to you for your information.

The hallway in the Superintendent's residence was painted. The seam along the base of the steel catchment windows on the south side of the Superintendent's residence were sealed with a new coat of cement.

It seems the new diesels are not giving us trouble free service as yet. The 5 KW plant at Heiser developed a bad oil leak and and generator, armature and flywheel had to be taken off to get at the gasket and oil seal that were leaking. This was fixed and then trouble developed in the fuel lines and they had to be taken off several times and cleaned out and at this time the plant is working again. The 3 KW plant at my house quit the last two nights and I had to overhaul the fuel lines and clean everything out and it has been running allright once more. The governor solinoid on the 5 KW burnt out also and had to be replaced. The factory has furnished us the parts for repairs free of charge so far as the plants are still fairly new.

Roads and Trails:

With very few breakdowns this month the road work has shown a lot of progress. The take off at Highway 89 has been moved about $\frac{1}{2}$ mile south in order to stay within the monument boundaries. The long curve near the Citadel has been eliminated by realigning the road to cut off the curve and shorten the distance and make a nice approach to go up the hill near the Citadel. Quite a bit of material has been hauled and dumped along the right of way. We have received a large Cat. No 12 road grader and a cat. loader and dozer and a stake truck that is being used as a utility truck for the crew.

Interpretation:

At Wupatki 441 people in 158 parties have been contacted for an average time of 15 minutes per party.

At Sunset Crater about 1351 people used the Lava Flow Nature Trail and 204 people made the hike to the crater rim.

The small information station at Sunset Crater is now in use and certainly is a big improvement to the area. We have two small glass display cases and are in the process of securing various specimens of the lave formations so that we can give the visitors some idea of the natural features of the area.

Research and Observation:

For the first time since I have been here, Deer and antelope have been seen close to Wupatki Ruin. Four deer were seen one evening on the path to the ruin and 6 antelope were seen just south of Heiser Spring. Perhaps the water holes are drying up and they are being forced to use our springs. Antelope have been seen frequently around the earth cracks

The above information was obtained from the records of the Department of the Interior, Bureau of Land Management, and is being furnished to you for your information.

The small rectangular building at number 1234 is now a store and probably is a big improvement to the street. It looks like a well planned building and one is the typical of the kind of building that is the best thing to have in the city. The building is the best thing to have in the city.

THE LITTLE BOOK OF THE
LIFE OF THE LATE
MR. JAMES H. BROWN
BY HIS SON
JAMES H. BROWN JR.
NEW YORK: THE CENTURY CO., 1907.

Travel:

Mupatki has been host to quite a foreign travel this month. We have had visitors from, Chile, Brazil, Switzerland, Iran, Belgium, Austria, England, New Zealand, Canada, Alaska and Hawaii.

Travel continues to increase with 458 cars and 1255 people counted at Mupatki. This is an increase of 62 cars and 179 people. It is really more of an increase than that, as last year we were adding 10% to the register count to account for turn-backs at the Citadel. This area is now closed so the travel is a straight count with nothing added.

Sunset Crater had 1186 cars and 3053 people for an increase of 297 cars and 798 people. On May 17, 106 cars entered the area for a new high for any one day in May.

Vandalism:

Sometime between April 30 and May 3 someone used the information station at Sunset Crater for a target. Five panes of glass were shot out, one bullet went through the plate holding the door lock and two shots through the side of the building.

Accidents:

On May 4, Newton S. Nicholas an operator for the road crew slipped off a step and sprained the instep of his right foot.

On May 8, Mrs. Grant Cordrey of San Francisco, California missed the step coming down into the office and fell breaking her left hip. She was taken to the hospital in Flagstaff for treatment. Separate reports have been made on these accidents.

Personal:

Mr. Henry L. Newell entered on duty as Seasonal Ranger on May 8. This certainly did help the situation of trying to be at two places at the same time and will give me more time to devote to visitors at Mupatki.

Spring Flow:

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS
GILA PUEBLO, BOX 1562
GLOBE, ARIZONA

July 9, 1953

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report for June 1953

General

Of major importance during the month was the general reorganization throughout the National Park Service which resulted in the removal of five areas from the jurisdiction of the Southwestern National Monuments. We were pleased to receive many complimentary remarks from the superintendents of the areas placed under direct supervision of the Regional Office. Superintendent Birnewies of Bandelier wrote:

"As we leave the Southwestern National Monuments we wish to express our gratitude to all of the headquarters staff for their very fine help and cooperation. The spirit of the Southwestern National Monuments has always been one of friendliness both to visitors and employees and we intend to retain that as much as possible. The Bandelier staff extends their best wishes for continued success to all of the Southwestern National Monuments."

From Superintendent Supernaugh of Organ Pipe Cactus:

"...We shall certainly miss our happy associations with the Southwestern Monuments and hope we will not be forgotten."

Superintendent Lewis of Saguaro commented:

"It was with considerable surprise that the news was received that several of the monuments under the administration of the General Superintendent would revert to the direct supervision of the Region Three Office. We appreciate the friendly efforts of all the Globe office staff and we are sure that the 'Good Neighbor' policy will remain in effect."

And from years of experience as a member of our organization, Superintendent of White Sands wrote:

"...Having been born into and reared for twenty years by the Southwestern National Monuments, it will be a little hard to realize that we are not one of this group. We can never adequately express our appreciation for our heritage and shall endeavor to so carry on that the Southwestern National Monuments shall always be proud of the great part they played in our 'bringing up'."

"To all the officials and members of the various units - our best wishes always."

We of the Southwestern National Monuments headquarters staff are glad that we had a part in the 'bringing up' of these fine areas and wish them every success in the future. We, too, hope that we will not be forgotten and that personnel from these areas will call at Gila Pueblo whenever they are in this vicinity.

Weather

At Chiricahua, "Everything is tinder-dry, and we keep hopefully hunting for rain clouds." That report with slightly different wording came from most of the areas. It was, hot, dry and dusty. Vegetation is suffering from lack of moisture, water holes are drying up, and the fire danger is causing concern. At Gila Pueblo, where temperatures have been running well over 100 for many days, we often cast our eyes toward the mountains, hoping to see gathering clouds that would bring badly needed showers.

Special Activities

Headquarters Office--Mr. John Stratton, our Personnel Assistant spent many hours Sunday, June 28, assisting the Forest Service with reports and other work in connection with a large fire on the Pinal Mountains in the Tonto National Forest near Globe. At times flames and smoke from this fire were plainly visible from Gila Pueblo.

While not a headquarters activity, we believe special mention should be made of the excellent work Superintendent Brewer is doing in connection with the Jerome Historical Society and the Jerome Mine Museum. His activities have brought much favorable publicity not only to the town of Jerome but also to the National Park Service. Arizona newspapers have given wide publicity to this project, and Arizona Highlights, a daily broadcast from KTAR in Phoenix and other stations throughout the state, devoted one of its programs entirely to this project. One of the many complimentary remarks about Mr. Brewer during this broadcast was the mention of him as "the man who brought ideas to Jerome." The Arizona Republic in its Sunday, June 28, edition, carried almost a full page story with pictures, entitled "Lively Ghosts Dig Up Relics; Build Memorial For The Living." Under a picture of Mr. Brewer the following appeared: "GUIDING HAND - Mr. James W. Brewer, Jr. superintendent of Tuzigoot National Monument, stands in front of a large map of Jerome in the front of the museum. An old hand in the museum business (he's been with the Park Service at various national monuments for 20 years), he guided the work and helped establish the display at level equivalent to the best in Arizona."

Arches--A representative of the Universal Pictures Company visited Arches. This company plans to film a picture entitled "The Son of Cochise" in the Moab vicinity. Their representative was greatly impressed with the Windows and the Court House Towers sections of the monument, but they cannot use these areas because of lack of roads over which to move their equipment.

Ranger Morris made a trip to Globe to return the Schramm trail tractor, and spent most of one day in the headquarters office. The superintendent and son, Tug, spent three days at Natural Bridges getting that area ready for the season.

Special Activities

Arches--(Continued)

Seven hours were spent searching for an 14-year-old man. He finally was located, completely exhausted, and had to be carried out on a stretcher.

Navajo--The better part of three days and nights were spent looking for two Boy Scouts lost in Naakai Canyon. There was some doubt about these boys being "lost" and some of the searchers concluded that the trek had been deliberately planned by the boys and that at no time would it have been impossible for them to have found their way back to camp. A detailed report covering this unfortunate experience with a group of Boy Scouts has been submitted by Superintendent Aubuchon.

Organ Pipe Cactus--The superintendent made a trip to Tucson to pick up seed for the Soil and Moisture program and for repair of the grader motor. While there, he visited Saguaro National Monument.

Saguaro--The Karl Barfields of Houghton Road had a welcoming party for the Lewis' with 45 people from Tucson and suburbs in attendance.

Mr. Lewis was the guest of Mr. C. E. Goyette at the Tucson Rotary Club weekly meeting on May 27.

Tumacacori--A various times, Archeologist Van Valkenburgh, Ranger Bullard and Seasonal Ranger Smith visited the Amerind Foundation cave dig about 10 miles southwest of Tumacacori. This appears to be a very old site and various evidences of habitation have been found through a maze of potsherds to fossilized camel vertebrae and teeth. Also, both red and black pictographs were of interest.

The Agriculture Department of the University of Arizona measured the well and found that it has dropped 7.9 feet since it was checked on March 15. Other wells in the vicinity have shown similar big drops.

Official Visitors

Aztec Ruins--Archeologist Vivian.

Bandelier--General Superintendent Davis; Highway Engineer Moran; Regional Chief of Concessions Koehler.

Casa Grande--Architect Kenneth Saunders.

Chaco Canyon--Archeologist Reed; Architect Carter; Engineers Moran and Diehl.

Canyon de Chelly--Architect Saunders.

Great Sand Dunes--General Superintendent Davis; Assistant Regional Director Miller and Administrative Officer Carpenter.

Saguaro--General Superintendent Davis; Naturalist Arnberger; Architect Saunders.

Tonto--Architects Saunders, Oblinger and Malbon.

Tumacacori--Architect Saunders.

Tuzigoot--Regional Counsel Barton.

Walnut Canyon--Assistant Regional Director Cornell; Regional Counsel Barton; Architects Saunders and Carter.

White Sands--Chief Clerk Crumley; Supervisor of Construction and Maintenance Mott.

Wupatki--Engineers Bradley, Wing and Torbert and Architect Carter.

General Publicity

Arches--The Double Arch appears on the cover of Utah's 1953 official highway map.

Great Sand Dunes--There was much picture taking at Great Sand Dunes during June with the following photographers doing the shooting: Charles Wunder of the Denver Post; Joseph Muench with 9 amateur photographers; Arthur Rothstein of Look Magazine; Charles Grover and Kyle Counts of the Colorado Travel Guide, and W. Emerson Scott, taking 16 mm. movies.

The Pueblo Chieftan ran a special article in its Sunday edition showing pictures of the dunes, including one with Ranger Moeny in official action.

Montezuma Castle--The June 14 Sunday edition of the Arizona Republic carried an article entitled "This Weeks Hike" in which the trails at both the Castle and the Well were stressed.

Navajo--An article on Navajo appeared in the Ford Times.

Tumacacori--A press release on the new fee system was carried in all local papers. The May 7 issue of Todo carried a feature article on Tumacacori entitled "La Mision de Tumacacori," by el Gral. Ignacio A. Richkarday.

White Sands--The releases concerning the increased fees were carried by all the press associations, local papers, and local and general radio coverage was given. Mr. Paris reports that so far as he could ascertain, no comment was noted against the increased fee.

Maintenance, Rehabilitation and General Work

Arches--The information sign for headquarters was completed by Ranger Morris and is serving as an excellent "Lone Ranger" during the staff's absence. A similar sign will be completed soon by the local Lions Club and erected on State Route No. 93 and will be of much help to people coming from the north who drive out to the monument expecting to find motels, cafes and other accommodations.

Chaco Canyon--Maintenance and repairs to wells, the Onan light plant, and installing the new underground line for the telephone occupied the staff's spare time during June.

Great Sand Dunes--Three picnic tables were planed and given the burnt umber-linseed oil treatment and the easel display at the lower campground repainted. Construction of the register stand for the Montezuma Nature Trail was finished except for painting.

Gran Quivira--Two additional picnic tables were constructed, painted and put in use. Sixty feet of underground conduit and electrical wiring were replaced between the shallow well pump and the residence.

Tuzigoot--Maintaining the museum has become almost a full-time job with dust from the tailings pond rising almost constantly. This also presents a health hazard from air pollution and an accident risk because of poor visibility. The superintendent has been discussing with the Jerome District Mine Superintendent methods of stabilizing the dust.

Walnut Canyon--The El Morro signs were almost completed and forms are ready for pouring the Sunset Crater and Wupatki signs. The Carlsbad Caverns signs are ready to go. The telephone line was repaired and the phone is now working well. The Pioneer Women marker was reset in the approved location, with assistance from the State Highway Department.

Roads and Trails

Arches--The new portion of the Delicate Arch Trail was completed on May 27, and many favorable comments have been received on the new and safe approach.

Casa Grande--The new section of highway in front of the monument did not hold up. For a week or so the road was being torn up and re-laid and a new seal coat applied.

Chaco Canyon--The continued dry weather has made the approach roads very rough and dusty. The car of a lady visitor had to be pulled from the sand dunes after she walked more than four miles for help. Engineer Diehl from the Regional Office arrived on June 10 to supervise construction of the new headquarters to Pueblo Bonito road.

Canyon de Chelly--Several more miles of pavement have been constructed on the proposed all-weather highway now under construction between Window Rock and Ganado. This improvement has already resulted in increased travel to the monument.

Gran Quivira--About 20 tons of crushed rock were hauled and spread on parking area and along worst spots of entrance road. This has alleviated to a great extent dust from moving cars and will strengthen roadbed during the rainy season.

Montezuma Castle--The small loop trail which extends along the top of the talus slope in front of the Castle and by some caves was completed. This eliminates a safety hazard as visitors insisted on climbing here before the trail was built.

Natural Bridges--The Gwachomo-Sipapu trail is in good condition. The other trails needed clearing of overgrowth and this will be accomplished soon. The entry road was in fairly good shape, but the Bear's Ears approach was very rough.

Navajo--Dry weather and persistent winds have made both the monument and approach roads very sandy. One section of the monument road may have to be realigned to avoid a huge sand dune.

Saguaro--Native stones were placed along the roadside at sites 4, 5, and 6 to prevent damage to the exhibits by wandering motorists. A simple masonry wall was placed at the overlook at site 21.

Walnut Canyon--A special use permit for a 1,000-foot right-of-way for the proposed approach road was obtained from the Forest Service. Considerable time and effort were expended in preparing the entrance road for oiling. Due to extreme dryness, water had to be hauled from Flagstaff to wet down the road.

Wupatki--The first 7 miles from the highway are coming right along in fine shape. The Sunset Crater entrance road is getting in bad shape due to the very dry weather. Material is being placed on it to keep it open until the rains come and it can be bladed smooth.

Concessions

Canyon de Chelly--The Thunderbird Ranch has been filled to capacity throughout the month. The Navajo Tribal Council has decided to construct a combination motel and restaurant in the vicinity of Chinle, near monument headquarters at an estimated cost of about \$200,000. This is expected to result in a sharp increase in travel to the area.

Cooperating Government Agencies

Chiricahua--Mr. Cooke reported as follows concerning the coming of electric power to Chiricahua: "On June 5, at 5:30 p. m. the REA said 'let there be light'. For the first time in history the Monument males have been able to use electric razors in the morning..."

Accessions

Headquarters Office--The Washington Office has issued a purchase order for 14 museum storage cases and drawers for them. When these are received, our need for this type of case will be filled for a considerable period. We are exceedingly grateful for this very fine cooperation.

El Morro--This area, which recently converted to electric power, has acquired a new electric range to replace the old gas one.

Interpretive Service

Headquarters Office--During a month's assignment to the Gila Pueblo Office, Superintendent Jackson of Tumacacori wrote the text for a self-guiding leaflet for that area and completed three easel displays for wayside exhibits and mounted them in the easel-type cases. He was working on the last trailside display at report time.

Mr. King edited copy for the fifth edition of the Sycamore Trail booklet and sent it to the printer. He also read the draft of a proposed self-guiding trail booklet for Aztec Ruins.

Messrs. King, Jackson and Arnberger participated in discussions of interpretive and preservation policies, with particular reference to Tonto and Tumacacori. Superintendent Sharp was present during the discussion concerning Tonto. They also participated in a discussion of campground policy at Arches.

The change in the method of handling visitors at Tumacacori made it necessary to slightly change the two-fold leaflet. The revised copy was sent to the Regional Office for inclusion in the new printing of two-fold leaflets for that area.

Mr. King gave a talk on June 3 before the Globe Rotary Club. His subject was "Archeological Conservation."

Bandelier--The Rainbow House and Tsankawi ruin self-guiding trails received more use than was anticipated. The Tsankawi trail was revised to make a loop trail. Small pictograph figures will mark the route.

Ranger Turney gave a special talk to 60 Boy Scouts from Colorado.

Chiricahua--Three groups were given special guided tours. Two slide talks were given in the museum and one illustrated talk to people at a Presbyterian Church camp. A gratifying increase in the number of visitors using the Massai Point Nature Trail has been noted.

Gran Quivira--Mr. Ringenbach reports that visitor reaction to the improved self-guiding trail and the guiding pamphlet has been generally good to enthusiastic. Some of the comments were: "A leisurely informative tour," "Quite a bit of history behind that pile of rock," "Why don't you have something like this at the other missions?" (meaning Abo and Quari).

Interpretive Service - (Continued)

Great Sand Dunes--Talks were given to 36 members of the San Luis Lions Club on "The Origin and Development of the National Park Service," to 38 members of the San Luis Institute of Arts and Crafts on "Desert Animals", and to 39 members of the Costilla County Rotary Club on "Recreation is a National Problem."

One hundred and fifty feet of time lapse movies of shadows on the dunes were received from Munitalp Foundation.

Montezuma Castle--With the entrance on duty of the seasonal ranger, the interpretive program is carried on from 8:00 a.m. to 6:00 p. m. daily and most visiting groups are contacted at the model and given the story of the area.

Saguaro--Mr. Lewis commented on the aggressive drive of the Arizona-Sonoran Trailside Museum toward the goal of establishing the full story of desert biology. The latest step in this drive is the employment of a skilled artisan in duplicating in wax and latex many forms to provide habitat scenes for placing animal life on exhibition, and also to simulate the blossoms of the Saguaro and other cacti, so the museum will have a year-long display of cactus flowers. All of this sounds like excellent interpretive goals.

Tumacacori--With the inauguration of the admission fee system, well over 90% of the visitors go on the guided trip whereas before, as few as 20% went on the trips. Apparently visitors want to get their money's worth and are now waiting for the next regularly scheduled trip.

Museum Activities and Exhibits

Headquarters Office--Naturalist Arnberger spent considerable time designing and preparing preliminary plans for exhibits to be installed at White Sands and Arches. These exhibits are scheduled for construction by the Museum Laboratory during the 1953 fiscal year. He also prepared a list of exhibit needs for the Southwestern National Monuments to be included in the 1957 fiscal year program for Construction of Exhibits for Existing Structures, and a memorandum regarding the preparation of four exhibits scheduled for completion in the 1955 fiscal year for the new administration building at Saguaro.

Montezuma Castle--Two panels were completed for the Well Museum and a third is being painted. The Apache exhibit for the Castle Museum is in preparation.

At headquarters, we were pleased to receive a sample specimen from the layman's herbarium. Mr. Cook and his staff are to be highly complimented for their interest and accomplishments in improving the Montezuma Castle Museum.

Research and Observation

Headquarters Office--Mr. Arnberger contacted Dr. W. B. O'Brian, Globe physician, to obtain medical opinion on the LC treatment for the bites and stings of venomous animals which has recently been developed by Dr. Herbert Stahnke. After talking with Dr. Stahnke, Mr. O'Brian is of the opinion that the LC treatment is medically sound and will eventually supplant the presently accepted cut-and-suck method.

Detailed data was compiled on the species of plants and animals occurring at Chaco Canyon, Canyon de Chelly, Capulin Mountain, Arches and Natural Bridges for the use of the Nature Conservancy in preparing their catalog of nature sanctuaries.

Research and Observation - (Continued)

Headquarters - continued

We requested clarification of the recent revision in collecting regulations which removes the restriction of Federal employment for collectors of spiders and insects. We feel that this restriction should be removed also for the collection of other members of the Phylum Arthropoda.

Chiricahua--A report was received from the U. S. Geological Survey giving a chemical analysis of rock specimens from Chiricahua. This analysis serves to confirm the classification of rocks made by Dr. Enlows and is important information on the geology of the area. Mr. Cooke reported that Dr. and Mrs. Enlows spent almost two weeks there while Dr. Enlows did further field work and research on the geology of this area. Mr. Cooke feels that a vast amount of praise and thanks are due Dr. Enlows, who shows great understanding of the interpretive values, as well as the purely scientific aspects of the study.

A graduate student in geology at Yale, Floyd Sabins, will spend the summer working on the Cochise Head Quadrangle, which includes most of the monument area.

Montezuma Castle--An archeological research program which included excavation of a couple of ruins in the Castle area and one at the Well was worked up and submitted with recommendations for approval. Archeologist Pierson catalogued and stored over 100 archeological specimens excavated from Richards cave 3 miles north of the area. A Warbling Vireo was a new bird recorded at the Well.

Organ Pipe Cactus--A research program with the Fish and Wildlife Service has been worked out, to be carried on over a long period of time. It is hoped that this can be started during 1954.

Tonto--Some live Triatomas (kissing bugs) were delivered to Dr. Sherwin Wood, who wrote that with these he could start new colonies for further experiments. So far, he has found negative results from the Tonto kissing bugs with regard to Trypanosoma Cruzi.

Tumacacori--Kissing bugs from this area were also sent to Dr. Wood. The following quotation is from a letter received from him: "The large bugs from Bullard's residence are Triatoma longipes. We do not know what other animals it feeds upon besides man. It is slow and sluggish and I suspect comes from ground squirrel burrows or dens of larger animals. Both specimens were negative for Trypanosoma. This is a new record to me for occurrence. One longipes from the Bullard residence has numerous bacteria which were actively motile. Although some studies have been made on this group in Triatoma, so far no dangerous pathogens have been found living in the bugs. I have also seen the bacteria in a bug Mr. Arnberger forwarded from Globe."

Loan Library

Accessions for the month totaled 90, made up of 7 books, 36 periodicals and 47 separates. Many photographs were furnished and several inter-library loans processed.

Southwestern Monuments Association

The "Jerome" booklet by Jimmie Brewer was sent to the printer on May 26 and finished copies delivered to the Jerome Historical Society in time for the opening of its museum on June 19.

Southwestern Monuments Association - (Continued)

Mr. King spent Sunday, June 21, working with the author and illustrator of a proposed booklet on the animals of the Southwest Desert. Mr. Amberger also spent several hours with these men.

Two fine bookcase cabinets with glass doors were received from the University of Arizona, along with other surplus materials which were formerly located at Gila Pueblo. These bookcases were moved into the Association stockroom, making the stock arrangement up to standard for the first time.

The number of covers mailed during the month was 290, including 50 letters and 50 purchase orders. Joe Paul Canchola, of Globe, was employed on a part-time basis and worked 107 hours in June.

It is believed that a revised method of keeping inventory cards, worked out by the Executive Secretary, with the assistance of the Assistant General Superintendent and the Treasurer, will greatly reduce the amount of work involved in keeping these records.

We greatly appreciated the excellent cooperation given by monument superintendents in sending in the fourth quarterly turn-ins early in order to assist in the making of a proper accounting for the current fiscal year.

Ruins Stabilization

Artec Ruins--A total of 16 rooms with prehistoric ceilings have now been given renewed protection. The roofing is of built-up construction with a chat surface both for added durability and improved appearance. In many, the drainage was changed from concealed tiles, all either broken or clogged, to trough-type drains at roof level.

Chaco Canyon--The first part of the month at Chaco was spent working on the archeological and stabilization reports for Gran Quivira. Messrs. Richert and Vivian also made a survey of the new road, Route 2, for archeological values. Archeologist Tom Mathews entered on duty June 1 and was assigned to working up the material culture so far recovered from Kin Kletso -- a backlog the permanent archeologists would not have gotten to for a long time. Much work remains to be done on the Ponto and Tuzigoot stabilization reports. At report time, both Messrs. Vivian and Richert were working on the voluminous records, notes and photographs covering the Mupatki project.

Travel

June is the beginning of the summer vacation season, and travel to our areas indicated that this season was off to a good start. We had an 8 percent increase over June of 1952, with visitors reported from every state and many foreign countries.

The demand for campground facilities was beginning to manifest itself. Great Sand Dunes reported a 100 per cent increase in campground use over a year ago and at Navajo, with a 169 per cent increase in visitation, almost half the visitors camped overnight.

Visitors

Headquarters Office--Messrs. King of the Forest Service Regional Office and Mr. Fomeroy, District Ranger, Globe; Ranger Morris, Arches, Superintendent and Mrs. Ringenbach, Gran Quivira; Archeologist Van Valkenburgh; Mrs. Elsie Sanders and Miss Helen McLane, Santa Fe.

Visitors - (continued)

Aztec Ruins--Professor and Mrs. H. Spanger, Harvard University

Bandelier--Archeologist Musbaum with Dr. Roberto Pane, University of Naples.

Canyon de Chelly--Visitors included school groups from Cincinnati, Ohio and Washington, D. C.

Casa Grande--Mr. C. J. Rittenhouse of Mazatlan, Mexico, who first visited the area in 1897. He stated the building looked about the same, but was very impressed by the evidence unfolded during excavations made after he last saw the ruin.

Chaco Canyon--Doc Sartin - who worked on the University of New Mexico hogans in 1936-37 and had not been back since; Fred Biseman, teacher from Clayton, Missouri and vacation-time explorer of inaccessible ruins.

Chiricahua--Mr. John C. Knox, Fish and Wildlife Service; a Mr. Pearson, Bureau of Land Management; four geologists, New Mexico Bureau of Mines.

Great Sand Dunes--A group of 40 Louisiana University students on a field trip--spent night of June 22 in monument.

Montezuma Castle--Professor Deaver and field biology class of 22 students; a YMCA group of 20 young people.

Navajo--Mr. and Mrs. Roberts, Denver Museum of Natural History Mr. and Mrs. Robert Euler, Museum of Northern Arizona and Miss Katherine Bartlett, also of this museum; Mr. E. McKee, accompanied by several coal experts from Pennsylvania.

Saguaro--Dr. Durward Allen, Dr. Daniel Leedy, Mr. Paul Hickie and John C. Knox, U. S. Fish and Wildlife Service; Jerry Cannon, Wildlife illustrator; Dr. Mark Williamson, photographer.

Tonto--Mr. Saadun Yousuf, Ministry of Agriculture, Iraq; Mr. Harlan Arnold, Soil Conservation Service.

Wupatki--Senator and Mrs. J. W. Stambough, Alberta, Canada; William A. Anderson, Washington, D. C., taking pictures of desert geology Messrs. G. D. Lassen, S. H. Robeson, and W. V. Turner, Watershed Survey Bureau of Reclamation.

Police Protection

Saguaro--Two Tucson men were apprehended just after they had dup up two large specimens of Ocotillo and loaded them into their vehicle. They were taken to headquarters where an interview revealed that they were totally unacquainted with National Park Service regulations and objectives.

Forest Fire Protection

Bandelier--The fire danger was high all month, but no fires occurred. Assistance was given the Forest Service on a fire in upper Frijoles Canyon.

Chiricahua--A fire school was held on June 3 and 4 attended by all monument personnel. Training was given in fire fighting and protection against fire. On June 10, 11, and 12 Ranger Barrel attended the Saguaro fire school and gained much valuable experience in fire fighting and protection techniques.

Saguaro--The annual fire control training conference was held on the 10, 11 and 12 and attended by all monument personnel except Ranger Zerbey. One lightning fire occurred on the 13th, but was confined to heavy scrub oak.

Forest Fire Protection - (continued)

Tonto--A small fire on the northeast boundary was controlled by the Tonto staff, with the Forest Service providing mop-up service. A cigarette thrown from a car started a fire on the approach curve to the parking area. This fire was quickly put out.

Walnut Canyon--The fire cache on the south rim was stocked with tools and supplies and a trail blazed with small aluminum triangle reflectors in case of necessity for going in after dark.

Tree Diseases

Montezuma Castle--Tremendous improvement in the vigor and appearance of the sycamore trees over the condition last year has been noted, due in part no doubt to the insecticide treatment accomplished last month. It is beginning to appear that the extensive pruning recommended for this fall may not be required.

Accidents

Navajo--A lady visiting Betatakin Ruin broke her right wrist when she fell near the spring. She was driven to Tuba City for hospital treatment.

Tonto--A woman was overcome by heat on the ruins trail and after receiving first aid by Archeologist Wenger, the woman rested about two hours in the superintendent's residence.

Personnel

Arches--An exchange in rangers resulted in the transfer of seasonal ranger James L. Bonham to Aztec Ruins and the transfer of Mr. Wick R. Miller from that area to Arches.

Bandelier--Roger Early and Robert Clay entered on duty as seasonal rangers.

Chaco Canyon--Superintendent Hastings returned to Chaco Canyon on June 7 after having served as Acting Superintendent at Aztec Ruins since February 24.

Octavio Romano reported for duty as seasonal ranger on June 9.

Gran Quivira--Mr. Joseph A. Roberts entered on duty as seasonal ranger on June 17.

Great Sand Dunes--Robert E. King terminated as seasonal ranger on May 29 and entered on duty as laborer leadman for week ends only. Mr. Eugene E. Moeny entered on duty as seasonal ranger vice Mr. King, May 30.

Natural Bridges--Seasonal ranger C. Robert Sundvall and family arrived on June 18 to take over the area for the season.

Tumacacori--Superintendent Jackson has spent the month in the headquarters office. Archeologist Van Valkenburgh has been at Tumacacori helping with the guiding. Seasonal Ranger Smith was terminated on June 19.

Tuzigoot--Cal Burroughs transferred to Wupatki May 20. On May 31, Edward R. Hill entered on duty as WAE tour leader.

Local Items

Chiricahua--Park Ranger Boileau returned to the area late in May with a bride, Carol Jean.

El Morro--The New Mexico Institute of Mining and Technology is mapping this area and a few men are camped on the monument for a few weeks.

Local Items - (continued)

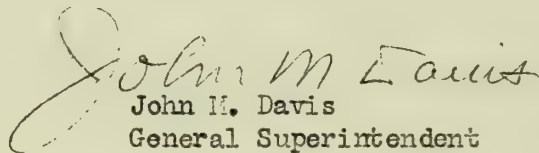

Navajo--A baby son was born to Laborer and Mrs. Bob Black.

White Sands--Ranger Davis and Joan are the proud parents of a baby girl, Barbara Lee.

Smiles of the Month:

From Casa Grande: A visitor asked, "D'yall have any pickled people hyah?"

And Tuzigoot has received mail addressed to: "Tizifoot" and "Tuzigood."

NATIONAL PARK SERVICE

ARCHES NATIONAL MONUMENT

MOAB, UTAH

June 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Arches National Monument
Subject: Monthly Narrative Report for the month of June, 1953

WEATHER: Winds have died down, but still no precipitation and the summer heat is definitely been turned on.

TRAVEL: In spite of the 100 degree temperatures our travel continues to climb. The 5259 visitors arriving in 1015 cars gives us an increase of 34% over the same period last year. Forty-six states, two territories and three foreign countries were represented.

INTERPRETIVE SERVICE: With one week's constant contact by Seasonal Ranger Wham and four weekends by Ranger Morris, 1013 visitors were contacted at the Wayside Exhibit. At Headquarters 789 people were contacted. The register is signed by 2,250 people and we estimate that at least that number used the new Nature Trail.

PUBLICITY: The Double Arch appears on the cover of Utah's 1953 Official Highway Map.

SPECIAL ACTIVITIES: Director Douglas Sirk, Universal Pictures Co., Inc., plans to film a motion picture, "THE SON OF CHOCHOISE", in the Moab vicinity. He is greatly impressed with the Windows Section and the Court House Towers sections of the monument. But, since there are no roads into these sections, it would be impossible to move their equipment to the selected areas. Although, no decision has been reached, they may use the mouth of the Courthouse Wash just off of Highway 160.

COMMERCIAL POWER: On June 11, the Utah Power and Light Company's Division Engineer, Mr. Packard spent half a day working out the construction plans for the power line into headquarters. The exact route of the line was designated and a plan giving location and cost will be submitted to this office as soon as it is completed by their engineers.

1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 26

[illegible]

PERSONNEL: Seasonal Ranger James L. Bonham was transferred to Aztec Ruins on June 23 and Seasonal Ranger Wick R. Miller who was at Aztec was transferred to Arches.

SIGNS: Ranger Morris completed the informational sign for Headquarters and it is serving as an excellent "Lone Ranger" during ~~the~~ absence from Headquarters. We find that most visitors will take time to read the information if there is no one around to give it to them verbally. A similar sign will soon be completed by the Moab Lions Club and be erected on State Route #93. This will be of help for the people who come from the North and drive out into the monument expecting to find motels, cafes and etc.

GENERAL: Ranger Morris made a trip to Globe to return the Schramm Trail Tractor; also the trip to Aztec for the exchange of seasonal rangers. Three days ~~were~~ spent by my son Tug and me at Natural Bridges installing the light plant, refrigerator and radio. Three previous attempts to put this radio in operation during the last three years were complete failures; however, Tug seems to have solved all the problems, for it worked perfectly from the moment he turned it on. I don't think I will worry about his future.

LOST VISITOR: Mr. W.S.T. Smith, an 84 year old man was lost for 7 hours south of the Windows Section on June 24. After 4 hours of tracking, made difficult by large areas of "slick-rock", we finally caught up with him. He had traveled approximately 3 miles in a very irregular circle and when found was only a mile from the parking area. When found he was completely exhausted and we carried him out on a stretcher. His daughter, Dr. Ruth T. Smith, took him to Grand Junction for a checkup.

TRAILS: The new portion of Delicate Arch Trail was completed on May 27. It has been signed and the old hand rail removed. We have gotten many favorable compliments on the new and safe approach; especially from older people who have attempted to make the trip before and were unable to reach their destination.

AZTEC RUINS NATIONAL MONUMENT
AZTEC, NEW MEXICO

24 June 1953

Memorandum

To: General Superintendent

From: Superintendent Aztec Ruins

Subject: Report LML, Superintendent's Monthly Narrative

WEATHER: Typically fine June weather with an occasional thunder shower to settle the dust and freshen the grass. The late Spring run-off arrived during the middle of the month and with the turn of summer, streams in this area are rapidly falling off in volume.

ADMINISTRATION: Inventory was completed upon return of Supt Townsend and the relief of Acting Supt. Hastings who returned to Chaco.

PERSONNEL: Seasonal ranger Dick Miller reported for duty June 5, then transferred to Arches with ranger James Bonham of Arches exchanging.

Decrease in Travel: Travel has fallen off about 5% over that of June last year. There have been 3,693 visitors in 995 cars. Of these 2,994 were conducted thru the ruins and 699 visited the museum only.

MAINTENANCE: Weed control in the ruins has been carried along during the month with some roadside burning toward fire prevention. Several dead limbs were removed from the visitor trails that had become hazardous.

Ruins Stabilization: Archeologist Richert left for Chaco Canyon June 6 after completing the ruins stabilization. A portion of his Navajo crew entered on duty for Archeologist Onstott June 8, in the excavation of the Hubbard Mound. At this date the Hubbard Mound central portion has been excavated to produce a fine kiva. Onstott's special report covers this.

VISITORS: Archeologist Vivian has visited while on inspection of the work currently going on in the ruins.

Ranger Bob Morris, Arches visited June 23.
Seasonal ranger Aron, Chaco, visited June 23.
Professor and Mrs. T. Morgan, Harvard visited June 14.

Irving S. Townsend
Superintendent

June 29, 1953

Memorandum

To: General Superintendent
From: Superintendent, Bandelier
Subject: Monthly Narrative Report, June 1953

Weather The weather was unusually hot during all of June with the exception of the 17th, 18th, and 19th when .72 inches of rain were received. Temperatures generally reached the nineties in the day time and were in the forties at night. The low was 37 degrees on the 4th and 5th and the high was 99 degrees on the 23rd.

The hot weather in the midwest and south contributed to the increase in travel that was recorded this month.

Special Activities

Probably the most important event of this month was receipt of the notice that beginning July 1 Bandelier will operate as an independent area instead of being one of the Southwestern National Monuments group. The association with the Southwestern Monuments organization will be missed but it is believed that the change will mean improved organization in the long run. A trip was made to Santa Fe to discuss procedures under the new set up and in general there will be little change.

The Los Alamos Outdoor Association donated another day of work on June 5. They cut wood for the campground and cleaned the stream through the campground.

The new fee system went in to effect on June 8 with the 15-day and annual permits. So far it seems to be working out very well with the checking ranger selling both permits which eliminates much of the exchange of 15-day for annual permits. It is quite noticeable that the new system is producing more revenue.

Inspections

We were very pleased to have General Superintendent and Mrs. Davis with their daughter Ann spend June 1 and 2 at Bandelier for a general inspection which included trail work, campgrounds, buildings, museums, and a discussion with the concessioner on maintenance of the lodge buildings. This is the first inspection by any of the headquarters staff since the move to Globe, Arizona.

Engineer Tom Moran came to the area on the 10th to make plans for oiling the campground road and to inspect the ruins trail oiling job.

June 24, 1953

Memorandum

To: General Department

From: Department, Director

Subject: Monthly Statistical Report, June 1953

The report was submitted on June 24, 1953, and was prepared by the Statistical Department. It contains a summary of the activities of the Department during the month of June. The report is divided into two main sections: a summary of the activities of the Department and a summary of the activities of the various units of the Department. The summary of the activities of the Department is as follows:

The summary of the activities of the various units of the Department is as follows:

Summary of the activities of the various units of the Department

The summary of the activities of the various units of the Department is as follows:

The summary of the activities of the various units of the Department is as follows:

The summary of the activities of the various units of the Department is as follows:

Summary of the activities of the various units of the Department

The summary of the activities of the various units of the Department is as follows:

The summary of the activities of the various units of the Department is as follows:

Regional Chief, Concessions Division Koehler inspected the Frijoles Canyon Lodge on the 10th and discussed the dining room sub-concession operation.

Maintenance

A plugged sewer line at the Lodge was cleaned out and put back in service.

A new water fountain was installed in the museum lobby.

Parking stripes were painted on the parking lot which greatly facilitates the handling of traffic on busy days.

A tent frame was constructed in the campground for a 14'X16' tent in which a seasonal ranger, with a family, will live this summer.

All of the fire hydrants were repainted with red paint.

Roads and Trails

Approximately 300 yards of the ruins trail was treated with an oil mix. However the project had to be postponed when the bid by contractors to oil the campground road proved to be excessive and it was decided to do the work with Monument personnel. An arrangement was made to procure an oil mix from the A.E.C. at Los Alamos and the campground road was completed on June 26. Sufficient additional funds were obtained to also oil the residential road and it will be completed in a day or two.

Concessioners

Mrs. Evelyn Frey reported generally better business at the cabins this year than last. There were 364 lodgings compared with 290 last year.

Business at the dining room has been somewhat erratic and gross receipts amounted to only \$2320.00. The sub-concessioner has had considerable trouble with obtaining experienced help but she has been able to maintain good service most of the time.

The Superintendent conducted a training meeting for dining room employees in which Park Service history, general policies and standards were discussed.

Interpretive Service

A total of 3983 visitors were conducted on 172 tours of the ruins. 11 evening lectures were given to 403 visitors compared with 6 talks and 139 people last year.

The Rainbow House and Tsankawi ruin self-guiding trails received more use than was anticipated with the result that the mimeographed leaflets for both trails were exhausted and new supplies had to be requisitioned.

The Tsankawi trail was revised to make a loop trail although the last part will be rather rough going with not constructed trail.

and because I believe that the only way to
prevent the spread of the virus is to
isolate the infected individuals and
prevent them from coming into contact
with others.

1. The first part of the report is a general statement of the purpose of the study and the scope of the investigation. It also includes a brief review of the literature on the subject.

A new water fountain was installed in the museum lobby.

Information Section

A search of your records was conducted on the date above.
The following information was found in my records regarding this
person and his family last year.

100-443887-100

[Faint, illegible text]

Small pictograph figures will mark the route.

A special talk was given by Ranger Turney to 60 Boy Scouts from Pueblo, Colorado on June 8.

Travel

Travel set a new record for a single month with 11,520 visitors compared with 10,748 last June which was the heaviest travel month until now. Many of the visitors were from Texas and the mid-west who were trying to get away from the heat wave.

Visitors

Visitors to Bandelier during June included:

- 90 Boy Scouts, Camp Davis, Las Vegas, New Mexico
- 19 Boy Scouts, from Pennsylvania.
- 18 Georgetown Day School, Indiana
- 28 Students, Lampasas, Texas
- 50 Boy Scouts, Troop 22, Pueblo, Colorado
- 16 Students, Emhouse, Texas
- 159 Students, 1st grade, Los Alamos, New Mexico
- 43 Students, 3rd grade, " " " "
- 48 Students, 4th grade, " " " "
- 68 Students, 5th grade, " " " "
- 14 Students, 7th grade, " " " "
- 92 Students, various grades, Los Alamos, New Mexico
- 50 Students, kindergarten " " " "
- 65 Adult Traveling Seminar, Presbyterian Church
- 28 Northern New Mexico Resort Association.

Archeologist Jesse Nusbaum brought Dr. Roberto Pane, University of Naples for a visit to Bandelier on June 20th.

Mr. John Littleton brought some friends for a visit on June 20th.

Archeologist Pinky Harrington, Region One and his family were visitors on June 25th.

Ranger Service

Roger Early, Winter Park, Florida and Robert Clay, Santa Fe, New Mexico were entered on duty as seasonal rangers. Mr. Early is conservation director for the Florida Audubon society and Mr. Clay is an experienced artist and sculptor.

Three training sessions were held for seasonal rangers. They were conducted by the Superintendent, Supervisory Ranger, and Ranger and covered general policies, interpretation and protection.

Forest Fire Control

The fire danger has been high practically all month but no fires have occurred in the monument.

Assistance was given to the Forest Service on a fire that was started by lightning in the upper part of Frijoles Canyon about three miles from the monument boundary. Four of our personnel worked 11 hours on the

Small photographs taken with the camera.
A small table was placed by the window at the top of the stairs.
From the stairs, looking down, the view was as follows:

Travel

Travel was a very pleasant one for a single man with 12.50.
Visitors appeared at 11.15, the first being the husband of the
lady who was with me. They all appeared very friendly and the
men were sitting in the room from the first.

Hallway

Hallway to the left of the stairs was isolated.

fire until relieved by a Forest Service crew.

The Seasonal Rangers were given training in both forest fire and building fire control.

Building Fire Control

A pike pole, fire ax, shovel, and 100 feet of garden hose were installed at the corral for use in case of fire.

Miscellaneous

As we leave the Southwestern National Monuments we wish to express our gratitude to all of the Headquarters staff for their very fine help and cooperation. The spirit of the Southwestern National Monuments has always been one of friendliness both to visitors and employees and we intend to retain that as much as possible. The Bandelier staff extends their best wishes for continued success to all of the Southwestern National Monuments.

Canyon de Chelly National Monument
Chinle, Arizona

June 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Canyon de Chelly
Subject: Monthly Narrative Report for June, 1953

Travel: 1378 people in 377 cars this month. This figure broke all previous records for travel for any one month since the monument was established. 1378 compared with 884 for June of 1952. Total visitors for the current calendar travel year is 3,091 - for the same period last year 2,040. There were 332 overnight campers. Guide and contact service totaled 166 hours.

Weather: Dry, dusty, hot, and windy all month. Only one shower of .09 of an inch fell on the 11th. Total moisture since the first of January only 1.94 inches. High-low temperatures ranged from 98 to 38.

Roads: All approach roads are dry and dusty, but in fair condition. Since our last report several more miles of pavement has been constructed on the proposed all-weather highway now under construction between Window Rock and Ganado. Increased travel to the monument already has resulted due to this improved road.

N.P.S. Visitor: Architect Kenneth Saunders, Region Three Office on June 1.

Organized Groups: Organized groups during the month included the following:

- 18 - Students from the Georgetown Day School, Inc., Washington, D. C. on June 13-14.
- 37 - Roger Brion high school students from Cincinnati, Ohio, on June 16.
- 60 - Our Lady of Mercy high school students from Cincinnati, Ohio, on June 21.
- 60 - Ganado high school students also on June 21.

Soil & Moisture: All work and expenditures on S&M projects will be completed by June 30.

Concession: All accommodations at the Thunderbird Ranch Concessioner have been filled to capacity throughout the entire month of June.

Administration: John T. McConville entered on duty as a Park Ranger (General) on June 8.

et
Cont. from page 1.

General: A sharp increase in travel to the monument, no doubt, will result from a recent decision made by the Navajo Tribal Council to construct a combination motel and restaurant in the vicinity of Chinle, near monument headquarters. Estimated cost about \$200,000.

It is good to receive the many daily favorable comments on our recently constructed comfort stations. Women are always calling other women in to see the new "Cute" rest rooms.

Capulin Mountain NATIONAL MONUMENT

Capulin New Mexico,

June 26, 1953, 19

Memorandum To; The General Superintendent,
Southwestern National Monuments,
National Park Service,
Globe Arizona,

From; Homer J. Farr, Ranger,
Capulin Mountain National Monument,

Subject; Monthly Narrative Report,

Visitors; Approximately five thousand one hundred visitors
This month to this Monument, bringing the total visitors Jan 1,
to June 30, eight thousand five hundred fifty,
Some increase over one year ago,

Weather; Has been very warm and exceedingly dry, No precipitation
this month. Goodness how we need rain,
It appears to the writer that a very similar pattern of weather
this season is following the past one,

Flora and Fauna; There appears to be sufficient moisture to hold the
browse, such as the Mountain Mahogany and Gambles oak and the Pinon,
There may be a small crop of pinon nuts this season, at least
they are putting on now,
I notice all our deer have moved to the North and shady side of
the Mountain for the hot weather, and to fawn, many little fawns will be
raised in the Monument this year,

Roads and trails, For the first time this year the roads are getting
in bad condition, due to the extreme drouth it is impossible to keep
the washboard condition from the road during the heavy traffic,
The trails are in fair condition, and are being used very heavy,

Information Pamphlets,

Thirty two have been mailed out on request
About five thousand has been handed out, including those
sent to the Regional Office, and those passed thru the Reg Box
on top the Mountain, we have on hand about 11,000 *Eleven thousand*

Sincerely

Homer J. Farr,
Superintendent,

The monument is a beautiful area of land.

The monument is a beautiful area of land.

June 25, 1953

Memorandum

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for June, 1953

General: The drought continues and of course it has been hot and dusty. Unemployment shows a rise in the Gila Valley but the situation is still not too bad. Some unemployment is no doubt caused by the fact that cotton farmers are replacing their human weeders with geese. It seems that a goose will eat anything but a cotton plant. There are now approximately 5,000 head of geese in Pinal County.

Weather: The first part of June was extremely muggy and uncomfortable, due purportedly to a blanket of moist air visiting us from the Gulf of Mexico.

| | 1953 | 1952 |

... ..

2011, and we found a similar pattern in 2012.

There are two in Washington, D.C. and one in New York City. It seems that a group will not be formed but a series of the first seven farmers are organizing their farms around attention is still not too far off. Some management is in the hands of not only the farmer but also the city and the not only the farmer but also the city and the farmer. The typical farmer and the city and the farmer.

How much of the new world is there still to be created?
 How much of the old world is there still to be destroyed?
 How much of the new world is there still to be created?
 How much of the old world is there still to be destroyed?

1. The following information was obtained from the records of the Bureau of the Census, Department of Commerce, for the years 1947 through 1954:

THE UNITED STATES DEPARTMENT OF THE INTERIOR
BUREAU OF LAND MANAGEMENT
WASHINGTON, D. C. 20246

REPORT PREPARED FOR: THE U.S. AIR FORCE

[illegible]

Jun 23
" "

Mr. Kroft, of the Omaha Office, and wife.

Mr. C. J. Rittenhouse of Mazatlan, Mexico. Mr. Rittenhouse, who's father ran a trading post on the Pima reservation near Sweetwater in the early 1880's, was first here in 1897. He says the building looks about the same - was very impressed by the evidence unfolded during excavations made after he last saw the ruin.

Administration and Protection: 6 requests for information were received during the month and promptly answered. The Adamsville Site was visited and no traces of recent pot hunting found. One sign, however, has been pulled down and the warning notice ripped off. We will replace this sign and hope it doesn't meet a similar fate.

Since travel tapered off somewhat this month we were at last able to get caught up on our backlog of paper work. The building fire inspection was carried out and the necessary corrections made.

Roads and Trails: The new section of highway in front of the monument which was laid down this spring did not hold up. For the past week or so this road was being worked on - torn up and re-laid. On the 23rd a new seal coat was applied. The condition of this road has naturally affected our travel figures for this month, giving us a slight decrease.

Maintenance: With the end of our heavy travel season Mr. Lopez was able to start a general cleanup of the whole area. A lot of maintenance work was done on Quarters No. 3. This included repair of window cashes, rebuilding and installing a shutter on the service porch, repairing the lock on the front door, and replacing 3 valves on the kitchen range.

Museum: The glasses were removed from two exhibit cases and two pictures taken. The latter were sent in with Archeologist Jewell's report on museum work accomplished in March.

Personnel: Ranger Clancy took two days sick leave during the month. The doctor first diagnosed his trouble as a good old fashioned case of mumps. Fortunately for him the Dr. was wrong - the "mumps" turning out to be a jaw infection.

Question of the Month: Colored gentleman - "D'yall have any pickled people hyah?"

A.T. Bicknell,
Superintendent

[Faint circular stamp]

Chaco Canyon National Monument
Bloomfield, New Mexico

June 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for June 1953

Weather

The high for the month was 96 on the 23rd and the low was 30 on the night of the 30th of May. Total precipitation for the month was .10 of an inch. Continued dust and winds the early part of this report period at times hampered outside activities. The worst dust storm of the month was on the 27th of May. All in all, it was about an average June so far as weather was concerned.

Travel

A total of 509 people in 166 cars visited the area this month. This figure is probably on the conservative side since for the first two weeks of this report period there was only one man on for five days a week and part of the time he was off on essential duty away from the office area. Of the above number of visitors 307 were conducted through Pueblo Bonito in 66 trips.

Administration

F.O. Memorandum 54-53 "Securing Protection and Conservation Objectives Through Interpretation" and SMM Memorandum 54-52 "Interpreters and Techniques" were found useful when breaking new men into the Park Service at Aztec and at Chaco.

The Annual Report for The Director and Project Completion Reports on the Ackerley buildings demolition and the light plant installation were submitted. Ranger White completed the quarterly SMM sales report.

Maintenance and Equipment

After making three trips to Farmington on successive days a sump pump was finally obtained from Foutz and Bursum for cleaning the three water wells. After each trip the pump was promised for the following day and on the third day was picked up on a job about 15 miles south of

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United Kingdom regarding the proposed changes to the law of the United Kingdom regarding the treatment of the British Commonwealth countries. The Commission is therefore unable to make any recommendations on this matter at this time.

1. The first of these is the fact that the United States has a large and growing population of people who are not citizens of the United States. This is a result of the large number of people who have been admitted to the United States as permanent residents, and the fact that many of these people have been born in other countries. This is a problem for the United States because it means that there are a large number of people who are not subject to the same laws and regulations as citizens of the United States. This is a problem for the United States because it means that there are a large number of people who are not subject to the same laws and regulations as citizens of the United States.

64

Farmington. Each well was pumped out and then the muck removed with a rope and buckets.

The 5 KW Chan Diesel light plant has required considerable attention and several nights it refused to run. On two of these nights we could not get the gasoline stand-by plant to run and reverted to kerosene lamps and candles.

A new underground line for the telephone was run from the office to Residence No. 1. All but one set of connections were made by the Indian Service men and they overlooked those at the office. Instructions were placed to Ranger Remane and with the help of a visitor, he completed the connections.

Wheels were hoed from inside and around Pueblo Bonito and the parking area.

Roads

A lady visitor's car was pulled from the sand dunes more than four miles from Pueblo Bonito after she had walked in for help. This section of the road has since been fixed somewhat.

Continued dry weather has left the approach roads rough and dusty with the first twelve miles from Highway 66 extremely corrugated.

New Road Construction

On June 10 Highway Engineer Diehl arrived at Chaco to start the new Headquarters to Pueblo Bonito road. On June 11 he went to Gallup to order 144 feet of 48 inch CMP culvert pipe. On the same day Swatzell and Ashcroft Construction Company of El Morro, New Mexico brought in their TD 18A International tractor, dozer, ten yard scraper and ripper. Work was started the next day on the half mile long cut off road across the Callo Arroyo thus eliminating four miles of driving to the well serving the new residences.

By the end of June tractor operation will have plunged cross washed including Mocking Bird on the new road alignment and the surface will be graded to 24 feet in width for one and three quarters miles and ready for topping with six inches of gravel surface material.

Owing to the hard-pan conglomerate the gravel deposit will have to be drilled and shot. This has delayed moving the gravel. Drilling and power operation is expected to be under way by June 29 and gravel trucking by the 30th.

Expenditures and obligations on this project are expected to be around \$5000 by June 30th.

Washington, D.C. July 10, 1944
The Honorable Earl Warren
U.S. Supreme Court Building
Washington, D.C.

Dear Mr. Chief Justice:
I am writing you today to express my sincere appreciation for the report which you have just received from the Committee on the Administration of the Federal Courts. I am sure that the report will be of great value to the Supreme Court in its deliberations on the proposed reorganization of the Federal Judiciary.

I am particularly impressed by the fact that the Committee has recognized the need for a more efficient and economical administration of the Federal Courts. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

Sincerely,
John H. E. Smith

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

Very truly,
John H. E. Smith

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical. I am sure that the Supreme Court will find the recommendations of the Committee to be both wise and practical.

NATIONAL MONUMENTS SERVICE
San Francisco, California

The present allotment will not be sufficient to complete the four mile road with gravel surfaces due to the fact that there is a short section of rock excavation to be encountered. An additional allotment of \$15,000 out of 1954 funds under present operation will mean a saving of \$5000 to \$10,000 due to the fact that the equipment is new in the area and we have very good equipment rental prices.

Personnel

On June 6 Superintendent Townsend unexpectedly returned to duty at Aztec Ruins where Superintendent Hastings had been pinch hitting since February 24th. Superintendent Hastings hauled a pick-up load of his household goods to Chaco on June 7 and finished with a second pickup load on June 8th. It was a pleasure to find out how well Acting Superintendent White had administered the area in the absence of the Superintendent.

Octavio Romano reported for duty as Seasonal Ranger on June 9 and has been making good progress in getting familiar with the area. Gordon Vivian graciously conducted him on a guided trip through Pueblo Bonito and brought up many interesting points.

N.F.S. Visitors

May 26 Messrs. Carter, Moran, and J. Diehl on road survey
June 11 Wick Miller, temporary ranger at Aztec and Irving
Townsend Jr. were overnight visitors
June 12 Eric Reed, Regional Archeologist

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Chiricahua National Monument
Dos Cabezas, Arizona

June 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather Conditions. As is usual for June, the weather has been hot and dry. In the middle of the month the edge of a thunderstorm gave us .11 inches of rain, which hardly settled the dust. Recently the temperature has risen to 99 degrees on two occasions. That may be cool weather for some of the Southwestern Monuments, but we are used to pine-scented mountain breezes. Everything here is tinder-dry, and we keep hopefully hunting for rain clouds.

General Publicity. We have received the article on Chiricahua written by Weldon Heald and published in Desert Magazine. It is well written, but contains an extraordinary number of minor inaccuracies.

Approaches to Monument. All roads are in fair shape, but most of them are very dusty.

Cooperating Governmental Agencies. On June 5, at 3:50 p.m., the REA said "let there be light". For the first time in history the Monument males have been able to use electric razors in the morning. Unfortunately all has not gone smoothly. The elderly and makeshift wiring which formed the underground connections between buildings has been unable to take the steady flow of current all day long. Numerous short circuits have developed, and when each junction box is uncovered it proves to be mysteriously full of water.

Interpretive Service. In addition to the regular Sunday afternoon conducted walks, three groups were given guided tours during the month. 24 Methodist youths were taken through Echo Canyon to Headquarters, as were 34 Presbyterians. Another group of 30 Presbyterians were conducted around the Heart of Rocks.

Two slide talks were given in the Museum, to a total of 24 people, and one illustrated talk was given to 71 people at the Presbyterian Church Camp.

This is due to the fact that the Department has received \$10,000 more than it expected to receive.

General Comments. It is noted that the monthly revenue has been \$100,000. In the month of the month the report of the Department shows an increase of \$10,000. This is due to the fact that the Department has received \$10,000 more than it expected to receive. This is due to the fact that the Department has received \$10,000 more than it expected to receive. This is due to the fact that the Department has received \$10,000 more than it expected to receive.

The Foothill Forest Nature Trail was used by 16 visitors at an average of one-half hour per trip. The new method of estimating visitor use of the Massai Point Nature Trail is more accurate than the previous method, and the 226 users represent a gratifying increase.

Museum Activities and Exhibits. The controversial panel exhibit on the geologic story of Chiricahua is now almost completely obsolete. Further research by Doctor Enlows has made this panel, installed only last autumn, worthless from an interpretive standpoint.

Research and Observation. Doctor and Mrs. Harold E. Enlows arrived here on June 13, and stayed for almost two weeks. During that time Dr. Enlows did further field work and research concerning the geology of Chiricahua. His findings have changed the story considerably. Although much more work could and should be done on the formations underlying the welded tuffs in and around the Monument, the volcanic story is now clear. A little more laboratory work remains to be done, but when we get the results of that, Dr. Enlows' paper will be complete. He has spent a lot of time and effort on this work, and the results should not be underestimated. His understanding of the interpretive values as well as the purely scientific aspect involved are deserving of a vast amount of praise and thanks.

Mrs. Enlows spent most of her visit at the typewriter, whipping into finished form Dr. Enlows work. To her, too, we are very grateful.

Ranger Barrel spent one full day in the field with Dr. Enlows, and gained thereby a much greater understanding of the geologic story.

Mr. Floyd Sabins, graduate student in Geology at Yale University, visited the Monument on June 6. He will spend the summer working on the Cochise Head Quadrangle, which includes most of Chiricahua National Monument. We will aid him in any way possible, and will await his findings with much interest.

Decrease in Travel. This month 2,817 people visited the area; 231 fewer than last year's record, or a decrease of 8%. The travel for the calendar year is now 12,339, or 12% above the previous record of last year, and greater than any figure for a full year's total previous to 1947. The seasonal shift in campground use is marked; fewer long-term campers than last month, and more picnickers and week-end heat-escapers.

It is true that the present world is full of
sorrow and pain, and that the people are in a state of
distress and suffering. But the people are not
to be pitied, for they are the cause of their own
misery.

The people are the cause of their own misery
because they are not true to their principles. They
are not true to their principles because they are
not true to their hearts. They are not true to
their hearts because they are not true to their
souls.

The people are the cause of their own misery
because they are not true to their principles. They
are not true to their principles because they are
not true to their hearts. They are not true to
their hearts because they are not true to their
souls. The people are the cause of their own
misery because they are not true to their
principles. They are not true to their principles
because they are not true to their hearts. They
are not true to their hearts because they are not
true to their souls. The people are the cause of
their own misery because they are not true to
their principles. They are not true to their
principles because they are not true to their
hearts. They are not true to their hearts because
they are not true to their souls.

The people are the cause of their own misery
because they are not true to their principles. They

their hearts because they are not true to their
souls.

Visitors. There follows a list of visitors and groups.

May 28 Four geologists from the New Mexico Bureau of Mines
(All had illegible signatures.)
June 4 Mr. Pearson, Bureau of Land Management
June 8 Methodist Camp group - 37 people
June 13-25 Doctor and Mrs. Harold E. Enlows
June 17 Presbyterian Camp group - 34 people
June 18 Presbyterian Camp group - 37 people
June 21 Mr. John C. Knox, Game Management Agent, Fish and
Wildlife Service

Ranger Service. Late in May Don Boileau returned to Chiricahua with his bride, Carol Jean. We are happy to have such a fine addition to the unofficial (or distaff) staff.

On June 18 Don finished his work as a laborer-leadman, and became Seasonal Ranger, the position he held last summer. We are happy to have him this year in the same capacity.

Forest and Building Fire Protection. On June 3 and 4 all Monument personnel attended the Chiricahua Fire School. Training in fire fighting and protection against fires was beneficial to all concerned.

On June 10, 11 and 12 Barrel attended the Saguaro Fire School, where he gained further experience in fire fighting and protection techniques, as well as some knowledge of the Saguaro terrain and fire problems. The latter will prove valuable if he is ever called to a fire at Saguaro. (So, for that matter, will the former.)

General. Mr. Post, Forest Ranger in charge of this part of the Coronado National Forest, has been transferred to Colorado. The Superintendent and Ranger of Chiricahua National Monument attended a farewell potluck supper held in his honor on June 19 in Cave Creek Canyon. All who know Mr. Post are sorry to see him go. He has been a fine friend and kindly cooperator.

El Morro National Monument

El Morro, New Mexico

June 23, 1953

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

There were 602 visitors to the Monument this month. This is 150 less than a year ago this month. We can not account for the sudden drop in number of visitors in view of the fact that we have had a goat many more than a year ago each month recently. We do not wish any other area any bad luck, but we hope that we are not the only area with a visitor drop. Of these visitors, 504 took a trip around the Rock in 107 parties. 46 persons went over the top of the Rock in 13 parties, and 99 persons listened to an orientation talk in 37 parties. There were 98 campers.

The warmest this month was 91 degrees and the coolest was 32 degrees Fahrenheit. There was .15 of an inch of moisture.

The approach roads have been passable all month, but surely have been rough. The county crews are on them all the time, but lack of moisture makes it very difficult to keep them in shape. The Monument road is in good condition.

With an average of 3½ trips per day and the large number of picnickers and campers, we have spent a good part of our time just guiding, picking up papers and keeping the one rest room clean.

Other routine summer chores were accomplished. Weeds were pulled up which had forced their way through the asphalt on the trail and on the road. Other weeds were cut down on the dirt trail. The walks were patched with asphalt and the shoulders were built up along their entire length.

The second bridge and the railings around the inscriptions were linseed oiled.

Some repairs were made on the first bridge, but that job is now

UNITED STATES
DEPARTMENT OF THE INTERIOR

at a standstill awaiting more lumber.

Some repair work was done on the trucks here at the Monument, and some work, such as relining the brakes and installing a new drive shaft on the pickup, was done in garages.

The cliff swallows came back on the 8th of June, but did not stay. Usually they nest here. The eagles raised one eaglet, we know, because the youngster was down on the ground learning to fly this month. He was down along the trail (visitors took pictures of him) for a few days, but soon vanished. He must have learned to fly.

We are gradually getting converted from gas to electricity. This month, we bought an electric cook stove.

The New Mexico Institute of Mining and Technology is mapping this area. A few of the men are camped on the Monument for a few weeks.

NATIONAL PARK SERVICE

Gran Quivira National Monument
Gran Quivira, New Mexico

June 23, 1953

Memorandum

To: General Superintendent
From: Superintendent, Gran Quivira
Subject: Monthly Narrative Report for June

Weather. This month has been very pleasant. High winds have abated, sufficient moisture was received to settle the dust, and temperatures ranged from a cool 40 degrees minimum to a warming high of 95 degrees. Precipitation of .79 of an inch was received in five separate showers and the results are reflected in the lushness of the summer vegetation.

General. A good bean crop is almost a certainty this year, say local farmers. That is, if the cut worms don't get to the stalks, or the sand doesn't smother them, or it continues to rain for the next month or two. Most of the land surrounding the monument is under cultivation in anticipation of a bumper crop that will once more make this the hub of the bean country. I like poker, myself.

NPS Visitors. Mrs. Homer Hastings and daughter from Chaco Canyon National Monument on the 4th.

Mr. Darrel H. Crumley, Chief Clerk, SWNM, on the 20th.

Road and Trail Maintenance. Additional road maintenance was possible this month with the receipt of funds from your office. Crushed rock filings, about 20 ton of it, was hauled from Mountainair and spread in the parking area and along the worst spots on the entrance road. This has alleviated to a great degree the dust from moving cars and will strengthen the road bed during the rainy season.

General Maintenance. Two additional picnic tables were constructed, painted, and put in use. A new mixing faucet was installed in the residence and repairs were made to the residence front door. A screen door was installed at the residence also.

Sixty feet of underground conduit and electric wiring were replaced between the shallow well pump and the residence meter.

DEPARTMENT OF THE INTERIOR

Personnel. Mr. Joseph A. Roberts of Santa Fe entered on duty as seasonal ranger on the 17th. For years, various Superintendents of this one-man area have been struggling with kerosene and gasoline barrels, sweeping, shoveling, talking, and generally trying to spread their services where they will do the most good. There is a limit to what one man can accomplish or attempt to accomplish. We welcome Ranger Roberts then and hope that his employment is the beginning of a new era.

Interpretation. Visitor reaction to the improved self guide trail and the guiding pamphlet has been generally good to enthusiastic. Some of the comments include, "A leisurely informative tour", "quite a bit of history behind that pile of rock", "Why don't you have something like this at the other missions?" (meaning Abo and Quarai). Guide service and interpretation were provided to visitors all month. Three hundred and ninety-three persons visited the museum.

Travel. Out of State visitors increased this month and we had a total of 447 persons in 117 cars. This is an increase of 38 percent over last year.

Approach Roads. The high winds in the early part of the month drifted sand across the highway in several spots causing some inconvenience to the traveler. The State blade worked the Mountainair highway on two occasions and at this time all roads are in fair shape.

GREAT SAND DUNES NATIONAL MONUMENT

Alamosa, Colorado

June 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Great Sand Dunes

Subject: Superintendent's Narrative Report for June, 1953

Weather Conditions

Windy cold weather until June 9 hindered travel but welcome moisture during the latter part of the month aided travel for that period.

Maximum temperature - 84° on June 10, 11, and 23
Minimum temperature - 34° on June 3
Precipitation - 1.25 inches

General

Word has been received from the Washington Office that the Great Sand Dunes will be removed from the Southwestern National Monuments group on July 1 and will then be under the direct supervision of the Regional Director, Region Three.

Inspections

Mr. Davis visited us on May 31 and June 1 on a "busman's holiday".

Mr. Hugh Miller and Mr. Carpenter of the Region Three Office were here on June 16 on matters pertaining to the transfer of direct supervision of the Great Sand Dunes from the General Superintendent of the Southwestern National Monuments to the Regional Director.

General Publicity

Photographers visiting the Great Sand Dunes in June included Charles Wunder of the Denver Post, Joseph Muench of Santa Barbara, California with 9 amateur photographers on a photographic tour, Arthur Rothstein of Look Magazine, Charles Grover and Kyle Counts of Colorado Travel Guide, and W. Emerson Scott taking 16 mm. movies.

I am sure that you will understand my position.

The Pueblo Chieftain ran a special article in their Sunday edition showing pictures of the dunes including one with Ranger Moeny in official action.

Maintenance and Rehabilitation

The rehabilitation project was completed on June 15. The trailer house and tool shed were given exterior coats of green paint. A set of steps was built on the steep hill between the trailer house and the superintendent's residence and a new concrete slab was poured in front of the trailer house. A lawn was planted in the rear patio of the superintendent's residence.

Three picnic tables were planed off and given the burnt umber-linseed oil treatment during the month and the easel display at the lower campground was repainted. Construction of the register stand for the Montville Nature Trail was finished except for painting which will have to wait until next fiscal year.

Campground cleanup took a great deal of time as camping increased over 100% over that of last year. Some time was spent relocating picnic tables and leveling and cleaning around the grates.

The monument road was graded weekly and is in fair shape as a result of the precipitation received.

Approach Road

Both approach roads to the monument were maintained in good condition by Alamosa County.

Interpretive Service

Some time was spent taking pictures for use in the printed booklet for the Montville Nature Trail.

150 feet of time lapse movies of shadows on the dunes were received from Munitalp Foundation.

Talks were given outside the area to 36 members of the Lions Club of San Luis, Colorado on "The Origin and Development of the National Park Service", to 38 members of the San Luis Institute of Arts and Crafts on "Desert Animals", and to 39 members of the Costilla County Rotary Club on "Recreation is a National Problem".

Southwestern Monuments Association Sales

Our quarterly inventory shows that the annual sales of SWMA publications increased from \$376.59 in fiscal year 1952 to \$452.75 this year.

The Public Health Service has a special service in which many
other special services are being conducted for the purpose of
an official action.

Investigation and Administration

The investigation program was completed in July 1941. The
Public Health Service had been given authority to conduct
a set of steps in the early fall between the Public Health
and the Department of Agriculture and a new committee was formed
in the fall of the Public Health. A new committee was formed in the fall
of the Department of Agriculture.

Three special studies were given to the Public Health Service
which included the following: the study of the health of the

Increase in Travel

An 8% increase in travel from 3353 visitors in June, 1952 to 3616 visitors this month occurred. This leaves the increase in annual travel at about 13%. It is interesting to note that in June travel from Colorado decreased slightly so the increase came entirely in out-of-state visitors.

Camping increased over 100% over that of June, 1952.

Visitors

Mr. and Mrs. Davis and Ann visited us on May 31 and June 1 on their return trip from Colorado Springs where Ann attended school last winter.

Mr. Hugh Miller and Mr. Carpenter of the Region Three Office were here on June 16.

Other National Park Service people visiting us were Mr. and Mrs. Kenneth Armitage en route to Yellowstone National Park where Mr. Armitage is a seasonal ranger-naturalist.

A group of 40 Louisiana State University students on a field trip in connection with their summer camp near Colorado Springs spent the night of June 22 here.

Personnel

Mr. Robert E. King was terminated as seasonal ranger on May 29 and entered on duty as laborer leadman for weekends only on June 5. Mr. Eugene E. Moenzy entered on duty as seasonal ranger vice Robert E. King on May 30.

634.0

Montezuma Castle National Monument
Camp Verde, Arizona

June 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report for June 1953

Weather: It was cool and windy the first part of the month. However, hot weather arrived June 9, and days since then have constantly passed the 100 degree mark. The hottest day was recorded on June 22 when the mercury reached 108 degrees. No rain fell during this report period.

Travel: June as usual brought the customary increase in travel. Our records show that 5,336 people in 1,556 cars visited the Castle and 2,106 people went to the Well. Total visitation of 7,442 is a slight increase over June of last year.

Visitors: On June 1, Prof. Deaver and Field Biology Class of 22 students visited the Well and Castle. This group was given special attention at both the Well and Castle.

On June 9, Seasonal Ranger Nowell and family from Sunset Crater.

On June 21, a YMCA group of 20 young people were given a special talk and tour of Sycamore Trail.

On June 22, Park Ranger Barrel from Chiricahua.

Publicity: The Arizona Republic on Sunday, June 14, carried an interesting article on the area. This article was entitled "This Weeks Hike" by Gordon Shepard, and it stressed the nature trails at both the Castle and Well.

Interpretation: The interpretive program was shifted into high-gear as of June 14 when the Seasonal Ranger entered on duty. The Castle area is now open and staffed from 8:00 a.m. to 6:00 p.m., and through the noon hour. Most visiting groups are contacted informally at the model location and there given the story of the area. A more formal talk is given to larger organized groups or when several small groups arrive at the same time.

We are also happy to report that, by changing the employee work schedule, it has been possible to relieve for one day the ranger at the Well. This means the Well is closed for only one day now as compared to two. When we say the Well is closed we mean the museum only.

Maintenance and General Work: The old 360 gallon water pressure storage tank was removed and replaced by a battery of four 120 gallon tanks. This increase in storage has improved the water pressure throughout the system and has taken some of the load off the pump by decreasing the frequency of pumping periods.

For safety purposes a couple of Sycamores were topped to remove dead growth. Since these trees furnish shade for the model and seating arrangement, removal of their tops in a manner so as not to damage the structures proved a difficult job.

Roads and Trails: The small loop trail which extends along the top of the talus slope in front of the Castle and by some caves was completed. This section of trail is used by a good many people and its construction has eliminated a safety hazard as visitors insisted on climbing here before the trail was built.

At the Well, the entrance road was patched and graded. Also, signs were oiled and placed in shape for summer travel.

Museum Exhibits: At the Well, time between visitors was devoted to exhibit construction. Two panels at the museum were completed and painting for a third is now being prepared. The Apache exhibit for the Castle museum is in preparation. More plants were collected and mounted for the Layman's Herbarium.

Research and Observation: An archeological research program was worked up and submitted with recommendations for approval. This program includes excavation of a couple of ruins in the Castle area and one at the Well.

Pierson cataloged and stored over 100 archeological specimens excavated this past year from Richards cave 3 miles north of the area. This work, as previously mentioned, is being done in cooperation with the Museum of Northern Arizona.

Mule deer have been observed off and on at the Well, and gray foxes recorded at both the Well and Castle. A Warbling Vireo constituted a new bird record at the Well.

Tree Diseases: Tremendous improvement in the vigor and appearance of the Sycamore trees over their condition of last year has been noted. This is probably due in part to insecticide treatment accomplished last month. In fact, it is beginning to appear doubtful if these trees will need extensive pruning this fall as has been previously recommended.

John O. Cook
Superintendent

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

June 25, 1952

Memorandum

To: General Superintendent

From: Seasonal Ranger, Natural Bridges National Monument

Subject: Monthly Narrative Report for the month of June, 1952, for Natural Bridges National Monument.

GENERAL: Bates E. Wilson, Superintendent, Arches National Monument, my family and self arrived on June 18, officially opening Natural Bridges National Monument. Mr. Wilson remained several days assisting in opening the Headquarters and to orientate me with the area. Winter debris is now cleaned away from the headquarters and camping area.

WEATHER: Since opening Headquarters, the weather has been continually hot but not unbearably so. Most afternoons and evenings have been windy. Whenever the air is calm the black gnats are ferocious.

TRAVEL: Between June 18 and June 24, a total of 181 people visited the area in 42 cars and 45 people utilized overnight camping facilities. The registers show that from November through June 17 a total of 1143 people came to the Monument.

INTERPRETIVE: Of the number of persons visiting the Monument from June 18 to June 24, a total of 93 were contacted at Headquarters. 45 were registered at Kachina Lookout and 49 registered at Headquarters during ranger's absence. The Headquarters-Sipapu trail was used by 42 persons.

ROADS & TRAILS: The entry road is in fairly good shape. The trail from Headquarters to Owachoma has been cleared of winter-gathered rocks and debris. The Owachoma-Sipapu trail is in good condition giving hikers no trouble. Some overgrowth needs to be cleared from the Sipapu-Kachina and the Kachina-Owachoma trails. Plans are made to take care of this very soon. Loose rocks have been cleared from the trail leading from Kachina Lookout to the bottom of White Canyon.

LOCAL: From Blanding to the pass, the Bear's Ears road is rough. The new road still partially under construction is badly cut up in spots and until further work is done, we are not advising tourists to use it.

An airstrip has been bulldozed at Deer Flat but should not be used by flyers not used to rough terrain landings and then only on emergency.

C. Robert Sundwall

C. Robert Sundwall, Seasonal Ranger

Navajo National Monument
Tonalea, Arizona

June 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report for June, 1953

Travel: Our travel for June 1953 has nearly doubled the previous travel record for June. We have had 40 visitors this month and of these, 194 camped one or more nights in the area. A chartered Greyhound bus carrying 42 passengers was able to reach the Monument headquarters due to the improvement of the road.

Weather: After a long delay summer weather has finally arrived. The high temperature for the month was 92 degrees and the low was 35 degrees. There has been no rainfall during June. There were several days of very high wind.

Roads: Due to the dry condition and the persistent wind blowing the sand the roads are in poor condition. There is one section where realignment may be necessary to avoid a huge sand dune. Our efforts with the small Galion Motor Patrol to move part of the dune from the road are useless. The winds have dug deep chuck holes in our road and approach roads and drifted in dunes in other spots. The damaged bridge across the San Juan River by Mexican Hat has been temporarily repaired and traffic resumed.

Special Visitors: Mr. and Mrs. Roberts, Denver Museum of Natural History.

Mr. and Mrs. Robert Euler, Museum of Northern Arizona
Miss Katherine Bartlett, Museum of Northern Arizona
Mr. E. McKee, Director of Research, Museum of N.A.
accompanied by several coal experts from Pennsylvania.

Special Activities: Most of three days and nights were spent looking for two Boy Scouts lost in Kaakali Canyon. There were three white men - myself included - and six Indians who actually went into the canyon in search of the boys. The following are the conclusions reached by the searchers after the boys had been found.

State of Kansas
To the Honorable
Legislature

January 1, 1908

Commissioner

To the Honorable

Legislature

Respectfully Submitted

Enclosed for the Honorable
Legislature are the reports of the
Commissioner of the State of Kansas
for the year 1907. The reports of the
Commissioner of the State of Kansas
for the year 1907 are as follows:

1. Report of the
Commissioner of the State of Kansas
for the year 1907.

2. Report of the
Commissioner of the State of Kansas
for the year 1907.

3. Report of the
Commissioner of the State of Kansas
for the year 1907.

4. Report of the
Commissioner of the State of Kansas
for the year 1907.

UNITED STATES

DEPARTMENT OF THE INTERIOR

At no time would it have been impossible for the Scouts to have back tracked their way to camp.

The boys had told other Scouts that they intended to walk to the San Juan River so the trek was deliberately planned.

They had one survival ration which contained food for 1 man for three days plus other food items and water. It was obvious they had not suffered from lack of food and water.

When the boys were found they were bathing in a water hole. Coming out of the canyon they were able to keep in advance of the search party by some 300 yards. Yet, a few hours earlier when a search plane was circling overhead they were "too pooped" they said, to crawl from a hogan in which they were resting and identify themselves.

It is unfortunate that they were hailed on the radio and in the press as "heros" who had survived a terrible ordeal.

General: For the first time in 2 years the water pump had to be repaired. The pump had been serviced during this period but had not needed any adjustment or replacement of parts. Believe me, this long period of successful operation is a far cry from the attention it used to require.

A new magneto was purchased and installed in one of the Kohler light plants. The two regularly used magnetos broke down completely and have been sent off for repair.

New roofing paper was laid on the museum-contact station roof. This became necessary after a recent high wind had stripped off the old paper.

A leaf in the right front spring of our jeep was replaced and all equipment serviced.

One trip was made to Flagstaff for supplies and to do some research for the proposed diorama of Keet Seel.

Requests for information answered: 18. An article on Navajo appeared in the FORD TIMES.

Accidents: A lady visiting Betatakin Ruin broke her right wrist when she fell near the spring. She was driven to Tuba City hospital for treatment.

SWMA: The cash sales at Navajo for the 3 month period ending the last of June is greater than the sales recorded for any previous years' period.

Persohnel: Laborer and Mrs. Bob Black have a new baby boy.

John A. Aubuchon
Superintendent

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Organ Pipe Cactus National Monument
Ajo, Arizona

June 25, 1953.

Memorandum

To: General Superintendent, Southwestern National Monuments

From: Superintendent, Organ Pipe Cactus

Subject: Monthly Narrative Report for June, 1953

Weather:

Summer arrived with a blast during the latter part of the period. After a cool spring with temperatures in the 80's, it jumped to 110 degrees which has left everyone gasping. High for the month was 110 on the 13th and again on the 21st. Low for the month was 50 degrees on the 4th and no precipitation fell for the period.

General:

The superintendent made one trip to Tucson on June 16, returning on the 17th, to pick up seed for Soil and Moisture Program, and for repair of the grader motor. A visit to Saguaro National Monument was made while in Tucson.

The big news this month was receiving word that we would leave the Southwestern Monuments on July 1 and go directly under the Region. We shall certainly miss our happy associations with the Southwestern Monuments and hope we will not be forgotten.

New Construction:

Our campground construction was completed during the period with exhaustion of the funds in this account. All is completed except for oiling of the roadways.

Only finishing touches remain to be done on the headquarters roads project. Curbing remains to be purchased and set in the parking area, then the road will be ready for oil with a final working after our summer rains.

Soil and Moisture Program was completed with the construction of water catchments and seeding.

Interpretive Service:

Interpretation has suffered during the period due to the lack of personnel. With one position unfilled and our remaining ranger on annual leave, we are not able to man our contact station at all times. We believe nearly everyone stopping has received some contact, however short.

Research and Observation:

We were pleased to work out a research program with the Fish and Wildlife Service to be carried on over a long period of time. The following Fish and Wildlife Service officials, Paul F. Hickie- Denver, in charge Wildlife Investigation on Public Lands, Daniel L. Leedy - Washington, in charge Wildlife Research Units, Durward L. Allen of Washington, Asst. Chief Branch of Wildlife Research, Lyle W. Sows, Leader, Cooperative Wildlife Research Unit, University of Arizona, and Charles R. Hungerford, University of Arizona, visited the area June 2 at which time the program was discussed and tentatively set up with the hope it can be started in 1954. Report of this was made to your office earlier.

A deer was killed on the highway and Ranger Henson preserved the skull for our collection.

Personnel:

Supervisory Ranger Henson is on annual leave from June 16 to July 26. Laborer Brown is also taking 10 days annual leave and will return to work July 1. All but one W.A.E. employees have been terminated since it is becoming too hot to get efficiency from hand labor.

William R. Superbaugh
Superintendent

Special activities:

The Park's Wildlife of Sonoran Desert has a preliminary report from the Survey of the Park's Wildlife, which was prepared by the Park's Wildlife Survey.

WILLIAM A. WALKER
Special Agent in Charge

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Saguaro National Monument
Tucson, Arizona

June 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Saguaro

Subject: Monthly Narrative Report for June 1953

General

It was with considerable surprise that the news of the several monuments under the administration of the General Superintendent would revert to the direct supervision of the Region Three Office. We appreciate the friendly efforts of all the Globe office staff and we are sure that the "Good Neighbor" policy will remain in effect.

Weather

Hot weather arrived with genuine finality at mid-month. A maximum of 109 degrees was reached on June 23. Showers accompanied by a crackling lightning storm occurred on June 12 & 13. A total of 0.23" of moisture was recorded. The showers provided limited relief to forested area and desert. Water storage at spring sites in the area continues to drop and no improvement is in sight. Very dry conditions still exist in the forested area.

A light freeze occurred on June 3 at Manning Camp and a high of 81 degrees was recorded at Mica Mt. Tower on June 23. Winds measured at 18 miles per hour occurred on June 17 to carry our Fire Danger to a 69 High reading.

Special Activities

The Karl Barfields of Houghton Road had a welcoming party for the Lewis' on June 6. Forty-five people from Tucson and suburbs attended.

Superintendent Lewis was the guest of Mr. C.E. Goyette at the Tucson Rotary Club weekly meeting on May 27.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Department of the Interior
Washington, D.C.

June 21, 1934

Memorandum

To: General Superintendent

From: Superintendent, Mammoth

Subject: Mammoth National Monument, June 1934

Summary

It was with much surprise received that the news of the several hundred cases of the administration of the General Superintendent would be the direct supervisor of all Mammoth Park office. We appreciate the friendly efforts of all the field office staff and we are sure that the good relations policy will remain in effect.

Details

Had we not received this surprise letter in this office, we would have been surprised to learn that the General Superintendent of the Mammoth National Monument would be the direct supervisor of all Mammoth Park office. We appreciate the friendly efforts of all the field office staff and we are sure that the good relations policy will remain in effect.

The Mammoth National Monument is a beautiful area and we are sure that the good relations policy will remain in effect.

Very truly yours,
Superintendent

The Mammoth National Monument is a beautiful area and we are sure that the good relations policy will remain in effect.

The Mammoth National Monument is a beautiful area and we are sure that the good relations policy will remain in effect.

General Superintendent John Davis and Naturalist Arnberger were Saguaro visitors on May 26. Mr. Davis was extremely helpful in providing guide lines and a concise picture of the special problems of the area. Messrs. Davis and Arnberger reviewed the Administration - Museum Building site and offered many helpful suggestions in the conduct of the interpretive program.

Architect Kenneth Saunders went over the proposed Administration Building on May 27. On this same date Mr. Saunders visited the Madrona Ranger Station where progress of the repair and rehabilitation program was reviewed. Supervisory Ranger Steele called attention to critical condition of the Madrona septic tank and need for replacement.

Status of Private Lands

The Saguaro land exchange problem involving the University of Arizona and State lands became a rather lively issue during June. A complete exchange of correspondence on this subject was received on June 12.

Maintenance

Supervisory Ranger Steele and the trail crew have opened the primary trail system. Present work is aimed at restoring trail drains and water bars.

Several minor wrinkles remain to be ironed out in the Saguaro Water System. One phase has been taken care of, that of excessive cycling by the main pump. The present secondary pump and pressure cushion tank does not function as the tank does not circulate nor receive fresh water. The solution appears to be merely one of mechanics and can be solved.

Our Onan Diesel Light Plant is again inoperative and we are still waiting for the factory to ship the necessary parts ordered by Mr. Earl Wilson to accomplish the original service repair on the guarantee. Correspondence on this matter is going into the seventh month with sales agency and factory.

Roads

Native stones were placed along the roadside at sites 4, 5, and 6 to prevent damage to the exhibits by wandering motorists. In the interests of safety a simple masonry wall was placed at the overlook at site 21. This site will require further modification to provide easier entrance and exit by visitor cars.

THE SECRETARY OF THE ARMY
WASHINGTON, D. C.
JAN 10 1921
TO THE SECRETARY OF THE ARMY

SUBJECT: [illegible]

[illegible text]

[illegible text]

New Construction

The low bid of \$22,500 by the Frontier Construction Company for the building of the new Saguaro Administration - Museum Building has gained approval at all levels except the Secretary's Office.

Interpretive Services

Travel and use of the Monument maintained a steady pace. The "personal touch" so prominent in the Southwestern Monument finds popular response in the visitor.

A total of 1,613 persons in 474 parties were contacted at monument headquarters and used the Cactus Forest Drive Booklet. This amounted to a total of 98.6 hours contact time for an average of 12.5 minutes per party.

Arizona-Sonoran Desert Trailside Museum continues its aggressive drive toward a goal which will embrace the full story of desert biology. An announcement in the Tucson Citizen of June 20 carries the news of the addition of Mr. Lewis Wayne Walker to the staff. Among his skills Walker is a skilled artisan in duplicating in wax and latex many forms to provide habit scenes for placing animal life on exhibition. It is possible for Mr. Walker to apply this same skill to simulate the blossoms of the Saguaro and other cacti to enable the museum to have a year long display or exhibit of cactus flowers.

Visitors

NPS and Cooperating

- June 1 - Dr. Durwood Allen, U.S. Fish and Wildlife Service, Washington, D.C.
Dr. Daniel Leedy, U.S.F.W.S., Washington, D.C.
Mr. Paul Hickie, U.S.F.W.S., Denver, Colorado.
Dr. Lyle Sowls and Bob Hungerford, U.S.F.W.S., Tucson.
- June 2 - William C. Bryan, Pathologist, U.S.D.A., Tucson, Ariz.
" 3 - Jerry Cannon, Wildlife Illustrator, Tucson, Arizona.
" 16 - Supt. William Supernauth, Organ Pipe Cactus Nat. Mon.
" 18 - John C. Knox, U.S. F.W.S., Phoenix, Arizona.

Other

- June 7 - Harry Schuttler, Div. Manager, Standard Stations Inc.
" 14 - Dr. Mark Williamson, Photographer, Oceanside, Calif.
" 17 - Dr. Ben Bialk, University of Arizona, Tucson.

Ranger Service

Supervisory Ranger G.E. Steele devoted the major part of June to preparing and conducting a Fire Control Training Conference,

- Saguaro National Monument -

Ranger Service (con't)

employing and training fire control personnel and trail workers, and setting up the facilities at Manning Camp.

Ranger Ben Zerbey was on headquarters and interpretive work for the entire month.

Police Protection

Harry C. Stein, age 42, and Joe Ferthing Jr., age 18, Tucson, Arizona were apprehended by Superintendent Lewis on June 14. The men had dug up two large specimens of Ocotillo and loaded them into their vehicle and were encountered driving against traffic at site no. 21. The men were taken to headquarters where an interview revealed that they were totally unacquainted with National Park Service regulations and objectives. A careful explanation of the Service policies seemed to come as a new experience and pleasant surprise.

Forestry

The annual Fire Control Training Conference was well timed. It was held on June 10, 11, and 12 and attended by all monument personnel except Ranger Zerbey. On June 13 Fire No. 1 broke out on Turkey Creek. The fire was the result of a heavy lightning storm that had stabbed the Rincon and Tanque Verdes for six hours. It is most fortunate that the strikes only produced one fire. The fire was in extremely steep terrain and confined to heavy scrub oak.

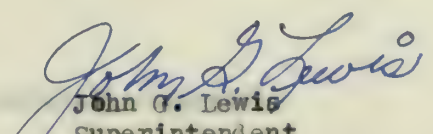

Class of Fire Danger Day readings remained in the moderate until June 17 when winds and temperatures combined to raise the index to "High" or Class IV. It is felt that our anemometer readings have been low and thus made for inaccurate reflection of true criteria.

Personnel

The following personnel were appointed and entered on duty as indicated:

| | |
|---|---------|
| John E. Cook, Laborer | 5/25/53 |
| Thomas M. Moran, Fire Control Aid, IGS-3 | 6/1/53 |
| Eber G. Glendening, Fire Control Aid, IGS-2 | 6/1/53 |
| Andrew Lee Deming, Laborer | 6/1/53 |
| James M. Peel, Laborer | 6/3/53 |
| James D. Edwards, Laborer | 6/5/53 |

Laborerleadman Frank Stansberry was on annual leave June 16, 17, and 18.

John G. Lewis
Superintendent

- Saguaro National Monument -

New Construction (Too late to classify)

A telegram was received by the Tucson Daily Citizen from the office of U.S. Senator Barry M. Goldwater stating that award was made by the Interior Department to the Frontier Construction Co. of Tucson in the amount of \$22,500 for construction of the new administration building.

J.G.L.

Tonto National Monument
Roosevelt, Arizona

June 27, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tonto National Monument
Subject: Narrative Report, lml, Tonto, June 1953

Weather. Hot and dry. 105° maximum. Strong winds much of the time. No rain since first week of March. Fire danger extreme most days.

Visitors, NPS & Special.

Personnel Officer John Stratton & Mrs. Stratton, Mr. & Mrs. Harry Boatwright, Chief Clerk Darrell Crumley, of Gila Pueblo, and Helen McLane of Region Three, May 30.

Architect Kenneth Saunders, Region Three, May 30.

Mr. & Mrs. Henry Dusterdick, brother of Mrs. Wenger, May 30.

Mr. D. Cable, USFS Sierra Ancha Experimental Station, with Mr.

Saadun Yousuf Serkahig, Ministry of Agriculture, Baghdad, Iraq, June 2.

Mr. Harlan Arnold, Soil Conservation Service, June 3.

Naturalist Les Amberger & family, June 4.

Mr. Cochran, Model Homes, Phoenix, prospective bidder on construction.

Mr. Bert Gibbs and Mr. Williams, Frontier Development Corporation, Tucson, prospective bidder on proposed construction here, June 17.

Landscape Architect Warren Oblinger, Sidney Malbon, and Mrs. Malbon, June 25. Architects Oblinger and Malbon checked on the status of the entrance road project, and staked out locations for the comfort station and residences proposed here.

Fires. A small fire on the northeast boundary on May 31 was controlled by the Tonto staff, and the Forest Service fire guard provided mop-up and standby service until the fire was out. This was along the Apache Trail, on both NPS and Forest Service land.

On Sunday June 21, a fire started from a cigarette thrown from a car, on the approach curve to the parking area. Due to prompt volunteer cooperation by visitors, we were able to put it out quickly, but it could have been a serious fire, endangering a residence and Cholla Canyon.

UNITED STATES DEPARTMENT OF JUSTICE
WASHINGTON, D. C.

June 17, 1934

TO: The Honorable Earl Warren, United States Supreme Court Building

FROM: Special Agent in Charge, Federal Bureau of Investigation

SUBJECT: Investigation of the activities of the American People's Party

Reference is made to the letterhead memorandum dated June 14, 1934, captioned as above, and to the report of Special Agent in Charge, New York, dated June 14, 1934, captioned as above.

Summary of the Investigation

On June 14, 1934, the New York office of the Federal Bureau of Investigation received a letter from the American People's Party, New York, dated June 14, 1934, captioned as above.

The letterhead memorandum dated June 14, 1934, captioned as above, contains a summary of the investigation conducted by the New York office of the Federal Bureau of Investigation, and a copy of the report of Special Agent in Charge, New York, dated June 14, 1934, captioned as above.

The investigation conducted by the New York office of the Federal Bureau of Investigation, and the report of Special Agent in Charge, New York, dated June 14, 1934, captioned as above, show that the American People's Party, New York, is a political party which is organized for the purpose of securing the election of its candidates to the United States Senate and the United States House of Representatives.

The investigation conducted by the New York office of the Federal Bureau of Investigation, and the report of Special Agent in Charge, New York, dated June 14, 1934, captioned as above, show that the American People's Party, New York, is a political party which is organized for the purpose of securing the election of its candidates to the United States Senate and the United States House of Representatives.

Travel. SW visitors to HQ. & museum this month, an increase of 746 over last June, and 100% over June two years ago.

First-aid. Also on Sunday June 21, a woman was overcome by the heat on the ruins trail. Archaeologist Sawyer administered first aid, and with the assistance of Mrs. Shar, the woman was treated for about two and a half hours at the superintendent's quarters, there being no other adequate place here to treat a patient. The woman's husband had carried her part way down the trail, and when he put her down to rest a moment, soaked her on a hot rock. She suffered quite a burn, on a place, to quote Alexandre Dumas "one commonly shows only to the apothecary". This seemed to be about as distressing as the manstroke.

Research. A batch of live tritons was delivered to Dr. Morris Wood, Los Angeles City College, by Dr. Martin Sawyer, father of archaeologist Sawyer. Dr. Wood expressed his appreciation, and wrote that with these he could start new colonies for further experiments. So far, he has found negative results from the Tonto tritons, with regard to trypanosoma cruzi.

Wildlife. A deer was sighted on the entrance road, not too common a sighting here. A skunk was caught in the underpinning of Mr. Sawyer's trailer quarters one night, and was freed by the intrepid archaeologist with no unfortunate results.

Projects. The roadside cleanup project is complete and will be reported as such, this month. A completion report will be sent in as soon as we can get it out. The project was inspected by landscape architect Oliver on June 23.

It is planned to keep the residence road and water system projects open until the road can be finished up closer to standard, and can allow made to the proposed residences. The road crew man, Charles Moody, will be kept on for another 2 or 3 weeks.

General. The superintendent was present at the opening of bids, at Cila Pueblo, June 26.

Two new radio batteries were obtained.

Mrs. Sawyer is recovering excellently from her operation, and is visiting Mr. Sawyer's parents in Denver.

June was another hot, busy month.

Charles C. Sawyer,
Superintendent

THE SECRETARY OF THE ARMY
WASHINGTON, D. C.
JANUARY 10, 1917

SIR: I have the honor to acknowledge the receipt of your letter of the 7th inst. in relation to the proposed purchase of land for the proposed establishment of a new military post at the mouth of the Colorado River, near the international boundary between the United States and Mexico. The land in question is situated in the Territory of New Mexico, and is owned by the Mexican Government. The proposed purchase of this land is for the purpose of establishing a new military post, and is a matter of great importance to the United States Government.

I have the honor to inform you that the proposed purchase of this land is being considered by the War Department, and that the necessary steps are being taken to complete the purchase. I am sure that you will be satisfied with the result. Very respectfully,
Your obedient servant,
The Secretary of the Army

Very truly yours,
The Secretary of the Army

The Secretary of the Army

I have the honor to inform you that the proposed purchase of this land is being considered by the War Department, and that the necessary steps are being taken to complete the purchase. I am sure that you will be satisfied with the result. Very respectfully,
Your obedient servant,
The Secretary of the Army

THE SECRETARY OF THE ARMY
WASHINGTON, D. C.

June 25, 1953

Memorandum

To: General Superintendent, S. W. N. M.

From: Acting Superintendent, Tumacacori

Subject: Superintendent's Monthly Narrative Report for June, 1953

Weather Conditions: This month was dry and hot. It did cloud up enough for a sprinkle of ".04" on June 13. I saw a crow winging its way home the other afternoon and he was flying with his mouth open he was so hot.

The temperature pulled itself up to 107° on June 23rd and took a dip to 43° on the night of June 2nd.

Special Activities: At separate times Archaeologist Van Valkenburgh, Seasonal ranger Smith, and I have visited the new Amerind Foundation cave dig about 10 miles southwest of this monument. It appears to be a very old site for they have found various evidences of habitation all of the way from sardine cans on the surface, through a mass of potsherds, to fossilized camel vertebrae and teeth. Both red and black pictographs were of interest.

Inspections: May 21 and 29 Architect Kenneth Saunders inspected the rehabilitation job in progress on the superintendent's residence and the protective shelter over a portion of the mission ruins.

Publicity: All local papers carried Superintendent Jackson's press release concerning the new fee system.

Through Archaeologist Potter we hear that the May 7, 1953 issue of Todo contains a feature and picture article on Tumacacori entitled "La Misión de Tumacacori" by el Gral. Ignacio A. Nickscharday.

Maintenance: The monument well was measured by the Agriculture Department of the University of Arizona. It has dropped 7.7 feet since it was last checked on March 15th. This big drop is comparable to that in other wells in the vicinity.

The dump was given its annual burning.

With maintenanceman Deutler spending his full time on the rehabilitation of the superintendent's residence, his regular work came to a standstill. The rangers did take over his jobs of cleaning the restrooms and watering. Little else could be done because the new fee system which went into effect necessitated the presence of someone on contact duty at all times in the mission lobby. The garden just does not look as nice as when it gets "Breezy's" careful attention.

January 1932

Memorandum

TO: The Board of Directors, General Electric Company

FROM: J. Edgar Hoover, Director, Federal Bureau of Investigation

SUBJECT: Investigation of the activities of the American Communist Party, Inc.

Reference is made to the report of the Special Agent in Charge, New York, dated January 10, 1932, and to the report of the Special Agent in Charge, Boston, dated January 12, 1932.

The investigation conducted by the New York Office has revealed that the American Communist Party, Inc. is a bona fide organization.

It is suggested that the American Communist Party, Inc. is a bona fide organization, and that it is not a mere front for the activities of the Soviet Union. It is suggested that the American Communist Party, Inc. is a bona fide organization, and that it is not a mere front for the activities of the Soviet Union.

It is suggested that the American Communist Party, Inc. is a bona fide organization, and that it is not a mere front for the activities of the Soviet Union.

Very truly yours,

J. Edgar Hoover, Director, Federal Bureau of Investigation

Enclosed for the Board of Directors are two copies of the report of the Special Agent in Charge, New York, dated January 10, 1932, and one copy of the report of the Special Agent in Charge, Boston, dated January 12, 1932.

The investigation conducted by the New York Office has revealed that the American Communist Party, Inc. is a bona fide organization.

It is suggested that the American Communist Party, Inc. is a bona fide organization, and that it is not a mere front for the activities of the Soviet Union.

Very truly yours,

Rehabilitation: Mr. Mott has been supervising the big job of rehabilitation of the Superintendent's residence. A carpenter has been hired most of the month and this past week a plasterer has also been on the job. I have helped with the re-wiring whenever possible. The house will have a greatly improved interior with much new cupboard space, new closets, and a rearranged kitchen. It will be considerably more comfortable next winter with a new oil furnace for central heating in place of the small oil burner in the living room.

New Construction: The shelter roof to be placed over a portion of the mission ruins has not been touched by the contractor for over a month. The roof has not been put on because the subcontractor has not delivered the roofing.

Interpretive Service: With the inauguration of the admission fee instead of the former guide fee several new area policies were set up to cope with new problems as they arose. Formerly as few as 20% of the visitors went on guided trips through the mission. Now, well over 90% go on guided trips. Could this be because they don't want to go away without getting their money's worth so they will wait for a scheduled trip when formerly they would not wait?

Research and Observations: The three young cardinals that were doing so well in a tree behind the ranger residence were killed and their nest was torn from its perch. Each bird had bled to death from two cuts in its neck. It looked as if it might be the result of pecking by another bird. Maintenance man Deubler observed a road runner kill a horned toad. Occasionally the bird would grab the toad with its beak and throw the toad up into the air.

Four kissing bugs were found in the ranger residence. These were sent with five others from the Amerind cave dig and from maintenance man Deubler's home in Tubac, to Dr. Sherwin F. Wood of Los Angeles City College for identification. We have seven more to send him this week. Following is a quotation from his letter:

"The large bugs from Bullard's residence are Triatoma longipes. We do not know what other animals it feeds upon besides man. It is slow and sluggish and I suspect comes from ground squirrel burrows or dens of larger animals. Both specimens were negative for trypanosomes. This is a new record to me for occurrence. One longipes from the Bullard residence has numerous bacteria which were actively motile. Although some studies have been made on this group in Triatoma, so far no dangerous pathogens have been found living in the bugs. I have also seen the bacteria in a bug Mr. Arnberger forwarded from Globe."

The two Amerind Foundation digs in the vicinity of Tumacacori have proved to be important enough that Charles di Peso and Barton Wright will return in September for nine months of further investigation. This research is of interest to us in that it is the only

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the East (CLPE) in the United States. The Commission is therefore unable to determine whether the CLPE is a genuine organization or a front organization for the Soviet Union.

...the ... of ...

[illegible][illegible][illegible]

1. The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of California:

archaeological work that has been done south of Tucson except work done on the monument. Maybe some information will become available on the period immediately prior to the arrival of Father Kino. The monument's copy of Di Peso's report on the Sobaipuri Indians has been received. It is one of the liveliest and most skillfully presented archaeological reports we have ever seen.

Increase or Decrease in Travel:

| | |
|--------------------------------------|---------------|
| Visitors this month- - - - - | 3,154 |
| Visitors this month last year - - - | 2,205 |
| Percent increase - - - - - | 43% |
| Highest June travel prior 1953 - - - | 3,021 in 1951 |
| Percent increase over June 1951 - - | 4% |

Visitors: May 30. Dr. Sacks of the Southwest Museum of Los Angeles. He is doing research on Tubac, a village three miles north of here.

Wild Life and Fish Cultural Activities: At first on June 12 I was ready to report a murder in our fish pond. The German carp that was in at least its 14th year was found thrashing violently in the pool while nearby in the water was a snake which we failed to capture for identification. After consulting maintenanceman Deubler it seems that this type of snake has been around almost every year. In a short while the carp was dead. Post-mortem examination revealed a long bruise on its body leading to the conclusion that it died from internal injuries suffered from hitting the brick rim of the pond on one of its leaps.

Personnel: Superintendent Jackson has spent the month in our Globe headquarters on special assignment. While there he has written the self-guiding booklet soon to be used in this area and has prepared several trail side exhibits.

Seasonal Ranger Frank G. Smith was terminated at noon on June 19. He is now off for the cool north rim of the Grand Canyon.

Archaeologist Callie Van Valkenburgh has been helping with the guiding during the absence of Superintendent Jackson. She has also been classifying the Tumacacori potsherd collection and completing an archaeological report on Grand Quivera. We appreciate having Callie back with us as she is an old hand at this area and could step right in and be a great help.

William C. Bullard, Jr.
William C. Bullard, Jr.
Acting Superintendent

1. The first step in the process of identifying a problem is to determine the nature of the problem. This involves a thorough understanding of the situation and the factors that may be contributing to the problem. Once the nature of the problem is understood, the next step is to identify the causes of the problem. This involves a detailed analysis of the situation and the factors that may be contributing to the problem. Once the causes of the problem are identified, the next step is to develop a plan of action to address the problem. This involves determining the steps that need to be taken to address the problem and the resources that will be required to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the implementation to ensure that the problem is being addressed effectively.

THE UNIVERSITY OF CHICAGO PRESS

Tusigoot National Monument
Clarkdale, Arizona

June 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tusigoot National Monument

Subject: Report lml, June 1953

There follows the narrative report of activities in this area for the month of June, 1953.

Weather

No trace of precipitation has been recorded during this report period. High temperature was recorded on June 23 at 107 degrees. There have been more windy days than calm.

Special Activities

Superintendent Brewer and WAE Tour Leader Hill have been active in off duty hours constructing the mine museum in Jerome. The superintendent spoke briefly at the opening ceremony on June 20. Congratulatory messages and verbal praise for the work of the Jerome Historical Society have been gratifying. Attached are announcements and some of the publicity covering the museum.

Official N. P. S. Visitors

Mr. and Mrs. Paul Spangle of Walnut Canyon National Monument on June 2.

Mr. and Mrs. M. Barton of Region Three Office on June 19.

Mr. and Mrs. Frank Kittredge (Retired) June 21.

Mr. Myron Sutton of Montezuma Castle National Monument and Mr. Robert Barrel of Chiricahua National Monument on June 24.

Maintenance, Rehabilitation and General work

Maintaining a polished museum has become a full-time project. Since the mine closed down and no moisture has been added to the tailings, a cloud of dust seems to rise with almost no wind. There are times when visibility on our entrance road

... ..

is so low that lights are necessary. Air pollution has reached a proportion that endangers health. Mr. Tolson's letter on this matter was forwarded to Mr. Russell, General Manager of Phelps-Dodge Corporation Douglas, Arizona. Mr. Henry D. Clark, Mine Superintendent Jerome District and Superintendent Brewer had been discussing methods of stabilizing the dust.

Rehabilitation of the case lighting fixtures has progressed nicely this month; twenty Slim-line fluorescent tubes 64 inches long are on hand. The sockets and ballasts are also on hand for these "instant-start" tubes. One "pilot" reflector was made to our specifications. Using sheet aluminum folded to reflect the light where needed and baffling its glare from visitor's eyes, we have one case completed. Following this model we will complete the other 19 cases as time and money permit.

Projects for the Ensuing Month

Exhibit case illumination.

Cut and hem curtains for the museum windows.

Install the new 200 foot 3/4 inch hose and reel.

Interpretive Service

3481 visitors in 1080 parties entered the monument this month. Last June we had 3374 visitors in 1083 cars. This may reflect the fact that car seats are getting wider. I'm pretty sure that the visitors aren't getting thinner.

3481 visitors went to the ruin, self-guided by leaflet. 3216 entered the museum. 265 visitors were locked out of the museum in out-hours. 100% of our 8-12, 1-5 visitors were contacted in the museum.

Personnel

Archaeologist Carroll A. Burroughs transferred to Wupatki National Monument on May 28. Cal hung up an outstanding record here. He put an end to the 14 year wait for a museum prospectus; he made hundreds of friends for the National Park Service and himself. He and Helen are greatly missed here and throughout the valley. Ida and I are looking forward to a reunion at Wupatki.

is as for the light and scenery. The position has been

Mr. Joseph Hoffmsier reported for duty vice Burroughs on the evening of May 28. He returned on the 29th, announcing that he had received a message stating his mother was in ill health and that he would depart for San Francisco immediately.

Mr. Harvey Kohler, of Montezuma Castle, helped us keep the carpet rolled out until the 31st.

Mr. Edward R. Hill, Jr. entered on duty as WAE tour leader May 31. Ed has been taking hold and falling into the routine nicely.

Miscellaneous

One visitor's question - "They was pretty modern for their day, wasn't they?" And two addresses - "TIZIGOOT" and "TIZIGOOD", each on bills of lading, helped us keep smiling.

This may be our last report from Tuzigoot, and if Tommy Townsend writes the next one, we hope he will find Tuzigoot as interesting an assignment as we did. Good luck, Tommy!

original will advance price for it. Now all we should be able
to do is to get the best price for the old one.

Valiant Canyon National Monument
Flagstaff, Arizona

June 26, 1933

Memorandum

To: General Superintendent

From: Superintendent, Valiant Canyon

Subject: Monthly Narrative Report of Activities at Valiant Canyon National Monument during June, 1933.

Weather Conditions:

Not a drop of moisture has fallen during the report period and windy weather accompanied by high temperatures have continued to make the fire danger as high as it can get. All areas of Coconino National Forest have been closed to camping and picnicking.

Administration

Application was made to the Forest Service and a special use permit was granted for a 1,000 foot right-of-way for our proposed approach road.

All of the administrative duties that generally accompany the end of the fiscal year have been kept current as possible. Heavy visitation and many maintenance projects to be finished have sufficed to keep us pretty busy.

Maintenance

The concrete signs for El Morro National Monument are almost completed, needing only about a half-hour of work. Carved signs are ready to go also. Trails, campgrounds, buildings have all undergone some repair and straightening up, and some of the safety measures recommended by the safety engineers completed. Repair of telephone lines has been accomplished and the phone is working well. High wind blowing branches has made this a continuous project. The interior of Residence No. 1 has been partly redecorated.

Preparations for the oiling of the entrance road have taken considerable time and effort. It was necessary to extend manholes for sewer and water lines to the level of the parking area. The road was graded and leveled for the first coat of oil by June 24. Due to the extreme dryness, water had to be hauled from Flagstaff to wet down the road as pressure and no outlets lower than 3/4 inch did not permit the use of our line. The oil will be applied June 26.

The Pioneer wagon marker was moved and re-set in the approved location with the assistance of the State Highway Department.

Forms are ready for the pouring of the arrest bracket-barthol signs and this will be done when time permits.

Travel

In spite of the rough and dusty condition of our approach road we had the highest travel ever recorded for June and the third highest in our history, being exceeded only by July and August of 1951. Visitors were registered from seventeen foreign countries, three territories, and 46 states. There were 5,500 visitors in 1,700 cars.

Interpretive Services

Colonial Major Stanley F. Walters assumed the duties of this position on June 15 relieving the pressure and allowing the Superintendent some time for other duties. A total of 1.5 and 1/2 hours was spent in actual contact time with 1,500 groups totalling 4,200 visitors.

A.A.A. Visitors

Assistant Regional Director Jernell and Regional Architect Warders on June 15. Landscape Architect Carter was in on June 15. Mr. and Mrs. Barton of the Region three office were in on June 15.

Special Groups

| | | | |
|------------------------------------|------------|-------|--------|
| Jay and Youth Center, Joliet, Ill. | 15 members | | June 7 |
| 7th Jay Adventist Youth Group, | 15 members | | 11 |
| Kawjae Indian Bible School | 47 | | 15 |
| Conservation class, etc | 15 | | 19 |

Fire Protection

The fire cache on the south rim was stocked with tools and supplies, and a trail blazed in with small aluminum triangle reflectors in case of necessity for going in after dark. Constant vigilance is maintained and visitors are cautioned. It may become necessary to prohibit smoking if things get any worse.

Wildlife

Antelope and deer are moving back into the general area in greater numbers than usual. Cattlemen are filling their tanks from our water line and as other tanks have dried up, I believe that the gun is moving in for water.

Llewellyn E. Gifford
Superintendent

It is the duty of every citizen to support the Government in its efforts to maintain the peace and order of the Nation. The Government is the only authority that can protect the rights of the people and ensure the safety of the Nation. It is the responsibility of every citizen to support the Government in its efforts to maintain the peace and order of the Nation.

THE GOVERNMENT

The Government is the only authority that can protect the rights of the people and ensure the safety of the Nation. It is the responsibility of every citizen to support the Government in its efforts to maintain the peace and order of the Nation.

THE PEOPLE

The people are the foundation of the Nation. It is the responsibility of every citizen to support the Government in its efforts to maintain the peace and order of the Nation.

The Government is the only authority that can protect the rights of the people and ensure the safety of the Nation. It is the responsibility of every citizen to support the Government in its efforts to maintain the peace and order of the Nation.

THE GOVERNMENT

Walnut Canyon National Monument
Flagstaff, Arizona

June 28, 1933

To: Mr. A. H. Adams

Re: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon
National Monument during June, 1933.

Weather Conditions:

Not a drop of moisture has fallen during the report period and windy weather accompanied by high temperatures have continued to make the fire danger as high as it can get. All areas of Coconino National Forest have been closed to camping and picnicking.

Administration

Application was made to the Forest Service and a special use permit was granted for a 1/2 mile foot right-of-way for our proposed approach road.

All of the administrative duties that generally accompany the end of the fiscal year have been kept current as possible. Heavy visitation and many maintenance projects to be finished have sufficed to keep us pretty busy.

Maintenance

The concrete signs for all Coconino National Monuments are almost completed, lacking only about a half-hour of work. Painted signs are ready to go also. Trails, campgrounds, buildings have all undergone some repair and straightening up, and some of the safety measures recommended by the Safety Engineers completed. Repair of telephone lines has been accomplished and the phone is working well. High winds blowing across the lake this is a continued project. The interior of Residence No. 1 has been partly redecorated.

Preparations for the oiling of the entrance road have taken considerable time and effort. It was necessary to extend pipelines for sewer and water lines to the level of the parking area. The road was graded and leveled for the first coat of oil by June 24. Due to the extreme dryness, water had to be hauled from Flagstaff to wet down the road as pressure and no water longer than 1/4 inch and not permit the use of our line. The oil will be applied June 26.

The Pioneer Woman marker was moved and re-set in the approved location with the assistance of the State Highway Department.

Forms are ready for the pouring of the Sunset Marker-Memorial signs and this will be done when time permits.

Travel

In spite of the rough and dusty condition of our approach road we had the highest travel ever recorded for June and the third highest in our history, being exceeded only by July and August of 1933. Visitors were registered from seventeen foreign countries, three territories, and 16 states. There were 3,500 visitors in 1,700 days.

Interpretive Services

Seasonal ranger Stanley J. Walters assumed the duties of this position on June 16 relieving the pressure and allowing the Superintendent some time for other duties. A total of 2.5 and 1 hour was spent in actual contact time with 1,000 groups totalling 4,300 visitors.

Local Visitors

Assistant National Director Corneli and National Architect Standers on June 17. Landscape Architect Carter was in on June 18. Mr. and Mrs. Burton of the region three office were in on June 19.

Fire Protection

The fire cache on the south rim was stocked with tools and supplies, and a trail blazed in with small aluminum triangle reflectors in case of necessity for going in after dark. Constant vigilance is maintained and visitors are cautioned. It may become necessary to prohibit smoking if things get any worse.

Wildlife

Antelope and deer are moving back into the general area in greater numbers than usual. Cattlemen are filling their tanks from our water line and as other tanks have dried up, I believe that the fire is moving in for water.

WHITE SANDS NATIONAL MONUMENT

Alamogordo, New Mexico

June 23, 1953

MEMORANDUM

To: General Superintendent, SWNM
From: Superintendent, WSNM
Subject: Report No. 1ml - Superintendent's Monthly Narrative

Travel for June, 1953

Visitors 21,629
Cars 5,121

Travel Year to Date

Visitors ... 96,658
Cars 23,694

ARMED FORCES

Visitors 3,990
Cars 939

Visitors ... 21,200
Cars 5,173

GENERAL:

There follows, the report of activities at the White Sands National Monument for the month of June, 1953:

Weather - Hot and dry, and even some moisture. High for the month was 105 degrees on both the 14th and 15th. Low for the month was a delightful 47 on the 20th. Moisture fell for a total of .20 of an inch.

For the second month in succession, we show a drop in visitors over the same month of last year. This month we show a drop of a little over 500 people and about 200 cars. Our travel year, however, is still ahead of any travel year to date. Many more months of losses, however, will pull us way down. July may be the month that does the trick - if by chance, we do not equal our record of the 4th of July of some 16,000 visitors. We are unable to account for this loss unless it might be heavy winds during the early part of the month - and then - the hot weather hit us hard.

INSPECTIONS:

The Superintendent made a few special trips to Dog Canyon to carefully survey and study the water situation, not only at that point, but the general water situation in that entire region as well, which covers the Army wells and an addition of lands on which the city of Alamogordo is buying up for the water holdings.

We shall await a conference with Assistant Regional Director Patraw on July 4th, before answering a request for information on this subject.

GENERAL PUBLICITY:

Our major one item of publicity this month has been the increase in fees throughout the entire Park Service. These fee changes were carried throughout the Southwest with coverage by all the press associations, local papers, and local and general radio coverage. So far as this office can ascertain, no comment was noted against the increased fee in any of our local papers. Actually, we have gotten little complaint from any source. A little local griping, part of which is in fun, but a little bit of gripe, perhaps, mixed in.

MAINTENANCE:

The majority of time for Maintenance man Rixey has been devoted to water problems. Ray assisted Gene on our chlorinator and both prior to and following this work, we were blessed with other problems on our water system. Lack of water in two instances was caused by sand and foreign matter getting into and stopping up our pressure reducer valve. Serious damage was resulting to our redwood tank and even when we had water, a tremendous loss occurring in the gallonage demanded to soak up the staves. The last time our supply was threatened due to the amount wasted. Arrangements have been made to remedy this as best we can. A request was made by the Army that we put in a system of valve controls in our line to conserve our water when working on the line. We did this to the best of our ability and are trying to cooperate in every way possible. A new well was brought in and all pumps operating developed a couple of serious leaks in our line due to faulty seating of gaskets. Two of the boys worked all Saturday and Sunday morning correcting this fault and we finally had to take out an entire section of pipe. So much for Ray's troubles. Now to go on to some of Joe's problems on roads. In addition to all the heavy winds of last month and all our troubles with roads, the factory man was in and made some repairs on the Gallon. Parts were not available and the machine was down for a week. This time was hard on the roads but Joe, by working over the weekend the past two weeks, is getting the roads slowly back into shape. With the 4th of July facing us soon, we are hoping to have our roads well widened for the strain.

DECREASE IN TRAVEL:

As stated in last month's report 'A continuation of these winds and our June travel will show a decrease as well'. The winds continued the early part of the month and we are about five hundred below June of last year. We are picking up of late and we hope we

2417, and 2418, 2419, and 2420, 2421, and 2422, 2423, and 2424, 2425, and 2426, 2427, and 2428, 2429, and 2430, 2431, and 2432, 2433, and 2434, 2435, and 2436, 2437, and 2438, 2439, and 2440, 2441, and 2442, 2443, and 2444, 2445, and 2446, 2447, and 2448, 2449, and 2450, 2451, and 2452, 2453, and 2454, 2455, and 2456, 2457, and 2458, 2459, and 2460, 2461, and 2462, 2463, and 2464, 2465, and 2466, 2467, and 2468, 2469, and 2470, 2471, and 2472, 2473, and 2474, 2475, and 2476, 2477, and 2478, 2479, and 2480, 2481, and 2482, 2483, and 2484, 2485, and 2486, 2487, and 2488, 2489, and 2490, 2491, and 2492, 2493, and 2494, 2495, and 2496, 2497, and 2498, 2499, and 2500, 2501, and 2502, 2503, and 2504, 2505, and 2506, 2507, and 2508, 2509, and 2510, 2511, and 2512, 2513, and 2514, 2515, and 2516, 2517, and 2518, 2519, and 2520, 2521, and 2522, 2523, and 2524, 2525, and 2526, 2527, and 2528, 2529, and 2530, 2531, and 2532, 2533, and 2534, 2535, and 2536, 2537, and 2538, 2539, and 2540, 2541, and 2542, 2543, and 2544, 2545, and 2546, 2547, and 2548, 2549, and 2550, 2551, and 2552, 2553, and 2554, 2555, and 2556, 2557, and 2558, 2559, and 2560, 2561, and 2562, 2563, and 2564, 2565, and 2566, 2567, and 2568, 2569, and 2570, 2571, and 2572, 2573, and 2574, 2575, and 2576, 2577, and 2578, 2579, and 2580, 25

will soon get back in the increase column. Our travel year to date is still some 2,810 ahead of our best year, so it could be worse.

RANGER SERVICE:

Tom Hickson went on duty as a seasonal Park Ranger on the 1st of this month, and Wendell Henry went to work on the 16th of June.

VISITORS:

Chief Clerk Crumley - Globe Office, and Supervisor of Construction and Maintenance Gene Mott. Our new Chief Clerk stopped in for a few minutes and we were glad to go over the area with him and acquaint him with some of our problems. He is invited to come back as often as it is possible for him to do so.

Gene was in for a few weeks in connection with the installation of our chlorinator, and he, as usual, did a mighty nice job. We are experiencing a little trouble getting the proper valve, etc., but Ray is giving the unit special attention and we are getting along fine thus far.

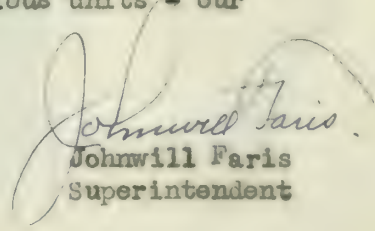

SPECIAL:

Ranger Dan Davis and Joan are the proud parents of an eight pound baby girl, Barbara Lee. Dan took several days leave, but Joan in her able manner has the family all back to normal once again and Dan has reported back to duty. Joan's mother, Mrs. Kelly, of Creston, Iowa, has been here for a few days helping Joan get things back to normal.

CLOSING:

We have received word that after July 1st, White Sands, along with several others, will be removed from the Southwestern National Monuments group and go directly under the Region. Having been born into and reared for twenty years by the Southwestern National Monuments, it will be a little hard to realize that we are not one of this group. We can never adequately express our appreciation for our heritage and shall endeavor to so carry on that the Southwestern National Monuments shall always be proud of the great part they played in our 'bringing up'.

To all the officials and members of the various units - our best wishes always.

Johnwill Faris
Superintendent

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Monthly Narrative Report, Wupatki and Sunset Crater National Monuments.

Weather:

The weather continues to be dry and windy with no precipitation recorded for the month to date. The total precipitation for the first 6 months of this year stands at .86 inches with no rainfall since last April. The month has been quite warm with a high of 103 degrees on June 23 and a low of 43 on June 2.

The rain gauges over the area were measured on June 3 and data sent in to the Museum of Northern Arizona for their records.

Inspections:

On June 15, Landscape Architect Charlie Carter and Engineer, Willard Bradley, Engineering Aid, Kit Wing and Draftsman Virgil Torbert visited Wupatki to make a preliminary survey of the route of the new road from the Earth Crack section to Wupatki Ruin.

Maintenance and General Work:

A new flagpole was made for Sunset Crater and installed on the east side of the parking area near the contact station. Three panes of glass were replaced in the contact station at Sunset Crater.

The 5 KW diesel electric plant at Heiser burnt out the governor solenoid and this part and two other switches were replaced by the company free of charge. Both plants are running fine at this date.

Roads and Trails:

The section from the Citadel to the Earth Cracks was widened, some trees removed and a good many loads of rock removed from the right of way. Material was hauled on the section close to the Citadel. The first 7 miles from the highway in is coming right along now in fine shape.

The entrance road to Sunset Crater is getting in bad shape due to the very dry weather and material is being dumped on it in order to keep it open until the rains come and allow us to blade it smooth.

Interpretation:

At Wupatki 1800 people in 572 parties were contacted for an average time of 15 minutes per party.

At Sunset Crater 3420 people took the Lava Flow trail around the lava flow and 554 people climbed to the top of the crater

Travel:

Travel broke all records for the month of June at both areas. Wupatki had a total of 786 cars and 2384 people for an increase of 103 cars and 381 people. Sunset Crater showed 2051 cars and 6311 people for an increase of 291 cars and 1859 people.

This is a good increase for Wupatki as usually there has been a 10% added to the count to account for Citadel turn-backs. That area is now closed so there has been no % added to register count this month.

We had visitors this month from the following countries; Australia, Belgium, England, France, Germany, Mexico, Peru, South Africa, Switzerland and Canada.

Visitors:

- 6/6 - Senator & Mrs. J. W. Stambough from Alberta Canada
- 6/6 - Mr. G. D. Lassen, Watershed Survey, Bureau of Rec.
- " - Mr. S. H. Robeson, " "
- " - Mr. W. V. Turner, " "
- 6/17- Fourteen members of the Coachella Valley Mineral Society of California
- 6/19- Mr. William A. Anderson, Washington D.C. Mr. Anderson was taking pictures of desert Geology and took pictures of Wupatki Ruin to use showing a pueblo that was abandoned due to desert conditions.
- 6/21- Troop 75, El Paso girl scouts, 18 scouts in all.

Personnel:

Archeologist Carroll A. Burroughs transferred from Tuzigoot National Monument to this area, arriving on June 29 to take over the vacant Park Ranger position at Wupatki.

Spring Flow:

Wupatki - 180 GPD
Heiser - 2100 GPD

Frederick R. Brueck
Superintendent

Introduction

As stated in the first chapter, the purpose of this study is to determine the effect of the various factors on the rate of growth of the population of the United States.

The first chapter is devoted to a general survey of the population of the United States, and the second chapter to a study of the factors which influence the rate of growth of the population.

Chapter I

The first chapter is devoted to a general survey of the population of the United States, and the second chapter to a study of the factors which influence the rate of growth of the population.

This is a general survey of the population of the United States, and the second chapter to a study of the factors which influence the rate of growth of the population.

The third chapter is devoted to a study of the factors which influence the rate of growth of the population, and the fourth chapter to a study of the factors which influence the rate of growth of the population.

Chapter II

- 1. The first chapter is devoted to a general survey of the population of the United States, and the second chapter to a study of the factors which influence the rate of growth of the population.
- 2. The third chapter is devoted to a study of the factors which influence the rate of growth of the population, and the fourth chapter to a study of the factors which influence the rate of growth of the population.
- 3. The fifth chapter is devoted to a study of the factors which influence the rate of growth of the population, and the sixth chapter to a study of the factors which influence the rate of growth of the population.
- 4. The seventh chapter is devoted to a study of the factors which influence the rate of growth of the population, and the eighth chapter to a study of the factors which influence the rate of growth of the population.
- 5. The ninth chapter is devoted to a study of the factors which influence the rate of growth of the population, and the tenth chapter to a study of the factors which influence the rate of growth of the population.
- 6. The eleventh chapter is devoted to a study of the factors which influence the rate of growth of the population, and the twelfth chapter to a study of the factors which influence the rate of growth of the population.
- 7. The thirteenth chapter is devoted to a study of the factors which influence the rate of growth of the population, and the fourteenth chapter to a study of the factors which influence the rate of growth of the population.
- 8. The fifteenth chapter is devoted to a study of the factors which influence the rate of growth of the population, and the sixteenth chapter to a study of the factors which influence the rate of growth of the population.
- 9. The seventeenth chapter is devoted to a study of the factors which influence the rate of growth of the population, and the eighteenth chapter to a study of the factors which influence the rate of growth of the population.
- 10. The nineteenth chapter is devoted to a study of the factors which influence the rate of growth of the population, and the twentieth chapter to a study of the factors which influence the rate of growth of the population.

Chapter III

The first chapter is devoted to a general survey of the population of the United States, and the second chapter to a study of the factors which influence the rate of growth of the population.

Chapter IV

The first chapter is devoted to a general survey of the population of the United States, and the second chapter to a study of the factors which influence the rate of growth of the population.

August 10, 1953

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report for *July* ~~August~~ 1953

Weather

July was a hot month, with heavy rainfall over many of the areas. More attractive countrysides as a result of improved moisture conditions were reported from Capulin Mountain, Chaco Canyon and Coronado National Memorial. In the latter area, the grasses which had been dry all year were up four to six inches, but the oak trees which have been hurt by drouth conditions had not yet responded to the rains.

Hot, sticky weather and heavy showers which made roads impassable or very rough in many areas had an adverse effect on travel.

Special Activities

Headquarters--On July 17 and 18 Mr. Davis visited the Point of Pines Archeological Field School of the University of Arizona, under the direction of Dr. Emil Haury. This is a beautiful location with unlimited archeological sites for students to work on. A fine program of excavation work, study and recreation is planned for the students. On the evening of July 17 Mr. Davis talked to the group of students and instructors on the history and policies of the National Park Service. Much interest was shown by the students in the Service and the possibilities of future employment in our organization. The young ladies in the group were especially interested in their prospects for employment in the archeological field in our Service.

On July 28 Architect Saunders and two student assistants visited Gila Pueblo. Messrs. Davis, Gastellum and Mott spent the entire day with them going over the rehabilitation program for this fiscal year.

Assistant Regional Director Hugh Miller and Mr. Arthur Jebens from the Secretary's Office spent part of Thursday, July 30 in our office. The following day Mr. Davis and Mr. Gastellum accompanied them on a trip to Tonto, Montezuma Castle, Tuzigoot, Walnut Canyon, Sunset Crater and Wupatki National Monuments.

The names of a number of promising young men in our organization who meet the eligibility requirements were submitted to the Regional Director as candidates for participation in the Fifth Departmental Management Training Program.

Southwestern National Monuments

Official Visitors
 Headquarters--Architect Saunders and two student assistants.
 On the 30th Assistant Regional Director Hugh Miller and Mr. Arthur
 Levens of the Secretary's Office spent two hours at Gila Pueblo.
Canyon de Chelly--Soil Conservationist Paul Balch.
Chaco Canyon--Regional Engineer Lassiter; Engineers George
Smith and George Johnston; Landscape Architect Carter; Soil
Conservationist Balch; Regional Archaeologist Reed; Naturalist King.
Montezuma Castle--General Superintendent Davis; Mr. Wallace
Johnson, Washington Office, who is making a study of trail courts
throughout the country.
Navajo--General Superintendent Davis.
Tumacacori--Architect Saunders.
Tuzigoot--General Superintendent Davis.
Walnut Canyon--General Superintendent Davis; Regional
Forester Carlson; Landscape Architect Carter.
Upatid--General Superintendent Davis.

General Publicity

We have been pleased to note the fine publicity that
 Arizona newspapers are giving Southwestern National Monuments.
 During the month of July the Arizona Republic of Phoenix has been
 especially generous in this respect. Their Sunday, July 12, issue
 carried a full-page spread featuring Canyon de Chelly.
 The July 19 Sunday edition devoted one entire section to
 the Verde Valley area. Included were many articles and photographs
 concerning Tuzigoot and Montezuma Castle National Monuments. Also,
 there was an article concerning the activities of the Southwestern
 Monuments Association.

The full front page of another section of this same edition
 was entitled "The Ancient Ones," and featured Navajo National Monument.
 The excellent photographs included one of Superintendent Autuchon and
 one of Pipeline, the Navaho guide.
 The local paper, the Arizona Record, has given generously
 of its space in reporting travel figures for the monuments, and
 various interpretative programs which are presented from time to time
 by headquarters staff andonto personnel before local service clubs
 and other organizations.
 All of this publicity is building up much goodwill for
 our organization throughout the state and for the National Park
 Service as a whole.

Montezuma Castle--The Los Angeles Examiner in its July 12
 edition carried an article concerning the Castle in the Motor and Out-
 ing Section. The article was entitled "900-Year-Old Sky-scraper Highlights
 of Arizona Trip" and pictures of the Castle and Well were spread all
 over the front page of the section.
 While we usually think of published articles and pictures
 in connection with publicity, we believe there is another kind that is
 equally effective. This is word-of-mouth praise by visitors to an
 area, who leave with good lasting impressions. The following from
 complimentary letters received by Superintendent Cook are excellent
 examples of this kind of publicity:

"From Professor Deaver of Flagstaff: "Let me express my appreciation to you for talking to our pre-session class in Field Biology. Your contribution, as one familiar with the practical aspects of your subject, enriched in large measure the scope of the course."

From Mr. Kennedy, Secretary of the San Mateo YMCA: "We are certainly glad we went to the Castle as it proved to be a very good experience for our members. We especially want to thank Mr. Koller who was our guide on the tour. Please tell him that he did a fine job and our kids talked about the ruins long after we left."

From an Oakland, California visitor: "I shall cherish the memory of the delightful visit to the Castle and the friendly service of the one in charge."

Tumacacori--Again this month we report "south-of-the-border publicity for Tumacacori. The June issue of Frontra, a magazine published in Mexico, carried a Spanish-language article describing the mission.

Wupatki--Seasonal Ranger Jack Stanley appeared on the Arizona Highways TV show on July 17. He talked about what to see in the Wupatki-Sunset Crater area. Several visitors mentioned seeing the show, and it is estimated many others came as a result of this show without mentioning it.

Maintenance, Rehabilitation and General Work

Headquarters--The Naturalist staff has set up a modest darkroom which will prove to be a valuable asset in the preparation of museum and wayside exhibits and other interpretive devices for use in field areas.

Maintenanceman Mack did a very neat job of remodeling some rooms in the workshop to provide storage space for tools, a place for small power equipment and a corner for his use as office space.

Canyon de Chelly--Additional information and directional signs were made and placed at monument headquarters and campground sites. Because of the increased number of campers, two new pit-type restrooms were placed near the Spider Rock overlook campground.

Chiricahua--The road and trail signs throughout the monument are undergoing a thorough revision. Several have been refurbished and several new ones installed. When this program is completed, there should be no reason for visitors becoming confused along the trails.

Coronado National Memorial--On his inspection trip Mr. Bullard noted that only seven holes were in the two new entrance signs, which seems to be a small number when compared with 63 found in an earlier sign. On his next trip, Mr. Bullard plans to take along a trash can to leave on the pass where many visitors picnic. He feels, and we agree, that if only a few people use the can, the appearance of the area will be improved. Also, little things like this done occasionally will make local people feel that we are interested in the area and are trying slowly to build it up.

Maintenance, Rehabilitation and General Work - continued

El Morro--The trail on the mesa was adequately marked by using piles of stone as trail markers. There is a marker every few yards, blending with the scenery, but plainly visible, so there is no reason for visitors getting lost or confused.

Tonto--Further study by the architects, a temporary pipe railing was placed alongside the drinking fountain as a safety measure. Some work is being done on the utility area, including construction of a loading dock. The remainder of the water system project awaits knowledge of precise location of house connections.

Tumacacori--The rehabilitation work on the superintendent's residence is almost complete, and it is hoped to have the house all spruced up for the new superintendent.

Walnut Canyon--A general cleanup of the grounds and roadside was made after completion of the road oiling job. Several new signs were made and installed.

Roads and Trails

Canyon de Chelly--The all-weather highway between Window Rock and Ganado is progressing nicely with several more miles of pavement having been added since last month's report. Visitors are advised to take this route.

Chaco Canyon--Work on the new headquarters to Bonito Road, with a few interruptions, has proceeded on schedule. At report time gravel surface had been placed on 1-3/4 miles and approximately 2-1/2 miles had been graded.

Montezuma Castle--Of importance to the monument was completion of the seal coating of the paved entrance road to the Castle which was accomplished on July 6.

Tonto--The entrance road oil job is standing up well. A cover of fine gravel is kept on the road and the road is dragged regularly with truck and drag broom.

Walnut Canyon--Superintendent Gullett obtained and forwarded a special use permit from the Forest Service giving the National Park Service a 1000-foot right-of-way for the approach road for this area. Wupatki--Progress on the new road has been slow due to continual loader breakdowns. Also, there was a complete shutdown while the crew worked on the Walnut Canyon road.

Cooperating Government and Non-Government Agencies

Tumacacori--Mr. L. B. Curtis, the district entomologist, brought a supply of Vodobia beetles to combat the cottony cushion scale in the patio garden. The University of Arizona again measured the depth of water in the well and found it to be 28 feet, a drop of 7.9 feet in 3 months.

Accessions

Headquarters--A microscope, some much-needed woodworking tool and some dark room and photographic supplies were obtained with end-of-the-year funds. Also, an insect cabinet, which will be sent to one of the areas having need for this type of equipment. Casa Grande--For the library, a copy of T. R. Smiley's Summary of Tree Ring Dates from Some Southwestern Archaeological Sites.

Interpretive Services

Headquarters--The problem of guiding at Aztec Ruins caused by the change in the fee collecting system was discussed with Mr. Jackson and the headquarters staff. Mr. Jackson submitted excellent data for a proposed self-guiding booklet, as well as suggestions for easel exhibits.

Detailed instructions on preparation of the new report, "Annual Statistical Tabulation (with Monthly Totals) of Interpretive Services," were sent to the field areas.

A well-prepared paper entitled "Suggestions to Authors of Natural History Handbooks" was received and a copy sent to Ranger Barrel who is working on a natural history handbook for that area.

Photographs of cave dwellings were sent to the editors of Our Wonderful World, a children's encyclopedia and arrangements were made to send literature on national parks and monuments to the Hobby Center at Chautauqua, New York.

Arches--The Cove Nature Trail is popular with visitors, even though Superintendent Wilson reports that it "is in extremely poor condition. Due to the dry weather, no rain this year, the Green Ephedra is brown and all specimens are poor...The Galleta, Needle-and-Thread and Indian Rice grasses are still dormant and most of these specimens have been tramped out or covered with blowing sand...The stakes have been moved to better specimens but it is doubtful that the common person can tell one type of brown, probably dead, grass from the other." It is hoped late summer rains will remedy this condition.

Chaco Canyon--Dr. Robert Lister of the University of Colorado and a group of 16 students spent the 26 and 27th in the area. They were given a talk on the history of research in the monument and on the natural landscape. They were also accompanied on a visit to Shabikeshchee, some refugee sites and other less visited spots.

Chiricahua--Pictures were taken for the Massai Point Nature Trail booklet, and some work done on the herbarium.

El Morro--Two groups of Girl Scouts under the leadership of Dr. Bertha Dutton were given talks on the Zuni Indians by Ranger Brugge during the evenings they camped in the area. The following mornings they were taken on tours of the Rock.

Museum Activities and Exhibits

Headquarters--A standard procedure for cataloging zoological and geological study materials in the Southwestern National Monuments was prepared by Mr. Arnberger. This is based largely on the excellent system in use at Grand Canyon and for the first time establishes a workable system suitable for our small areas which have their own peculiar problems not found in the parks with a resident naturalist.

Exhibit plans for White Sands and Arches were completed and sent to the Regional Office for submission to the Museum Laboratory.

Arrangements were made to obtain professionally-made pictures of the easel exhibits recently constructed by Mr. Jackson for use at Tumacacori. These pictures will be used to illustrate the booklet for the self-guiding trail which we hope to have in operation at Tumacacori soon.

Museum Activities and Exhibits - continued

Aztec Ruins--From Mr. Hastings' report we quote: "On July 11 Mr. Sherman S. Howe, pioneer resident of Aztec, donated his large collection of Anasazi archaeological material to Aztec Ruins National Monument. Part of the collection has been stored and part on exhibit at the monument for several years on a loan basis. A certificate of acknowledgement was given to Mr. Howe in the presence of several visitors and he requested that this be placed in the case which holds his pottery.

"Since 1882 when Mr. Howe was a member of the first party entering the Aztec Ruins, he has retained his interest in the ancient people and carried out salvage operations when he found ruins in imminent danger of being destroyed. He was also a member of the party which excavated the ruin under the direction of Mr. Earl H. Morris.

"Mr. Howe is now partially blind and deaf but two or three times each week he walks the mile from town to talk archaeology with visitors."

Gran Quivira--Ranger Roberts prepared two exhibits for inclusion in the museum. One shows the different National Park Service areas in New Mexico with map and photographs, and the other includes a large map of the State done in color and tracing the routes of early Spanish explorations.

Navajo--Six days during the month were spent working on plans for the proposed diorama which Mr. and Mrs. Warren G. Butts of California are making for the museum. A silk screen reproduction of one of Mr. Harrison Begay's paintings was donated to the museum by Mr. Simon of San Francisco. Mr. Begay is a noted Navajo artist.

Research and Observation

Headquarters--Mr. King, on personal time during week ends, completed the editing of two scientific reports concerning Montezuma Castle and sent them to press.

Dr. Sherwin F. Woods of the Los Angeles City College has notified us that the U. S. Department of Health, Education, and Welfare is setting up a laboratory at Arizona State College at Tempe under the direction of Dr. Charles F. Richards for the examination of insects of medical and veterinary importance. He suggested that future specimens of Triatoma be sent to the new laboratory, which is much more centrally located with respect to national monuments.

A collecting permit has been issued to Dr. Donald F. Hoffmeister of the University of Illinois who desires to collect mammals at Canyon de Chelly this summer. The results of Dr. Hoffmeister's study should be very interesting and may establish definitely the presence of mammals there, which has long been suspected, but never proven.

A series of photographs illustrating geological features at Chiricahua was selected for Dr. Enlow to use in illustrating the final report of his study in that area.

Chiricahua--Geologist Floyd Sabins is making the monument his headquarters and is doing much to clarify the regional geological picture.

Research and Observation - continued

El Morro--Dr. Woodbury of Columbia University and a crew of student archeologists have made this area the base of operations for a few days several times during the month.

Montezuma Castle--Dr. Willis W. Wirth, of the Division of Insect Detection and Identification, U. S. National Museum, Washington, collected Diptera (biting midges) at the Well. He also noted some Anopheles mosquitos but doubts the likelihood of nearby malarial sources.

Loan Library

The naturalists separated from the photograph file all negatives and prints relating to the decoordinated five monuments and packed them for shipment to Santa Fe. They then culled out a large number of worthless pictures and counted the remaining negatives finding the total to be 7,908.

Accessions totaled 86, including 14 books, 31 periodicals, and 41 separates.

Southwestern Monuments Association

Messrs. King and Arnberger read proof on the fifth edition of the guide book for the Sycamore Trail at Montezuma Castle.

An improved method of recording sales and inventories for color duplicates, post cards and miniature photographic packets was worked out by the executive secretary and the treasurer.

The final shipment of the Jerome booklet was received, as well as most of the fifth printing of Poisonous Dwellers of the Desert.

Covers mailed during the month totaled 336.

Stabilization, Ruins and Otherwise

Arches--Not exactly ruins stabilization, but under the heading of stabilization, we believe, was the recent decision of the Advisory Board approving the use of simple and unobtrusive stabilization measures on Delicate Arch to retard its ultimate destruction by the forces of nature. No work will be undertaken pending receipt of further word and technical advice from the Regional Office.

Aztec Ruins--Archeologist Richert went to Aztec Ruins on July 23 to complete his project on the West Ruin. He is now repairing or replacing protective roofs in this Ruin and doing minor maintenance throughout the site.

Chaco Canyon--Preliminary study of all artifacts recovered from Kin Kletso was completed by Mr. Mathews. He is now revising the text and making illustrations.

Mr. Frank McNitt, an old friend of the Service, loaned over 150 photographs taken by Mr. Richard Wetherill in Chaco between 1896 and 1899. Copy negatives were made of 50 of these.

Gran Quivira--Some work was accomplished on the report for this area. With final revision of the summary and conclusions and the assembly of some further illustrations, this work will be completed.

Wupatki--The dummy for all stabilization work done to date in this area was completed. Some 750 photo pages have been sent for reproduction.

Travel

Travel to a number of the areas was less than a year ago. Some of the superintendents reported extreme heat as partially responsible for the decrease; others feel that heavy summer rains which made roads rough and in some instances impassable, reduced visitation; and one superintendent thinks the new admission fee system has been a contributing factor.

Total visitation, however, is still ahead of last July by one per cent and for the year to date the increase over last year is 19 per cent.

Visitors

Headquarters--Superintendent Ricknell, Casa Grande; Also superintendents McNeil, El Morro, Lewis of Saguaro and Superintendant of Organ Pipe Cactus; Rangers Clancy of Casa Grande and Steele of Saguaro.

Archives--Turpin C. Banister and Mr. Bernard de Voto of the National Parks Advisory Board.

Aztec Ruins--Brigadier General and Mrs. H. J. Jilani, Military Attache, Embassy of Pakistan, Washington, D. C.; Mrs. Edwin Hickey.

Canyon de Chelly--Harry Donohue, Special Assistant to Assistant Secretary Orme Lewis; 15 students from the University of Arizona geology department.

Chaco Canyon--Dr. Bertha P. Dutton with groups of Girl Scouts; John B. Glass, Peabody Museum, Harvard University; Friends Work Group consisting of the Reverend Little and 38 members.

El Morro--Dr. Dutton with two groups of Girl Scouts. Gran Quivira--Reverend Victor R. Stoner, authority on early mission history.

Montezuma Castle--Regional Counsel and Mrs. Barton; Al Leach, Arizona Republic staff writer; Dr. Robert Lister, Archaeologist, University of Colorado.

Tuzigoot--Dr. Lister; Ted Smiley, Laboratory of Tree Ring Research, University of Arizona; 76 Sul Ross State College students.

Walnut Canyon--Mrs. Thomas B. Noble, Dr. Don Clark and Mrs. Clark, Range Technician, Indian Service; 65 members of the Hopi Mission School.

Tupatki--Dr. Dutton and two groups of Girl Scouts.

Police Protection

Coronado National Memorial--A miner in this vicinity told Mr. Ballard that there are deer in the area which are so tame they come to his cabin for handouts. Mr. Ballard hopes that the boundaries can be posted prior to the beginning of the hunting season.

Soil and Moisture Control

Chaco Canyon--Mr. Balch spent two days in the area going over the State program. Numerous pictures were taken of Chaco Wash while it was running to show cutting areas. Plantings made this spring were checked for survival and pictures taken of their growth. Survival has not been as good as expected due to continued drought.

Forest Fire Protection

Chiricahua--The fire danger was high early in the month, but dropped somewhat when the rains began. No fires were reported on the monument, but a number of small lightning fires occurred in the adjoining Coronado National Forest.

Walnut Canyon--Park Ranger Spangle was called to the White Lake fire at Yellowstone National Park as Liaison Officer in charge of a crew of Navajo fire fighters.

Tree Diseases

Montezuma Castle--The DDT spraying at Montezuma Well has proved effective as there are almost no tent-caterpillars in the cottonwoods and the sycamores are without major infestation. The cottonwoods in the picnic area, however, are badly in need of a major pruning job, which, it is hoped, can be accomplished this fall before the leaves drop.

Accidents

Montezuma Castle--Four enlisted men from the Luke Air Field overturned on the small hill just east of the Well. The accident was caused by excessive speed, but fortunately only minor cuts and bruises were suffered. A "Slow" sign was erected at the top of the hill, but is not deterring the "speed demons."

Personnel

Aztec Ruins--Superintendent Homer F. Hastings transferred from Chaco Canyon, effective July 15, to replace Mr. Townsend who has requested disability retirement.

Chiricahua--Temporary Ranger Boileau accepted a position at a resort in Idaho and left the last week in July.

Tumacacori--Superintendent Jackson left early in the month because of the death of his mother and then reported for his new assignment at Pinnacles National Monument. It is a fine compliment to a man when someone who has worked under him writes as Mr. Bullard did about Mr. Jackson. We quote from Mr. Bullard's report: "We will certainly miss Earl and his family. He has done a great deal for this monument including 'Tumacacori's Yesterdays' and the forthcoming mission trail booklet. I am sure that all others that have worked here under Earl will agree with me that he has been an excellent administrator and a wonderful person to work with. Region Four has picked up another good man."

Wupatki--Seasonal Ranger Jack Stanley entered on duty July 1. Superintendent Fred Brueck left on the 4th for his new assignment at Zion National Park. Park Ranger Cal Burroughs served as Acting Superintendent pending the arrival of Superintendent Brewer who transferred from Tuzigoot on the 28th.

Local Items

Headquarters--The population at the Gila Pueblo was increased by one during the month when a baby son, Howard Bennett, arrived in the Arnberger household.

Local Items - continued
Arches-Superintendent Wilson assisted in the apprehension of two men held on suspicion of car theft who overpowered the Moab city marshal and escaped. Mr. Wilson manned one of the numerous road blocks.
A proposal for generating power is being submitted by the Utah Power Company. Needless to say, monument personnel are hoping that this is one project that will be speedily completed.
Chaco Canyon--The Vivians entertained the Canyon families with a barbecue during the month. Gordon proved to be a good chef. Tumacacori--Request from New Hampshire: A list of "quiet water streams near Tumacacori for canoeing."

"Complaint of the Month"

From Tumacacori: Gentlemen visitor to Acting Superintendent Billard: "There can I register a complaint?"

Mr. Billard: "Right here. Why?"

Gentlemen: "Your museum glass is too clean and I didn't see it and bumped my head." Congratulations, Mr. Denbler, for the polished glass, and may we have many more "complaints" of this kind.

ARCHES NATIONAL MONUMENT

MOAB, UTAH

July 24, 1953

Memorandum

To: General Superintendent

From: Superintendent, Arches

Subject: Monthly Narrative Report for July, 1953

WEATHER: High temperatures ranged from 91 to 111 for the month of July.

It rained all around us but only a trace fell on the monument.

TRAVEL: A decrease of 350 visitors as compared to July of last year. There were 4,292 people in 1,353 cars representing 41 states, Australia, and Egypt visited the area.

INTERPRETIVE SERVICES: 1,599 people were contacted at the Wayside Exhibit by Managers Morris and Miller, 1800 signed the register. 632 people were contacted at the Headquarters office and an estimated 1807 used the Cove Nature Trail.

INTERPRETIVE DEVICES: The Cove Nature Trail is in extremely poor condition. Due to the dry weather, no rain this year, the Green Ephedra is brown and all specimens are poor. The Whipple Fish Hook Cactus has been transplanted several times, but within a few days it disappears. Evidently some people take the name of the cactus literally and hook on to it. The Galleta, Needle-and-Thread and Indian Rice grasses are still dormant and most of these specimens have been tramped out or covered with blowing sand. Even the Rabbitbrush is in sad shape. The stakes have been moved to better specimens but it is doubtful that the common person can tell one type of brown, probably dead, grass from the other.

NOTEWORTHY VISITORS: Members of the National Parks Advisory Board,
Mr. Turpin C. Bannister, July 3, 1953
Mr. Bernard de Voto July 5, 1953

ROADS: State Route #93 is rough, but the county maintenance crews can't or won't work on it until it rains. The roads in the monument are in fair shape, but very dry and it is a full time job keeping the dust pockets, chuck holes, filled with shale.

1. The first of these is the fact that the population of the United States is increasing at a rapid rate. This is due to a number of factors, including immigration and a high birth rate.

2. The second factor is the fact that the population is becoming more urbanized. This is due to the fact that people are moving from rural areas to cities in search of better living conditions and economic opportunities.

3. The third factor is the fact that the population is becoming more educated. This is due to the fact that more people are attending school and obtaining higher levels of education.

4. The fourth factor is the fact that the population is becoming more diverse. This is due to the fact that people from different ethnic backgrounds are moving to the United States.

5. The fifth factor is the fact that the population is becoming more mobile. This is due to the fact that people are moving from one part of the country to another in search of better living conditions and economic opportunities.

6. The sixth factor is the fact that the population is becoming more affluent. This is due to the fact that the standard of living in the United States is high and is increasing.

7. The seventh factor is the fact that the population is becoming more health conscious. This is due to the fact that people are becoming more aware of the importance of maintaining good health and are taking steps to do so.

8. The eighth factor is the fact that the population is becoming more environmentally conscious. This is due to the fact that people are becoming more aware of the impact of their actions on the environment and are taking steps to reduce their impact.

9. The ninth factor is the fact that the population is becoming more technologically advanced. This is due to the fact that people are becoming more familiar with and using new technologies.

10. The tenth factor is the fact that the population is becoming more socially conscious. This is due to the fact that people are becoming more aware of social issues and are taking steps to address them.

SPECIAL ACTIVITIES: The Univeral International Pictures Co., Inc. picked a more accessable location, than the monument, for filming "The Son of Chochise." The Twentieth Century Fox Film Corp. is studying the possibilities of shooting some sequence shots in the monument, but as yet no definate decision has been made.

COMMERCIAL POWER: The power line from Crescent Junction to Moab is nearing completion. The Utah Power and Light Co. is drawing proposals for the payment of commercial power to our headquarters. This is one project that we hope can be completed in the very near future.

SIGNS: An informational sign, similar to the one that was installed at headquarters last month, was placed just off of Highway 160 on State Route 93, the entrance to the main section of the monument. The sign is sponsored by the Moab Lions Club, but was constructed by Ranger Morris during his free time; the Lions Club paid for all materials. Although it has been in service for only two weeks its use has passed all expectations. People coming from the North can now get an idea of what to expect before driving to the Wayside Exhibit. All comments have been favorable and when the visitor reaches the contact point in the monument he laready knows what he wants to do. Several cars turn around at the sign and save themselves the drive into the monument, where they would turn around at the Wayside Exhibit when told about the area, no facilities and etc., and the life of the contact man is much easier. Explanations are now about the points of interest in the monument.

COOPERATION WITH OTHER AGENCIES: Two men held on suspecion of car theft overpowered the Moab City Marshal and escaped the evening of July 21st. Road blockwere set up and Superintendent Wilson was called to man a road block south of Moab. The men were caught Wednesday afternoon about 3 miles south of Moab.

Aztec Ruins National Monument
Aztec, New Mexico

July 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Aztec Ruins
Subject: Monthly Narrative Report for July, 1953

Weather: Warm weather with an occasional light shower has characterized the report month. The humidity has been high and to some extent muggy. Maximum temperature for the report month was 86° on several days and the minimum was 52° on July 23rd.

Administration: With the practice of selling admission tickets, remittance of collections, mail pick-up, and other so-called business must be transacted during the noon hour or after 3:00 P.M.

Personnel: Early in June it became apparent to Superintendent Townsend that he could not continue his duties with the National Park Service and would request disability retirement. When General Superintendent Davis was informed of this, he telephoned Superintendent Hastings at Elaco to transfer to Aztec within a week if possible—a move which was formerly planned for July 31. The transfer was accomplished on July 13 making the seventh move in 19 months for this Superintendent. Inventories and records were checked with Mr. Townsend on July 14 and he departed for Albuquerque on that date.

Visitor Travel: On July 19th 225 tickets were sold which exceeded the previous all-time record of 222 on September 1, 1952. With the practice of selling admission tickets, two employees must be on duty constantly and it becomes necessary to lock the museum 12:00 to 1:00. The first guided trip for the day is started at 8:00 A. M. and the last at 4:00 P. M. This provides three hours per day less guide and contact service than was offered in 1952. We find that visitors often enter the ruin unattended and on two occasions have been known to pick the lock into the series of seven rooms with original ceilings. Comments in detail on the sale of admission tickets have been offered by separate memorandum.

There were 4351 visitors who came in 1234 cars. Of this number 3513 visitors took the tour through the ruins in 251 parties. There were 368 visitors in 93 groups who stopped after hours or for other reasons did not take the guided trip.

Maintenance: Keeping the restrooms and museum clean and paper picked up over the area has kept one laborer busy most of the time. He was off duty for a week with an injury during which time there was little policing of the grounds. In slack periods weeds have been hoed in the ruins and work has been done on the lawn watering system which takes water from the irrigation ditch.

S. W. A. Business: On July 20 Elizabeth L. Fish was employed by the Association as a sales girl to handle S. W. A. Sales. With the volume of visitors we are now getting, and with the collection of admission fees, the ranger had little time for this work. Miss Fish has increased the volume of sales considerably.

Donations: On July 11 Mr. Sherman S. Howe, pioneer resident of Aztec, donated his large collection of Anasazi archaeological material to Aztec Ruins National Monument. Part of the collection has been stored and part on exhibit at the monument for several years on a loan basis. A certificate of acknowledgment was given to Mr. Howe in the presence of several visitors and he requested that this be placed in the case which holds his pottery.

Since 1882 when Mr. Howe was a member of the first party entering the the Aztec Ruins, he has retained his interest in the ancient people and carried out salvage operations when he found ruins in imminent danger of being destroyed. He was also a member of the party which excavated the ruin under the direction of Mr. Earl W. Morris.

Mr. Howe is now partially blind and deaf but two or three times each week he walks the mile from town to talk archeology with visitors.

Archaeological Explorations: On July 24 the archaeological explorations project excavating the subterranean under the direction of Archaeologist Instett was terminated. A total of 22 rooms surrounding a kiva in two rows were excavated. Three poorly preserved burials of adult children were found. Under the northeast corner of the ruin the remains of an older house with adobe mud walls was discovered, but neither time nor funds permitted its exploration. Mr. Instett's report for July is attached.

Special Visitors:

- July 8, Brigadier General and Mrs. A. J. Gilani, Military Attache Embassy of Pakistan, Washington D.C.
- July 16, Mr. and Mrs. Ted Nichols.
- July 18, Mrs. Eddie Leese and her brother Mr. Hastings.

Superintendent

Canyon de Chelly National Monument
Chinle, Arizona

July 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Canyon de Chelly
Subject: Monthly Narrative Report for July, 1953

Travel: 1061 people in 307 cars. Again, this broke all previous records for July. 1061 compared with 950 for July of 1952. Total visitors for the current calendar travel year is 4,152 - for the same period last year 2,990. There were 361 overnight campers. Guide and contact service totaled 154 hours.

Weather: Hot, dry, and dusty during the first part of the month, however, a few light scattered showers fell from the 15th on. Total moisture amounted to .82 of an inch. High-low temperatures ranged from 104 to 55. There has been only 3.16 inches of precipitation during the past 8 months, consequently, this part of the reservation is badly in need of additional moisture.

Roads: All approach roads are rough but passable. The proposed all-weather highway now under construction between Window Rock and Ganado is progressing nicely with more miles of pavement having been added since our last report. Travelers to the monument are advised to take this route.

N.P.S. Visitors: Archeologist J. C. Harrington and family from Region One Office on June 26-27.

Soil Conservationist Paul Balch, Region Three Office on July 14-15-16.

Organized Groups: Organized groups during the month included the following:

- 20 - Archer Mobile Camp Senior Fire Scouts on July 6-7-8.
- 7 - Explorers Post No. 289 - Los Angeles on the 6th and 7th.
- 60 - Members from the Presbyterian Southwest Traveling Seminar on the 11th.
- 15 - Students - University of Arizona - Geology Dept. on the 13-14.
- 9 - Boys from Mountain Meadow Ranch, Prescott, July 14-15
- 25 - Prairie Trek Group on July 21-22-23.

Cont. from page 1.

Noteworthy Visitor: Mr. Harry Donohue, Special Assistant to the Assistant Secretary Orin Lewis on July 22. Mr. Donohue was given a half-day jeep trip into the canyons and offered every possible assistance.

Signs: More informational and directional signs were made and placed at monument headquarters and the campground sites.

General: The rods in the water well pump were pulled and new leathers installed.

Due to the increased number of campers two new pit-type restrooms were constructed at monument headquarters and placed near the campground area at Spider Rock overlook.

Capulin Mountain NATIONAL MONUMENT

Capulin New Mexico,

July 27, 1953,

19.....

Memorandum To; The General Superintendent
Southwestern National Monuments,
National Park Service
Globe Arizona,

From; Homer J. Farr, Ranger
Capulin Mountain National Monument

Subject; Monthly Narrative Report,

Visitors;

There has been approximately five thousand four hundred visitors this month to the old volcano, bringing total visitors to date since Jan 1, thirteen thousand nine hundred fifty,

Weather;

Was very hot and dry until July 11, when we had 3.71 inches of rain in the village of Capulin and about 5 inches of rain in the Park, The east side getting the larger portion of the local rain, The on the 18th we were favored with a one inch rain Then again on the 19th with three four of an inch,

Flora and Fauna;

Today the entire countryside has took on a new bright green color and all grasses and other growing things are simply beautiful, heavy rains during the month have set us up nicely, The young deer are now old enough to be brought out into view and the bucks have their new horns are beginning to show up in many places round the Mountain, many visitors report seeing the early in the morning and late in the evening,

Roads and Trails;

The road was very badly damaged by the July 11th downpour but within three days all was going again and today the road is in fair condition but many rullies have been left on the outside which we hope to get filled soon, No work has been done on the trails this month as we just simply could not get to it,

Information Pamphlets;

Forty one has been mailed upon request, and three thousand nine hundred sixty have been handed out and run thru the register during the month, Now on hand 7000,

Very Respectfully
Homer

NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

July 25, 1953

Memorandum

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for July, 1953

General: Summer arrived on the 1st day of the month with a maximum temperature of 116, followed on the next day with a high of 117. The mean maximum temperature for the month thus far is 107. The extreme heat seems to have discouraged our travel somewhat. We show a very slight decrease as compared with the same period last year.

If anyone would care for a good big healthy goose Pinal County is the place to get it. We reported last month that the cotton growers in the area were using some 5000 head of geese to weed the fields, since supposedly geese will eat almost anything but cotton. Much to the farmers dismay, however, it has been discovered that cotton to geese is like olives to humans - one must acquire a taste for them.

Weather: Hot and humid. Although we have no means of recording humidity here, the Phoenix papers indicate the humidity is much higher than normal. We did get 1.26 inches of rain during the month but it came in seven small showers which did not do much except make the humidity worse.

| | 1953 | 1952 |
|---------------|-------------|------------|
| High Maximum | 117 | 110 |
| Low Maximum | 99 | 99 |
| Mean Maximum | 107 | |
| High Minimum | 81 | 81 |
| Low Minimum | 68 | 61 |
| Mean Minimum | 74 | |
| Precipitation | 1.26 inches | .02 inches |

Interpretive Service: Guided trips through the ruin have been made at about the same frequency as the winter months but of course our attendance has dropped greatly. On July 1st four trips were con-

ducted for the benefit of sixteen visitors. A total of 125 tours were made with an attendance of 841 visitors. The average tour lasted 44.6 minutes. 1179 visitors looked through the museum but did not go to the ruin.

Administration and Protection: During the month 9 requests for information were received. Two of the most interesting were forwarded to Globe for action.

The Adamsville site received the usual inspection and two warning signs were replaced.

The annual inventory has been started by the Superintendent. It is hoped that this project will be completed in the near future.

Maintainance: The general clean up of the monument, started last month, has been completed. Mr. Lopez has done an excellent job on the project. The drainage ditch running from the west of the residential area to the Northwest of Compound A was cleared and graded. All weeds have been removed from the rooms and courtyards of Compound A.

Museum: Some work has been accomplished on our Museum Prospectus as time allowed.

Personnel: The personnel at this area are looking forward to the needed improvements which can be made this year to their homes, due to the increase in quarters rentals.

Library: A copy of T.R. Smiley's "Summary of Tree Ring Dates from Some Southwestern Archeological Sites", Laboratory Bulletin of Laboratory of Tree Ring Research, University of Arizona, Oct., 1951, was obtained for our library.

A.T. Bicknell,
Superintendent

Chaco Canyon National Monument
Bloomfield, New Mexico

July 25, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Chaco Canyon

Subject: Monthly Narrative Report for July, 1953

Weather

The rains this month have brought some relief from the drought conditions. A total of 1 inch of rain was recorded at the gauge but there were several spotty showers over different sections of the monument which could not be recorded. A noticeable increase in growth of riparian dry bulbwoods plus a freshening of the grass, siltgrass, and cyclam has greatly brightened the area. The high for the month was 93° and the low was 47° on the night of the 26th. Days have averaged around 90° and the nights in the high 50's.

Travel

Travel again hit an all time high for July with a total of 633 people in 169 cars. Our travel has shown an increase in visitors but a decrease in the number of cars. On the total travel for the month 396 people took the tour through Pueblo Bonito in 67 trips and 196 people were contacted in the museum in 41 groups and given orientation talks.

Administration

Daily duty was maintained throughout the month with one man on duty at the Headquarters all month. This is the first month this has happened in some time due to the shortage of personnel. Some extra work had to be done in order to catch up on the filing and reports. A majority of this work was kept fairly current during the month. Most of the non-hours this month have been spent on contact work.

Maintenance

Most routine maintenance was kept current during the month. The roads were not scraped due to the lack of personnel. Some trouble has been experienced with one of the pumps losing its prime but we hope that this has been fixed.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Chief, National Park Service
Washington, D. C.

June 25, 1953

Dear Sir:

Enclosed for you are two copies of a letterhead memorandum from the National Park Service to the Bureau of Reclamation, dated June 18, 1953, regarding the proposed construction of a dam on the Colorado River at the mouth of the Grand Canyon National Park. The letterhead memorandum is being furnished to you for your information and for your use in the Bureau of Reclamation.

The letterhead memorandum is being furnished to you for your information and for your use in the Bureau of Reclamation. It contains information regarding the proposed construction of a dam on the Colorado River at the mouth of the Grand Canyon National Park. The letterhead memorandum is being furnished to you for your information and for your use in the Bureau of Reclamation.

Very truly yours,
Director, National Park Service

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Roads and Trails

Due to the number of rains off of the monument, both north and south, the approach roads have caused a number of complaints from visitors. In quite a number of places sand has washed into the road and in others it has washed out and because of the two it is a bit bumpy. Monument roads are in poor condition due to the rains and heavy travel by the dump trucks working on the new road.

Soil and Moisture Control

Mr. Balch was in the area for two days going over the S&M program. Numerous pictures were taken of the Chaco Wash while it was running in order to show cutting areas, etc.. Some time was spent going over the program for this fiscal year as well as discussion of past years and their effects on the S&M program.

Plantings made this spring were checked for survival percentages and pictures taken of their growth and of the growth of plantings of previous years. Survival this season has not been as good as was expected due to the continuation of the drought.

New Road Construction

Work on the new Headquarters to Bonito road is, with a few interruptions, going according to schedule. Gravel hauling got under way on the 6th of July and continued through the 16th. On the 17th a rain caused generally unsatisfactory working conditions and work was shut down over the weekend. Work was resumed on the afternoon of the 20th but was again stopped on the 22nd due to run-off in both the Gallo and Chaco washes. The flash flood in the Gallo Canyon broke through the Gallo dike which had been completed the previous weekend and the seepage from this through the plug below this point, where the cut-off road crosses, undermined the latter structure to the point that it was no longer safe to cross. By the 26th of the month this plug will be completely rebuilt. Regardless of delays and poor hauling conditions gravel surface material has been placed on 1 3/4 miles of the project and approximately 2 1/2 miles has been graded.

As of July 25, possibly \$13,500 has been spent, and we feel that with the additional allotment of \$7,500 the entire road and Bonito parking area should be in passable condition for use by the middle of August if we get some more rain for grade finishing.

1. The first of these is the fact that the

107. I have not in my hand the original of the letter of the 10th of June 1861, but I have a copy of it in my possession. The letter is dated 10th of June 1861, and is addressed to the Secretary of the Navy, Washington, D.C. It is a letter of introduction from the Secretary of the Navy to the Secretary of the War, and is signed by the Secretary of the Navy, G. B. Frisbie.

Let's say we have a set of points x_1, x_2, \dots, x_n in \mathbb{R}^d . We want to find a hyperplane that separates them. The hyperplane is defined by a vector w and a scalar b . The decision function is $f(x) = w \cdot x + b$. The margin is the distance from the hyperplane to the nearest data point. The goal is to maximize the margin.

Personnel

Superintendent Hastings transferred to Aztec Ruins on the 13th. Mr. Hastings had been here about 12 months, three and a half of which was spent at Aztec Ruins on a temporary assignment during the sickness of Superintendent Townsend. We will miss Homer and Mary at Glace and wish them every success and less frozen pipelines at Aztec.

General

Quite some time was spent this past month by Octavio Romano on proposed changes in the museum. These changes were discussed with Dale King while he was in the area.

The Vivians gave the people in the canyon a barbeque the night of the 11th, and it was quite a success. Gordon is a good chef.

John D. Dillinger

Chiricahua National Monument
Dos Cabezas, Arizona

July 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Monthly Narrative Report

Weather. The rainy season started July 4 with a light shower. Since then we have had rain 14 out of the 21 days. However, only 2.66 inches have fallen. The surrounding country as a rule has been well soaked but so far the heavy rains have missed Chiricahua.

Maintenance. The road and trail signs throughout the entire monument are undergoing a thorough revision. Several signs have been refurbished. Three new signs have been installed. Five others are ready for installation and more are under construction. When this program is completed there should be no reason for any visitor to become confused along the trails.

We still continue to have trouble with our electric system. Several hours were spent by the ranger and superintendent tracing down a bad short in the superintendent's residence.

Approaches to Monument. Since the rains began the dirt roads have been in poor condition, but usually passable. Even on the paved road visitors have had to proceed with caution due to streams flowing across the highway.

Interpretive Service. Two regularly scheduled conducted walks were taken to Echo Park and youngsters from the Methodist Church Camp in nearby pinery Canyon were given two special trips, making a months total of 4 trips and 71 people for an average of two hours.

Two half hour interpretive talks were given to a total of 33 people. 1931 people in 429 parties visited the museum. The foothill forest trail was used by 2 visitors and the Massai Point nature trail by an estimated 276.

Research and Observation. A small amount of work was done on the herbarium and some pictures were taken for the Massai Point Nature Trail booklet. Geologist Floyd Sabins is at present making the monument his headquarters, and is doing much to clarify the regional geological picture.

Decrease in Travel. For the second month in a row travel decreased from last years record. 2394 people visited us this month or 220 fewer than last July. Stormy skies over the Chiricahuas and rough roads may have played their part as only the Sunday or local travel was smaller. Travel for the year is still high. The 14,735 visitors represented an increase of 8.1% over 1952 at this date.

Ranger Service. Temporary Ranger Boileau has just advised that he has accepted a better position at a resort in Northern Idaho and will be leaving next week. We are now looking for another temporary ranger to finish the season.

Forest Fire Protection. The fire danger was high early in the month and dropped somewhat when the rains began. No fires were reported on the monument but the surrounding Coronado National Forest had a number of small lightning fires.

Public Health. Near the end of June the water was tested and found pure.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tumacacori, Arizona

July 25, 1953

Memorandum

To: General Superintendent, S. W. N. M.
From: Acting Superintendent, Tumacacori
Subject: Monthly Narrative Report for Coronado National Memorial for July, 1953

The inspection trip this month was made on July 20th. Rain had not fallen for several days and the dirt road was in fine shape.

In talking with two miners and one rancher in the area they all said that about six inches of rain had fallen in the past two weeks. This had lessened the bad fire danger that had existed in the area. The grasses that have been dry so far all year are up four to six inches. The drouth seems to have hit the oak trees especially hard and they have not yet started to respond to the rains.

Our two new entrance signs had only seven holes in them which seems like a few when compared to the 63 holes in an earlier sign.

On my next trip to this area I plan to take along a trash can to leave on the pass where many people picnic. If just a few of the visitors will use the can the area will look better. With just an occasional little thing like this being done in the area I think that the local people will feel that we are trying to really look after this new area and slowly build it up.

I hope that we will be able to post the area before the hunting season starts this fall. Boundary signs were ordered for this some time ago. One miner said that there are deer in the area and that they are quite tame and come to his cabin for handouts.

My visit to the area was cut short by a hard rain that came up and decided to stay around the rest of the afternoon. Maybe next month the sun will be right and we can get in some pictures of this area.

Report 1ml

July 28, 1953

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

There were 703 visitors this month who came to El Morro. They came in 190 automobiles. This is nearly 150 less visitors than a year ago this month, but we found last month that we were not the only ones with a loss then and probably will not be this month. Of these visitors, 582 took a trip around the Rock in 109 parties. 150 persons took a trip over the top of the Rock in 31 parties. There 236 campers during the month.

The warmest was 95 degrees and the coolest was 49 degrees Fahrenheit. There was 2.32 inches of rain.

The approach roads have been in good shape most of the month except for a few hours during and after rains. The Monument road has remained in excellent shape.

We had a good amount of rain this month, but May and June were so dry that the rains did not bring out much in the way of a wild flower display. Those that did come out were sort of dwarfed.

The New Mexico Institute of Mining and Technology continued its camp from last month. We didn't see much of the crew because they were out in the field all day and came back just in time to get supper and get to bed. The students left a few days ago, but the professor and family are staying on for another month so that he can complete the mapping.

Dr. Woodbury from Columbia University, and crew of student archaeologists have made this their base of operations for a few days several times this month.

Dr. Bertha Dutton was in twice, each time with a different group of Girl Scouts. These girls are picked from all over the country as outstanding Scouts. They were given a talk on the Zuni Indians by Ranger Briggs in the

Page 101

There were two visitors this morning who came to the office. One was a man in a suit and tie, and the other was a woman in a dress. They both came to see the manager. The man was very polite and spoke in a low voice. The woman was also very polite and spoke in a low voice. They both seemed to be very interested in the work of the office. They both stayed for about an hour and then left. The manager was very pleased to see them and was very kind to them. He gave them some information about the work of the office and they both seemed to be very satisfied with it. They both thanked the manager very much and then left. The manager was very happy to see them and was very kind to them. He gave them some information about the work of the office and they both seemed to be very satisfied with it. They both thanked the manager very much and then left.

DEPARTMENT OF THE INTERIOR

NATIONAL MONUMENTS SERVICE

El Morro Nat'l Mon.

evening and a tour of the Rock next morning.

One evening we were surprised and pleased to have a visit from Dale and Mrs. King. He was a little behind schedule (due to our rains and mud), but did manage to stay a half day with us.

We were very sorry to see our good neighbors, the Ashcrofts, leave the community. However, the first move did not take them very far away, only as far as Raah, where they are renting a house temporarily. Ike Lewis and family, who have been running the El Morro Trading Post for the past several months, are moving into the house formerly occupied by the Ashcrofts. He is a good friend and a member of the square dance set.

As we had more water at the start of the season than we did last year, the rains in July filled the pool and it even ran over a few times.

One of the worst things we need here is an adequate septic tank and rest room. We have only one small rest room, built for the office force, which serves both men and women as a public rest room. It is bad enough during the day when both men and women line up to use it, but it is much worse at night, when, for example, one night there were 27 campers in!

Most of the month was spent in guiding and clean up work. We did complete the rehabilitation of the bridge. Another job completed was the adequate marking, by piles of stones as trail markers, of the trail on the mesa. There is a marker every few yards, blending in with the scenery but plainly visible, so there is little reason for a visitor to get lost or confused. Also, we chopped and pulled up weeds along the trail. The electric stove was installed.

On last month's report, we stated the eaglet had left, presumably learned to fly. Maybe so, maybe no. Early this month, a Tuni Indian and party came by and asked to have the eaglet for use in their ceremonies - the feathers. It was already gone, possibly its feathers to decorate some other less scrupulous Indian, but we carefully explained to the Indian why we could not let him have it even if it had been here. Some other Indians came by and stated that they wanted to go on the mesa top to get something to be used in a curative ceremony. We could not understand just what they wanted and didn't think that they knew at the time, but we let them go. When they returned, after several hours, they had a few pebbles and a bead taken from one of the ruins. We readily gave permission to take them if they would help out in making some one well and they seemed pleased.

Irving McNeil, Jr.
Superintendent

...and the fact that the ...

and State a word of kindly encouragement and praise will
be given to the student who has been successful in his studies.

The above information was obtained from a review of the records maintained by the Bureau of Prisons.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific information required.

NATIONAL PARK SERVICE

Gran Quivira National Monument,
Gran Quivira, New Mexico

July 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report for July

Weather. The hot spell which has affected New Mexico was also in evidence here. Highs of 97 and 98 have made the weather here warmer than last year. There have been very few high winds and on the whole the temperature has been quite pleasant. Moisture has been almost adequate with a precipitation reading of 2.42 inches received in 13 showers and our vegetation is greener than it has been for many years.

Local. A good bean crop seems more certain this year because of the rains received this month. Local farmers are optimistic. The wheat harvesting has started and combine crews have moved into the area - the average yield on the wheat crop were not high.

NPS Visitors. Mr. and Mrs. Foy Young of Bendelier were in on the 9th.

Road and Trail Maintenance. The monument approach road was dragged several times during the month to attempt to smooth the surface and fill in the rough spots. The road dragging and the crushed rock filings placed on the road and parking area last month has been an improvement. The recent rains had eroded some of the sand from the steep parts of the trails and these were filled.

Visitors, other. The Reverend Victor R. Stoner, an authority on early mission history, visited the area on the 24th of June, and rendered his opinion as to the identification of some of the features within the mission of San Isidro.

Wildlife. Rattlesnakes have lessened in the area evidently as only one was seen this month. Rabbits are still numerous and most visitors have the opportunity to see at least one. Our quail seem to be staying with us. A mother bird and six young were observed.

DATE OF BIRTH: 1911-11-11

The first time the name of the victim was heard, it was in the form of a rumor. The rumor was that a man had been killed. The rumor was spread by a group of men who were in the area at the time of the killing. The rumor was spread in a way that was intended to cause fear and panic among the people of the area. The rumor was spread in a way that was intended to cause the people of the area to believe that the killing was the work of a group of men who were in the area at the time of the killing. The rumor was spread in a way that was intended to cause the people of the area to believe that the killing was the work of a group of men who were in the area at the time of the killing.

Approach Roads. A proach roads into the area are in fair condition. The Mountainair approach was graded several times by the State and is considered good. A few wet spots on the Carrizozo approach were in evidence most of the month and caused some minor inconveniences to the visitor.

Museum Activities. Two exhibits have been prepared for inclusion in the museum. Ranger Roberts prepared one exhibit showing the different National Park Service areas in New Mexico with map and photographs, and another which includes a large map of the State done in color and tracing the routes of early Spanish explorations.

Research and Observation. Several new plants were tentatively identified and placed in the herbarium. Herbarium cards were prepared on the new additions and the file brought up to date.

Personnel. The Superintendent was on annual leave from June 26 to July 12 and the seasonal ranger acted as Superintendent.

Special Activities. In conjunction with annual leave, the Superintendent visited the South-eastern National Monument headquarters and the Sonoran missions of Tumacacori and San Xavier del Bac. A pickup truck load of boxed pottery was transported to Globe for storage.

Travel. This was an average travel month with 443 persons in 114 cars visiting although the count was considerably less than last year's unusually heavy travel. Some visitation was undoubtedly discouraged by the wet weather.

Interpretation. Visitor contact and interpretation was continuous all month. Guided parties totalled 44 for an average of 36 minutes per party and the attended museum had 417 visitors. Reaction to the new self guide pamphlet was again favorably received and 250 persons in 70 different parties used the facility.

Ray B. Rinnebach
Superintendent

Montezuma Castle National Monument
Camp Verde, Arizona

July 27, 1953

Memorandum

To: General Superintendent

From: Superintendent, Montezuma Castle

Subject: Monthly Narrative Report for July, 1953

Weather: It has been hot. Almost all days have averaged well over a hundred degrees with the highest reading of 112 occurring on July 2. Showers falling intermittently during the month totaled 1.8 inches of precipitation. However, these showers had little cooling effect on the weather, but instead caused a sticky humid condition.

Travel: Steady throughout the month with 5,466 people in 1,537 cars to the Castle and 2,197 people in 698 cars to the Well. This totals 7,663 visitors to the area and is slightly less than the number recorded last July.

Visitors:

June 30 - Mr. & Mrs. Barton from Regional Office, Santa Fe.
July 1 - Al Leach, Arizona Republic staff writer, Phoenix.
July 12 - Thirty International students from the Verde Valley School representing a Seminar sponsored by the Friends Society, (Quakers).
July 16 - Dr. Robert Lister, Archeologist, University of Colorado, and a National Park Service Collaborator.
July 22 - Seventy students from Sul Ross College, Alpine, Texas, under the direction of Mr. Powell.
July 26 - Thirty-five students from North Texas College, under the direction of Mr. Robert Miller.

Official Visitors:

July 15 - Mr. Wallace Johnson from Washington Office. Mr. Johnson is making a study of trailer courts throughout the county.
July 21 - Mr. John Davis, Headquarters Office. Mr. Davis stopped by on a routine visit to talk over various monument problems with the superintendent.

Publicity: On July 12, the Los Angeles Examiner carried quite an article concerning the Castle in its Motor and Outing section. Title of the article was "400-Year-Old Skyscraper Highlight of Arizona Trip", and pictures of the Castle and Well were spread all over the front page of this section.

Then, on July 19, the Monument was well mentioned in the Arizona Republic in a special edition covering the Verde Valley. Again a picture of the Castle appeared on the front page of the section.

Accidents: On July 5, four enlisted men from Luke Air Field overturned their car on the small hill just east of the Montezuma Well museum. This accident was a result of excessive speed, and fortunatley the occupants suffered only minor cuts and bruises. A SLOW sign was erected at the top of this hill, but is failing to deter the more impetuous visitors.

Roads and Trails: Of importance to the Monument was completion of the seal coating of the paved entrance road to the Castle. This work was accomplished on July 6, by W. J. Henson and Co. of Prescott.

Tree Diseases: By now the result of this Springs's DDT spraying project at Montezuma Well can fairly well be ascertained. Compared to last year, there are almost no tent-caterpillars in the Cottonwoods and the Sycamores are without major infestation. However, the Cottonwoods in the picnic area are still badly in need of a major pruning job, and it is hoped that this can be accomplished this fall before the leaves fall.

Research & Observation: Bird life diminished during the hot weather to about 40 species, but with the coming of summer rain, plants like the sunflower, cardinal-flower and wild morning-glory were stimulated into bloom.

Dr. Willis W. Wirth, of the Division of Insect Detection and Identification, U. S. National Museum, Washington, visited the Well and made some small collections of Diptera, or biting midges. He also noted that the Anopheles mosquito is present here but doubts the likelihood of nearby malarial sources.

Complimentary Letters: Several nice letters from visitors were received this month. Prof. Deaver of Flagstaff writes, "Let me express my appreciation to you for talking to our pre-session class in Field Biology. Your contribution, as one familiar with the practical aspects of your subject, enriched in large measure the scope of the course." Then, Mr. Kennedy, Secretary of the YMCA, San Mateo, writes, "We are certainly glad we went to the Castle as it proved to be a very good experience for our members. We especially want to thank Mr. Koller who was our guide on the tour. Please tell him that he did a fine job and our kids talked about the ruins long after we left." And from a lady in Oakland, California comes the following, "I shall cherish the memory of the delightful visit to the Castle and the friendly service of the one in charge."

Memorandum

To: General Superintendent
From: Seasonal Ranger, Natural Bridges National Monument
Subject: Monthly Narrative Report for the month of July, 1933,
for Natural Bridges National Monument

General: Thank goodness, the guests are gone. Not just in the interest of we who are permanent but also for the Eastern women, who wearing shorts and tops was a natural bait for this biting insect. Two Londoners proved they could make the hike and enjoy it. Mike Johnson, long the monument custodian, was a July visitor. The area has remained fresh looking even though the weather has been hot. Recent storms have kept the area under control.

Weather: Hot, mostly. A quick shower on July 11 was welcomed. On the afternoon of July 17, a heavy rain fell. Water at least five feet deep ran for an hour or so down least one canyon carrying timber and rubble with it. Presently as much flood came into the canyon. The rain lightened but continued through most of the night and still about noon the following day. Light showers have occurred since.

Visitors: A total of 655 people in 207 parties entered the monument during the month being 9 short of the same month of last year. Of this number, 412 were contacted at Headquarters; 54 signed the register during my absence, and 130 registered at Lechua. 110 persons in 31 parties used overnight camp facilities. Eleven parties totaling 45 people made the trip to Sipahu and on to Lechua. Three conducted tours were held during the month with a total of 32 persons. This included one tour with 12 boys from the Cottonwood School Foundation.

Work: Approximately 25 hours has been spent on work during the past three weeks taking care of storm damage and natural wear. Quite a bit of work has been necessary on the trail from Lechua to the bottom of the canyon to Washburn as well as at Lechua.

Trails: Trails from Standing to the monument are in fair shape. The lower approach on new road is now easily traveled down over the Bear's Pass. The road from the monument to Lita is reported as rough. Considerable work has occurred from Lita to Leesville.

C. Robert Sandwall

C. Robert Sandwall, Seasonal Ranger

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 1, 1862. It is a very long and detailed letter, covering a wide range of topics, including the state of the Union, the progress of the war, and the administration of the government. It is a very important document, as it provides a clear and concise statement of the President's policies and goals for the country.

Navajo National Monument
Tonalaa, Arizona

July 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report for July 1953

Travel: We have had a good month with a total of 375 persons visiting the area. The previous July high was 212 persons in 1952. We have had 356 more visitors this travel year than we had during the entire 1952 travel year.

Weather: Ah, at last the rains came! We had 1.57 inches of moisture during July and it was certainly appreciated. It did not seem to halt our visitation except during the period between July 17 and 26. The high temperature for the month was 95 degrees and the low was 52 degrees.

Roads: Most approach roads and our own road system were sandy until the rains came. All roads were graded while the moisture lasted and are in good condition now.

Inspections: General Superintendent John Davis made an inspection of the area July 23.

General: One full day was spent working on our road grader. The front wheel bearings were repacked and checked. The gasoline pump had to be dismantled and cleaned due to rust and water in the pump and tank. A few stumps and small trees were removed along the campground road. Sandals on the Sandal Trail were repainted. The routine work of campground cleanup and guiding parties to the ruin has demanded most of our time.

Museum Activities: Six days, including a two day trip to Keet Seel and a one day trip to the Museum of Northern Arizona, were spent working on plans for the proposed Diorama with Mr. and Mrs. Warren G. Butts of California.

A silk screen reproduction of one of Harrison Begay's paintings was donated to the Monument-museum by Mr. M.A. Simon of San Francisco. This painting will be added to the Navajo exhibit when we obtain a frame for it.

REPORT OF THE
COMMISSIONER OF THE
BUREAU OF LAND MANAGEMENT

July 15, 1910

Washington

101 General to Commissioner

From: Superintendent, Klamath

Subject: Klamath National Forest, July 15, 1910

I have the honor to acknowledge the receipt of your letter of July 15, 1910, and in reply to inform you that the same has been forwarded to the proper authorities for their consideration. The same has also been forwarded to the proper authorities for their consideration.

UNITED STATES

DEPARTMENT OF THE INTERIOR

INVESTIGATION OF THE
BUREAU OF LAND MANAGEMENT

July 18, 1931

Wildlife: The first rattlesnake to be found in the head-
quarters area during the last 3 years was seen July 1st.

Publicity: The PHOENIX REPUBLIC dated July 19 and the NEW
YORK HERALD TRIBUNE of June 28, carried articles and pictures
pertaining to Navajo National Monument.

Twenty requests for information were received and answered
during this report period.

Wupatki National Monument
NATIONAL PARK SERVICE
Flagstaff, Arizona

July 26, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Wupatki National Monument
Subject: Report lml, July, 1953, Sunset Crater National Monument

Weather:

Light to moderate mid-day showers; otherwise clear and bright. Temperature normal.

Inspections:

General Superintendent John W. Davis made an inspection of the area on the 22nd.

Maintenance:

Lettering on all signs repainted. Stakes replaced on trail to crater rim. Door on men's rest room repaired.

Roads and Trails:

Entrance road and upper end of loop road in bad shape at beginning of month. Maintenance Bean worked those sections into good shape with the help of the July showers.

Interpretive Service:

Travel: ~~2227~~ 7447 visitors in 2287 parties entered the monument. Last year there were 5635 visitors in 2001 parties. 2929 visitors in 856 parties were not contacted, entering the monument at times when the contact station was closed.

Groups: Students, Arizona State College, Flagstaff (10); Dr. Bertha Dutton with two groups of Senior Girl Scouts (21)(21); the Indiana Club, Phoenix (32); Boys Club, Mountain Meadows Ranch (29); Explorer Scouts, Patterson, N.J. (17);

Foreign: Foreign countries represented this month included Australia, Austria, Canada, Brazil, England, Eire, Denmark and France.

Wildlife: One porcupine was seen by Ranger Newell. Three gray fox were reported by tourists on the loop road.

RECEIVED
JAN 10 1957

UNITED STATES
DEPARTMENT OF THE INTERIOR
Tonto National Monument
Roosevelt, Arizona

July 20, 1933

Memorandum

To: General Superintendent
From: Superintendent, Tonto
Subject: Narrative Report, 1st, Tonto, July 1933

Weather. Hot. Up to 106 degrees on several days, quite a few humid days during month. 2.8 inches rain, mostly on July 16-17.

Travel. 1953 visitors for the month, compares with 1215 last July.

Roads & Trails. The entrance road oil job seems to be standing up well so far. A cover of fine gravel is kept on the road, & road is dragged regularly with the truck & drag broom. The hard rain of July 7 washed some of this gravel into the drainage diversions and made special maintenance necessary. The Schramm trail tractor was brought out from Gila Pueblo to help push gravel out of the turnouts.

The ruin trail was washed in places, and repaired, but needs the usual yearly working over.

Projects. A detailed completion report on the Entrance Road Project is nearly finished. Pictures are being printed by the San Diego Laboratory. Some work is being accomplished on the utility area, chiefly construction of a loading dock on the east side where the area is about the height of a truck bed above the surrounding terrain. Remainder of the water system project awaits our knowledge of precise location of house connections.

Special. Word was received in Gila Pueblo of secretarial approval of construction of houses & comfort station planned here.

General. A pipe railing was put up alongside the drinking fountain, as a temporary safety measure pending further study by the architects.

July was a hot month as usual, quite a few visitors, quite a little maintenance accomplished, and considerable office work accomplished.

We are paying for the nice winters now.

C. C. Sherr

UNITED STATES
DEPARTMENT OF THE INTERIOR

TUMACACORI NATIONAL MONUMENT
Tumacacori, Arizona

July 25, 1953

Memorandum

To: General Superintendent, SMM

From: Acting Superintendent, Tumacacori

Subject: Superintendent's Monthly Report for July, 1953

Weather Conditions: The heat broke with the coming of the summer rains on July 5th. Then in a 12 day period we received a total of 4.47 inches of precipitation. The Santa Cruz River was in flood stage for many days. One local resident said it was the highest she had seen the river since 1914.

Inspections: Architect Kenneth Saunders on July 7th to check the progress of the rehabilitation job on Residence #1.

General Publicity: Another Spanish language article on this area appeared in the June issue of "Frontera" a Mexican magazine.

Complaints: One grumpy looking man had me ready to take full flight when he said, "where can I register a complaint?" I said, "Right here, why?" "Your museum glass is too clean and I didn't see it and bumped my head." I guess maintenance man Deubler had better lay off the elbow grease a bit.

Maintenance: Work is still being carried on in Res. #1 by maintenance man Deubler. We hope to have the house all spruced up for the superintendent.

New Construction: The contractor for the shelter roof over a section of the old mission has not done a bit of work all month.

Visitors: Cactus Pete II - John Lewis and wife, July 19th.

Personnel: Superintendent Jackson was transferred to the Superintendency of Pinnacles Nat'l Mon't., Calif. We will certainly miss Earl and his family. He has done a great deal for this monument including "Tumacacori's Yesterday" and the forthcoming mission trail-booklet. I am sure that all others that have worked here under Earl will agree with me that he has been an excellent administrator and a wonderful person to work with. Region Four has picked up another good man.

THE UNIVERSITY OF CHICAGO PRESS

1. The first thing I noticed when I stepped out of the plane was the cold, crisp air. It felt like a fresh blanket after a long, hot journey. The sun was shining brightly, and the birds were chirping happily. I took a deep breath and felt a sense of peace wash over me. It was exactly what I needed.

It is not a fair statement to say that the Government is not doing enough to help the people who are in need. The Government is doing all that it can to help the people who are in need.

THE UNIVERSITY OF CHICAGO
CHICAGO, ILL.

Archaeologist Van Valkenburgh returned to the Regional Office on July 11, after completing her special assignment here.

Research and Observations: Archaeologist Van Valkenburgh cataloged part of our sherd collection. It is hoped that she will be able to return this fall to complete this work.

Weeds are taking over the area as happens annually when the summer rains have started.

Cooperating Governmental Agencies: Mr. L. B. Curtis, District Entomologist, brought a supply of *Vodalia* beetles to combat the Cottony Cushion Scale in our patio garden.

The Univ. of Ariz. measured the depth of the water in our well. It measured 28 feet, a drop of 7.9 feet in 3 months!

Interpretive Service: 183 conducted trips were made through the old mission church with 1434 visitors. The museum and garden were used by 1894 visitors. 2228 visitors received information at the register desk.

Increase or Decrease in travel:

| | |
|--|--------------|
| Visitors this month | 2356 |
| Visitors this month last year: | 2388 |
| Percent decrease. | .01% |
| Highest July travel prior to 1953. | 2601 in 1951 |
| Percent of decrease over July of 1951. | .09% |

Request for Information: One party in New Hampshire requested a list of "quite water streams near Tumacacori for canoeing." I guess that most any of our dry washes will suit him.

William C. Bullard Jr.
Acting Superintendent

 Department of the Interior

**Tuzigoot National Monument
Clarkdale, Arizona**

26 July 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Superintendent, Tuzigoot National Monument.
Subject: Report 1st, July 1953

There follows the narrative report of activities in this area for the month of July 1953.

Weather: Has been hot and humid with plenty of rain. A cloudburst in Jerome at 3:30 P.M. on the 8th washed rocks, mud and debris onto Highway 89A and blocked traffic for 12 hours. Two cars were locked in the slides. A spot of water hit near the top of Cleopatra Mountain and washed part of the "J" away. Another cloudburst on the 17th flooded the tail race pond and broke the earth dam at Mrs. Vesoar's ranch. Water surrounded the ranch buildings just as the Superintendent was inspecting Tuzigoot Ruin for damage. We phoned Phelps-Dodge, which owns the property. P.D. phoned the Sheriff's office fearing for Mrs. Vesoar's safety. The sheriff recruited Ranger Ed Hill and his four-wheel drive Jeep, but they were unable to persuade Mrs. Vesoar to leave. Eventually Mr. Hill, the Sheriff, and the water subsided.

Inspections: Routine inspection of the area was made by General Superintendent John M. Davis on the 12th.

N.P.S. Visitors: Mr & Mrs. Lloyd M. Pierson of Montezuma Castle on the 6th.

Don Humphrey of Grand Canyon National Park on the 20th.

Dean Barker and John Falotice of Grand Canyon National Park on the 25th.

Reportworthy Visitors: Ted Smiley, erstwhile Custodian of Tuzigoot, now of the Laboratory of Tree Ring Research, University of Arizona, Tucson on the 5th.

Dr. Bob Lister, onetime National Park Service Ranger, now with the University of Colorado, Boulder on the 16th.

Organized Groups: July 4 - Circle D Trailer Ranch, Phoenix; 33 in party.

July 13 - Friendly Pines Camp; 15 visitors

July 16 - Phoenix Campfire Girls; 8 visitors

July 19 - Phoenix YMCA Campers; 10 visitors.

July 22 - Sul Ross State College, Alpine, Texas; 76 visitors.

Interpretive Service: 3704 Visitors entered the area in 1065 cars. 3389 visitors went through the ruin; 3332 entered the museum and were oriented. 405 visitors signed the outside register before 8:00 A.M.; after 5:00 P.M. or on the days the museum is closed at lunch time. 100% of our 8-12; 1-5 visitors were contacted in the museum. Travel came from 43 states, Alaska and 10 foreign countries.

The numerous rainy days easily accounts for the slight decrease in travel.

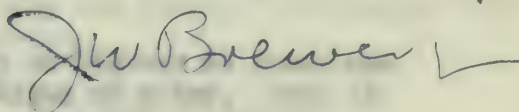

Publicity: Arizona Republic of Sunday July 19 carried a magazine section publicizing the Verde Valley; which included a story on Tuzigoot and a picture of the Superintendent.

An editorial in the Phoenix Gazette of July 15 said that the editor hoped the people of Jerome would carry on with the plans of Brewer.

Monument Approach Road: The road from Clarkdale to Tuzigoot was scraped on July 18. The loop drive into the monument was also bladed and smoothed.

Storm Damage To Tuzigoot: The cloudburst on the 17th caused some damage to the north wall of room 15, Group V. Mud slides covered the drain under the trail and the torrent undermined the wall and entered the room. A drain from the room permitted the water to run under the trail with out further damage.

Personnel: Jimmie "Rawhide" Brewer leaves for his new position as Superintendent of Wupatki National Monument within the next few days. Lloyd Pierson of Montezuma Castle entered on duty the 28th as Acting Superintendent.

James W. Brewer Jr.
Superintendent.

Information Service: 1954-1955. This service was established in 1954 and was discontinued in 1955. It was a service for the purpose of providing information to the public. It was a service for the purpose of providing information to the public. It was a service for the purpose of providing information to the public.

July 28, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report for July, 1953

Weather Conditions

The long drought which had caused forest fire danger to soar to an unprecedented high was finally broken on July 5 and since that time almost daily showers have made a total of around 2 1/2 inches for the month. Some of the storms were accompanied by lightning and two bolts struck near the residences with one bolt striking the transformer on the power line causing a four hour break in service.

Administration

Administrative duties have been kept current and all Fiscal year reports submitted.

Maintenance

Needed interior repair and decoration was made in both quarters and general cleanup of grounds and roadside was made after completion of the road oiling job. Several new signs were made and installed. The El Morro entrance signs were completed and the Sunset Crater-Mupatki Loop road sign was poured and removed from the cast as well as several small emblems. The Island trail was cleaned of all litter and minor repairs made.

The Float valve in the water sump on Highway 89 stuck and caused the loss of approximately 150,000 gallons of water. Each of these losses substantiates our need for a large storage tank at Walnut Canyon and a larger sump. A weekly check has been maintained thru-out the year and this one caught us "between laps".

Travel

Each succeeding month during the travel year has broken the record and July was no exception. We had the largest number of visitors ever recorded for a single period with 6,546 visitors in 1,841 cars. Poor approach roads have discouraged many and the almost daily showers during the last two weeks also discouraged some visitation

July 20, 1955

Dear Sirs:

I am pleased to hear that you are well.

I am sure you will find the enclosed of interest.

I am, very respectfully,

UNITED STATES

Interpretive Services

The detailing of Park ranger Spangle as liaison officer in charge of a Navajo fire fighting crew flown to the White Lake fire at Yellowstone National Park has thrown the bulk of interpretive work on the Superintendent and Park ranger during the last week. Heavy travel has left little time for other work.

A total of 122 hours was spent in actual contact time with 1,674 groups comprised of 5,951 visitors. Visitor contact has been maintained from 7:00 A.M. to 7:00 P.M.

During the oiling of the road it was necessary for all visitors to walk in the half mile from the entrance but they were all good sports and we did not receive a complaint.

Fire Protection

Park ranger Paul F. Spangle was called to the White Lake Fire at Yellowstone National Park as liaison officer in charge of a crew of Navajo fire fighters. The call came thru at 10:30 P.M. A charter plane picked him up at the Flagstaff Airport on July 22 at 2:00 A.M. and he left for Yellowstone with the fire fighters from the Gallup, N.M. airport at 3:15 A.M.

General

The Boy Scout Jamboree is over and Walnut Canyon was not visited by a single organized group. Some 50,000 were supposed to pass thru Flagstaff.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Flagstaff, Arizona

July 25, 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Acting Superintendent, Wupatki National Monument
Subject: Report 1ml, Monthly Narrative Report, July, 1953

Weather:

Hot, clear and dry through July 1st. Hot, muggy, with some afternoon cloudiness since the 1st. Only two measureable rains - .51" on the 9th and .51" on the 17th. The hot weather may have discouraged some visitors early in the month. The rains kept no one away; the day of our big rain was one of our heaviest visitor days.

Special Activities:

Seasonal Ranger Jack Stanley appeared on the Arizona Highways TV show on the 17th. He talked about what to see in the Wupatki-Sunset Crater area. Several visitors have mentioned seeing the show and undoubtedly many more have visited the monument as a result of it.

Inspections:

General Superintendent John M. Davis visited Wupatki on the 22nd. With Construction Supervisor Chittum and Acting Superintendent Burroughs, he made a thorough inspection of the Wupatki road construction project and the new road alignment.

Maintenance:

With record travel and year-end administrative work, the ranger force has had little time for more than on-site routine clean-up. However, we did manage to get the maintenance area at Heiser cleaned up a bit, and picked up roughly a half-ton of cans, cartons, bottles and paper along the Wupatki-Sunset Crater road.

The letterhead memorandum is from the Bureau of Land Management, Department of the Interior, to the National Park Service, Department of the Interior, dated July 19, 1934.

Roads & Trails:

Maintenance man Bean worked the Sunset Crater entrance road and the upper end of the loop road into good shape with the help of the July rains there. He is now working on the lower end of the loop road which, because of continued dry weather around Wupatki and Heiser, is getting rougher and developing some bad holes. A couple of good rains at this end would really help to get the road in shape.

New Construction:

After a brief shut-down to complete the Walnut Canyon road, Construction Supervisor Chittum again has the Wupatki road construction under way. Much of the base material for the U.S. 89-Citadel section has been hauled, but progress has been slowed by continual loader breakdowns.

Interpretive Service:

Contact service was maintained daily on a regular 8-12 and 1-5 schedule and irregularly during noon and off-hours as circumstances permitted. On a few occasions the contact station was closed to take care of emergency maintenance or to pull unfortunate visitors out of the cinders.

Travel: Travel this month broke all previous records. 3034 visitors in 945 parties entered the monument as against 2072 in 665 parties last July. 563 visitors in 183 parties came at times when the contact station was closed and so were not contacted.

NPS Visitors: Bob Burns and Don Squires, Lake Mead, on the 18th. Jimmie and Ida Brewer, Tuzigoot, on the 19th.

Groups: Dr. Bertina Dutton, with 21 Senior Girl Scouts, on the 4th and again on the 24th. The groups camped overnight, were given campfire talks, museum talks and guided tours through Wupatki and Citadel ruins. These were excellent groups and it was a pleasure to have them.

Group of 7 Senior Explorer Scouts, Post 109, Palatine, Illinois, on the 28th.

Foreign: Many visitors from foreign countries visited Wupatki this month. Represented were Australia, Canada, Canal Zone, Denmark, England, France, Germany, Holland and Liberia.

Information was received from the United States Department of the Interior and the Bureau of Land Management that the land in question is owned by the United States and is being offered for sale. The land is located in the State of California and is being offered for sale at a price of \$100,000. The land is being offered for sale in order to raise money for the construction of a new highway. The land is being offered for sale in order to raise money for the construction of a new highway.

| Wupatki Spring | July 1st | 1.00 | 1.00 | 1.00 |
| Heiser Spring | July 1st | 1.00 | 1.00 | 1.00 |

Personnel:

Seasonal Ranger Jack Stanley entered on duty on the 1st. Jack is a wildlife conservationist by training and an excellent photographer. He is a welcome addition to the staff.

Superintendent Fred Bruce and family transferred to Zion on the 4th, with Fred entering on duty there as Assistant Chief Ranger. All of us around here say good-byes very much and wish them the best of everything at their new station.

Water Supply:

Wupatki Spring has gone into its usual summer slump and is flowing about 100 gallons per day. This is barely enough for the residence, and not enough to supply the public drinking fountain.

Weiser Spring is holding up pretty well, with a 1800 gallon per day flow at present. Water samples still show some contamination. Mr. Ed. Stanfill of the Arizona State Department of Health and Sanitation made a field check at Heiser last week. We expect to receive his recommendations for correcting the situation within a few days.

September 10, 1953

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report for August 1953

Weather

During August the weather continued much the same as in July. Heavy showers fell in many areas, causing damage to roads and trails, and in one or two instances lightning strikes occurred. Again stormy weather seemed to keep visitors away from some of the monuments, especially the more remote ones that are accessible only over unpaved roads.

Special Activities

Headquarters--The staffed fiscal office began operations during the month under the supervision of Chief Clerk Darrell Crumley. Purchasing Agent Tom Varela from the Regional Office and Cost Project Clerk Inez Quigley, from Grand Canyon, reported for duty on August 10. Fiscal Accountant Laird D. Stoker transferred from Mesa Verde, effective August 17, and property and Supply Clerk Clarence E. Davis, from the Washington Office, reported on August 24, completing the present staff in the fiscal office. They have been very busy getting the newly established office operating smoothly, and at present are busily engaged in preparing the 1955 estimates.

Naturalist King attended the Pecos Conference, held at the Museum of Northern Arizona, Flagstaff. He reported this conference to be one of the best, if not the best, he has attended. These meetings are attended by archeologists, ethnologists and other scientific men from universities and colleges throughout the country. After meeting and talking to these men, Mr. King is convinced there is much interest in the National Park Service archeological areas and in our efforts to preserve these priceless ruins. He also feels that the Service has many influential friends in high places in the academic world.

An invitation to hold the 1954 conference at Gila Pueblo was extended in the name of General Superintendent Davis and enthusiastically accepted. Naturalist King was appointed chairman of the committee for the next meeting. Other members appointed were Dr. Richard Woodbury of Columbia University and Archeologist Thomas Onstott, Region Three. Mr. Onstott's resignation as of September 1 caused the appointment of Dr. Ernst Antevs to replace him, inasmuch as two members of the committee are supposed to be local.

Special Activities - Continued

Superintendents Aubuchon and Guillet, Payson Burns, Dale Spangle, and Archeologists Pierson and Peck from the Southwest National Monuments attended all or part of the meeting, along with other Service personnel from Region Three. Many of them came on their own time and at their own expense.

Arches--The main battle scene for the Universal picture "Hombre of Cochise" was filmed in the Devil's Garden. Filming took place here. The picture was directed by Douglas Sirk and the lead roles played by Rock Hudson and Barbara Rush. Filmed in color and 3-D, it should find some very spectacular scenery.

Mr. Wilson made one inspection trip to Natural Bridge, which turned out to be more exciting than he had anticipated. His personal report of this trip reads as follows:..."The entire trip to Natural Bridge was made via Route 16 through Hanksville and Tropic, and how to advise the many visitors who inquire about this route. One day was spent on a point between two of the 60 crossings in North Canyon where a roaring flood ran its course to the Colorado River. Four days were spent next morning working through the remaining six miles of the canyon. My wife and two little daughters are not experienced road builders. It is a beautiful trip, but I don't advise taking it if there is a sign of a cloud over the Henry Mountains.

Walnut Canyon--Superintendents Guillet and Brewer, Rangers Sutton and Spangle, and Mr. and Mrs. Dale King attended the 25th Anniversary program of the founding of the Museum of Northern Arizona and added their congratulations to the hundreds of others received by Dr. Colton and the Directors for their fine work during past years. Talks were presented by Dr. Gladys Gammage, Mr. John Pabst, Dr. Edwin McKee, Dr. Edwin Colbert, Dr. J. C. McGregor and Dr. Gladys Gammage.

Official Visitors

Headquarters--Assistant Regional Director Cornell; Archivist Kenneth Saunders; Channing T. Howell, en route to his new assignment as superintendent at Grand Quivira; Superintendent Lewis and Gordon Zerby of Saguaro; Archeologist Fred Peck; and Acting Superintendent Hanson, Organ Pipe Cactus, to work with Chief Clerk Crowley on the estimates.

Arches--Highway Engineers George Smith and George Johnston; Soil Conservationist Balch; Forester Ratcliff.

Aztec Ruins--Naturalist King, accompanied by Mrs. King, and two were overnight visitors; Assistant Regional Director Patrow and a Pierre from Washington; Regional Forester Carlson.

Casa Grande--Assistant General Superintendent, Esteller, who spent a day in the area discussing various administrative problems with monument personnel.

Chaco Canyon--Engineers Moran, Smith, and Johnson, Regional Office; Naturalist King.

Chiricahua--Assistant Regional Director Cornell; Superintendent of Construction and Maintenance Mott.

Fortezuela Castle--Messrs. H. Miller, John Davis, E. Gaston, and Arthur Gebens; Messrs. Reed and Schroeder; Naturalist King and Lavajo--Archeologists Reed and Schroeder.

Sunset Crater--Naturalist King

Tonto--Architect Saunders and Student assistants Miller and Wheeler; Mr. Mott.

Official Visitors - Continued

Tumacacori--Assistant Regional Director Cornell; Architect Saunders and Student Assistants Williams and Wheeler; Mr. Lott.

Tozigooot--Naturalist King; Archeologists Reed and Schroeder.

Walnut Canyon--Assistant Regional Director Patray and Mr. Tierne; Engineers Smith and Johnston; Naturalist King; Archeologists Reed and Schroeder.

Upatki--Engineers Smith and Johnston; Landscape Architect Carter; Archeologists Reed and Schroeder; Naturalist King.

General Publicity

Headquarters--The Arizona Record, published in Globe, carried an article concerning the establishment of the fiscal office. All the incoming personnel were named along with a short statement regarding the background in the National Park Service.

Mention of the Montezuma Castle and its location in the Verde Valley, along with a picture of the ruins, was made in Westways magazine, official publication of the Automobile Club of California.

Superintendent Sharp of Tonto recently received a letter from a man in El Paso, Texas, who had seen on television the film prepared by the Globe-Miami Chambers of Commerce to publicize this section nationally. Some pictures of the ruins are included in this film. This letter was read over a local radio station, with comments concerning the growing tourist interest in this part of the country. We have received other evidence that this film, which is in color, is being shown widely throughout the United States--all of which would seem to forecast an ever-increasing visitation to the monuments in the Southwest.

Tozigooot was featured in an article appearing in the Yavapai County Messenger, and a representative from Arizona Republic visited the area to gather information for a forthcoming article.

Harry W. Halm wrote a fine article concerning Walnut Canyon for the New York Times, which has resulted in many visitors stopping by.

Maintenance and Rehabilitation

Most of the maintenance work accomplished the past month has been of a routine nature. Some building maintenance work is underway at Gila Pueblo.

In most of the areas, heavy summer visitation with the resultant increase in interpretive service, cleanup of picnic and camp grounds, cutting weeds (which stubbornly grow most rapidly during the busiest seasons), repairing storm damage here and there, and keeping the physical plants in operating condition have kept the personnel in our small one-and-two-man areas fully occupied.

A special project at Tozigooot was the hanging of new curtains in the museum, which resulted in a marked improvement in the appearance of the room.

New Construction

Construction work on the comfort station and two new residences started at Tonto on August 20. At the end of the month Superintendent Sharp reported good progress on this project.

Roads and Trails

At Arcnes one torrential rain caused a serious washout on the Windows Road, but even so the long-awaited moisture enabled maintenance man Lamborn to do a good job on all monument roads. The Canyon de Chelly approach roads were very muddy - at times impassable - which prevented visitors from reaching the monument.

The Chaco Canyon roads were policed boundary to boundary twice, and trash picked up in sizable quantities. The trading posts are now selling "near beer" and from the number of bottles along the highways, it would appear they are doing a brisk business. Construction of the new headquarters to Pueblo Bonito road was complete with the exception of grading and scarifying the fill material. This probably can't be accomplished until next spring when there should be enough moisture in the material to bond it.

Chiricahua approach roads were at times impassable from local downpours, but on the whole they were in fair condition.

Mr. Bullard reported that the approach roads to Coronado National Memorial are in fine shape--and adds that it would be interesting to know how many people pass through that area each month.

At El Morro, one of the few areas receiving no heavy downpours, the approach roads were in good condition and the monument road in excellent shape.

Superintendent Aubuchon writes that at Navajo "road conditions during August can best be described as having been 'wishy washy' due to rain.

At Tonto there was heavy flood damage to the ruins trail and also some damage to road drainage. A heavy maintenance program will be required on the ruins trail later this fall when it is cooler and there are more slow rains, which do not run off so quickly but soak into the ground.

Trails and roads at Tuzigoot were cleared of overhanging brush. Mud washed down by rains was removed from the ruins trail.

Two Navajo laborers, borrowed from Wupatki, did some repair work on the roads and trails at Walnut Canyon.

Wupatki--Progress on the road project picked up speed during the month with the acquisition of new equipment. Highway Engineer Johnston was assigned to the road job for several days on two occasions during the month. His assistance and the benefit of his experience were greatly appreciated.

Concessioners

One of the problems faced by isolated areas that is not commonly realized by those living near populous centers was pointed out by Superintendent Cooke. He wrote that "Lack of a concessioner or anyone else to serve single meals continues to be one of our problems. With the Silver Star Ranch serving practically no meals except to overnight guests and charges for overnight guests running \$10.00 per day, many visitors are disappointed in not being able to get a lunch here or stay overnight within the limits of their pocketbook."

Accessions

A welcome accession was five excellent steel safe sections each with five drawers, which enabled us to file in convenient and orderly manner many maps and other large items that have been in great disorder since 1942.

Accessions - Continued

Arches--A new Chevrolet Coupe pickup (which Superintendent says rides like a Cadillac compared to the old Dodge truck which it replaced); also received were two badly needed tools, an acetylene welding outfit and a drill stand which converts the portable drill into a drill press.

Tumacacori--A copy of Wyllys' Arizona, History of a Frontier was donated to the library by the Southwestern Monuments Association.

Tuzigoot--Some 18 books and pamphlets were donated to the library by the Southwestern Monuments Association, Arizona State Museum and the Carnegie Institution of Washington.

Interpretive Service

At headquarters Mr. King spent approximately two days editing the new trail booklet for the mission and grounds at Tumacacori, and took it to the printer on August 14.

While visiting Walnut Canyon, Mr. King was much impressed by the originality and excellence of the cleverly painted pictographic station numbers on the Island Trail.

At Montezuma Castle, Tuzigoot, Sunset Crater and Wupatki he found many people using the trail booklets.

At the August meeting of the NFFE, Mr. Arnberger presented an illustrated program featuring colored slides of areas administered by the National Park Service. The slides were furnished by the Washington Office and had been used previously in presenting budget needs of the Service before Congressional committees.

At Chaco Canyon, Seasonal Ranger Romano started work on a proposed self-guided nature trail for Chettro Kettle.

A lanternslide lecture was given to a group of Girl Scouts at Chiricahua; four hikes were conducted. As usual, the Massai Point self-guided nature trail proved popular with visitors.

Montezuma Castle--The Washington Office was furnished a 33-minute recording of interpretive activities at Montezuma Castle and Well. This included an average contact at the Well Museum, an archeological talk on the Castle, and an excerpt from a forthcoming program of bird calls.

Navajo personnel conducted 30 trips to Betatakin Ruins. When it is considered that each of these trips requires about three hours, considerable time is devoted to guided trips. One campfire talk was given.

Museum Activities and Exhibits

The museum at Montezuma Castle and the one at Montezuma Well were highly commended by Naturalist King. He states that "they reflect expenditure of great ingenuity and ability, and probably are the best locally-made exhibits ever to be installed in the Southwestern National Monuments". At the Well museum, the panel painting of legends of Montezuma Well, contributed by Mrs. Elsie Spangle of Walnut Canyon, is very popular with the visiting public. An oil painting showing the Verde Valley as it probably appeared in Pleistocene times was added to the Geological panel in the Castle museum. This painting was done by a professional artist friend of Ranger Sutton, using materials purchased by the Southwestern Monuments Association.

Museum Activities and Exhibits - Continued

Mr. King was delighted with the fine museum developed in Jerome, Arizona, under the direction of James W. Brewer. This museum, according to Mr. King, should do much to place Jerome on the map as the "biggest ghost town in America". We feel rather closely related to this museum as it sells all pertinent booklets of the Southwestern Monuments Association, and wooden signs for the Verde Valley monuments will be made in the fine workshop in the basement of the museum. Approximately one-half of the 10,000 Jerome booklets published by the Association have been sold in less than three months.

Superintendent Aubuchon, Navajo, reported some appreciated donations to the museum--a metate and mano by Bobby Patterson of Cow Springs, and a postcard rack by the Fronske Studio, Flagstaff.

Research and Observation

Mr. King discussed with Messrs. Brewer and Burroughs at Wupatki the desirability of clearing a small area at the Citadel which is to be used for parking. Mr. Burroughs will run a soil profile trench and carry out the additional work required to determine the presence of any prehistoric material in the area.

Approval was given to the issuance of a collecting permit to Dr. Donald Hoffmeister of the University of Illinois for collecting small mammals at Wupatki.

Dr. Sherwin F. Wood who has been examining kissing bugs collected in Southwestern National Monuments areas reported two important discoveries so far this summer. Specimens of kissing bugs, Triatoma sp. from Tonto have revealed the presence of Trypanosoma cruzi, the causative agent of Chagas disease (a serious public health problem in Central and South America, but so far no genuine case of the disease has been identified in the United States); Triatoma sanguisuga indictiva were located at Tumacacori, verifying the location of this species, which had previously been in doubt.

Mr. Don B. Stallings, a collaborator, found a rare butterfly, Megathymus ursus in Chiricahua. In addition to this one specimen at Chiricahua, it appears there are only eight other specimens of this exceedingly rare butterfly known in the entire world.

Superintendent Farr at Capulin Mountain reported an interesting wildlife observation: "Mrs. Farr and I had the pleasure yesterday evening of watching a bobcat charm a rabbit and those who are skeptical about such an operation may take my word for it, they sure can get the job done. This little bunny was completely overcome while the big cat crawled to within striking distance. We then moved in and forced the cat to take his eyes off the bunny. Then the rabbit became alive and hopped away, while the big cat gave us a disgusted growl and sneaked off in the bushes."

The Southwestern Forest and Range Experiment Station, University of New Mexico, made an analysis of the vegetation inside the fenced portion of the monument as compared with that outside, at Gran Quivira. The monument will be furnished with a copy of the report.

New bird records for Tuzigoot are: Wood Ibis, Mycteria americana, and the Lazuli Bunting, Passerina amoena.

Research and Observation - Continued

On his off-days, Ranger Hill has been carrying on some preliminary archeological surveys and has run across some very interesting sites which seem to include early man and P I - II. This early period up until the late Tuzigoot times is the least known portion of the Verde Valley pre-history.

Loan Library

Accessions totaled 116, including 17 books, 2 tape recordings, 56 periodicals, and 41 separates.

Mr. Brooks Darlington, publisher of the Arizonian, was contacted regarding the availability of pictures of desert animals for the photographic files.

Southwestern Monuments Association

The fifth edition of the guide booklet for the Sycamore Trail, Montezuma Castle, was received. Mr. Arnberger corresponded with Navajo concerning the availability of books on wildlife to be sold by the Association in that area.

Several hours were spent setting up new inventory cards in order to simplify the keeping of the records. Royalties for the last quarter were figured and paid.

All spare time was spent gathering material for the annual report. Approximately one-half of this work has been completed.

Ruins Stabilization

The current program at Aztec Ruins was completed under Archeologist Richert's supervision and then he returned to Chaco Canyon, where he resumed active work on Kin Kletso. Mr. Vivian completed the Gran Quivira excavations report, a very fine 153-page document, which it is hoped can be published within the coming year.

Travel

Again this month some of our superintendents thought weather reduced travel to their areas somewhat, and considering the thunderstorms that occurred in places, with resultant floods, washed-out roads and other phenomena that accompany our Southwestern summer storms, they probably are right. Despite decreases over the previous year in a few areas, travel for August was 3 per cent above that of August, 1952, and for the travel year to date we are 16 per cent ahead of last year.

Visitors

Aztec Ruins--Naturalist and Mrs. Dodge and daughter Judy; Mr. and Mrs. John Kell and friends; Mr. Hillis L. Howe, Cottonwood Gulch Foundation from Thoreau with group of 25 boys.

Canyon de Chelly--Jack Breed, on photographic coverage in color for Time magazine; Herbert Elliston and family, August 7 and 8 - Mr. Elliston is editor of the Washington Post; Mr. Julian H. Solomon, Camp Counselant, Girl Scouts of America. Several groups of Boy Scouts and Girl Scouts.

Chaco Canyon--Hubert Ball, Chief Engineer, Mid-Rio Grande Conservation District; Macon Freeman, Mel Coston, W. J. Durham, Publications Manager, Staff Photographer, and Division Officer respectively of the Humble Oil Company., to take pictures for their publication; Ted Smiley of the Tree Ring Laboratory in Tucson; Dr. Robert Lister of the University of Colorado with 18 students; Messrs. Louis Laury, V. F. Crook of the Albuquerque Office, and Mr. Clifford G. Pernall, Washington.

Visitors - Continued

Gran Quivira--Dr. Don Lehmer, University of Nebraska, who is doing archeological work on pipe line about a mile and a half north of the monument.

Montezuma Castle--Mr. E. R. Blakley, Botanist at Desert Botanical Gardens, Tempe; Dr. Allen and a class of 24 students from Arizona State College, Flagstaff.

Navajo--Dr. and Mrs. Hugh Cutler, St. Louis; Dr. and Mrs. R. Woodbury of Columbia University; Dr. and Mrs. Emonson of Tulane University.

Tuzigoot--Dr. and Mrs. Richard Woodbury, Anthropologist, Columbia University; Dr. and Mrs. Rey Ruppe', Iowa State University; Mr. and Mrs. Dick Shutler, Museum of Anthropology, University of California.

Walnut Canyon--Dr. Kesner, University of Arizona; Dr. Eldred D. Wilson, State Bureau of Mines, University of Arizona; Grand Canyon Music Club, 85 members; Tocoloma Club, California, 48 members

Wupatki--Mr. and Mrs. Malcolm Farmer, Museum of Northern Arizona, accompanied by Miss Irene Emery, Laboratory of Anthropology; Mr. P. W. Simmons, Atomic Energy Commission, Mining Division, Grand Junction, Colorado; Dr. and Mrs. Robert Manners, Brandeis University; Dr. and Mrs. Richard Woodbury, Columbia University, Department of Anthropology, with a group of students; Mr. Ted Sayles, Arizona State Museum.

Fire Protection

Tonto--Fourth cigarette-caused fire which was controlled with difficulty by Archeologist Wenger, Laborer Tweedy, and a visitor. If this fire had not been controlled, it would have burned the whole slope under the ruins where most of the botanical interpretation is carried on. Seems as visitation increases, more thoughtless persons are in the crowds and they are the ones who cause trouble for the overworked personnel in small one and two man areas.

Walnut Canyon--Eight hours were spent by the superintendent and seasonal ranger putting out a fire in a huge snag in what is perhaps the roughest part of the monument. Again on August 21 a large tree was struck by lightning during a heavy rainstorm. However, the following morning smoke again appeared and this was completely extinguished. It appears the tree will survive.

Forest Pest Control

Aztec Ruins--An infestation of tent caterpillars was sprayed with Chloradane and Triton B. The spray reached only 40 feet, however, so the operation was not a complete success.

Personnel

Canyon de Chelly--As a swan song, Mr. Bright wrote as follows:

"After having the good fortune of being associated for the past 20 years with Region Three--10 of which I have had the privilege of being a member of the Southwestern National Monuments, it is with a feeling of much concern that I submit this my last report as Superintendent of Canyon de Chelly. Through the years I have come to think very highly of our Southwestern Monuments organization and its resourceful members. A most hearty welcome to all of you at Craters of the Moon."

Personnel - Continued

Gran Quivira--Mr. Channing T. Howell reported at Gran Quivira the latter part of the month as superintendent to replace Mr. Ringebach, who is transferring to Tumacacori in like capacity.

Local Items

Chaco Canyon--If Mr. Vivian is interested in herpetology, he had an excellent opportunity to delve deeper into the subject during the month. One rattlesnake made itself at home under a bedroom floor and caused some disturbance by continually looking up through the crack between the floor and the wall. Another was found in the kitchen waiting hopefully below the refrigerator door.

Navajo--Superintendent Aubuchon writes about two men from California who drove in and stated their intention of visiting Inscription House, Keet Seel, Betatakin and Rainbow Bridge. Their plan was to ride to and from these areas, but not by horseback. In the trunk of their car they had a small garden tractor for transportation. After spending two days trying to get down to Inscription House, but never getting beyond the point to which a car can be driven, they gave up in great disgust and left for parts unknown without having seen any of the areas.

Tumacacori--For awhile on August 23, visitors must have thought a zoo was also in operation at Tumacacori. A bat was flying around inside the museum and on the floor there was a giant desert toad (8" long), at the front door a gopher snake made visitors hesitate and between the museum and the church a four-foot king snake made several appearances.

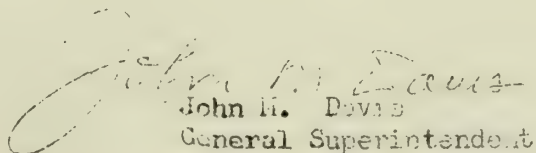

Tuzigoot--Archeologist Pierson muses, "Should lightning be added to the abandonment theories of Tuzigoot Pueblo!" Two strikes were recorded during the month--one hit the southwest corner of the reconstructed room in the ruin, ran along the floor, down the iron pipe guardrail and shattered the newell post at the bottom of the stairs. The other hit the garage, dislodged a stone and knocked out a small piece of plaster in the garage ceiling.

Tonto--Superintendent and Mrs. Sharp are proud of the baby girl, 2-1/2 months old, named Ann, who arrived in their home on August 26, for adoption. Congratulations, Charlie and Francis, to the Ann of well.

Story of the Month

The "All-Sufficient" Guide Leaflet

Superintendent Guillet was slightly surprised when he offered a visiting couple a guide leaflet for the island trail and was greeted with the reply "Oh, we have a guide leaflet we obtained at Arches." Superintendent Guillet: "A Walnut Canyon Guide Leaflet?" The woman replied, "Oh, are there different ones? We have been using this one for Arches and Wupatki," and she seemed to indicate it had worked quite nicely.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

August 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Arches National Monument

Subject: Narrative Report for the month of August, 1953, Arches

WEATHER: During the first half of the month we received two torrential rains, one at headquarters and one in the Windows Section. Two other lighter showers fell over the entire area. With this badly needed moisture came a drop in temperature, from 111 degrees down to a cool 90 degrees. In the last week temperatures have climbed back into the low 100 range.

TRAVEL: Inspite of another motion picture group taking over most of the accommodations in Moab, we show an 13% increase in travel over the same period last year, with 6713 visitors entering the area in 1803 cars and 20 busses. Forty-seven states (South Carolina absent), D. of C., two territories, and ten foreign countries were represented,

INTERPRETIVE DEVICES & SERVICE: Rangers Morris & Miller contacted 2068 visitors at the Wayside Exhibit. We estimate that 3134 people used the Cove Nature Trail, as this is the number of people who signed the register. Information was given to 986 visitors at headquarters and 24 written requests for information were answered.

NPS VISITORS, Region III: George D. Smith, Highway Maintenance Engineer
George J. Johnson, " " "
Paul L. Balch, Soil Conservationist
Harold M. Rateliff, Forrester

ROADS: Although one serious washout occurred on the Windows road the long awaited moisture was welcomed by Maintenanceman Winbourn, as it enabled him to do a good blading job on all the roads in the area. State Route # 93 was washed out badly once, but the County Road Crew repaired it very quickly.

SPECIAL ACTIVITIES: Universal Pictures Co. changed their location for the main battle in the "Son of Chochise", from an island in the river, which disappeared with the high water, to the Devil's Garden. They filmed for five days and were exceedingly considerate of the area, much more so than our regular visitor. The picture was directed by Douglas Sirk and the leads were played by Rock Hudson and Barbara Rush. Filmed in color and 3-D it should afford some very spectacular scenery.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

August 28, 1923

Memorandum

To: General Superintendent

From: Superintendent, Arches National Monument

Subject: Narrative Report for the month of August, 1923, Arches

During the first half of the month we received two tremendous rains, one at headquarters and one in the Wilson Canyon. The other half of the month was very dry. The temperature was about 70 degrees. In the last week temperatures have varied from 100 to 105 degrees.

Trails. Several of our trails have been very dry since the first of the month. We have a few trails in the Wilson Canyon. The trails are very dry. The temperature is about 70 degrees. In the last week temperatures have varied from 100 to 105 degrees.

Vegetation. The vegetation is very dry. The temperature is about 70 degrees. In the last week temperatures have varied from 100 to 105 degrees.

Animals. The animals are very dry. The temperature is about 70 degrees. In the last week temperatures have varied from 100 to 105 degrees.

Summary. The summary is very dry. The temperature is about 70 degrees. In the last week temperatures have varied from 100 to 105 degrees.

Recommendations. The recommendations are very dry. The temperature is about 70 degrees. In the last week temperatures have varied from 100 to 105 degrees.

NEW EQUIPMENT: The new Chevrolet Coupe Pickup was received and rides like a Cadillac compared to the 1947 Dodge it replaced. We are not used to such luxury, but certainly appreciate it. We also received two badly needed tools, i.e., Acetylene Welding outfit and a drill stand which converts our portable drill into a drill press.

GENERAL: One trip to Natural Bridges was made and the area found to be in excellent hands. Bob Sundwall has done a very good job this summer as seasonal ranger. We are sorry he is unable to stay on the job longer. The return trip from Natural Bridges was made via Hite & Hanksville and I learned, first-hand, just how to advise the many visitors who inquire about this route. One night was spent on a point between two of the 60 crossings in North Wash while a roaring flood ran its course to the Colorado River. Four hours were spent the next morning working through the remaining six miles of the canyon. My wife and two little daughters are now experienced road builders. It is a beautiful trip, but I don't advise taking it if there is a sign of a cloud over the Henry Mountains.

Astec Ruins National Monument
Astec, New Mexico

August 24, 1953

Memorandum

To: General Superintendent
From: Superintendent, Aztec Ruins
Subject: Monthly Narrative Report for August, 1953

Administration: The listing of F.O. and F.P.A. memoranda was brought up to date.

A key board was made and keys are being tagged as they are identified.

Fidelity bonds were finally obtained for the three employees who sell tickets and in the same mail there was a memo from the Washington office advising that bonds were no longer needed for Aztec Ruins and other areas.

Travel: There were 5394 visitors who came in 1485 cars. This brings the total for the calendar (travel) year to 19,047 which is 490 less than for the same period last year when contact service was being maintained for 11 hours each day. Under the requirements for selling Admission tickets we can contact visitors for only 8 hours each week day and 10 hours on Sundays. Tickets sold totalled 3702 with 258 trips made through the ruins for 4208 visitors. 358 visitors in 101 groups did not avail themselves of the guided trips.

Maintenance and Improvements: An air vent was made into the water pump shelter at the floor level and the pump now runs with fewer interruptions because of over heating.

A hot water tank for the apartment attached to the garage was hooked up and after considerable difficulty (digging), a leak in the line was located and repaired.

Forest Pest Control: When Regional Forester Carlson visited the monument on August 8 he found the tent caterpillars infestation in need of immediate control. At 8:00 P. M. on August 10 Superintendent Hastings left for Gallup on the first leg of a trip to Walnut Canyon for a spray rig. He returned on August 12 and the spraying was done on August 14 with the assistance of Mr. Robert Brown, a neighboring farmer and his helper. The insecticide used was Chloradane and Triton E.

1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 26

Over the centuries, various different theories have been advanced to explain the origin of the word "candy". Some believe it comes from the Sanskrit word "kandya", meaning "sweet", while others think it is derived from the Arabic word "qandi", meaning "sugar". The word "candy" is also thought to have originated from the Dutch word "candij", which means "sugar candy".

[illegible]

These findings are similar to those reported by other researchers. For example, a study by [Name] et al. (2018) found that [Description of finding]. Another study by [Name] et al. (2019) reported that [Description of finding].

1. The first step in the development of a new product is the identification of a market need. This is often done through market research, which can be conducted in a number of ways. One common method is to conduct surveys of potential customers, asking them about their needs and preferences. Another method is to observe how people use existing products and identify areas for improvement. A third method is to consult with experts in the field, such as scientists or engineers, who can provide valuable insights into the technical feasibility of a new product. Once a market need has been identified, the next step is to develop a prototype of the product. This is often done using 3D printing or other rapid prototyping techniques. The prototype is then used to test the product's functionality and to gather feedback from potential customers. Finally, once the product has been tested and refined, it is ready for production and distribution.

1. The first of these is the fact that the Commission has not yet received any information from the Government of the United States regarding the activities of the Committee for the Liberation of the People of the South (CLPS) in the United States. The Commission is therefore unable to determine whether the CLPS is a legitimate organization or a subversive group.

The spray reached up only about 40 feet and caterpillars in tents above this level are now falling down visitors necks or crawling into the residence or museum.

Utilities: On July 26 the electric power went off at 9:30 P. M. and service was not restored until 7:30 A.M. the next day. Long before this time we were out of water because our pump is operated by electricity.

On the same day the main sewer line from the restrooms became plugged. This line again became clogged on July 30 and several feet of it were dug out without finding a clean-out plug. A plumber used a sewer auger through a hole broken in the line.

On August 1 the power was off from early morning to 8:30 A. M. and from 12:00 to 2:00 P. M. The trouble was corrected when a limb resting on the line near our pump shelter was removed.

A leak in the 2 in. water line near the superintendent's residence was located and repaired.

Natural gas service for all the area west of the Animas River was interrupted for several hours on the night of August 6 when a digging machine broke the main line.

The sewer line from the restrooms became plugged again on August 7 and an old septic tank serving as a trap was discovered 15 feet from the building. This was so full that it was obstructing the line and it was pumped out with a cesspool pump on August 8.

The electric power was again off for 3 hours on August 18 when the main engine in the plant at Farmington broke down.

Protection: A hole broken through the screen wire in the door at the east end of the series of seven roofed rooms in the main ruin was repaired after it was discovered that visitors were entering here before or after hours.

Stabilization and Drainage: Archeologist Richert returned from Chaco on July 23 to resume stabilization work with 1954 fiscal year funds. This work was completed on August 20 and Mr. Richert has forwarded a report to Mr. Vivian. Work was done on 14 rooms and 7 kivas in the central housing block where stabilization ranged from minor pointing and spalling to major repair. In the case of two kivas this involved the removal of loose, unsightly concrete capping and replacement with stabilized mortar.

A thorough check was made of the East Ruin and roof timbers in rooms 1 and 3 were supported. Fleas or other insects in these rooms made the use of insecticide necessary before work could be done in them.

The drainage tile buried deep in a trench on the north side of the ruins was inspected by Hastings and Richert and found

to be functioning.

Fire Prevention: All S & A extinguishers were discharged and refilled. Brackets are still to be made for these.

Leaves were removed from the steps into the basement and paper cartons in the basement were destroyed. Paper towels and toilet paper were stacked in the old cistern which now serves as a tool room.

Paint stored in a back room off the museum was sorted and that which we kept was stored on shelves in the water pump shelter.

An unvented gas heater in the apartment joining the garage was removed as was an excessively long drop cord in the garage.

A small unapproved heater with a flexible connection in the hot water tank shelter at the superintendent's residence was removed.

National Park Service Visitors:

- July 24 Mr. & Mrs. Dale E. King were overnight visitors when Dale studied contact and interpretive problems which grow out of the sale of admission tickets and went over stabilization problems with Mr. Richert.
- July 29 Messrs Patraw and Bierne were here in connection with the Management Organization Study. Both took the trip through the ruins and then Mr. Bierne conferred with the superintendent about the monument's management.
- Aug. 5 Seasonal Ranger Octavio Romano from Chaco
- Aug. 8 Regional Forester Carlson made a fire inspection and checked on the tent caterpillar infestation.
- Aug. 8 Supt. and Mrs. Charles Sharp and friends were here from Tonto.
- Aug. 16 Supt. and Mrs. Bright from Canyon de Chelly
- Aug. 22 Naturalist and Mrs. Natt Dodge and Judy Mr. and Mrs. John Kell and friends Ranger and Mrs. Ted Sowers and family

Newsworthy Visitors:

On August 10 Mr. Hillis L. Howe of Cottonwood Gulch Foundation from Thoreau was here with a group of 25 boys.

On August 22 Dr. J. E. J. Harris of Albuquerque was here for his first return visit since he saw the ruins 35 years ago with a candle.

Homer F. Hastings
Superintendent

Canyon de Chelly National Monument
Chinle, Arizona

August 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Canyon de Chelly

Subject: Monthly Narrative Report for August, 1953

Travel: 1356 people in 400 cars this month. This compares with 1119 visitors in 339 during the same period last year. Total visitor count for the current calendar travel year is 5,508 - for the same period last year 4,109. There were 430 overnight campers - a large number of which stayed several days. Guide and contact service totaled 160 hours.

Weather: Several scattered showers throughout the month with total precipitation amounting to 2.30 inches - about normal. High-low temperatures ranged from 99 to 51.

Roads: Generally all approach roads have been very muddy - at times impassable. This prevented many visitors from reaching the monument. However, at the present time all are in fair condition. Each day finds more hard-surfacing added to the proposed all-weather highway between Window Rock and Ganado. Again, I suggest all travel to the monument be made over this route.

Organized Groups: Organized groups during the month included the following:

- 21 - Archer Mobile Camp Senior Girl Scouts on July 26-27-28.
- 17 - Senior Boy Scouts, Explorers Post No. 502 on August 12-13.
- 10 - Senior Boy Scouts, Brooklyn, N. Y. on August 23-24.

Noteworthy Visitors: Mr. Julian H. Solomon, Camp Consultant, Girl Scouts of America, on Aug. 3-4.

Mr. Jack Breed on photographic coverage in color on Canyon de Chelly for Time magazine on Aug. 4-5-6-7-8.

Herbert Elliston and family on Aug. 7-8. Mr. Elliston is Editor of the Washington Post.

All were given personally conducted tours into the canyons.

Maintenance: Deteriorated and leaking water lines around monument headquarters were dug up and replaced with new galvanized pipe.

Daily policing of campground areas is now almost a necessity due to the increased number of overnight campers.

2002, 12, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54, 55, 56, 57, 58, 59, 60, 61, 62, 63, 64, 65, 66, 67, 68, 69, 70, 71, 72, 73, 74, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, 90, 91, 92, 93, 94, 95, 96, 97, 98, 99, 100, 101, 102, 103, 104, 105, 106, 107, 108, 109, 110, 111, 112, 113, 114, 115, 116, 117, 118, 119, 120, 121, 122, 123, 124, 125, 126, 127, 128, 129, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848,

— Effects on overall health and safety

[illegible]

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. The investigator must first determine the nature of the problem and the scope of the investigation. This is done by interviewing the parties involved and by reviewing the relevant documents.

1. The proposed all-weather highway between Winston-Salem and Greensboro, North Carolina, is a project of the Federal Highway Administration, U.S. Department of Transportation. The project is being financed by the Federal Government and the State of North Carolina. The project is being constructed in two phases. The first phase is the construction of a four-lane highway between Winston-Salem and Greensboro. The second phase is the construction of a four-lane highway between Greensboro and High Point. The project is being constructed by the North Carolina Turnpike Authority. The project is being constructed in accordance with the provisions of the Federal-Aid Highway Act of 1956, as amended.

On this occasion we had a very good time and enjoyed the trip very much. We were very comfortable and the food was excellent. We were very happy to see you and your family. We hope you are all well and happy. We will be in touch again soon. Love, Mom and Dad.

Report of the Committee on the Administration of the Government of the District of Columbia, 1901-1902, p. 10.

It was then personally submitted to the Bureau.

Cont. from page 1.

General: After having the good fortune of being associated for the past 20 years with Region Three - 10 of which I have had the privilege of being a member of the Southwestern National Monuments, it is with a feeling of much concern that I submit this my last report as Superintendent of Canyon de Chelly. Through the years I have come to think very highly of our Southwestern Monuments organization and it's resourceful members. A most hearty welcome to all of you at Craters of the Moon.

Everett W. Bright
Superintendent

Canyon de Chelly National Monument

REPORT OF THE
COMMISSIONER OF THE
BUREAU OF LANDS

1900. First year.

General: After having the first portion of the year
for the first 10 years with the Bureau - in 1890 I have had the privilege
of being a member of the Commission of the National Academy, it is with a feeling
of some concern that I submit this report as representative of the
to-day. Through the years I have come to think very highly of the
various scientific organizations and the various institutions. A very early
reference is all for the history of the Bureau.

Capulin Mountain NATIONAL MONUMENT

Capulin New Mexico,

August 26, 1953, 19.....

Memorandum To; The General Superintendent
Southwestern National Monuments,
National Park Service
Globe Arizona.

From; Homer J. Farr, Ranger,
Capulin Mountain National Monument,

Subject; Monthly Narrative Report,

Visitors;

There has been approximately nine thousand six hundred
Visitors to the Monument this month,
making total Visitors since Jan 1st, twenty three
thousand five hundred fifty to date,

Weather;

About two inches of rain has fallen during the month,
In general it has been very cool and very pleasant
Very little wind this month,

Flora and Fauna,

Everything in the park is doing wonderful,
We will have a light crop of pinon nuts, have had a light
crop of cherries but our gooseberries and currants failed
entirely this year, we do have a very good crop of acorns,
One of the neighbor boys told me a few days ago that
he counted thirty seven deer in driving around the
Monument, it is quite common to see at least a dozen or more,
Mrs Farr and I had the pleasure yesterday evening of
watching a bob cat charm a rabbit and those who are
skeptical about such an operation may take my word for it
they sure can get the job done, This little bunny was
completely overcome while the big cat crawled to within
striking distance and then we moved in and forced the cat to
take his eyes off the bunny, then the rabbit became alive
and hopped away, while the big cat gave us a disgusted growl
and sneaked off in the bushes,

Roads; Have been hard to maintain this month but are now in very
good condition,

Information pamphlets, twenty have been mailed and three thousand
nine hundred eighty handed out and passed thru the register,
Now on hand three thousand,

Very Respectfully,

Homer J. Farr

the monument, and the second is a photograph
of the monument. The third is a photograph
of the monument, and the fourth is a photograph
of the monument. The fifth is a photograph
of the monument, and the sixth is a photograph
of the monument. The seventh is a photograph
of the monument, and the eighth is a photograph
of the monument. The ninth is a photograph
of the monument, and the tenth is a photograph
of the monument. The eleventh is a photograph
of the monument, and the twelfth is a photograph
of the monument. The thirteenth is a photograph
of the monument, and the fourteenth is a photograph
of the monument. The fifteenth is a photograph
of the monument, and the sixteenth is a photograph
of the monument. The seventeenth is a photograph
of the monument, and the eighteenth is a photograph
of the monument. The nineteenth is a photograph
of the monument, and the twentieth is a photograph
of the monument. The twenty-first is a photograph
of the monument, and the twenty-second is a photograph
of the monument. The twenty-third is a photograph
of the monument, and the twenty-fourth is a photograph
of the monument. The twenty-fifth is a photograph
of the monument, and the twenty-sixth is a photograph
of the monument. The twenty-seventh is a photograph
of the monument, and the twenty-eighth is a photograph
of the monument. The twenty-ninth is a photograph
of the monument, and the thirtieth is a photograph
of the monument. The thirty-first is a photograph
of the monument, and the thirty-second is a photograph
of the monument. The thirty-third is a photograph
of the monument, and the thirty-fourth is a photograph
of the monument. The thirty-fifth is a photograph
of the monument, and the thirty-sixth is a photograph
of the monument. The thirty-seventh is a photograph
of the monument, and the thirty-eighth is a photograph
of the monument. The thirty-ninth is a photograph
of the monument, and the fortieth is a photograph
of the monument. The forty-first is a photograph
of the monument, and the forty-second is a photograph
of the monument. The forty-third is a photograph
of the monument, and the forty-fourth is a photograph
of the monument. The forty-fifth is a photograph
of the monument, and the forty-sixth is a photograph
of the monument. The forty-seventh is a photograph
of the monument, and the forty-eighth is a photograph
of the monument. The forty-ninth is a photograph
of the monument, and the fiftieth is a photograph
of the monument. The fifty-first is a photograph
of the monument, and the fifty-second is a photograph
of the monument. The fifty-third is a photograph
of the monument, and the fifty-fourth is a photograph
of the monument. The fifty-fifth is a photograph
of the monument, and the fifty-sixth is a photograph
of the monument. The fifty-seventh is a photograph
of the monument, and the fifty-eighth is a photograph
of the monument. The fifty-ninth is a photograph
of the monument, and the sixtieth is a photograph
of the monument. The sixty-first is a photograph
of the monument, and the sixty-second is a photograph
of the monument. The sixty-third is a photograph
of the monument, and the sixty-fourth is a photograph
of the monument. The sixty-fifth is a photograph
of the monument, and the sixty-sixth is a photograph
of the monument. The sixty-seventh is a photograph
of the monument, and the sixty-eighth is a photograph
of the monument. The sixty-ninth is a photograph
of the monument, and the seventieth is a photograph
of the monument. The seventy-first is a photograph
of the monument, and the seventy-second is a photograph
of the monument. The seventy-third is a photograph
of the monument, and the seventy-fourth is a photograph
of the monument. The seventy-fifth is a photograph
of the monument, and the seventy-sixth is a photograph
of the monument. The seventy-seventh is a photograph
of the monument, and the seventy-eighth is a photograph
of the monument. The seventy-ninth is a photograph
of the monument, and the eightieth is a photograph
of the monument. The eighty-first is a photograph
of the monument, and the eighty-second is a photograph
of the monument. The eighty-third is a photograph
of the monument, and the eighty-fourth is a photograph
of the monument. The eighty-fifth is a photograph
of the monument, and the eighty-sixth is a photograph
of the monument. The eighty-seventh is a photograph
of the monument, and the eighty-eighth is a photograph
of the monument. The eighty-ninth is a photograph
of the monument, and the ninetieth is a photograph
of the monument. The ninety-first is a photograph
of the monument, and the ninety-second is a photograph
of the monument. The ninety-third is a photograph
of the monument, and the ninety-fourth is a photograph
of the monument. The ninety-fifth is a photograph
of the monument, and the ninety-sixth is a photograph
of the monument. The ninety-seventh is a photograph
of the monument, and the ninety-eighth is a photograph
of the monument. The ninety-ninth is a photograph
of the monument, and the one hundredth is a photograph
of the monument.

Very respectfully,
John M. Smith

UNITED STATES

NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

August 25, 1953

Memorandum

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for August, 1953

General: The cotton crop in Pinal County seems to be in good condition this year and picking has started on at least one farm. Anyone want a job - outside work and fine quarters ?

According to the Arizona Business and Economic Review, travel for June, 1953 was slightly less than for June of the previous year.

This monument was completely unaffected by the Boy Scout trek to and from their Jamboree in California.

Weather: Hot, but less so than July.

| | 1953 | 1952 |
|---------------|------|------|
| High Maximum | 112 | 112 |
| Low Maximum | 102 | 99 |
| Mean Maximum | 103 | 101 |
| High Minimum | 79 | 81 |
| Low Minimum | 63 | 58 |
| Mean Minimum | 72 | 73 |
| Precipitation | 0.10 | 0.82 |

Interpretive Service: With one of its personnel on annual leave this month, Casa Grande was a one man area four days out of each week. A total of 140 tours were made with an attendance of 1040 visitors. The average tour lasted 48.1 minutes. 1080 visitors looked through the museum but did not go to the ruin.

Administration and Protection: 7 requests for information were received during the month and were duly answered.

The Adamsville Site shows no signs of recent pothunting.

Noteworthy Visitors and Organized Groups:

August 6 13 members, Coolidge Sunday School group.
" 8 6 " " " " "
" 8 Mrs. J.C. McGregor and son, enroute to join Archeologist J.C. McGregor of the University of Illinois at the Pecos Conference.

...and the ...

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the industrial revolution. The process of urbanization is the movement of people from rural areas to urban areas. This is done for a variety of reasons, including the search for better living conditions, the desire for education, and the need for employment. The process of urbanization has led to the growth of large cities and the decline of small towns. This has had a significant impact on the way we live and work.

REMARKS: The following is a summary of the results of the investigation conducted on the above mentioned vessel. The vessel was found to be in compliance with the requirements of the Act and the Regulations thereunder. The vessel was found to be in compliance with the requirements of the Act and the Regulations thereunder. The vessel was found to be in compliance with the requirements of the Act and the Regulations thereunder.

Natural History: A large red tailed hawk perched for some time in a mesquite tree near the museum on the morning of August 8.

Maintenance: Other than routine, several windows in the quarters were repaired, the entrance road dragged, and the sewerage field cleaned.

Museum: Some work has been accomplished on our fact files as time allowed.

Personnel: Supervisory Ranger Clancy returned from annual leave on the 24th of this month.

Archeologist Peck attended part of the Peecos Conference on his days off. One day of annual leave was taken for travel.

NPS Visitors: We were glad to have a visit from Assistant General Superintendent Luis Castellum (on the 17th) who discussed matters of administration, housing, and personnel with the Superintendent. We appreciate very much the aid given us by Mr. Castellum.

A.T. Bicknell,
Superintendent

NATIONAL PARK SERVICE

Tumacacori National Monument
Tumacacori, Arizona

August 25, 1953

Memorandum

To: General Superintendent, S. W. N. M.
From: Acting Superintendent, Tumacacori
Subject: Monthly Narrative Report for Coronado National Memorial
for the month of August, 1953

On August 17th I made the monthly inspection trip of this area.

On the way to the area I paid a visit to District Ranger Bob Schmitt who is in charge of the Forest Service area surrounding Coronado. He was able to give me some information concerning the local people living in the vicinity of Coronado and some good information on the area itself. He says that as far as he knows that the area has never been surveyed even though it lies alongside the U.S.-Mexican border.

Rainfall in the Coronado area has been very spotty and ranged from 2 to 14 inches within ten miles. The vegetation looked even better than last month. The fire danger is pretty well over and the Forest Service has released all its fire guards in the vicinity.

I put a 55 gal. drum^{for trash} on top of Montezuma Pass where there is considerable picnicing. It is now up to the visitors. A big dent was made in the number of tin cans and general trash atop the pass as I brought home a full pick-up load of discarded material. Another trip should just about have it all cleaned up.

The caretaker at the mine at the foot of the pass was interested that I had left the trash can on the pass. He offered to help pour a concrete base for the can this fall. Then the can could be secured to bolts in the concrete to slow up anyone's idea of rolling the can down the mountainside.

The approach roads to this area are in fine shape. It would be interesting to have an idea as to how many people pass through this area each month.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Chaco Canyon National Monument
Bloomfield, New Mexico

August 25, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for August, 1953

Weather

The temperature during the month has been very nice as a rule with a few hot days. The high for this report period was 96 degrees on the 25th of July and again on the 8th of August. The minimum was 45 degrees on the night of the 7th of August. Average maximum temperature was 89 degrees and the average minimum was 54 degrees. All in all, a pretty nice month, except that we received practically no rain. A total of .20 of an inch was all that fell on the monument although a number of nice showers were observed to the east and south. This is a continuation of the drouth conditions which have prevailed for the past three years. In 1952 there was .95 of an inch of rain for August and for that period of 1951 there was 1.95 inches of rain. Despite the lack of rain, there were a number of overcast days which no doubt contributed somewhat to the low travel experienced.

Travel

A total of 884 people in 236 cars visited the area during this report period. This, as usual, is the highest recorded travel for the month of August at Chaco Canyon and the highest recorded travel for any report period. Of the total number of people, 506 went through Pueblo Bonito in 86 trips. Trip time averaged one hour and five minutes with a total of 46 hours spent on museum contact time. A total of 276 people in 76 groups were met in the museum, not in conjunction with the trip, and given orientation talks on the points of interest in the area.

Administration

Daily duty was maintained throughout the month with 2 men on duty at the office most of the time. Most of the current projects were carried on in spare moments between interpretative talks and most of the paper work was kept current. The addition of Mr. Myers to the

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Staff for the month has made the difference between marking time and carrying on the improvement projects for the area. Also it has given us a taste of what could be accomplished with the addition of a third permanent member to the staff.

Maintenance

Most routine maintenance was kept current during the month. Weeds were chopped from most of Pueblo Bonito and the areas of it on display to the public were sprayed with 2-4-D solution to try and kill the new growth.

Roads and Trails

The main monument road was graded twice during the month by the Indian Service from Crownpoint. Due to lack of moisture however the road is back in poor condition. Roads were policed boundry to boundry twice with quite a bit of trash picked up. With the heavy travel for the month this latter has become quite a problem especially now that the trading posts have started selling "Near Beer". The Navajos seem to like it and from the number of bottles picked up along the road the sales seem to be good.

All of the road signs in the area were re-lettered with good results. Some of the old wooden signs are scheduled for removal since the time consumed in scraping, re-painting, and re-lettering is so large. We hope to have some cement signs soon to replace these.

Some work was done in odd moments on the trail to the overlook back of Pueblo Bonito. Loose gravel had been a hazard and this was removed. Work on this section of the trail to alleviate this danger is scheduled for this fall or winter.

New Road Construction

The construction of the new Headquarters to Pueblo Bonito road was completed and work stopped on the 14th. The tractor and a crew of three Navajos did work on during the week of the 17th. The tractor leveled the dump piles and the Indians removed the large rocks. All that remains to be done as far as construction goes is for the fill material to be scarified and graded. We hope that this will be done this coming spring when there is enough moisture in the material to bond it. At present it is used very little due to the lack of compaction of the surface material.

Self-Guided Trails

Work on a proposed self guided trail for Chetro Kettle was instituted this month by Ranger Romano. It is hoped that this can be

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

REPORT for the month of July 1917, showing the progress of the work done in the Department of the Interior, under the direction of the Secretary of the Interior, in the execution of the duties assigned to him by the President of the United States.

The work of the Department of the Interior, during the month of July, has been largely of a routine character, and has consisted of the following items:

1. The work of the Bureau of Land Management, during the month of July, has been largely of a routine character, and has consisted of the following items:

2. The work of the Bureau of Reclamation, during the month of July, has been largely of a routine character, and has consisted of the following items:

3. The work of the Bureau of Indian Affairs, during the month of July, has been largely of a routine character, and has consisted of the following items:

4. The work of the Bureau of Geographical Names, during the month of July, has been largely of a routine character, and has consisted of the following items:

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

completed before his termination. Romano is putting in a lot of his own time on this project.

The proposed trail pamphlet for the Casa Rinconada-BC site trail has had nothing further done on it this month due to the other necessary work which must be done.

Chiricahua National Monument
Dos Cabezas, Arizona

August 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather. August, so far, has been somewhat drier than July. July gave us 5.20 inches of rain compared with 2.11 so far in August.

Inspections. Assistant Regional Director Miller and Mr. Jebens, Department of the Interior inspector, spent several hours on the monument on July 31, and discussed Park Service work and methods.

Assistant Regional Director Cornell spent several hours on the monument on August 6 and went over maintenance and improvements with the superintendent.

Mr. Mott of the Globe office arrived the afternoon of August 12 and spent the rest of the day and all of August 13 going over the proposed revision of the electric system to provide for complete REA service to the monument. A number of other proposed rehabilitation were also checked with the superintendent.

Approaches to Monument. All approach roads to the monument have remained in fair condition. However, local downpours of rain have sometimes made some of the roads impassable for a short time.

Concessioners. Lack of a concessioner or anyone else to serve single meals continues to be one of our problems. With the Silver Spur Ranch serving practically no meals except to overnight guests and charges for overnight guests running \$10.00 per day, many visitors are disappointed in not being able to get a lunch here or stay overnight within the limits of their pocketbooks. The best chance, for those who know ahead of time, is for visitors to bring their own lunches or food and do their own cooking in one of the Faraway Ranch cabins which can be rented at very reasonable prices.

Cooperating Government Agencies. Following the dividing of the Crook National Forest among other local national forests the local ranger district has been enlarged and the district ranger stationed in Willcox. Cooperation by the local forest force has always been good and we feel that it will continue to be although we will not be in as close touch with the district ranger as we were when he was stationed just over the mountain at Portal.

Interpretive Services. Four conducted hikes were made with a total of 73 visitors. One lantern slide lecture was given to 22 girl scouts at the Methodist camp near the monument. 22 visitors used the self guided Foothill Forest Trail and an estimated 362 the Massai Point selfguided nature trail. 2487 visitors were contacted in the museum in 505 parties.

Travel. 2868 visitors came to Chiricahua this month. This is an even 500 short of the 3368 for August of 1952. This is the third month on which we have lost some travel compared with a year ago, but we are still over 3 % ahead of this time last year.

Ranger Service. Temporary Ranger Boileau left July 27 to accept work in Northern Idaho. He was replaced August 9 by John Stanley who had been working at Wupatki.

Forest Fire Protection. The Chiricahua force put out one small fire for the Forest Service about 1 mile south of the monument boundary.

A recent heavy rain together with green annuals has lowered the fire danger to where we felt we could let the fire control aid go from the lookout, at least for a while.

Clair V. Cooke

Clair V. Cooke
Superintendent

I have just read your letter of the 10th inst. and am
glad to hear that you are well. I am
very much interested in your work and
hope to hear from you again soon.
I am sure that you will find it very
interesting and profitable.
I am sure that you will find it very
interesting and profitable.
I am sure that you will find it very
interesting and profitable.
I am sure that you will find it very
interesting and profitable.
I am sure that you will find it very
interesting and profitable.

Yours truly,
J. W. Smith

UNITED STATES
DEPARTMENT OF THE INTERIOR

Report 1m1

August 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, El Morro
Subject: Monthly Narrative Report

This month, for the second time in the history of the Monument, we topped 1,000 visitors. Though we had less than a year ago, we did have 1010. Of these visitors, a large proportion, 866 took a trip around the Rock in 152 parties. 241 took a trip over the top of the Rock in 56 parties, and 123 listened to an orientation talk. There were 194 campers.

The warmest this month was 92 degrees and the coolest was 41 degrees Fahrenheit. There was 1.42 inches of moisture. We had rain on 11 days, but so little each time that all together we have had less than one half of that a year ago or two years ago.

Because of no heavy rains, the approach roads have been in good shape and the Monument road is in excellent shape.

The wild flower display, possibly because of the lack of moisture this summer, has been disappointing. We have had neither the variety nor the number of flowers of a year ago. Most of those that did come out were sort of scrubby.

With an average of better than five trips per day, we have had little time for anything besides guiding and keeping the place picked up and cleaned up. We have kept the office work current, chopped weeds, made some repairs on the asphalt trail and accomplished a few other chores.

The Columbia University students and the State Institute Of Mining and Technology group have left which makes things sort of quiet!

Irving McNeill, Jr.
Irving McNeill, Jr.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE

Gran Quivira National Monument
Gran Quivira, New Mexico

August 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report for August

Weather. This has been a month of cool temperatures, thunderstorms, and brief showers. Almost daily cumulous cloud buildup was observed and precipitation totalled 2.72 inches received in 15 showers. Lightning and thunder accompanied all storms and hail was reported as falling just South of the monument on the 20th. The average maximum temperature was 87 degrees and the average minimum 55 degrees.

Storm damage to crops from the hail storm of the 20th was negligible in the immediate vicinity but over a half million dollars in crop damage was reported from the Estancia valley, 35 miles North.

Visitors. Dr. Don Lehmer, University of Nebraska, who is presently doing archeological work on the pipe line project, visited the area on the 14th. The Superintendent accompanied him over part of the line, which passes East-West about a mile and a half North of the monument boundaries. Work crews are expected here in about a month.

Maintenance. Several man days were expended in the cleanup of both mission sites. Weeds were more of a problem this year and experimental weed killing sprays were tested but the best device seems to be the hoe and rake. Loose rubble was removed from the interior of the buildings and minor veneer replacement accomplished.

Eight trips were made for drinking water. Our stake truck was under repair for a two week period and with empty cisterns the pickup and small tank were put into emergency service.

With lightning storms at their peak our telephone line maintenance increased. Service was cut off for several days when lightning split two insulators and burned out the repeating coil. Repairs were made by the Superintendent and a lessee of the line.

1992, 1993, 1994, 1995, 1996, 1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 26

Routine road and trail maintenance was carried on all month.

Research, Cooperating Agencies. The Southwestern Forest and Range Experiment Station, University of New Mexico, made an analysis of the vegetation inside the fenced portion of the monument as compared with that outside. Range Conservationist W.C. Cavin conducted the surveys and will furnish us with a copy of his report.

Travel. We received an increase of 90 percent in travel this month. Visitors totalled 772 in 191 cars. Most of this increase is attributed to organizations holding conventions and meetings in the vicinity.

Interpretation. There was a constant demand for services this month. Of the 772 persons who visited, 711 of them were contacted and 707 given some interpretation at the museum. 50 guided trips were made and 141 parties used the self guide facility. Quite a few hours of contributed overtime was necessary this month.

Personnel. Temporary Ranger Joseph A. Roberts was terminated on July 31.

Janitor Lois Kite worked one day a week, on the Superintendent's lieu day, kept the museum open, and contacted the public.

Ray B. Ringenbach

August 24, 1953

Memorandum

To: General Superintendent
From: Seasonal Ranger, Natural Bridges National Monument
Subject: Monthly Narrative Report for the month of July, 24, to August 18, 1953, for Natural Bridges National Monument.

GENERAL: This report includes only up to August 18 on which date it was necessary for me leave the Natural Bridges to prepare for my regular winter work.

Eates E. Wilson, Superintendent, Arches National Monument, visited the area for two days during this period accomplishing routine business and doing preliminary work for a nature trail.

WEATHER: A heavy rain occurred about the middle of July giving the first moisture of the summer in the area. From about the first of August until August 18 rains occurred quite regularly at times flooding in both Armstrong and White canyons. A heavy rain during the fore part of August damaged state roads to the extent that no visitors could get to the Monument for a period of four days.

RAVEL: A total of 378 visitors in 127 automobiles entered the area during the period of this report. This number is somewhat below the expected because of the rainy season. A total of 15 parties utilized camping facilities including 37 persons. An additional 80 persons registered at the Rackham Lookout. The hike to Sipapu was made by 9 parties including 22 people. One of these parties was a conducted hike.

ROADS & TRAILS: Roads and trails were in fair condition. The rains made considerable road work necessary filling in washed out places.

LOCAL: As of August 18, both roads leading to the area from Blanding as well as the road from Dite were in fair condition. The lower or new road from Blanding is in much better condition than the Bears Ears road.

Seasonal Ranger

Montezuma Castle National Monument
Camp Verde, Arizona

August 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report for August 1953

Weather: For August this has been a good month in regards to the weather. Although temperatures of well over 100 degrees were recorded on several days, cool nights have prevailed and frequent light showers have prevented extended hot spells.

Special Activities: I spent part of July 31 with Arthur Jebens, from the office of the Administrative Assistant Secretary, discussing monument operation procedure and problems.

On July 28, Archeologist Pierson was detailed to Tuzigoot to assume responsibility for that area until such time as the superintendent's position is filled.

Messrs. Reed and Schroeder arrived on August 20, to discuss archeological research and stabilization of ruins for the area.

Seasonal Park Ranger Koller did relieve work at Tuzigoot on August 18, so that Pierson and Hill from that area could attend part of the Peeco Conference at Flagstaff.

I spent August 23, discussing with Naturalist King the interpretive program for the monument.

Travel: Record breaking travel was experienced this month when 8,222 people were counted. Broken down this figure will show 5,807 visitors in 1,650 cars to the Castle and 2,415 visitors in 745 cars to the Well. Travel has been especially heavy this past two weeks.

Official Visitors: July 31: Messrs. H. Miller, John Davis, L. Castellum, and Arthur Jebens.

August 10: Supt. and Mrs. Guillet, Walnut Canyon, to pick up the spray rig for spraying trees.

August 20: Messrs. Reed and Schroeder.

August 23: Naturalist King and wife.

Page 2:

Visitors: August 4: Bob Edens and 15 boys from Mountain Meadow Ranch.

August 10: Mr. & Mrs. Spangle, Walnut Canyon, and Jim Clancy from Casa Grande.

August 8: Mr. E. R. Blakley, Botanist at Desert Botanical Gardens, Tempe.

August 13: Seasonal Ranger Walters, Walnut Canyon.

August 21: Dr. Allen and a class of 24 students from Arizona State College, Flagstaff.

Interpretation: A 33-minute recording of interpretive activities at Montezuma Castle and Well was prepared and mailed to the Washington office. This included an average contact at the Well Museum, an archeological talk on the Castle, and an excerpt from a forthcoming program of bird calls.

Specially designed metal stakes were painted, labelled, and set out along the Sycamore and Loop Trails to point out plants currently in bloom. The stakes are small and inconspicuous and designed to be easily re-labelled and shifted around as the flowering season changes.

15,000 new two-folds (Montezuma Castle) and 10,000 new Sycamore trail booklets were received during the month and placed in service.

Publicity: Mention of the Castle and its location in the Verde Valley, along with a picture of the ruins, was made in Westways magazine, official publication of the Automobile Club of California.

Museum Exhibits: Work was concluded this month on revision of exhibits at the Well museum. Mrs. Elsie Spangle of Walnut Canyon contributed eight unusual paintings of the legends of Montezuma Well. This panel is now a very popular one and is receiving continued public approval. We certainly appreciate Mrs. Spangle's contribution of time and skill which has helped so much in improving the museum.

An oil painting showing the Verde Valley as it probably appeared in Pleistocene times was received and added to the Geological panel in the Castle museum. This painting was made by Rossette McDonald, professional artist now living in California. Mrs. McDonald is a friend of Myron Sutton, and material for the painting was purchased last winter by Southwestern Monuments Association.

Maintenance and General Work: A cottonwood limb, weighing almost two tons, fell across the path to the Ladies restroom in the campground at Montezuma Well and broke thirty feet of pasture fencing. This again emphasizes the urgent need for pruning in this area.

Page 3:

Research and Observation: 151 specimens from the Monument insect collection were sent to the U. S. National Museum for identification.

A number of plant specimens were boxed and sent for identification to Dr. T. H. Kearney, of the California Academy of Sciences. These included a collection of grasses made by Seasonal Ranger Koller in 1952, and a Pondweed series obtained this summer from the Well. Dr. Kearney gave us exceptionally fast service and the plants have already been identified and returned. They will be made a part of the herbarium.

A checklist of birds of this area is being compiled by Sutton, and has drawn the interest of Dr. Alan R. Phillips, of the University of Arizona. Dr. Phillips states that birds in the vicinity of Camp Verde are of special interest. Dr. Mearns made numerous collections there in the 1880's, and since that time an unusual change in the abundance of certain species has occurred, as for example, the White-winged Dove and Gila Woodpecker which, so common now, were unknown in Mearns's time.

Navajo National Monument
Tonalea, Arizona

August 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report, August 1953

Travel: Our travel is holding up very well. We had 332 persons this August compared with 112 persons in August 1952 and 156 persons in August 1951. There were 176 who camped one or more nights in the area.

Weather: Since the last report period we have had 4.78 inches of rain. The high temperature for this period was 92 and the low 45 degrees.

Roads: Road conditions during August can best be described as having been "wishy washy," due to rain. We were able to install the stone headwalls for the culverts just prior to our last big rain. I am positive that the headwalls saved the culverts from washing out. The Sandal Trail and the trail to Betatakin Ruin required some maintenance. One party of visitors going to Keet Seel by horseback got into quicksand to the horses' rumps.

Visitors: Dr. Erik Reed and Al Schroeder, August 22-23. Dr. and Mrs. Hugh Cutler of St. Louis, Dr. and Mrs. Woodbury of Columbia U. and Dr. and Mrs. Edmonson of Tulane U.

General: A sign was made and installed on the trail to Messenger Mesa Overlook. The water system generator was hauled to Tuba City for repairs. The light plants were serviced and tuned. A redwood trough was installed at Betatakin Ruin spring.

Two loads of sand were hauled from Cameron for use in several small projects. Fifteen loads of rock were quarried and hauled for use in the headwalls for the recently installed culverts

Three small windows for ventilation of the Kohler plants were placed in the generator shed. A new door was made and placed in the tunnel at the spring in Betatakin Canyon. At last one can get to the pump without crawling on his knees. There is also a lot more light in which to work when making pump repairs.

Museum and Interpretation: A nice metate and mano were donated by Bobby Patterson of Cow Springs. A postcard rack was given to the museum by Fronske Studio, Flagstaff.

There were 30 guided trips to Betatakin Ruin this month. This does not seem to be such a large number but when you realize that these trips required at least 3 hours it means we have had little time for anything else.

One campfire talk was given. Two days were spent at the Pecos Conference.

Miscellaneous: One of the local Navajo proved his ability as an archer when he bagged a coyote near here with his home made bow and arrows.

One day recently two men from California drove in and stated their intention of visiting Inscription House, Keet Seel, Betatakin and Rainbow Bridge. Their plan was to ride to and from the above areas - but not by horseback. In the trunk of their car they had a small garden tractor for transportation. They spent two days trying to get the tractor down to Inscription House but never got beyond the point to which you can drive a car. They finally gave up in great disgust and left for parts unknown without having seen any of the areas.

John A. Aubuchon
Superintendent

~~Wupatki National Monument~~
NATIONAL PARK SERVICE
Flagstaff, Arizona

August 27, 1953

Memorandum

To: General Superintendent

From: Superintendent, Wupatki

Subject: Report 1ml, Sunset Crater National Monument, August, 1953

Weather: Generally clear days and nights with midday cloudiness and some midday showers. Snow on the San Francisco peaks August 21 for about three hours. Nights cold. One local bean farmer reported the loss of 60 acres of beans on the night of August 6th from freezing, the earliest on record.

Official Visitors: Naturalist Dale King, Globe Office, on the 20th.

Roads and Trails: Entrance road generally in good shape, but some sections developing washboards. Two spots on the shelf road cut by heavy rains required several truck loads of lava boulder fill.

Interpretive Service: Contact service was maintained 8-12 and 1-5 five days a week, closed two days.

Travel: 6505 visitors in 2066 parties registered at the monument. Of these, 2534 people in 826 parties arrived at hours when the contact station was closed and were not contacted.

Groups: Friendly Pines Camp, Prescott, (16) on the 10th.
Flagstaff Missionary Bible Society (60) on the 11th.
Woodcraft Rangers, Los Angeles, (34) on the 16th.
Grand Canyon Music Camp (60) on the 17th.
Boy Scout Troops, Weymouth, Mass., (26) on the 21st.

Foreign: Foreign countries represented this month were England, France, Canada, Mexico, West Germany, Italy, Netherlands, Japan, Formosa, Argentina, Brazil, Colombia.

General: Mr. Welch, Arizona Fish & Game warden, report two people struck by lightning on the monument Saturday, August 22nd, about 7 p.m. His information came from a Flagstaff physician who treated them. They apparently were not injured.

J. W. Brewer, Jr.

Journal of Internal Medicine 245: 395–401

Tonto National Monument
Roosevelt, Arizona

August 28, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tonto
Subject: Narrative Report, lml, Tonto, August 1953

Weather. Total of 6.4 inches rain for month, with violent rains on July 26 and August 10, which damaged roads and trails. Many humid days, but nights generally cool.

Travel. 2301 visitors for the month, about a 22% gain over August last year. This compares with the February peak travel last year of 5109 to indicate a relatively high year-round travel rate. Nearly all the month was on a one-man basis.

Special Visitors. Mr. Arthur Jebens, Washington D. C. , Interior Department Management Survey team member.

Architect Kenneth Saunders, Santa Fe.

Assistant Regional Director Hugh Miller, Santa Fe.

General Superintendent Davis and Assistant General Superintendent Castellum, Gila Pueblo, Globe.

Student Architects Phil Williams and Elbert Wheeler, Santa Fe.

General Foreman Gene Mott, Globe.

Mr. Williams and Mr. Bert Gibbs, Frontier Development Corporation, Tucson.

Mac & Evelyn Sharp, Compton, California.

Scoutmaster L. Mazei and 20 Scouts, Miami, Arizona. This was a good group of boys, well supervised.

Mr. & Mrs. Max Current & son, Vernal, Utah, friends of Supt. Lombard of Dinosaur.

Fire. The fourth cigarette-caused fire of the year occurred at the north end of the parking area, August 4, when Archaeologist Kemper was on duty alone. With the help of a hard-working visitor, Mr. William Zear of Maywood, Illinois, and Leaden Tweedy, the fire was controlled, with difficulty due to strong winds. It would have burned the whole slope under the ruins, where most of our botanical interpretation is carried on. The annual brane grass dries out rapidly after rains, and makes a severe hazard all summer. I believe that the high incidence of such fires here this summer is partly coincidence, and partly reflects the sad fact that as travel increases, a greater number of the idiot fringe drifts into the area, making more trouble for everybody. Just another by-product of understaffing the Park Service areas.

Roads & Trails. Most of Leonard Tweedy's time during the month was spent in repairing flood damage to road drainage, emergency repair of the ruins trail, and in patching dozens of shallow holes in the parking area oiled surface, which now needs seal-coating as part of normal maintenance after 3 years weathering and heavy use.

The trail will need a program of heavy maintenance, to be carried out later this fall when it is cooler and we get more slow rains. The violent rains did much damage, but ran off quickly and do not soak the ground like the winter rains.

Construction. Excavation of sites for comfort station and residences was started on August 20. The contractors crew is now preparing to pour footings and get ready for plumbing and masons crews on the houses.

Personnel. Most of August was a one-man month. Supt. Sharp was on leave 8 to 17, Archaeologistenger to the Pecos Conference Aug. 17 to 21, and on leave from then to September 15. WAB Hunter Cosner was on duty several days during the month. Laborer-leadman Charles Tweedy was terminated c.o.b. August 25, and began work next morning for the contractor here. This was a matter of convenience for all parties, as we were not prepared to start our trail maintenance. Also, the contractor finds it hard to get good men to come out here. It is planned to re-employ Mr. Tweedy when he is again available.

On August 19 & 20, the superintendent & wife went to Phoenix to bring back a 2 1/2 month old baby girl which they are adopting.

General. Two trips to Miami were made to get the dump truck repaired. Later, new connecting rod inserts were put in by Mr. Tweedy. Despite this, one rod went out while the truck was being delivered to Smetki for the road job there, and the truck was left at the Forest Service garage in Flagstaff.

The culverts were hauled to Cila Pueblo for storage, giving us a little more room on the utility area.

This has been a rugged month here, with storms, many visitors, quite a little fire wire for emergency work on roads and trails, and some time spent in checking with the contractor. The usual Southwestern Con-ants practice of doing office work at night has been carried on, when visitors, emergencies, weather, and maintenance work permitted the time to be used that way. It is just damn hard to get in over 10 hours these days, with so many diversions coming up.

Narrative 141, August 1933

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tumacacori National Monument
Tumacacori, Arizona

August 25, 1953

Memorandum

To: General Superintendent, S. W. N. M.

From: Acting Superintendent, Tumacacori

Subject: Monthly Narrative Report for August, 1953

Weather Conditions: Evidently the July rains constituted our summer rains for this month only 1.02 inches fell. The temperature ranged in the daytime from 93° to 105°. At night the range was from 57° to 69°.

Inspections: On July 29th Mr. Kenny Saunders, Architect and Mr. Gene Mott, Supervisor of Construction and Maintenance looked over the rehabilitation job just completed on Residence #1. Mr. Saunders was accompanied by Student Assistant Architects Wheeler and Williams.

On August 6th Mr. Harvey H. Cornell, Assistant Regional Director and party were in for a short inspection trip.

Also on August 6th Archaeologist Gil Winger and family of Tonto Nat'l. Mon't. made a brief visit. That same day Supervisory Ranger Earl Steele of Saguaro Nat'l. Mon't. and family were here. It took a special tour to get his own family and all the in-laws through the old mission church.

Maintenance: A minimum amount of maintenance was carried out since Maintenanceman Deubler was on annual leave for two weeks. Weeds were pulled from the area in front of the church and were also cut from around the residences and picnic area. Residence #1 is now ready for the new superintendent whenever he arrives. The patio garden after three months of neglect has been brought around to looking like it used to by several days work. A lot of pruning and weeding was done, enough to fill over four pick-up loads.

Accessions: A copy of Wyllys "Arizona, History of a Frontier State" was donated to our library by the Southwestern Monuments Association.

New Construction: No work performed by the contractor on the shelter roof over a portion of the mission buildings this month.

Washington, D.C.

June 25, 1921

Memorandum

TO: Chief of National Park Service, U.S.D.I.

FROM: Acting Chief of National Park Service, U.S.D.I.

SUBJECT: Boundary of the National Park, 1921

On June 25, 1921, the Acting Chief of National Park Service, U.S.D.I., has received from the Acting Chief of National Park Service, U.S.D.I., a letter dated June 25, 1921, in which the latter has requested that the boundary of the National Park be extended to include the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I.

The Acting Chief of National Park Service, U.S.D.I., has also received from the Acting Chief of National Park Service, U.S.D.I., a letter dated June 25, 1921, in which the latter has requested that the boundary of the National Park be extended to include the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I.

The Acting Chief of National Park Service, U.S.D.I., has also received from the Acting Chief of National Park Service, U.S.D.I., a letter dated June 25, 1921, in which the latter has requested that the boundary of the National Park be extended to include the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I.

The Acting Chief of National Park Service, U.S.D.I., has also received from the Acting Chief of National Park Service, U.S.D.I., a letter dated June 25, 1921, in which the latter has requested that the boundary of the National Park be extended to include the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I.

The Acting Chief of National Park Service, U.S.D.I., has also received from the Acting Chief of National Park Service, U.S.D.I., a letter dated June 25, 1921, in which the latter has requested that the boundary of the National Park be extended to include the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I. and lying between the National Park and the land owned by the U.S.D.I.

Personnel: Tour Leader, Wayne Clark, finished up August 24 at COB. It has been nice to have had Wayne with us for the past two months. He picked up the monument routine quickly and has been a great help.

Research and Observations: On August 23rd it seemed for a while that we were operating an outdoor zoo. In the museum we had a bat flying around leering at the women visitors and on the floor a giant desert toad (8" head to bottom) worked over the flies. At the front door a gopher snake slowed up visitation. Between the museum and the church a four foot king snake made several appearances.

A sharp-shinned hawk has wrecked havoc in our patio killing a female cardinal and her two young. It also may have killed a female white winged dove and destroyed her two eggs. However it did miss the tiny new black chinned humming bird. The visitors have been enjoying this little bird being fed by the parents.

Interpretive Services: Of the 2,154 paying visitors to the area (including their children) only 1,758 went on a guided trip. People seemed to just struggle into the area at odd times. Only on weekends was business brisk. On Sunday August 24th we had 166 paid visitors go through the church. This is the biggest visitation to the church since February 22nd of this year.

Increase or Decrease in Travel:

| | |
|--|-------|
| Visitors this month. | 2,403 |
| Visitors this month last year | 2,659 |
| (This is also the highest previous August) | |
| Percent decrease. | 10 % |

General: It has been a quite month and nothing of earth shaking importance has really happened at this area. Everything has gone along quite smoothly.

Clarkdale, Arizona

August 24, 1953

MEMORANDUM

To: General Superintendent, Southwestern Monuments

From: Acting Superintendent, Tuzigoot National Monument

Subject: Report 1ml, August, 1953, Monthly Narrative Report

Weather In general, August has been a series of rainstorms interspersed with hot humid days. Maximum temperatures over the 100° mark and minimums in high 50's. Much lightening has accompanied most of the storms.

Special Activities Messrs. Jebens, Miller, Davis and Castellum on August 1st stopped at Tuzigoot. Mr. Jebens is a member of the Management Inspection Team from the Secretary's OFFICE.

Pierson and Hill, on their own time, attended several sessions of the Pecos Conference at the Museum of Northern Arizona in Flagstaff. Several worthwhile problems in interpretation of the archaeology of the Verde Valley were brought up at the conference so the meeting was of particular interest to the personnel of this area.

N. P. S. Visitors Les Earenfight of Joshua Tree National Monument on August 8.

Archaeologists Reed and Shroeder on August 20.

Naturalist Dale King on August 24.

Reportworthy Visitors Rev. Charles Parker of Prescott, author and friend of the service on August 6.

Friendly Pines Camp, Prescott, August 10, 15 in party

Senior Scout group from San Bernadino, Cal., Aug. 10.

1/2 Harmon Maxson, ex- archaeologist of Tuzigoot on Aug. 13.

Friends International Peace Seminar, Verde Valley School on Aug. 16 with 10 in party.

Dr. and Mrs. Richard Woodbury, Anthropologist, Columbia University on Aug. 22.

Dr. and Mrs. Rey Ruppe', Iowa U. on Aug. 21.

Mr. and Mrs. Dick Shutler, Museum of Anthropology, Univ. of California, Berkley, on Aug. 22.

Mr. and Mrs. Lyndon L. Hargrave on Aug. 23.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Travel 3787 visitors entered the area in 1090 cars. 3406 went through the museum and 3787 used the Tuzigoot Trail through the ruin. This is compared with 4268 visitors in 1129 cars in August 1952. The slight decrease in travel may be blamed on the weather- either too wet or too hot. Then again people seem to have decided that the spring and fall months are a much nicer time of year to see this section of Arizona.

Visitors came from 43 states and 10 foreign countries.

Publicity An article about Tuzigoot appeared in the Yavapai County Messenger of July 30.

Mr. Shepard of the Phoenix Republic acquired information about Tuzigoot for a forthcoming article.

Maintenance and Rehabilitation The new curtains have been hung in the museum. It is hoped that the case lighting can be done in the near future. Improvement in the looks of the museum is already marked with the curtains up; the lights should polish it off.

Roads and Trails The county road crew has filled in the numerous chuck-holes in the approach road from Clarkdale. Rains have kept most of the dust down. Trails and roads on the monument were cleared of overhanging brush and mud which the various rains have washed down was cleared from the ruins trail. Directional signs were repainted by the tour-leader and one new sign is in process of construction.

Storm Damage The monument area had two lightning strikes in the past month. The first strike hit the southwest corner of the reconstructed room in the ruin, ran along the floor, down the iron pipe guardrail and shattered the newell post at the bottom of the stairs. The post has since been replaced. The second strike hit the southwest corner of the garage, dislodged a stone and knocked out a small piece of plaster in the garage ceiling. Note: Add lightning to the abandonment theories of Tuzigoot Pueblo!

Accessions Several volumes were added to the library during the month. These are some 18 books and pamphlets on archaeology history, biology, etc. which were donated by the Southwestern Monuments Association, The Arizona State Museum, and the Carnegie Institution of Washington. The library was placed on the mailing list for Climatological Data, the monthly organ of the weather bureau. Correspondence with the Bureau of American Ethnology has initiated the shipment of some 25 publications on southwestern archaeology and ethnology which should be received soon.

 to have decided that the saying and this would be a good idea
 on the morning after the war in the day. Then again people can
 say in August 1988. The slight decrease in interest may be due to
 around one year. This is because in 1987 interest was 11.5%
 but now it is 10.5% and the Federal Reserve
 have not changed the money and they want the Federal Reserve
 to have 11.5% interest rate in 1988.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

about 1912 for a further article.
Dr. Howard of the Toronto Hospital suggested a translation
Yves and Louis Lemaire of 1910.
The article is written about 1912 and appeared in the

It is already worked with the material of the first world war. In the next future, improvement in the form of the material will be made. In the present, the new material is not available.

Books and Walls The only book now on display in the National Academies is the current issue of Science, dated June 1961. The book is the only one in the library. The book is the only one in the library. The book is the only one in the library.

The following is a list of the names of the persons who were present at the meeting of the Board of Directors of the United States National Bank, held on the 10th day of January, 1901, at New York City, New York.

NATIONAL PARK SERVICE

Tour leader Hill has commenced the cataloging of the backlog of photographic prints and negatives.

Research and Observation New bird records for the area are the Wood Ibis, Mycteria americana and the Lazuli Bunting, Passerina amoena. Brewers Snowy Egrets are frequently seen on Peck's Lake and incite the visitor's curiosity. Blue Grosbeaks are seen quite frequently, or at least, one is.

Rains have brought out many small flowers as well as a strange plant which has been rather uncommon until now- grass. The mountains and foothills look like "Auld Erin".

Ed Hill has been carrying on a preliminary archaeological survey on his days off. He has run across some very interesting sites which seem to include early man and P I- II. This early period up until the late Tuzigoot times is the least known portion of Verde Valley pre-history.

Personnel Jimmie Brewer got off to his new superintendent position at Wupatki on July 30 after spending two days with the Acting Superintendent breaking him in to Tuzigoot routine. Jimmie made a host of friends during his sojourn at Tuzigoot. The Mine Museum at Jerome was a fine accomplishment and is a credit to his ability and resourcefulness. It also won Jimmie to the hearts of the good citizens of Jerome; the National Park Service has profited by it too. The local sentiment is best expressed by a postcard in the Mine Museum. The postcard is of Wupatki with the words "Our Rival" inscribed on the face.

Walnut Canyon National Monument
Flagstaff, Arizona

August 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon
National Monument during August, 1953

Weather Conditions

Weather has been exceptionally cool for August with a frost occurring on August 6 which did considerable damage to bean and corn fields in the Cinder hill area. A total of 1.17 inches of moisture fell in several storms. These were accompanied by a great deal of lightning. Several trees were struck near headquarters and one fire started inside the Monument, and one on Forest lands.

Administration

Messrs. Jebens and Bierne of the Secretary's office visited Walnut Canyon on August 1, where Mr. Jebens interviewed the Superintendent on general administrative problems.

The Superintendent and his staff attended such sessions of the Pecos Conference on Southwestern Archeology as were consistent with the operation of the Monument. The Conference was held from August 17 thru 19 at the Museum of Northern Arizona and the National Park Service was well represented. An evening session of N.P.S. members was held after the conference at Walnut Canyon.

One trip was made to Montezuma Castle for the power sprayer which was brought to Walnut Canyon where it was picked up by Superintendent Hastings of Mateo Ruins.

Maintenance

A new float valve was finally located, purchased, and installed in the sump near Highway 89 and the sump completely cleaned and sterilized. All junk, trash, and unsightly material stored in our utility area was hauled away, restacked, and a general straightening up accomplished. Two Navajo laborers were borrowed from Wupatki and pathing and other repair jobs were done on roads and trails. Noxious weeds were cleared from along the right-of-way along our entrance road.

Due to pressure of heavy travel no work was accomplished on the concrete sign project.

Travel

The heaviest travel yet recorded for any single month in our history with a total of 6,595 visitors in 1,829, cars.

Interpretation

A total of 119 hours was spent in contacting 1,429 groups comprised of 5,382 persons.

Several additional trail markers were installed along the Island trail identifying and explaining features not included in the guide leaflet. The Paul Coze painting of prehistoric life at Walnut Canyon was reframed and mounted with a reflecting light.

N.P.S. Inspections

- August 7 - Messrs. George Smith and George Johnston, Region Three.
1 - Messrs. Jebens and Bierne, Secretary's Office, Washington, D.C.
Associate Regional Director Patraw and Assistant Regional Director Miller, Region Three, Santa Fe, New Mexico.
General Superintendent Davis and Assistant General Superintendent Castellum, Gila Pueblo, Globe, Arizona.
20 - Regional Archeologist Reed, Archeologist Schroeder, Region three office.
Naturalist and Mrs. Dale King, Gila Pueblo.

N.P.S. Visitors

- August 9 - Engineer Willard Bradley, Santa Fe, New Mexico
10 - Les Ehrenfeitt, Supervisory park Ranger, Joshua Tree Nat'l. Mon.
19 - Ranger Turney and wife, Bandelier National Monument
Archeologist Gil Wenger and family, Tonto National Monument
Superintendent and Mrs. John Aubuchon, Navajo National Mon.
Carroll Burroughs, Archeologist, Wupatki National Monument.

Visitors of Note

- August 15 - Dr. Kesner, University of Arizona
24 - Dr. Eldred D. Wilson, State Bureau of Mines, University of Arizona, Hal Jackson, Flagstaff C. of C. and Mr. Ralph Deckard (Limestone Quarry inspection)

Organized Groups

- August 11 - Grand Canyon Music Club.....85 members
17-18 - Tocoloma Club, Calif.....48 members

Publicity

A fine article by Harry W. Malm appeared in the New York Times of August 2. This article on Walnut Canyon was well prepared and has resulted in many visitors stopping by during the month.

1. The first part of the document is a list of names and addresses of the members of the committee.

2. The second part of the document is a list of names and addresses of the members of the committee.

26. The twenty-sixth part of the document is a list of names and addresses of the members of the committee.

27. The twenty-seventh part of the document is a list of names and addresses of the members of the committee.

28. The twenty-eighth part of the document is a list of names and addresses of the members of the committee.

29. The twenty-ninth part of the document is a list of names and addresses of the members of the committee.

30. The thirtieth part of the document is a list of names and addresses of the members of the committee.

Forest Protection

The Superintendent and Seasonal Ranger Walters were called to investigate a forest fire just west of our Monument Boundary on the evening of July 29. The fire was located in a huge snag in what is perhaps the roughest section of the canyon. We spent from 4:00 until 12:00 P.M. getting it completely out.

Again on August 21 a large spike-top was struck by lightning near our west boundary inside the monument. It was raining heavily at the time of discovery and an investigation indicated that it would soon be extinguished by the rain. It was kept under investigation and was considered out the next morning as no smoke was visible. Later a smoke again appeared from the inside of the tree near the top and this was completely extinguished. This tree will in all probability survive.

General

The Superintendent attended the 25th Anniversary program of the founding of the Museum of Northern Arizona and added his congratulations to the hundreds of others received by Dr. Colton and the directors for their fine work during past years. Talks were presented by Dr. Grady Gannage, Mr. John Habbitt, Dr. Edwin McKee, Dr. Edwin Colbert, Dr. J.C. McGregor and Dr. Gladys Reichard.

Superintendent Guillet served as Master of Ceremonies for The Annual Northern Arizona Square dance Festival breakfast which was attended by square dancers from five surrounding states.

Story of the Month

On August 19 while I was presenting an interpretive talk to Visitors, a woman and (I presume) her husband came thru the museum lobby and without stopping started down the Island Trail. I called to them and explained that the trail was "self guiding" and to fully enjoy the trip they should take a guide leaflet. The woman said "Oh we have a guide leaflet we obtained at Arches National Monument" I said "A Walnut Canyon Guide leaflet?" She exclaimed "Oh are there different ones? we have been using this one for Arches and Wupatki". She indicated that it had worked quite nicely.

Wupatki National Monument
Flagstaff, Arizona

August 27, 1953

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Report 1ml, August, 1953

Weather:

Clear and bright most of the time, with some afternoon cloudiness and occasional showers. A little over an inch of rain fell during the month in three showers.

Special Activities:

Messrs. Brewer and Burroughs attended several sessions of the Pecos Archaeological Conference held in Flagstaff at the Museum of Northern Arizona August 17-19.

Official Visitors:

Messrs. Jebens and Beirne from Washington, accompanied by Messrs. Patraw and Miller from the Regional Office and Messrs. Davis and Castellum from Globe, inspected the area and interviewed the Superintendent on the 1st.

Highway Engineer George Smith, Regional Office, August 4-6; Highway Engineer George Johnston, Regional Office, August 4-13 and August 19-27; Landscape Architect Charles Carter, Regional Office, August 6; all went over the Wupatki road construction with Superintendent Brewer and Construction Supervisor Chittum.

Archaeologists Erik Reed and Al Schroeder, Regional Office, on the 21st.

Naturalist Dale King, Globe Office, on the 20th and 22nd.

Maintenance, Rehabilitation and General Work:

Some time was spent trying to improve radio reception and transmission. The old vertical antenna, no longer in use, was dismantled. Several types and lengths of antennae were cut and

tried with little notable success. The next venture will be a half-wave center-fed antenna. A new ground was installed.

Two man-days were spent smoothing the trail through Wupatki ruin.

Some time was spent on extensive clean-up of the Headquarters area. Relics of the old CCC days were cleaned out of the slope area back of Headquarters. The storage room back of the museum is in process of being cleaned out; thus far four lot-up loads of junk have been hauled to the dump.

The Diesel fuel storage tank for the light plant at Heizer was dug out and the hole filled in preparatory to setting the tank at ground level. The buried-tank installation has never been successful, apparently because the fuel pump on the plant is incapable of pulling fuel up from that level.

Roads and Trails:

Progress on the Wupatki road construction was slow at the beginning of the month but picked up speed as new equipment was brought into play. The new Lough front-end loader was delivered in the middle of the month and a rental shovel was brought in a little later. Fill for the new entrance road take-off was hauled, spread and compacted. Clearance was received for the purchase of corrugated pipe culvert for three of the most serious drainage spots and additional fill was hauled to raise the grade. Much of the fill along the road is held in windrows to prevent its blowing away, and it is being spread and compacted as it can be handled. Very little rain has fallen on the section of road under construction, and what water is used must be trucked in. Highway Engineer George Johnston, assigned to the road job August 4-13 and 19-27, has been a real help and we are very pleased to have the benefit of his experience.

Maintenance Bean worked the Heizer end of the loop road, filling holes, plating and blading those sections that caught a little rain.

Interpretive Service:

Contact service was maintained daily on a regular 8-12 and 1-5 schedule and irregularly during noon and off-hours as circumstances permitted.

Travel: Travel this month was again high. A total of 3398 visitors in 1022 parties entered the monument as against 2863 visitors in 862 parties last August. 363 visitors in 124 parties arrived during hours when the contact station was closed and

5. fifth of these is the fact that the

For details and specifications, see page 100.

1. The first is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The process of urbanization is the movement of people from rural areas to urban areas. This is caused by a number of factors, including the need for labor in urban areas, the availability of jobs in urban areas, and the desire for a better life in urban areas. The process of urbanization has led to the growth of large cities and the decline of small towns and villages. This has had a number of effects on the United States, including the concentration of population in urban areas, the development of a service economy, and the decline of agriculture. The process of urbanization is still going on, and it is expected to continue for many years to come.

SUMMARY OF MONTHLY NARRATIVE REPORT - SOUTHWESTERN NATIONAL MONUMENTS
SEPTEMBER 1953

| | | Page No. |
|--|---|----------|
| <u>General</u> | Quarters Appeals material being assembled; visitors becoming problem at Gila Pueblo. | 1 |
| <u>Weather</u> | Approach-of-fall weather noted. | 1 |
| <u>Special Activities</u> | Personal time archeological survey of Gila County being made by Mr. King and others. | 1-2 |
| <u>Official Visitors</u> | Accounting survey team visited Gila Pueblo, Tonto and Casa Grande; Messrs. Gregg and Cook, Washington Office also visit SWNM areas. | 2-3 |
| <u>General Publicity</u> | Unsolicited publicity concerning Gila Pueblo office over local radio station; some areas featured in <u>National Geographic</u> . | 3 |
| <u>Maintenance, Rehabilitation, & General Work</u> | Apartment rehabilitated Aztec Ruins; drinking fountain constructed at Montezuma Castle. | 3-4 |
| <u>New Construction</u> | Electric power line construction under negotiation for Tonto, and new residences progressing in that area. | 4-5 |
| <u>Roads and Trails</u> | Campground road project underway at El Morro; good progress made on Wupatki road work. | 5-6 |
| <u>Accessions</u> | Plants, shrubs and trees donated to help beautify Gila Pueblo grounds. | 6 |
| <u>Interpretive Service</u> | Messrs. Davis, King and Arnberger participate in programs before local groups; easel displays installed at Tumacacori. | 6-7 |

| | | |
|---|------------------------------|--|
| 7 | Research and Observation | Research papers reviewed by Naturalists; more observations of rattlesnakes than usual. |
| 6 | Loan Library | Accessions totaled 90; work of putting library in good working order continued. |
| 3 | Southwestern Monuments Assn. | Thirteen bids for quotations to print booklets sent out; requests for identification of flowers being received, stimulated by flower booklets, no doubt. |
| 6 | Ruins Stabilization | Stabilization work accomplished at Tupatid; Kin Kletso work continued at Chaco Canyon. |
| 8 | Travel | Game report as recent months - still ahead of previous year. |
| 8 | Visitors | Interesting visitors reported by Aztec Ruins; Audubon Society representatives visit Chiricahua and Tonto. |
| 9 | Insects and Tree Diseases | Pine beetle infestation noted at Chiricahua. |
| 9 | Personnel | Archaeologist Bradley at Tuzigoot; Park Ranger McGarry at Aztec Ruins. |
| 9 | Local Items | New bride at Montezuma Castle; new baby at Walnut Canyon. |

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - September 1953

General

During the early part of the month, the newly-established fiscal office burned the "midnight oil" getting the organization into high gear and devoting much time to preparation of the 1955 estimates. At the September 8 staff meeting General Superintendent Davis expressed his appreciation to Chief Clerk Crumley and the employees in the fiscal office for their devotion to duty. They displayed the true National Park Service spirit -- getting the job done regardless of personal sacrifice.

During the month, Assistant Superintendent Gastelum, as Chairman of the Quarters Appeals Committee, collected considerable data from real estate agents and other federal agencies and discussed the general contents from the individual field areas with Superintendent Brewer of Mupatli and Chief Clerk Crumley of the headquarters office. The appeals are now being formulated and will be transmitted within the deadline date.

An increasing problem at Gila Pueblo is the one of handling visitors, especially on week ends. No encouragement that we know of for people to visit our headquarters has been issued, but such visitation is increasing. Our problem is to find some way to handle it that does not take so much personal time from the staff people located here.

Weather

September weather was just about what we could expect. The days were warm, the nights chilly, forecasting the approach of fall. Also heralding the coming of fall were the touches of color appearing at the higher elevations. Drought conditions are still causing anxiety in a few areas. On the whole, however, September was a pleasant month.

Special Activities

Headquarters--On Saturday, September 19 Naturalist and Mrs. King went to Tucson where they attended Dean Cummings' autograph party for his new book entitled First Inhabitants of Arizona and the Southwest. This party was held the day before Dean Cummings' 93rd birthday.

On personal time, Mr. and Mrs. King are visiting some exceedingly interesting archaeological sites in company with the Reverend R. J. Vorts, of Globe, who is an ardent conservationist. It is planned that this spare time work will develop into a full scale archaeological survey of the ruins of Gila County, and perhaps a broader area. This will be done in cooperation with the University of Arizona.

Aztec ruins--Mr. Sherman C. Howe was very pleased when a framed picture of the ceremony at which he signed over his archaeological collection was presented to him. This was on his 83rd birthday, August 26. Mr. Howe celebrated the day by valding from town to the ruins.

Tonto--A line survey crew from the Salt River Power District surveyed for pole locations on September 25.

Tumacacori--Superintendent Ringenbach made his first inspection of Coronado National Monument, during which he visited with Forest Ranger Bob Schmitt at Patagonia and with Ranger H. Reynolds. He and Mr. Reynolds went over the cooperative agreement involved and set a tentative date to jointly inspect Coronado National Monument.

He also called on Mrs. Grace Sparks. Mr. Ringenbach summed up his impressions by stating that "to deter any major vandalism or trespass the boundaries must be located and posted. This part of the Huachuca has been hunted for years and we can expect this to continue until our boundary survey has been run and funds are available to provide ranger protection."

Official Visitors

One of the most important events at headquarters was the visit of Mr. McClellan from the General Accounting Office, Mr. Jones from the Secretary's Office, and Mr. Montgomery from the Director's Office. Mr. Gastelum met these gentlemen in Phoenix and brought them to Gila Pueblo via Tonto over the Apache Trail. They had expressed a desire to visit some of the Southwestern National Monuments, if possible.

At Tonto they had a splendid opportunity to observe a small area in operation. Superintendent Sharp was on duty by himself attempting to serve the visitors in addition to working on the construction project underway there and giving assistance to representatives of the contractor. Mr. Gastelum personally conducted the survey party to the ruins and was pleased to hear one of the two representatives not from the Director's Office make the statement that the American tax payers should not object to paying taxes to conserve irreplaceable values such as those found at Tonto.

After spending part of two days at the headquarters office, these three men were returned to Phoenix by Mr. Gastelum via Casa Grande. They were given a tour of the ruins by Archaeologist Peck and discussed fiscal problems with Superintendent Bicknell.

It is always a pleasure to have parties of this type look over our operations.

Official Visitors - continued

General Superintendent Davis returned September 1 from a trip which included visits to El Morro, Chaco Canyon, Aztec ruins, and Arches National Monuments.

Naturalist Arnberger met Mr. Gregg of the Washington Office at Arches. Mr. Gregg expressed his appreciation for the tour of the monument and his pleasure at finding Superintendent Wilson and Ranger Morris doing such an excellent job serving visitors, in view of their limited facilities.

Mr. Arnberger also visited Canyon de Chelly, Wupatki-Sunset Crater, Walnut Canyon, Montezuma Castle and Tuzigoot, giving assistance on interpretive problems. At Navajo he took the horseback trip to the Keet Seel ruins and found the sight almost beyond description when he rounded a curve in the canyon and these magnificent ruins came into view.

Chief Forester Larry Cook and Regional Forester Carlson visited Gila Pueblo and also Chiricahua and Gran Quivira. Architects Saunders and Oblinger, Regional Office, also spent some time at headquarters and inspected the construction work under way at Tonto.

Messrs. Patraw and McCollm visited Arches; Landscape Architect Van Pelt spent three days at Chaco Canyon; Engineer George Johnston and Archeologist Vivian were at Wupatki during the month.

General Publicity

We have been pleased with the unsolicited and complimentary remarks made by Miss Jan Paul during her weekly radio programs over the local station concerning the Southwestern Monuments Association and the cultural and other values to the community of having the Southwestern National Monuments headquarters in Globe. Miss Paul is a former Broadway producer and playwright, who now operates a book store in Globe and conducts a weekly radio program devoted to cultural activities in the vicinity.

The September issue of National Geographic Magazine carried full-page color pictures of Casa Grande and Tunacacori. Tunacacori was also featured in a "Know Your Arizona" broadcast over Station KCMF. A tape recording was made by Mr. Jay Miller of KCMF in cooperation with the superintendent and ranger on the exhibits in the museum and this was used in the broadcast.

The new 1953-1954 Arizona road map under a section entitled "Arizona Facts" prominently features Casa Grande under "Early Inhabitants" and Tunacacori under "The Spaniards."

Descriptions and maps of Chiricahua were checked and revised for the AAA and for the H. L. Gousha Company.

Gran Quivira, along with other historical ruins in New Mexico, was featured in the column "Off the Beaten Path" in the Albuquerque Journal. Superintendent Howell believes that this article resulted in a marked increase in travel to the area.

Maintenance, Rehabilitation and General Work

Some building rehabilitation work is underway at Gila Pueblo. Also, the local gas company has started excavating along the highway preparatory to bringing natural gas into our headquarters. It is hoped this will be accomplished within a few weeks so we will have the gas for our furnace before cold weather arrives.

Net Constructi on

At Aztec Ruins considerable rehabilitation work is being done on the "great" apartment attached to the main structure. The

New Construction - continued

Construction work on the two new residences and the comfort station progressed well during the month at Tonto. All cement walls are up, plumbing, water and gas lines in and floors poured and finished.

At Tunacacori, the shelter roof over the ruins was installed on September 21, bringing this project within 95 per cent of completion. However, additional flashing and mastic to tie into the mission church building are still required and it appears that additional bracing will be necessary to insure stability.

Roads and Trails

During a recent trip to Mupatki, Mr. Gastellum collected samples of road materials from the project there and took them to the State Highway Department testing laboratory in Phoenix. He contacted Engineer Brown, who is in charge of this laboratory, and he said they would be glad to help whenever we have road materials to be tested. We hope to make increasing use of these facilities in connection with future road building projects and feel sure this service will assist us in getting the best possible materials for use on our roads.

At Arches a heavy summer rain with the resultant flash flood played havoc with roads and visitors' tempers on August 28. Also, it presented an opportunity for National Park Service personnel to render some "beyond the call of duty" service. Mr. Wilson's report read in part as follows: "Approach road #93 was washed out at every culvert and a heavy flow down Court House Wash held up eleven cars from 5 PM until midnight...Two gallons of hot soup, prepared by the HSIP, was carried across the wash and drained to the last drop by over 30 hungry people. No cars were damaged, although it took 2 hours to dig, push and pull out one car which was hopelessly wedged in a cut of a 35" culvert washout...The county maintenance crew was unable to work the road immediately and it remained passable only to experienced drivers for five days. One serious washout occurred on the Windows road which took a full day to repair. Water cut at every crossing, but in three days maintenance man Winbourn had all our roads in good shape."

At Chaco Canyon much time was also spent repairing roads which had been badly damaged by heavy summer rains. About 20 yards of fill material were hauled to replace washed out places on the north approach road, and the ditch alongside this road coming down the cliff into the canyon was cleaned to remove rocks which had washed down. Numerous other minor time-consuming repair jobs are required and will be continued during the current report period.

In the Chiricahua area the Willcox and Douglas Chambers of Commerce are ardently trying to get the approach road from Willcox into the state highway system. If this effort is successful, and the road is paved, travel to this monument would undoubtedly increase tremendously.

Supervisor of Construction and Maintenance Mott arrived at El Morro on the 16th and started building a crew to begin work on the campground road. At the end of the month good progress was being made on this project.

Roads and Trails - continued

The county crew bladed the gravel roads approaching and within the monument at Tusigoot. A new sign was erected along the road indicating the Tailing's Pond and its use and Pecks Lake. This slowed down considerably one of the principal questions asked by visitors concerning things outside the monument.

The Lupatid road work is progressing nicely with an expanded crew, more trucks and some rental equipment. Regarding trails in the area, Superintendent Brewer reports "Both the Lupatid Ruins Trail and the Citadel Ruins Trail need to be worked over before the next heavy travel season. The Citadel trail is a dangerous foot path, and with the greatly increased travel that will come to the Citadel with the new road, some measures must be taken in the interest of public safety. The Lupatid Trail needs some minor relocations to bring out points of interest; more than that, it needs better definition and proper surfacing to keep the people on the trail and off the ruin walls."

Mr. Castellum also was able to clear up a right-of-way permit for the Sunset Crater entrance road by getting the state to relinquish a permit for a slender pit. The Regional Director has cleared the permit with the Forest Service and an important project can now be carried forward.

Accessions

The greatly appreciated donations were received to help beautify the Gila Pueblo grounds. One was a donation of perennial shrubs, herbs, and trees from Mr. and Mrs. Charles Ichikawa, of Globe (formerly of Grand Canyon); the other was a small donation of native trees and shrubs from the Soil Conservation Service nursery at Tucson. The Southwestern Monuments Association purchased a fine tape recorder which will enable us to listen to and edit the interesting material the field is producing with the two tape recorders donated by Dr. Thomas D. Noble.

Arches--two power supply units from Mesa Verde to be used in operating the radios at Arches and Natural Bridges.

Interpretive Services

Naturalist King completed editing the self-guiding trail booklet for Tusigoot and took it to the printer on September 9. He compiled for Naturalist Dodge's use at the forthcoming Shonandosh Conference information concerning self-guiding trails which have been installed in the Southwestern National Monuments. A total of 20 has been installed during the last five years. Mr. King also revised copy for the second edition of the Big Bend booklet, sent it to the printer and read proof during the month.

Mr. Arnbarger completed editing the text and other material for the forthcoming printed guide booklet for the Montville Trail, Great Sand Dunes, which is being printed on a cooperative basis by the Southwestern Monuments Association.

Mr. King spoke on "Archaeological Conservation" before 60 members of the Globe Lions Club on September 24.

Interpretive Services - continued

Mr. Arnberger presented two talks and showed a motion picture at the Globe High School. The first presentation was to over 300 students in the Junior High and the second to the Senior High group with over 600 in attendance. These talks were made as part of an assembly program designed to stimulate the students' interest in developing a city park in Globe.

Mr. Davis participated in a panel discussion, along with local civic leaders, at a meeting of the local branch of the American Association of University Women.

At Tumacacori five easel displays were installed along the proposed self-guided trail and are being used in conjunction with the guided trip. The National Park Service traveling exhibit was received and placed in the Kino Room for public enjoyment.

Superintendent Guillet of Walnut Canyon presented an illustrated talk "Unveiling Canyon de Chelly" to 40 members of the Flagstaff Kiwanis Club. Two tape recordings of interpretive talks at Walnut Canyon were made and submitted to the Director's Office. Mr. Guillet had one strenuous contact period during the month when 500 students in 72 cars and busses arrived from the Arizona State College for a picnic, and he was on duty alone. He reports, however, that the crowd was handled without undue difficulty "as contact and orientation talks were made as I parked the cars and when I finished I was 500 yards up the road from the parking area."

Interpretive service, of course, is an important function in all our areas and all superintendents report many hours spent greeting visitors and giving orientation talks.

Research and Observation

An excellent manuscript was received from Mr. Vivian on his recent archeological work at Gran Quivira. This report comes up to the high standard of Mr. Vivian's past work, and it is hoped to publish it within the next 12 months.

Mr. Arnberger reviewed and made slight corrections in a manuscript titled "Additional Bug (Hemiptera, Reduviidae) Annoyance and Trypanosoma cruzi in Southwestern National Monuments, by Dr. Sherwin F. Wood. This article will appear soon in a professional journal. There is a possibility that Dr. Wood will visit several of the field areas next summer to continue his research on the ground.

More observations of rattlesnakes were reported this month than usual. Acting Superintendent Barrel of Chiricahua wrote "This has been a gay summer for rattlesnakes. Many black-tailed and green rock rattlers have been encountered all over the Monument. Several narrow misses, but no bites." Superintendent Cook, Montezuma Castle, reported six rattlers counted during the month, three in the immediate vicinity of the campground. At Tonto the snakes are beginning to appear more often and according to Superintendent Sharp, some of them show a mean disposition. Most rattlers are sighted here in April and October. Mr. Sharp also reports seeing a few Gila Monsters.

Loan Library
The library is gradually getting into better working order under the direction of Mr. King and the capable assistance of Mrs. Bennett. There were 90 accessions during the month, including 13 books, 35 periodicals, and 42 separates.

Southwestern Monuments Association
Invitations were sent to 13 printers for quotations on three booklets, to be opened October 5.
Mr. King reports that "judging from various requests received over the past few months, it will be necessary for the association to set up a service for identifying flowers and flower pictures. The latest request came from Mr. Chris Heller of New Jersey, who enclosed 27 Kodachromes of Southwestern flowers which were identified and returned by Mr. Amburger. This interest in flowers has undoubtedly been stimulated by the successful flower book-lets published by the association."

Ruin Stabilization
Archaeologist Richert and a crew of 6 men went to Wupatki on the 3rd of September to work on the drainage program there. The major item was the drainage of 12 deep rooms on the east side. At Chaco Canyon work continued on the stabilization of San Kletso, and it was hoped that the comprehensive stabilization of this site would be near completion by the end of the month.

Travel
Travel for the month totaled 46,166 as compared to 44,063 for September of last year. For the travel year to date our areas show a 15% increase over the corresponding period a year ago. Given favorable weather, October should also show an increase in visitation as the spectacular colors throughout the scenic areas of the Southwest normally draw large numbers at this season.

Visitors
Headquarters visitors included: Superintendent Bicknell, also Superintendents Howell, Sharp, and Lewis; Rangers Hanson, Steele, and Bullard; Archaeologist Beck; Mr. and Mrs. Joe Cosner, Archaeologist William and Mrs. Masley and Reverend R. J. Voris.
Aztec ruins reported interesting visitors, Mr. and Mrs. R. B. Knickerbocker, Ladner, British Columbia, who came to see their relative, Mr. Knickerbocker was born in a sod stockade three miles from Aztec in 1876 and was the first white boy born in San Juan County.

Some noted visitors at other areas included Mr. Merritt L. Smith, American Automobile Association at Canyon de Chelly; Dr. Jensen, Professor of Geology, Yale, Chiricahua; Mr. and Mrs. Henry James, authors, Gran Quivira; Messrs. Sprunt and Hamrell, Audubon Society representatives at both Chiricahua and Tonto; Fernando Pesquet, Librarian, Sonora State Library, Hermosillo, Tlaxacourt; Dr. Keener, University of Arizona, Walnut Canyon; and Dr. and Mrs. Stout, Department of Anthropology, University of Iowa, Wupatki.

Insects and Tree Diseases

Superintendent Cooke of Chiricahua inspected the upper Rhyolite Canyon area where some Arizona pines are dying. The drought and southwestern pine beetle seem to be responsible; however, the insect infestation is not serious as yet.

Personnel

Maintenanceman Mack was sent to Mupatki the 17th to join the road crew.

Ranger Paul F. McCrary transferred from Carlsbad Caverns to the vacant ranger position at Aztec Ruins.

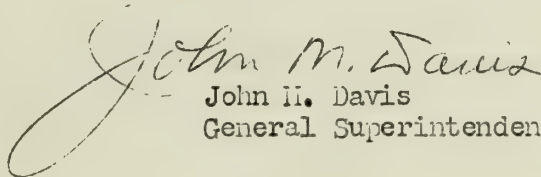

Archeologist Zorro A. Bradley reported for duty at Tuzigoot on the 13th.

We were pleased to receive word early in the month that six superintendent positions in the Southwestern National Monuments had been upgraded from GS-7 to GS-8.

Additions to the Southwestern National Monuments "family":

A new "Park Service and Southwestern National Monuments wife" was acquired on September 19 when Ranger Sutton, Montezuma Castle, was married to Miss Ann Livesay (former Ranger-Naturalist at Grand Canyon), in Elgin, Illinois. We are happy to offer our congratulations -- welcome Mrs. Sutton to our midst.

A new prospect for a future Ranger arrived at Walnut Canyon on September 10, with the birth of Keith Stephen, to Ranger and Mrs. Paul F. Spangle.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
ARCHES NATIONAL MONUMENT
MOAB, UTAH

September 24, 1953

Memorandum

TO: General Superintendent
From: Superintendent, Arches National Monument
Subject: Narrative report for September, 1953

WEATHER: Temperatures were unusually low for September and an above-normal amount of moisture was received in one rain storm.

NPS VISITORS: General Superintendent Davis
Asst. Chief Naturalist Gregg and Mrs. Gregg
Naturalist Arnberger
Asst. Regional Director Patraw
Regional Chief of Lands & Recreation Planning McCole

ROADS: Approach road #93 was washed out at every culvert and a heavy flow down Court House Wash held up eleven cars from 5 PM until midnight on August 28. Two gallons of hot soup, prepared by the HSMF, was carried across the wash and drained to the last drop by over 30 hungry people. No cars were damaged, although it took 2 hours to dig, push and pull out one car which was hopelessly wedged in a out of a 35" culvert washout. The attached clippings from the Times Independent is a good example of what happens to the visitors car if he is not advised when it is safe to cross Court House Wash. The county maintenance crew was unable to work the road immediately and it remained passable only to experienced drivers for five days. One serious washout occurred on the Windows road which took a full day to repair. Water out at every crossing, but in three days Maintenance man Winbourn had all our roads in good shape.

NEW EQUIPMENT: Two power supply units were obtained from Mesa Verde National Park and installed to operate both the Arches and Natural Bridges radios. These units are very convenient, being actually a small DC generator, the output of which can be regulated to 12 Volts, eliminating the use of batteries. The Generator is driven by a 1/4 HP motor which operates on 110 Volts AC.

TRAVEL: Due to our approach road being closed for 5 days and the discontinuance of counting visitors at Headquarters our travel count shows a decrease of 63% from the same period last year. During this month 2,976 visitors were counted by the traffic counter entering the area in 930 cars.

PERSONNEL: Seasonal Ranger Wick Miller was terminated at 5:00 PM on September 30. It was intended to send Wick to Natural Bridges for the first week in Sept., but heavy rains made the roads impassable.

OIL WELLS: Two wells are being drilled in the vicinity of the Monument. An oil well rig was set up in the Salt Valley Section 31, T. 23S, R. 21E and T. 25S R. 20E Section 11 is a large rig to drill for kerosene.

INTERPRETIVE SERVICE: With the new definition of an "Attended Interpretive Station", our interpretive contacts at Arches will, for this month and through June of 1954, drop to zero, for the Headquarters, where most of our contacts are made from September through June is now classed as only an informational station. This also affects our travel count, for now no count is being made of visitors stopping at Headquarters.

The register at the Wayside Exhibit was signed by 1937 people and we estimate that the same number used the Cove Nature Trail. For the third time the leaflet box was broken into. This time the top was pried off with a screw driver and approximately \$2.75 was taken.

WATER DEVELOPMENT: Mr. Ben G. Lafgren, Ground Water Division, USGS, Salt Lake City, spent September 21 in the area and plans to also visit Natural Bridges. As far as he knew his office had not received the request for a water survey of these two areas; but was glad to know that a survey might be requested. He went over both areas with the project in mind.

REHABILITATION PROGRAM: Notice that \$150.00 has been allotted for replacing the cover on our water reservoir and \$200.00 for the replacement of five picnic tables has just been received. The job on the reservoir will be done immediately and we understand the tables will be purchased along with those for other areas.

DEATH

**Astec Ruins National Monument
Astec, New Mexico**

September 24, 1953

Memorandum

To: General Superintendent

From: Superintendent, Astec Ruins

Subject: Monthly Narrative Report for September, 1953

Administration:

September has been a hectic month with one ranger being terminated, a new one reporting for duty, the well out of commission for five days, and an unprecedented number of visitors. Efforts are being made to acquaint Ranger McCrary with monument administration so that he can take over when my vacation begins next month.

Travel:

Of a total of 3922 visitors this month to Astec Ruins, 3236 were conducted on tours through the ruins. Another 686 visitors did not avail themselves of the guided trips. The total number of visitors arrived in 1212 cars. This brings the years travel to 22969 visitors.

Sunday, September 6, was the largest visitation day yet reported for this area with 368 visitors. Eleven guided tours were conducted that day with 329 people availing themselves of these tours. A total of 252 tickets were sold.

Increase in Travel:

Travel for this month shows a 19% increase in spite of personnel shortage.

Maintenance and Improvements:

On September 1, it was found that holes in the pipes into the well were letting water escape faster than it could be pumped and the pump was dismantled. A wrecker was rented from a local garage to pull the pipe. The pipes were so badly corroded that several holes had been eaten into various pieces

UNITED STATES DEPARTMENT OF AGRICULTURE
WASHINGTON, D. C.

January 11, 1918

Dear Sir:

General Department

Department, United States

Subject: General Department Report for January, 1918

Summary

Department has been a busy month with our regular daily
work, a new one starting for 1918, the day of our
the new year, and our regular work of 1917. There are
many things in general which are being carried on
that we are sure will be of great benefit to the public.

Details

Of a total of 1000 letters this month to the public
we have received 1000 letters from the public. The total number of
letters received in this month is 1000. This is a very good
result.

January, 1918, was a very busy month for the
Department. In this month we have received 1000 letters from the
public. This is a very good result.

Summary in Detail

Travel for this month shows a 100 percent increase in the
amount of travel.

Recommendations and Suggestions

In conclusion, I am sure that the public will be
satisfied with the results of the Department's work in 1917.
I am sure that the public will be satisfied with the results of
the Department's work in 1918. The public will be satisfied
with the results of the Department's work in 1918.

of the system, and those had to be replaced. Much rust was dislodged from the pipe and one additional day was required in the job because a piece of rust got under the seal in the foot valve. Voluntary assistance was rendered by Mr. Harry Olmstead of the Aztec Ruins Trading Post, who helped throughout the entire project. This piece of neighborly assistance was greatly appreciated.

Considerable rehabilitation is in progress on the small apartment attached to the garage near the Superintendent's residence. Numerous cracks have been repaired and repainting is partially completed.

Personnel:

Ranger Paul F. McCrary, Jr., wife Jane and two children arrived from Carlsbad Caverns Sat. September 12, They are rehabilitating an apartment on the area.

Seasonal Ranger Edward L. Madson was terminated C.O.B. September 17.

Seasonal Ranger James L. Bonham was terminated C.O.B. September 17.

W.A.E. guide James W. Corson was on duty Sept. 5, 6, 7, and 20, but feels that other duties prevent his continuing in the W.A.E. position.

Ruins Stabilization:

Two bound copies of previous stabilization Reports ^{were received} during the month.

Special Activities:

Mr. Sherman S. Howe was very pleased when a framed picture of the ceremony at which he signed over his archeological collection was presented to him. This was on his 83rd birthday on August 26 and he celebrated the day by walking from town to the ruins.

National Park Service Visitors:

August 30 - General Superintendent John M. Davis.

Protection:

~~The~~ protective screen of new wire ~~was~~ placed in front of the pictographs in the court yard ~~was~~ so shiny that the pictographs could scarcely be seen. After the problem was mentioned to a few parties of visitors, some one of them suggested painting the screen black, which was done.

[illegible]

1. The first step in the process of the investigation is the identification of the problem. This is done by the investigator who is assigned to the case. He or she will interview the witnesses and the suspect, and will also look at the evidence. The next step is to determine the facts of the case. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The third step is to determine the cause of the problem. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The fourth step is to determine the responsibility for the problem. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The fifth step is to determine the solution to the problem. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The sixth step is to determine the outcome of the investigation. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The seventh step is to determine the lessons learned from the investigation. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The eighth step is to determine the recommendations for the future. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The ninth step is to determine the conclusion of the investigation. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect. The tenth step is to determine the final outcome of the investigation. This is done by the investigator who will look at the evidence and will also interview the witnesses and the suspect.

Canyon de Chelly National Monument
Chinle, Arizona

September 25, 1953

Memorandum

TO: General Superintendent

FROM: Acting Superintendent, Canyon de Chelly

SUBJECT: Monthly Narrative Report for September, 1953

Travel: 926 people in 310 cars this month. This compares with 881 visitors in 273 cars for the same period last year. Total visitors count for the current calendar year is 6434 - for the same period last year 4990. There were 198 campers, many who stayed for several days. Guide and contact services totaled 132 hours.

Weather: High - low temperature ranged from 91 to 37. Only .07 of an inch of precipitation was recorded for this month. The cool nights are cutting down the number of campers and the length of their stay.

Roads: All approach roads have been passable but rough. The new oil surface road between Window Rock and Ganado is moving along rapidly and this provides the best approach to the monument. Roads within the monument are in very good shape.

Noteworthy Visitors: Mr. Merritt L. Smith, Assistant Secretary of the American Automobile Association on August 29th.

H. P. S. Visitors:

August 28 - Mr. John Davis, General Superintendent

September 3-6 - Mr. Les Aramberger, Naturalist

September 11 - Mr. Art White, Superintendent Chaco Canyon

September 15 - Mr. Wane Graf, Ranger Petrified Forest

Maintenance: Automotive equipment checked and serviced. All signs in area were overhauled. Plaster repaired on the interior and exterior of buildings.

Personal: Superintendent Everett W. Bright left Sept. 1 to take over as Superintendent at Craters of the Moon NM. The Brights were very well liked by everyone in the community and we were sorry to see them leave. Ranger John McConville took over as Acting Sup't.

Canyon de Chelly National Monument

Canyon de Chelly National Monument
Chinle, Arizona

Cont. from page 1

Accident: A visitor was bitten by a Navajo dog while walking in the Canyon. A complete report on this was submitted.

General: The floor of the Canyon is very dry and any travel with-in the Canyon difficult.

There is considerable speculation now, by both White and Navajo, as to the effect of the new laws on sale of liquor to the Indians.

John T. McConville

John T. McConville
Acting Sup't.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Capulin Mountain NATIONAL MONUMENT

Capulin New Mexico,

September 26, 1953.

Memorandum To: The General Superintendent
Southwestern National Monuments,
National Park Service
Globe Arizona,

From: Homer J. Farr, Ranger,
Capulin Mountain National Monument,

Subject: Monthly Narrative Report,

Visitors;

There has been approximately forty five hundred
visitors to the Volcano this month,
Total Visitors since Jan 1, to 28,050

Weather;

No precipitation this month, Very cool and very
pleasant thru the month, a very light frost visited us
on the north of the 20th, Grass has cured up wonderfully
nice and the cattle men are rejoicing over this fact,
Some falls it might be mentioned are early and early
heavy freeze catches the grass very lush, this
blackens it and is not very good,

Flora and Fauna,

Color has begin to show in the oak and aspen
and cherries, we do have beautiful golden, yellow,
brown and green in the fall,
Two porcupines have been destroyed in or near the
park this month and many more needs to be,
all wild life this fall appear to be more plentiful
than common,

Roads and Trails,

Roads have been maintained in good condition
Thru the month, with the exception of being very very
they have been good most of the time,
Trails have been used extensively but have had
maintenance this month,

Information pamphlets,

1000 pamphlets have distributed this month
Now on hand two thousand,

Very Respectful
Homer J. Farr

After the 1950s, the number of people in the United States who are over 65 years old is increasing rapidly. This is due to the fact that the birth rate has declined and the life expectancy has increased. As a result, the proportion of the population that is aged 65 and over has risen from about 10% in 1950 to nearly 15% in 1990. This trend is expected to continue, with the percentage of the population aged 65 and over projected to reach about 20% by the year 2020. This increase in the elderly population has led to a growing concern about the financial security of older Americans, particularly those who are not covered by Social Security or have low income. The government and private organizations are working to address these issues by providing financial assistance and services to the elderly.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
CASA GRANDE NATIONAL MONUMENT
COOLIDGE, ARIZONA

September 25, 1953

Memorandum

To: General Superintendent, SWNM
From: Acting Superintendent, Casa Grande
Subject: Monthly Narrative Report for September, 1953

General: Fall arrived this year a little earlier than usual. Although the daytime temperatures are still above 100 degrees, the evenings and nights are pleasantly cool.

Cotton picking started this month in earnest and the crop is by all indications going to be another good one. Increased use of mechanical cotton pickers has reduced the number of transient farm workers, and is no doubt the main reason for the slight decrease in our travel for the month.

Business throughout the valley is on the upward swing, as is always the case at this time of year. It is difficult for any new-comer here to ~~adjust~~ become accustomed to the relatively slow summers and the extremely busy winters.

The Arizona Business and Economic Review for August is devoted to an economic study of the city and county of Yuma, an important western travel gateway to this monument. According to the study, Yuma County has one of the heaviest through and out-of-state traffic flows to be found in Arizona, a large percentage of which is tourist travel.

Weather: The days continue hot but without the high humidity of early summer. Nights are cool; for the first time in many weeks we have been able to do without coolers after sundown.

Interpretation: The pictures of our interpretive program were taken this month and are being processed. They should be back in time to make the deadline on October 1. The monument is indebted to Mrs. Peck for the use of her camera and time spent in taking the pictures.

□ □ □ □ □

[illegible]

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been resolved.

Due to annual leave, Casa Grande was again a one man area four days out of each week. A total of tours were made with an attendance of visitors. The average tour lasted minutes. visitors looked thru the museum but did not go to the ruin.

121

959 Noteworthy Visitors and Organized Groups: 1256

| " 19 | Phoenix Visitors Club, 21 members. |
| " 19 | Mr. Al Runkle of Tucson, to discuss some films to be taken at this monument for the Sunshine Climate Club in Tucson. |

Administration and Protection: requests for information were received and answered this month. Adamsville received the routine examination and continues undisturbed.

Maintenance: The cooler weather has given great numbers of people the urge to picnic and as a result Mr. Lopez has spent considerable time on grounds cleanup. Roadside cleanup has been a problem this month due to the unusual type of visitor we get during the cotton picking season.

Several days were spent hauling sand and gravel for the utility area road. The road is now in better condition than it has been for some time.

Personnel: Superintendent Bicknell has been on annual leave since the 1st of the month. He will return to duty on October 8th.

If it were not for the fact that I am writing this report, I would mention the promotion of Jim Clancy from Park Ranger, GS-5, to Supervisory Ranger, GS-6, effective July 20, 1953.

James N. Clancy,
Acting Superintendent

Chaco Canyon National Monument
Blommfield, New Mexico

September 25, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chaco Canyon
Subject: Monthly Narrative Report for September, 1953

Weather

This month has been generally nice with day time temperatures in the mid-eighties. Nights are a bit nippy with temperatures in the mid-forties. High for the month was 92 degrees on the 25th of August with the low maximum at 83 on several days. Minimum was 34 degrees on the 24th of this month.

Several days were completely overcast with a resulting drop in travel and several days of high wind with dust made outside work difficult.

Total precipitation for this report period was .15 of an inch which fell on the afternoon and evening of the 27th.

Travel

Again "over the top". This seems to be getting to be a well worn statement not only for Chaco but for most of the Southwestern Monuments. A total of 513 people in 170 cars visited the monument during this report period. This is 183 people and 62 cars over this period of last year which had previously been the recorded high for this month.

Of the above number of people 287 went through Pueblo Bonito on guided tours and 31 went on "quickie" trips. A total of 31 hours were spent in the museum on general talks and giving information to visitors and 51 hours were spent on guided trips.

There has been the usual decrease in travel since Labor Day. However, there seems to be a more steady travel than during this period last year.

Administration

Daily duty was maintained during the month. Most routine correspondence was kept current as well as the filing. Eight requests for information were answered.

Interpretation

Through Labor Day one man was on duty at the museum. Since the 18th the interpretive services have been on a "hit or miss" basis. With the usual routine fall projects getting under way the one man on duty has been away from the office a large part of the time.

Work on the proposed self-guided trail for Chetro Ketl was not completed by Mr. Romano. He took one copy of the manuscript to Albuquerque to complete it.

Maintenance

Most routine maintenance has been kept current during the month. Specific jobs are listed under the following headings. The 2-4-D solution sprayed on the new growth in Pueblo Bonito seems to be working nicely. Most of the young growth has been killed off.

Roads and Trails

A majority of the outside work this month has been on roads. The main entrance road was dragged twice during the month but is still corrugated in a lot of places. Roads were policed twice during the month.

Retaining walls on the north approach road which had been badly damaged during the summer were replaced and about 20 yards of fill material hauled in to fill washed out places.

The old road across the northern part of the monument which had been built by the CCC had been washing badly in some places. The crew worked one and a half days on this road making small diversions across it in order to drain the road bed and stop the eroding of the crown.

The ditch along the side of the road coming down the cliff into the canyon on the north approach was cleaned out the the rocks removed. This had been filled during the last hard rain.

A lot of small but time consuming projects are scheduled for the next report period in order to get the roads in shape for winter, if possible.

Soil and Moisture Control

A crew of three men spent the first two weeks of this report period cutting tamarisk trees in the arroyo. These have been piled to be used in tree and cable jetties which are to be constructed in October and November. The tamarisk has been found to be useful in causing silt deposits and with the shortage of cottonwood trees a lot

of tamarask will have to be used.

One item, not mentioned in last months report, was the work done in Horse Pasture Canyon. The lower dike at the mouth of the canyon had silted in and this dike was lengthened, widened, and raised a few feet. The upper side was cleaned, widened, and cut considerably deeper. The TDL8A International tractor and pan was used for this work.

Inspections

General Superintendent Davis was in the area on the 29th. Area problems and general administrative procedures were discussed. Mr. Davis also inspected the new headquarters to Pueblo Bonito road and the diversion dam constructed in the Galle Canyon.

Landscape Architect David N. Van Pelt was in the area the 21st, 22nd and part of the 23rd, to lay out plans for landscaping around the new residences as well as to get acquainted with the area. This was his first trip to Chaco.

An inspection trip was made to Kin Bineola and Kin Klisin during the month and no new disturbances were noted. On a trip to Gallup a stop was made at Kin Ya-ah and things there seemed to be in good shape.

Personnel

Richard D. Myers, seasonal ranger through August, was terminated the 29th and Octavio Romano was terminated on the 18th of this month. Both are returning to school. Chaco is a one-man area again.

Wildlife

One porcupine was observed walking down the road on the evening of the 21st and a road runner was seen near Horse Pasture Canyon on the 29th of last month.

Prairie dogs seem to be on the increase. Fair sized colonies have been seen in two places on the monument and in other places several new burrows have been noticed.

Visitors, N.P.S.

General Superintendent Davis on the 29th of August
Landscape Architect Van Pelt from Santa Fe on the 21st, 22nd, and 23rd.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Chiricahua National Monument
Dos Cabezas, Arizona

September 25, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather Conditions. The drought is becoming more and more serious. We have had only 2.46 inches of rain in August and .04 inches this month, compared to the averages of 4.29 and 1.48 inches, respectively. Nine out of the last twelve months have been deficient in rainfall.

Special Activities. Superintendent Cooke left for annual leave on September 10. He will return at the end of the month.

Inspections. On September 6, Chief Forester Cook and Regional Forester Carlson made a brief inspection of the Monument. On September 9, Engineer George Smith inspected the road and trail situation. He complimented Mr. Marble on his road maintenance.

General Publicity. Descriptions and maps of Chiricahua were checked and revised during the month for the AAA and the H.M. Gousha Company.

Approaches to Monument. The Willcox and Douglas Chambers of Commerce and several local people are ardently trying to get the approach road from Willcox taken into the State highway system. We are hopeful of success in this matter, for there would then be a good chance of having the road paved. State Highway 86 receives heavy travel by out-of-state visitors, particularly in the cooler months, and a paved road from that highway to the Monument would undoubtedly increase our travel tremendously. At present many people make a long detour to get here via black-top road. Certainly many more wonder about Chiricahua, look at a road map; and reluctantly decide against the trip.

At the moment the Willcox and Bowie roads are smooth but very dusty. The road from Portal is both dusty and extremely rough, but we understand that it is now being bladed after more than a year of utter neglect.

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Washington, D. C.
San Carlos, Arizona

September 12, 1933

Memorandum

To: General Superintendent
From: Acting Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather Conditions. The month is passing very much more normal. We have had only 2.16 inches of rain in August and 1.41 inches this month, compared to the average of 4.17 and 1.15 inches, respectively. None out of the last twelve months have been deficient in rainfall.

Local Activities. Superintendent looks half for money leave on September 13. He will return at the end of the month.

Inspection. On September 4, Chief Forester took me and regional forester Taylor made a joint inspection of the monument. In September 7, Mr. Taylor Taylor inspected the road and trail situation. He accompanied by people on the road maintenance.

General Inspection. Inspections and work of Chiricahua were checked and noted during the month for the 1st and 2nd. Chiricahua Company.

Inspection to Inspect. The Wilson and Taylor Company of Commerce and several small people are working trying to get the approach road from Wilson down into the State highway system. We are hopeful of success in this matter. The road would then be a good chance of having the road paved. State highway is now being paved by half-of-the-village, particularly in the center section, and a great road from that highway to the monument would undoubtedly increase our travel tremendously. It passed very people make a last effort to get into the monument road. Certainly more have made about Chiricahua, but at a good way and relatively decided against the trip.

At the moment the Wilson and Taylor road is nearly as very good. The road from Taylor is very good and relatively good, but we understand that it is now being closed after some time a good at other aspect.

Donations and Accessions. Several valuable reference books were donated to the Monument by the Southwestern Monuments Association.

Interpretive Service. Six people were taken on two conducted walks to Echo Park. (Our Labor Day weekend crowd was obviously more interested in beer than in nature.) Twenty-nine people used the Foothill Forest Trail, and an estimated 561 took the Massai Point Nature Trail. 2,152 visitors were contacted in the museum in 501 parties.

Research and Observation. Mr. Stanley spent part of his time as Seasonal Ranger taking color slides and black-and-white pictures for reproduction. Those which we have seen are very good. We expect to get some good pictures for the Massai Point Nature Trail booklet in this way.

This has been a gay summer for rattlesnakes. Many black-tailed and green rock rattlers have been encountered all over the Monument. Several narrow misses, but no bites.

Decrease in Travel. Again we have had fewer people than during the same month last year. 2591 this month, 2803 last September, or a percentage drop of 7.2 . For the year, however, we are still ahead - - by the magnificent total of 390 people, or a shade under 2 percent.

Visitors. Visitors to the Monument this month included the following:

- Aug. 28 - Dr. Jensen, Professor of Geology, Yale University
- Aug. 28 - Mr. and Mrs. Pierson, Bureau of Land Management, (Soil and Moisture), making an official movie of the San Simon Valley.
- Sept. 2 - four members of the Pasadena College Endowment Group.
- Sept. 8 - Mr. Richard Holt and family, Arizona Field Geologist for Humble Oil Company
- Sept. 10 to 12 - Messrs. Sandy Sprunt, Assistant Western Representative of the National Audubon Society, and Bert Harwell, roving Audubon representative and National Park Service Collaborator.
- Sept. 6 Chief Forester Cook and Regional Forester Carlson, NPS
- Sept. 17 - Engineer George Smith, NPS
- Sept. 21 - Park Naturalist Richard Prasil and family, Carlsbad Caverns National Park

Ranger Service. Seasonal Ranger John H. Stanley was terminated at the close of business September 6.

Forest Fire Protection. The fire danger will be critical if the wind rises. Fuel is very dry.

Insects and Tree Diseases. The Superintendent inspected the upper Rhyolite Canyon area, where some Arizona Pines are dying. The southwestern pine beetle and the drought seem to be responsible, but insect infestation is not serious at present.

General. At Massai Point a self-assured gentleman was showing his family the strange rock figures. He was overheard to say: "And the most marvelous thing of all about those balanced rocks is that every one is hollow!"

September 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for Coronado National
Memorial for September 1953

A patrol and inspection tour of Coronado National
Memorial was made by the Superintendent on September 22.

This was my first look at the Coronado site
since my assignment here and I found that a full ten hour day
was necessary to make the patrol.

Enroute to the memorial I stopped and visited
with Forest Ranger Bob Schmitt at Patagonia and spent some time
in discussing the location of possible section markers but Mr.
Schmitt stated he knew of none that would be of benefit in
helping us locate our territory. Ranger Schmitt was recently
replaced on the Canelo District by Ranger W. Reynolds and I
stopped at the Canelo Ranger Station to meet him. We went
over the cooperative agreement involved and set a tentative
date to jointly inspect Coronado.

Conditions at the memorial were satisfactory.
The approach since the monument was made was satisfactory with 7
bullet holes and these were patched and sealed, and the signs
are in presentable condition. Trash and litter was not too
heavy and it appears that the trash barrel placed last month
had some effect.

Range conditions in the area are fair. In
beneficial rains were received during September and the grasses
are short and dry. Fire danger is above the normal for this
time but as this date is past the fire danger period is less
are manned by the Forest Service.

A pleasant two hours were spent with Mrs. Grace
Sparkes, a very interested person in Coronado, who offered at
some future time to help us in the more remote parts of the
country.

It was a very interesting and informative session. The speaker discussed the importance of maintaining accurate records and the role of the auditor in this process. He also mentioned the need for transparency and accountability in financial reporting. The session was well-attended and the speaker's presentation was highly praised.

September 23, 1953

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

There were 604 visitors this month which is 8 per cent increase over a year ago, and the first month in four that we have had an increase. These visitors came in 183 automobiles. Of these people, 480 in 27 parties took a trip around the Rock. 96 persons in 32 parties went over the top of the Rock, and 105 listened to an orientation talk.

The coolest this month so far has been 39 degrees and the warmest was 85 degrees Fahrenheit. The neighboring farmers are all very happy that the freeze is coming so late, it has not come yet, so that they can gather in their crops before frost. At the end of August, for the month, we had 1.52 inches of moisture. For the same month last year, we had well over three inches and the same the year before that. This month, so far, we have had no moisture at all.

The approach road from Gallup has been in good shape, but the one from Grants has been rough and bumpy. The Monument road is in good shape.

We linseed oiled the new bridge, the large entrance sign and five others. We refinished the floors in the residence and the office.

As cold weather is approaching, we went down to the basement and prepared the furnace for the winter. It was oiled, nozzles changed and the like. Afterwards, we tried it and it works like a charm. The last few mornings, we have awakened to find it operating.

In order to make the north side inscriptions more accessible during the cold and icy weather, we went down to the Tuni Salt lake and got five hundred pounds of salt to put on the steps. It is hoped that in this way we can keep them from freezing over.

National Park Service visitors included Messrs. John Davis, George Smith, Oblinger and Mott.

DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

Gran Quivira National Monument
Gran Quivira, New Mexico

September 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Gran Quivira
Subject: Monthly Narrative Report for September

Weather. Clear weather, with little wind prevailed. A gentle rain the first of the month resulted in 0.36" precipitation. Maximum temperature 92°, the average being 85°. The minimum was 44°; average minimum 51°.

Due to lack of moisture, conditions are extremely dry on the surrounding farms. The Pinto bean crop is being harvested and is yielding a heavier crop than has been had during the past several years.

Special Activities. While enroute from Lake Mead National Recreation Area to Gran Quivira National Monument I spent the day, August 28, in the office of Southwestern National Monuments, Globe, Arizona to become familiar with allotments and other data pertinent to Gran Quivira.

General Publicity. Gran Quivira National Monument and other noted historical ruins in this part of the state received favorable mention in the column, "Off the Beaten Path", by Doyle Cline in the Albuquerque Tribune. I believe the article has resulted in a marked increase in travel to Gran Quivira.

Maintenance. Loose rubble was removed from the interior of the missions. Routine road and trail maintenance has been carried on. A general clean-up of the area was made. A broken glass was replaced in one of the information stations. Packing was replaced in the deep well pump. Repairs were made to the weather station. Several temporary signs were made and installed. Five trips were made for household water. Physical inventory of government property was made.

Approaches to the Monument. The Torrance County crews maintained the approach road from Mountainair and the road is now in very good condition. The approach road from Carrizozo is in rather poor condition.

WATER RESOURCES DIVISION
WASHINGTON, D. C.

October 10, 1944

Memorandum

TO: Chief, Water Resources Division

FROM: Assistant Chief, Water Resources Division

SUBJECT: Monthly Progress Report for September

During the month of September, the following work was completed: The first of the month consisted in a 24-hour investigation of the water resources of the Colorado River. The second was a 24-hour investigation of the water resources of the Colorado River.

The first of the month, September 1st, consisted in a 24-hour investigation of the water resources of the Colorado River. The second was a 24-hour investigation of the water resources of the Colorado River.

During the month of September, the following work was completed: The first of the month consisted in a 24-hour investigation of the water resources of the Colorado River. The second was a 24-hour investigation of the water resources of the Colorado River.

During the month of September, the following work was completed: The first of the month consisted in a 24-hour investigation of the water resources of the Colorado River. The second was a 24-hour investigation of the water resources of the Colorado River.

During the month of September, the following work was completed: The first of the month consisted in a 24-hour investigation of the water resources of the Colorado River. The second was a 24-hour investigation of the water resources of the Colorado River.

During the month of September, the following work was completed: The first of the month consisted in a 24-hour investigation of the water resources of the Colorado River. The second was a 24-hour investigation of the water resources of the Colorado River.

Interpretative Service. A total of 250 persons in 67 parties were conducted, on 22 trips, through the mission and Indian ruins; the conducted trips averaged thirty minutes each. Parties totaling 593 persons in 174 groups used the self-guide trail. 191 parties of 652 persons were contacted in the museum exhibit room.

Increase in Travel. Travel to this area shows a decided increase for the month. Visitors totaled 843 in 241 cars from 29 states and two foreign countries. There were 109 cars from out of the state with 341 passengers. Ideal weather for travel is believed to be a large contributing factor. Total for the travel year to date is 1,048 cars and 3,783 people as compared with 982 cars and 3,366 people for the 1952 travel year to the same date.

Visitors.

National Park Service:

- Sept. 6 - Park Ranger Wm. Featherstone and family, White Sands National Monument,
- Sept. 8 - Dr. Musbaum, Sr. Archeologist, Reg. 3.
- Sept. 10- Ranger-Guide John Barr, Carlsbad Cavern NP.
- Sept. 11- Chief Forrester Lawrence Cook, Wash. D.C. Region 3 Forrester Stur Carlson.
- Sept. 14- George A. Grant, N. P. S. Photographer.

Other Government Officials:

- Sept. 21- Forest Ranger Nave, Cibola National Forest, Mountainair, New Mexico.
- Sept. 12- A. S. Baker, B. L. M. Albuquerque, N. Mex.

Other noteworthy visitors:

- Mr. and Mrs. Henry James, Authors, Albuquerque, N. Mex.
- Miss Buckley, Schoolteacher, Claunch, New Mexico.
- Mr. Hicks, Schoolteacher, Estancia, New Mexico.
- Mr. John Auferoth (a local booster) Mountainair, N. Mex.

Personnel. Effective August 30, Superintendent Ray E. Ringenbach transferred to Superintendent, Tumacacori National Monument and Channing T. Howell transferred from District Ranger, Lake Mead National Recreation Area to Superintendent, Gran Quivira National Monument.

Janitor Lois Kite worked three days during the month on the Superintendent's lieu days, kept the museum open and contacted the public.

Information received, a total of 100 persons in 1941
persons were reported, on 11/11/41, through the census was 1941
total; the estimated figure was 100 persons. The

Charles T. Howell
Representative

Montezuma Castle National Monument
Camp Verde, Arizona

September 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report for September 1953

Weather: It has been dry and hot all month. Nights are beginning to cool down but day time temperatures are still reaching 100 degrees.

Travel: This has been another heavy month for travel, with almost as many visitors as were recorded last month. Labor day weekend was especially heavy when over 1200 people visited the Castle and about one-half that many went to the Well. Final figures show 5,537 people in 1,582 cars to the Castle and 2,400 people in 750 cars to the Well. This totals 7,937 visitors to the monument for the month and is an increase over last year.

Visitors: September 5, Mr. & Mrs. Jannish, Santa Fe. Mrs. Jannish is known for a drawings appearing in the Flower book series published by the Southwestern Monuments Association.

September 6, Supt. John Lewis and family from Saguaro.

September 9, C. A. Harwell, Collaborator at Large, Berkeley, California, and Alexander Sprunt, Pacific Coast Representative for the National Audubon Society.

Official Visitors: On September 11, George Smith, Highway Engineer stopped by to look over the monument road system.

On September 13, Naturalist Arnberger paid the area a visit to check museum exhibits and the interpretive program.

On September 20, Asst. General Superintendent Castellum arrived to check rentals and to discuss fiscal matters with the monument superintendent.

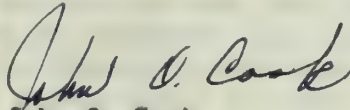

Maintenance and General Work. Despite constant and heavy travel, it was possible to accomplish some maintenance and new work. Of these jobs, the most important completed was construction of a badly needed drinking fountain. This fountain is located adjacent to the front of the Castle museum, and its location has eliminated the necessity of walking 100 yards down the Castle trail for a drink of water.

Page 2:

Persomnel: Pierson spent the full month at Tuzigoot where he is Acting Superintendent. Seasonal Ranger Koller will remain on duty until such time as Pierson returns to duty here.

Park Ranger Sutton, on annual leave, left September 13 for Elgin, Illinois where he was married to Miss Ann Livesey (former Ranger Naturalist at Grand Canyon) on September 19. He will return with his bride the first part of next week.

Research & Observation: Six rattlesnakes were counted this past report period. Three of these were killed in the immediate vicinity of the campground by visitors. Grey fox seem to be on the increase and are often heard barking at night. Although it seems early, flights of ducks are beginning to appear in the Valley.

John O. Cook
Superintendent

[Faint handwritten signature]

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
ARCHES NATIONAL MONUMENT
MOA B, UTAH

September 28, 1953

Memorandum

To: General Superintendent
From: Seasonal Ranger, Natural Bridges
Subject: Narrative report for September, 1953

GENERAL: This report includes only a partial month due to the fact that the prior Ranger left on August 18 and there has been no one here till Sept. 8, when Bates Wilson arrived. I arrived here on September 10. Bates Wilson and myself chained the complete loop trail, planned a whole new set of signs, looked over the proposed sight of the new nature trail and went over the area planning improvements and etc. One full day was spent by Sup't. Wilson installing the new power supply for the radio and another day in cleanup of the area and hauling a tank of water.

NPS VISITORS: Naturalist Les Arnberger who spent most of one day laying out a nature trail.

WEATHER: The weather, since I arrived, has been beautifully fair and clear with frequent fleecy white thunderheads and I have been able to help many of our visitors to get pictures that they had only dreamed of before, as several of those that I took on guided tours told me.

TRAVEL: A total of 259 visitors in 90 automobiles entered the monument during the sixteen days included in this report. During this time we had 52 people (21 parties) to use our overnight camping facilities. This number seems high to me considering the isolation of the monument and the time of year. There has been 10 parties comprising 31 people making the hike to Sipapu or the whole loop.

ROADS AND TRAILS: Roads and trails are in fair to good condition with considerable work planned for the near future, i.e., new signs, brushing and a great deal of work on the proposed nature trail route.

MAIL: Both roads leading to this area from Blanding are in good condition with exception of two stretches over Bears Ears Pass. The new or lower road is excellent and has just been worked over. The road to Hite is fair to good except for 18 mile stretch where wash crosses the road 60 times. Passenger cars are coming through, regularly, with no trouble.

Signed
J. H. Stanley, Seasonal Ranger

Navajo National Monument
Tonalea, Arizona

September 28, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report for September, 1953

Travel: There were 345 persons visited this area during the period covered by this report. During September 1952 there were 89 persons and in September 1951 there were 136. Of the 345 persons 153 camped overnight, 45 went to Keet Seel and there were 137 visitors on 34 trips to Betatakin. So far this travel year we have had a total of 1913 visitors in comparison to 880 last year at this time. Well over half the visitors explain that they are looking for new interests in out of the way places to escape the huge crowds found in the larger areas.

Weather: Beautiful fall weather has prevailed this month. There was .74 inches of precipitation recorded, low temperature for the month was 45 degrees and the high was 85 de rees.

Roads and Trails: All roads are in good condition. Our local trails are in fine repair except the trail to Keet Seel which is quite badly washed.

Visitors: Naturalist L. Arnberger - September 11

Ranger Art White, Chaco Canyon, September 11.

Mr. and Mrs. Merrill, member of the NF Association and employee of the State Department - September 26.

Photographer Laura Gilpin - September 18

Ass't Area Director Robert Young, J. S. S., and party of 7 - September 19

1917-1918

General: Work continued on roads and trails. One trip was made to Flagstaff for supplies and equipment. Preliminary work in remodeling the water pump generator house was begun. Two loads of sand were hauled from Cameron for this project.

The water pump has just been serviced and a wonderful new foot-valve installed. One of our recent visitors, an oil well pump manufacturer, sent us a deep well ball and seat valve which works like a charm. The cast iron suction head on the pump has developed a series of pin hole leaks that probably cannot be repaired.

A day and a half was spent making a serviceable grease pit. The pit is not entirely finished but is useable. We have long had a need for one and now the greasing of vehicles can be done safely and easily.

A load of propane gas was delivered and the service man checked all our pro-gas equipment.

Wildlife: The first porcupine to be seen in this area during the last three years made himself at home in a tree top near the parking area. The animal obviously became disgruntled due to visiting photographers and left in a huff during the night.

Personnel: Seasonal Ranger Hubert Laughter was terminated COB September 25. Mr. William Adams entered on duty as laborer, ungraded, September 24.

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Report 1ml, Sunset Crater National Monument,
September, 1953

Weather: General rains August 26-28. Clear and bright, with few showers, for the rest of the period. Nights cold.

Official Visitors: Naturalist Les Arnberger, Globe Office, on the 12th.

Roads and Trails: Entrance road dry and dusty, developing annoying washboards on the up-hill sections, generally good on the level stretches.

Interpretive Service: Contact service was maintained 8-12 and 1-5 five days a week through the 19th. Ranger service discontinued c.o.b. September 21st.

Travel: Travel continued heavy through Labor Day, then dropped off sharply. 4160 visitors in 1357 parties signed the register. This is about the same total as last year, but no allowance was made in this count for non-registrants.

Foreign: Foreign countries represented this month were Canada (provinces of Ontario, Saskatchewan and Ontario), France, Guam, Denmark, Hawaii, Brazil, England, Germany, Scotland and Venezuela.

General: The flagpole at the parking area was knocked down sometime during the night of the 6th.

Seasonal Ranger Henry L. Newell started his terminal leave Tuesday the 22nd. He will be terminated October 3rd.

Memorandum

To: General Superintendent

From: Superintendent, Tonto

Subject: Narrative Report, LMA, Tonto, September, 1953

Weather. Hot and dry. No rain. Up to 100 degrees nearly every day. Low of around 63° early mornings.

Travel. 2085 visitors for the month, which compares with 1490 for September last year. About a 30% gain.

Visitors, NPS & Special. Scout Troop No. 3, Globe, 13 Scouts with Scoutmaster Arson Spencer & Globe business men, August 29.

Mr. & Mrs. Luis Castellus and family, and Mr. and Mrs. Manuel Castellus and family, Sunday, September 6.

Mr. Bert Maxwell, NPS Collaborator, & Mr. Sandy Sprunt, Berkeley, Cal., both of the Audubon Society.

Architect Kenneth Saunders & Landscape Architect Warren Oblinger.

GAC Survey Team, Washington, Mr. C. P. Montgomery, Mr. E. T. McClelland, Mr. Carl F. Jones, accompanied by Assistant General Superintendent Castellus.

Engineer George Smith, Santa Fe, to look over road & trail problems.

Maintenance Supervisor Gene Lott, to inspect plumbing on new buildings.

Mr. Rudy Mack, Gila Pueblo, to return dump truck from Apatki.

Mr. & Mrs. Paul Robinson, Tucson, anthropologists.

Mr. & Mrs. F. H. Timberlake, California, ornithologist.

Personnel. WAF Tourleader Cosner was on duty about 10 days during the month. Archaeologist Wenger returned from leave September 20. Charles A. Tweedy was employed as truck driver, light duty, August 25.

Construction. Work progressed well on residences and comfort station, with all cement block walls up, plumbing, water & gas lines in, and floors poured and finished as of this week end. All work seems to be well done.

Salt river lower District line survey crew surveyed for pole locations on September 25.

THE UNIVERSITY OF CHICAGO PRESS, 5 EAST LEXINGTON AVENUE, NEW YORK, N. Y. 10017-2453

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Finally, the last step in the process is to implement the plan and monitor the results. This involves putting the plan into action and tracking the progress of the solution. Once the problem has been solved, the final step is to evaluate the results and determine if the solution was effective. This involves comparing the results of the solution to the original problem and determining if the problem has been solved. If the problem has not been solved, the process may need to be repeated.

Wildlife. A few Gila Monsters were sighted during the month. The rattlesnakes have begun to appear more often, and some of them show a mean disposition. Most rattlers are sighted here in April and October.

Special. This may be the only area to be able to report a bona fide sighting of a bearded archaeologist on a popo stick.

General. Most of September was a one-man month, with the ranger on duty over Labor Day and on the superintendent's lieu days. With over 2,000 visitors, a much time required to consult on numerous questions with the job foreman, and some time for maintenance & office work, it was a busy month. Considerable office work was accomplished after hours. It is an interesting aspect of any construction job on a small area, that no matter whether it is done by contract or day labor, innumerable questions arise which require time to dispose of, and much of the superintendent's day is taken up in this manner. We hope for a return to nearer normal, now that Archaeologist Wenger is back on the job.

Exotics. Several puncture vines (tribulis terrestris) were discovered growing in and near the circle at the end of the parking area. This needs several years of careful attention every spring to try to eradicate this most unwelcome plant.

Tumacacori National Monument,
Tumacacori, Arizona

September 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for September, 1953

General. My transfer and reassignment from Gran Quivira to Tumacacori was effected on August 31. Household goods and family accompanied me and the move was made without incident.

The last three weeks have been busy ones. The "breaking in" period has been limited - it almost seems as if there wasn't one. Local contacts with businessmen in Nogales and Tucson were made on a "get acquainted" basis, and many of the neighbors were met. The Forest Service and State Highway Patrol were also contacted.

Weather. There was no rainfall this month and the days have been hot. Temperatures of 95 degrees were recorded the first part of the month increasing to 122 degrees the past few days. Minimum temperatures have averaged 58 degrees.

Visitors. Archeologists Charles Di Peso and Barton Wright of the Amerind Foundation.

Mr. Fernando Pesqueira, Librarian, Sonora State Library, Hermosillo, on the 19th.

Rev. Weber and Rev. Weidner, Catholic priests from Milwaukee, on the 16th. Several members of the clergy from different parts of the United States, who were in Tucson for the consecration of a new Bishop, visited Tumacacori.

Construction. The shelter roof over the corridor ruins was installed by the Young Steel Co. on September 21. This job has been held up for several months due to the lack of material and is now considered 95 percent complete. The roof and drains have been installed but additional flashing and mastic to tie into the mission church building are still required. It appears that additional bracing will be necessary to insure stability.

Maintenance. Grounds cleanup started on the first of the month and has been continuous. Maintenance man Deubler has spent every free moment doweeding the area and bringing the patio garden up to standard. The trail through the mission area was slightly realigned and cleaned. Two artis caps for the roof vents in residence No. 1 were purchased and installed.

Travel. We had an increase of 10 percent in travel over that of last year. Actual count of visitors this month totalled 2,309 persons arriving in 635 cars. With the installation of the new fee system it has been apparent that turn-arounds will increase over what they were before the charge was placed on entrance to the building. Paid admissions or revenue has increased. Turn arounds totalled 284 persons during September.

Publicity. Mr. Jay Miller of Radio Station KCNA came in on August 31 and made a tape recording with the Ranger and Superintendent on the exhibits in the museum. The transcription was broadcast on September 8 on "Know Your Arizona" program. Mr. Miller has recently been appointed to the University of Arizona's radio and television programming department.

An excellent color picture of our museum diorama "A Mass in Tumacacori" was carried in the September issue of the National Geographic Magazine. It was included in the article, "From Tucson to Tombstone" by Mason Sutherland.

Interpretation. Guided trips through the ruins operated on a one man schedule most of this period. A total of 148 trips were made with 1,357 persons. About fifty percent of the paid admissions took the guide trip.

Five easel exhibits were installed along the proposed self guide trail and these have been used in conjunction with the guided trips.

The National Park Service Traveling Exhibit was received and has been placed in the Kino Room for public perusal.

Cooperating Agency. The State Department of Health made an analysis of our water supply and reported it safe for public use.

CONFIDENTIAL

Personnel. Employment papers were completed on Mr. Richard Paver who will serve as WAE Tour Leader for the next 30 days.

Ranger Bullard went on annual leave for a 30 day period and Maintenanceman Deubler took 8 hours annual leave on the 14th.

Research. The Amerind Foundation started their excavation of an early Indian site several weeks ago. The location of the work is 3 miles South of the monument and Archeologists Charles Di Peso and Barton Wright anticipate at least nine months work on this project.

*Very Respectfully,
J. C. Thompson*

24 September 1953

Memorandum

To: General Superintendent.

From: Acting Superintendent, Tuzigoot.

Subject: Report 1ml, September 1953 Monthly Narrative Report.

Weather. Hot days and cool nights. Temperatures in the low 100's during the day, cooling off to around 60 at night. No moisture

Official Visitors. Maintenance men Mack of Gila Pueblo on Sept. 10; Naturalist Arnberger on Sept. 14; and Assistant General Superintendent Castellum on Sept. 20.

Reportworthy Visitors. District Ranger Maxey, Grand Canyon on August 31, down in the Valley to become a father. John O. Cook of Montezuma Castle on 1 Sept. Ranger Paul Spangle of Walnut Canyon on Sept. 9, to be present at an offsprings arrival. Mesdames Reichart and Chittum of Wapaki on Sept. 10. Ranger Sutton of the Well on Sept. 10. John Stratton, future Superintendent of Tuzigoot on Sept. 21 to look over the new job.

Travel. With the summer travel slowing down Tuzigoot received 3517 visitors in 1156 cars during September. This compares with 2935 visitors in September a year ago and represents an increase. 3141 visitors went through the museum while it was open and 3517 used the Tuzigoot Trail.

Publicity (?) Archaeologist Bradley and wife managed to get pinched their second day in town. For resultant publicity see attached photo.

Maintenance and Rehabilitation. The cover on the drain-board in the office was covered with linoleum to prevent leakage of water into the supplies below and to make a better work surface. The guard rail in the reconstructed room of the ruin was repainted. Plans were made with Mr. Stratton to do some painting in the quarters.

Roads and Trails. Approach roads were very dusty during the month. The gravel roads approaching and wit in the monument were bladed the first of the month by the county crew.

A new sign was erected indicating the Tailings Pond and its use and Pecks Lake. This has also ad down one of the principle questions asked by the visitors on things outside the monument.

10. The following information is being furnished to you for your information only. It is not intended to be used for any other purpose.

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 3, 1862. It is a very long letter, and it contains a great deal of information about the state of the country at that time. It is a very important document, and it is one of the most interesting documents in the collection.

[illegible]

From these data, it is evident that the majority of the respondents are male, and that the majority of the respondents are in the 25-34 age group. The majority of the respondents are in the 25-34 age group, and the majority of the respondents are male.

1. The first step is to identify the problem or question that needs to be answered. This involves understanding the context and the specific requirements of the task.

Personnel. Tour Leader Edward R. Hill Jr. was terminated on Sept. 12 and he returned to graduate work in anthropology at the University of Arizona. Ed. is a personable young man and made a good impression with the local people during his short stay. He had devoted a great deal of spare time to the Jerome Museum project and was a capable interpreter of Tuzigoot.

Archaeologist and Mrs. Zorro A. Bradley arrived the 12th and Zorro reported for duty Sept. 13. Between renting a house, getting furniture delivered at midnight, and breaking into Tuzigoot routine, Zorro and Nattalie have been busy. We are most happy to have them with us.

Lloyd M. Pierson
Acting Superintendent.

THE PHOTO LAB

HEY, THERE! F. T. Schuerman hands a Lions Club subpoena to Mr. and Mrs. Zorro Bradley summoning them, along with hundreds of other motorists Monday, to help stop unnecessary traffic accidents. Schuerman was assisted in maintaining a highway roadblock at the Baptist Church by Al Smith. Bradley is the new archaeologist at Tuzigoot National Monument.

Walnut Canyon National Monument
Flagstaff, Arizona

September 27, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon Monument during September, 1953.

Weather Conditions

The weather during the month has been somewhat warmer than usual with no killing frost yet recorded. There was a total of 1.82 inches of rainfall recorded.

Administration

Administrative duties are current though continued high travel and maintenance have not allowed us much time. Three and one-half days of annual leave was taken by Park ranger Spangle, and one day by Superintendent Guillet.

Maintenance

Maintenance work has been done by the superintendent and Park ranger during the greater part of the month and consisted of general duties such as sawing wood for the camp ground, un-plugging water closets in the rest rooms and working on signs. One navajo laborer was borrowed from Wupatki on September 21 in order to get all of the concrete signs finished before cold weather sets in. Our biggest bottle neck in this project is lack of any equipment to move the signs we have poured so that we can pour more.

Travel

Travel continues to break records with 1,602 parties totalling 5,436 visitors during the month. This represents an increase of almost 1,150 visitors over September of 1952. Last years total was passed on September 10 and travel registered from now until Dec. 31 will represent our increase. Our travel year to date is 32,766 compared with a total of 31,551 for 1952 travel year.

Our visitors came from 45 states and three territories as well as 12 foreign countries including Pakistan, Arabia, and Tasmania.

Interpretive Activities

An illustrated talk "Unveiling Canyon de Chelly" was presented to some forty members of the Kiwanis Club in Flagstaff by Superintendent Guillet at their regular Monday luncheon on August 31. The heaviest day

of visitor use yet recorded was September 8 with 107 parties totalling 604 visitors. Superintendent Guillet was on duty alone and the Student body of Arizona State College came in for their annual picnic. This group of some 500 students and 72 cars and busses was handled without undue difficulty as contact and orientation talks were made as I parked the cars and when I finished I was 500 yards up the road from the parking area.

4,588 persons in 1,325 groups were given orientation and interpretive talks. One hundred hours were spent in actual contact time.

Tape recordings have been made of our interpretive activities to submit to the Washington office.

Museum Activities

As time permitted plans were made for improving and replacing some of our museum exhibits so that work may be started during the winter months if time presents itself. These plans were discussed during the last visit of Naturalist King and will be submitted to the Globe office for final approval.

Visitors

September 5.....110 members of Arizona State College Faculty
6..... Mr. and Mrs Janish(Jeanne) of Santa Fe

19..... Assistant General Superintendent Castellum, Gila Pueblo

Special Activities

The re-dedication of the Pioneer Women Marker placed at Walnut Canyon is scheduled to take place on Saturday, October 3. Various state officials including Senator Goldwater and Howard Pyle, Governor are Scheduled to attend. All Park Service Officials are invited. No refreshments are anticipated other than the "crow" served the Superintendent.

Meredith M. Guillet
Superintendent

UNITED STATES
DEPARTMENT OF THE INTERIOR

Wupatki National Monument
NATIONAL PARK SERVICE
Flagstaff, Arizona

September 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Wupatki

Subject: Report lml, Wupatki National Monument, September, 1953

Weather:

General area rain August 26-28 brought .9" of moisture.
Clear and bright since, with warm days and cool nights.

Official Visitors:

Naturalist Les Arnberger, Globe Office, on the 12th.
Luis Castellum on the 17th and 21st.
Engineer George Johnston September 2-5 and 8-18.
Archaeologist Gordon Vivian on the 22nd.

Maintenance, Rehabilitation and General Work:

The Wupatki legend sign at the old entrance road was moved to the temporary entrance road and the old masonry base demolished and removed.

The mailbox was moved to the new entrance road.

Cleanup of the back room in the museum basement was completed and a large work table set up. For the time being, the room will be used for planning and drawing-board work.

Some time was spent on grounds cleanup both at Headquarters and at Heiser.

Two man-days were spent in opening up a clogged sewer line and replacing some hot water line in the Superintendent's residence.

Both Onan light plants were checked over, serviced, adjusted and given minor repairs.

The Fairbanks-Morse water pump at Wupatki Spring was overhauled.

UNITED STATES
DEPARTMENT OF THE INTERIOR

OFFICE OF THE
SOLICITOR GENERAL

September 22, 1931

Memorandum

To: General Superintendent

From: Special Agent, Special

Subject: Report on, Special Agent, September, 1931

Summary

General area with about 25-30 acres, 1/2 of which is clear and 1/2 of which is wooded, with some small fields.

Special Agent

Special Agent for Forestry, Office of the General Superintendent, on the 19th of September, 1931, was on duty on the 17th and 18th. He was on duty on the 17th and 18th. He was on duty on the 17th and 18th. He was on duty on the 17th and 18th.

Information, Information and General

The Special Agent at the old station was moved to the temporary station and the old station was demolished and removed.

The station was moved to the new station.

Cleaning of the new room in the new station was completed and a large work table was set up. For the time being, the room will be used for cleaning and packing work.

How long was spent on grounds since last at Washington and at Baker.

Two men-days were spent in cleaning up a single room and preparing new and other lines in the Superintendent's residence.

Both Green light plants were cleaned up, serviced, adjusted and given about repairs.

The Superintendent's house was at Baker and was

ended.

The Sunset Crater Ranger Station and trailer house residence were closed up September 21st and some of the records and moveable equipment brought down to Wupatki for storage. The refrigerator from Sunset was set up in the old CCC barracks at Heiser and is currently being used by some of the road crew.

Roads and Trails:

With an expanded crew, more trucks and some rental equipment, the Wupatki entrance road is progressing well. Most of the base fill for the section from the highway to the Earth Cracks has been hauled and spread. Much of the section to the Citadel has been compacted. An additional water truck is expected soon, which will speed up the work of compaction. A most urgent need at the moment is another grader.

Some road maintenance was done early in the month on the Doney-to-Wupatki section of the entrance road but little has been done since because of equipment breakdowns. Both the Galion grader and the Case loader had to go into the Forest Service shops for repairs. In spite of this, both the entrance road and the loop road, though dusty, are in fair shape.

Both the Wupatki Ruins Trail and the Citadel Ruins Trail need to be worked over before the next heavy travel season. The Citadel Trail is a dangerous foot path and, with the greatly increased travel that will come to the Citadel with the new road, some measures must be taken in the interest of public safety. The Wupatki Trail needs some minor relocations to bring out points of interest; more than that, it needs better delineation and proper surfacing to keep the people on the trail and off the ruin walls.

Stabilization:

Archaeologist Richert and his Navajo crew arrived September 4th for stabilization work on Wupatki ruin. In addition to patching and capping walls, they installed drains in the rooms which were cleared last summer. Rick and his crew did their usual fine job, finishing up on the 25th.

Interpretive Service:

Contact service was maintained daily on a regular 8-12 and 1-5 schedule and irregularly during noon and off-hours as circumstances permitted. Plumbing and other emergencies caused occasional disruptions of the schedule.

The Board of Directors of the American Red Cross has decided to allocate \$100,000 for the relief of the victims of the recent earthquake in Mexico. This amount is being distributed in the form of grants to various relief organizations operating in the affected areas.

United States

With its extensive resources, the United States is in a position to provide substantial aid to the victims of the earthquake. The American Red Cross is currently working to coordinate the distribution of these funds to the most effective relief organizations in Mexico.

The American Red Cross is also providing medical supplies and personnel to assist in the relief efforts. The organization is working closely with the Mexican government and other relief agencies to ensure that the aid is distributed efficiently and effectively.

The American Red Cross is also providing financial aid to the victims of the earthquake. This aid is being distributed in the form of grants to various relief organizations operating in the affected areas. The American Red Cross is also providing medical supplies and personnel to assist in the relief efforts.

International

The American Red Cross is also providing financial aid to the victims of the earthquake. This aid is being distributed in the form of grants to various relief organizations operating in the affected areas. The American Red Cross is also providing medical supplies and personnel to assist in the relief efforts.

International

The American Red Cross is also providing financial aid to the victims of the earthquake. This aid is being distributed in the form of grants to various relief organizations operating in the affected areas. The American Red Cross is also providing medical supplies and personnel to assist in the relief efforts.

Travel: Travel was high again this month, continuing brisk until after Labor Day and then slacking off. 2391 visitors in 795 parties visited the monument as against 1508 visitors in 543 parties last year. 383 visitors in 107 parties arrived during hours when the contact station was closed and so were not contacted.

NPS Visitors: Ranger & Mrs. Joe McErlean of Bryce Canyon on the 30th. Engineer Ralph Lassiter and Mr. Howard Cameron of the Washington Office on the 6th. Steve Leding and Tom Major of Grand Canyon, with their families, on the 7th.

Reportworthy: Dr. & Mrs. Stout, Department of Anthropology, University of Iowa, on the 1st. Mrs. Moser and group from the Verde Valley School on the 6th. Mr. and Mrs. Janish, on the 6th. Mr. Watson Smith on the 25th.

Foreign: Foreign countries represented at Wupatki this month were England, Belgium, Canada, Denmark, Spain, New Zealand, Germany, Switzerland and Australia.

Personnel: Maintenance man Joe Bean was on annual leave September 8th to 16th. On September 25th he came down with a severe case of shingles. He will be off duty at least a week on doctor's orders.

Ranger Cal Burroughs was on annual leave September 21st to 25th.

Rudy Mack from Globe arrived on the 17th to join the road crew.

Water Supply:

Wupatki Spring, running about 150 gallons per day, suddenly shut down to about 80-90 gallons per day about the 17th. With this diminished supply and an almost exhausted water storage, it was necessary to cut off the water fountain in front of the museum.

Heiser Spring continues steady at about 2150 gallons per day. It is currently serving two residences, five house trailers and at least eight Navajo families.

J. W. Brewer, Jr.,
Superintendent

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
SOUTHWESTERN NATIONAL MONUMENTS
GILA PUEBLO, BOX 1562
GLOBE, ARIZONA

November 10, 1953

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report for October 1953

Weather

Arches, Aztec Ruins, and Chaco Canyon reported heavy rains. At Arches, Courthouse Wash ran several hours; Chaco Canyon had a total of 1.04" precipitation, with Chaco Arroyo running about 4 feet deep on two days. A light snow fell at Navajo.

Extremely dry weather prevailed at Chiricahua, Montezuma Castle, and other southern areas, where the days were warm and pleasant for the most part.

Special Activities

Headquarters--Mr. and Mrs. King continued to visit Gila County ruins in company with Mr. Robert E. Voris, an enthusiastic local conservationist. They climbed to the Cooper's Fork and Maverick Basin Cliff Ruins from Cherry Creek.

The task of transporting unsatisfactorily stored archaeological material continued during the month. Archeologists Pierson and Richert brought loads of material from various monuments. Mr. Richert will work three months on the Wupatki artifacts, reporting here about the middle of November.

Assistant Superintendent Castellum spoke before the Globe Rotary Club, using as his subject "Your Federal Government and the Federal Employee." This talk was very favorably received, so much so in fact, that Mr. Castellum has been asked to give it before the Lions Club sometime in November.

Chaco Canyon--Acting Superintendent White reported two interesting visitors - Mrs. Richard Wetherill and Mrs. Frederick Hyde. Mrs. Wetherill was accompanied by Mr. Lou Bachly, who was making a tape recording of her recollections of Chaco Canyon "way back when." This is part of a program sponsored by business men of New Mexico to get recordings of the pioneers of the state. The possibility of getting duplicate recordings were discussed with Mr. Bachly.

Mrs. Hyde came in to present the monument with a hand bound volume of George Pepper's report of Pueblo Bonito. The printed inscription in front of the volume in part is as follows: "Presented to the Museum of Chaco Canyon National Monument in memory of my husband, Frederick E. Hyde, archeologist, friend of the Indian, and contributor to his economic betterment: pioneer of the Hyde Expedition at Pueblo Bonito 1896-1899--", and is autographed by Mrs. Hyde. This

Maintenance, Rehabilitation and General Work - continued

Tonto--The residence at present occupied by the superintendent was given a new asphalt roofing. Mr. Sandoval, a globe carpenter who had been employed at Gila Pueblo, applied the roofing material at a considerable saving in cost over conventional quotations. An application of Sant-Sol set applied to the ruins almost a year ago gave such excellent and long-lasting results that another 15 gallons were applied.

Tumacacori--Facilities were provided for mounting two fire-extinguishers in the museum and one at the butane tank. Heating units in both the museum and residences were cleaned.

Tuzigoot--The superintendent's quarters were repainted.

Walnut Canyon--Most of the safety measures recommended by Mr. Ahern have been accomplished. An electric heater was purchased to replace the large oil heater formerly used in the west rooms. This will result in a considerable saving and improve safety conditions.

Wupatki--Considerable time was spent on plans for restoration and museum rehabilitation; on a survey of the Wupatki Ruins trail for minor relocations, regrading and surfacing; and on locating section corners necessary to surveying and mapping Helser and Wupatki Springs for claims to water rights.

New Construction

Tonto--Good progress was made on the two new residences and the comfort station. With luck, this project should be completed in another month.

Roads and Trails

Arches--Much-needed moisture made it possible to put monument roads into good condition. Rains made Courthouse Wash and smaller wash crossings difficult, and stranded occupants of five cars on at least one occasion. The State Highway Department cooperated nicely by bringing in a D-8 Caterpillar bulldozer to remove debris which heavy rains had deposited in the center of Moab Wash just above the bridge at headquarters. New road and trail signs were installed at Natural Bridges.

Chaco Canyon--Part of the trail behind Pueblo Bonito was relocated and some steps added, making this portion of the trail, which had been dangerous, safer. Washouts in the main road were repaired.

El Morro--The campground spur road and the parking area were completed under the direction of Supervisor of Construction and Maintenance Mott. The "farmers" road was also graveled and a cattle guard installed.

Montezuma Castle--All roads except the approach to the Well were in good condition. Gravel was hauled to fill some of the worse holes, but because of dry conditions in this area, not much was accomplished toward smoothing this road.

Wupatki--The road construction work in this area is progressing nicely. Some delay in starting oiling operations has been necessary due to difficulty of finding pit run surfacing materials.

Cooperating Government Agencies

Chiricahua--Headquarters for the local district forest ranger were moved from Portal to Willcox. Along with the change the Forest Service has proposed to abandon the telephone exchange at Portal, where the Park Service line connects. Many protests were received and the latest information is that the line will continue to operate, at least for the present.

Interpretive Services

Headquarters--A memorandum on the subject of achieving protection and conservation through interpretation was prepared and sent to all field areas, the Regional Office, and the Director.

Correspondence was initiated in an attempt to obtain a tape recorder which would operate continuously in lobbies and other audience rooms in the Southwestern National Monuments.

Twelve hundred copies of "What to See and Do at Chiricahua" were mimeographed and sent to the area.

Mr. Arnberger presented an illustrated talk to residents of the Gila County Old Folks Home.

Mr. Davis spoke before the Arizona Archeological and Historical Society in Tucson on the 19th, using "Ruins Stabilization" as his subject. He reported that members of this learned society were greatly interested in the work the National Park Service is doing in preserving ruins.

The distribution of free leaflets is quite a problem in the Southwestern National Monuments where many areas are unmanned part of the time, making it impossible to determine which people would really use the leaflets and which would not. Where they cannot be distributed on a selective basis, we are faced with the problem of keeping these booklets away from visitors altogether, or making them available to all visitors, including those who just pick them up because they are free.

Aztec Ruins--Ranger McCrary presented a slide program on Carlsbad Caverns National Park to the Home Builders Club of Aztec.

Canyon de Chelly--Two new wayside exhibits were set up at White House Ruins Overlook. These, complete with pictures and legends, will be part of the self-guided trail to be set up from the overlook down to the White House Ruins.

Montezuma Castle--Superintendent Cook reports the following comment from a lady visitor concerning the Montezuma Well Loop trail and guide pamphlet: "This is such a good way--I like seeing things this way. You feel like such a rubberneck on a guided tour. If a person is half way intelligent and can read, then these trails are the best thing." Mr. Cook doesn't quite agree that the guide pamphlet is better than a guided trip, but was glad to hear this reaction from a visitor concerning one of our valuable interpretive devices.

Navajo--Two days were spent with an artist from Denver, making rough posters for use in school kits. One day was spent at Inscription House Ruin making a sketch map of the road and trail from the trading post to the ruin. This map, when finished, will be available to visitors at the Inscription House Trading Post, where they are required to register and should give somewhat better control of visitors to that portion of the monument.

Interpretive Services - continued
Tumacacori--Forty-five bases and numbered stakes were constructed preparatory to the installation of the self-guided trail. The five easels which were installed previously were popular with visitors and were used in supplementing the guided tours.

Museum Activities and Exhibits

Gran Quitiva--White visiting Gran Quitiva recently, Mr. Gastelum noted one of the original beams from the mission exposed to the elements and that noticeable deterioration is taking place. He has suggested that this be protected for eventual use in the museum.

Tonto--A new insect case was constructed to better illustrate the area's small wildlife display. Archeologist Wenger went to Tucson on one of his "off" days to obtain information about the proposed museum exhibit revision. The University of Arizona State Museum donated several fine photographs of the lace cotton shirt found in the ruins at Tonto.

Research and Observation

Gran Quitiva--Many birds of several species as well as quail, rabbits, and road runners are observed frequently on the monument grounds. One flock of 16 quail is seen daily and three antelope were observed in the vicinity of the monument. Montezuma Castle--The biennial wildlife census turned up some new records, notably the Mexican Crossbill. Fifty-three species of birds and ten species of animals were counted, establishing an estimated population of 600 birds and animals in the monument.

Some biting midges and other microscopic insects were collected and sent to Dr. Wirth of the U. S. National Museum. He reported that the collection contained several very interesting new records and species, one of which was known only from Keener County, California and another known only from Texas and Oklahoma. Tonto--Large numbers of javelina have been observed every evening as they come to the trailer quarters in large numbers to obtain water from the bird bath (no rain for over a month). Kodachrome slides are being obtained almost every evening. Walnut Canyon--Ranger Spangle deserves much credit for his plant collections. The area now has a total of 241 plants, including 16 new plants representing two new families, four new genera, nine new species and one new variety.

Loan Library

Accessions totaled 97. Some time was spent in an attempt to straiten out our subscriptions to various publications. This has been an aggravating problem since our move to Gila Pueblo.

Southwestern Monuments Association

Good quotations on the reprinting of the Deserts and Mountains flower books were received as well as for the first edition of Animals of the Southwest Deserts. The flower books

Southwestern Monuments Association - continued

will be delivered in December, while the animals books should arrive in January. The Tumacacori trail booklet was delivered October 23. Artist Webb Young of Santa Fe submitted suggested covers for three trail booklets: Aztec Ruins, Wupatki, and Montezuma Castle.

All superintendents of the five decoordinated areas have indicated that they desire to continue operating as units of the Southwestern Monuments Association.

Ruins Stabilization

Mr. King in his monthly report commented as follows on the \$7,071 cut in our ruins stabilization account: "Because of the high cost of overhead in the highly technical ruins stabilization work, this cut means that almost no work can be done on the ruins during the second half of the fiscal year, other than minor maintenance."

Field men were requested to continue the accumulation of color slides on stabilization and research activity. These are necessary for budget requests and will come in handy for outside talks.

Archeologist Richert completed work on the maintenance program at Wupatki and Nalakihi.

At Chaco Canyon the comprehensive program at Kin Kletso was brought to completion and this site can now be considered in maintenance status.

The comprehensive stabilization program for the recently excavated Hubbard Mound at Aztec Ruins began on the 12th of October.

Travel

For the first time during this calendar year we must report a decrease in travel. There were 2856 fewer visitors than in October, 1952, a decrease of 9 per cent. For the year to date, however, we are 47,910 or 13 per cent ahead of the corresponding period a year ago.

October and November are normally low travel months. In addition to this, threatening skies, heavy rain storms in some of the northern areas, and rough and muddy roads, were contributing factors to this month's decrease.

Visitors

Headquarters--Mr. and Mrs. Carl F. Janish; Naturalist and Mrs. Jepson, Grand Teton; Mr. and Mrs. Dale Bullock, Santa Fe; Park Ranger Featherstone, White Sands; Superintendent Brewer, Wupatki.

Arches--Congressman D. R. Stringfellow, Utah; William Vandivert, photographer for Colliers Magazine.

Aztec Ruins--Mr. and Mrs. J. M. Fairchild, U. S. Department of Labor.

Casa Grande--Dr. and Mrs. Michie Nagei, Kyoto University, Tokyo, Japan; Dr. Haury and Dr. Danson, University of Arizona, with groups of students; Al Runkle, professional photographer, Tucson.

Visitors - continued

Gran Quivira--Mr. and Mrs. Paul Baker, editor of the Lancin County News, Carrizozo, New Mexico; a group of women from the Albuque branch.

Tonto--Mr. Gene Aiken of W. M. Cline Company, to photograph the area; Professor Kenneth Kurtz, Occidental City College, Los Angeles; Waldo Ruess, of California, brother of Everett Ruess, who lived at Tonto in the 30's and later disappeared in the Escalante Country of Utah.

Tuzigoot--Mr. and Mrs. Robert E. Smith, Region One Architect; Charles E. Peterson, Independence Hall; Mr. and Mrs. Eugene Velzy, State of California Division of Beaches and Parks.

Police Protection

The opening of the deer season, as always, brought about an increase in work load in many of the areas. At Chiricahua, Ranger Barrel spent several days posting the boundary prior to the season's opening and during the season patrolled from sunrise to sunset.

At Tonto and Walnut Canyon, patrols were made around the monument. No violations were detected.

At Coronado National Memorial, press releases advising of the game reserve at the area were sent to Southern Arizona newspapers in advance of the season. On patrol day, October 22, two groups of hunters with camps well within the boundaries were asked to relocate their camps and some three hours were spent at Montezuma Pass pointing out to hunters as well as could be done where the Memorial lands were located.

Wildlife Management

Coronado--While Superintendent Ringenbach was visiting with Miss Grace Sparks, she mentioned the interest in her vicinity in seeing the Service develop water holes within the Memorial for wildlife usage. Mr. Ringenbach believes that wildlife is prevalent in the area as he noted lion tracks and saw blacktail deer just south of Coronado Peak.

Soil and Moisture Conservation

Chaco Canyon--Construction of tree and cable jetties is underway, but because of a decrease in the SMC allotment, cable structures will be placed in only the most necessary places. An inspection of some of the jetties during the recent runoff disclosed them to be functioning properly.

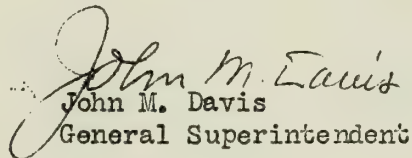

Accidents

Gran Quivira--When Superintendent Howell went to a neighbor's home to get help on the water system, he was bitten by a dog. A Mountainair doctor treated him and the injuries were such that there was no loss of work time. Mr. Howell's recommendation for preventing such accidents: "Know the dog."

Local Items

Chaco Canyon--Acting Superintendent White received a letter from a family which visited the area this past summer, during which time their son picked up "an old rock which the Indians used to grind on." After returning home, his mother remembered seeing a sign saying no material should be removed and she wrote they would be glad to return the "rock" if it was not all right to keep it. Mr. White is glad that "if metate it is," he doesn't have to pay the postage all the way from Ohio.

Montezuma Castle--The Verde Valley Pioneers Association held its annual picnic at the Well, with approximately 200 persons in attendance.

NATIONAL PARK SERVICE
ARCHES NATIONAL MONUMENT
MOAB, UTAH

October 23, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Arches

Subject: Narrative Report for October, 1953

WEATHER: Warm sunny days prevailed during the first of the month, but since the 19th it has been raining intermittently. Cloudy skies prevail. A very heavy rain in the Klondik Bluff area caused the Courthouse Wash to run for several hours on October 12.

ROADS: The much needed moisture has made it possible for us to put the monument roads in good condition. Route#93, the approach road to the monument, was washed out in places and repaired by the county, but continued rains have made Courthouse Wash and smaller wash crossings difficult. The occupants of 5 cars, stranded on the wrong side of Courthouse Wash on October 12, were hauled into Moab for the night. On the morning of the 13th the water had gone down enough for them to drive their cars across and go their respective directions.

TRAVEL: The wet and cloudy weather and muddy roads caused our travel to decrease 103% as compared with October '52. 1,439 visitors in 409 cars came to Arches this month. 1,000 people signed the register at the Wayside Exhibit and we estimate that the same number used the Cove Nature Trail.

MAINTENANCE: On October 12 the head on the motor of the light plant was removed to grind the valves. Not only the valves needed grinding, but all four pistons were broken. The motor was taken into Moab for a complete overhaul. After five days the job was completed - except that when it was all put back together, the rear main seals were left out. Another full day was required to partially remedy the bad oil leak, and we hope that we can use the plant without more expense, until the Utah Power & Light Co. will tie us on to that great big, beautiful power line that is running right past our frontdoor. Such an agreement is being considered and all we want for Xmas is real store bought electricity.

Floods during September and October deposited rocks and sediment in the center of the Moab Wash just above the bridge here at hdq. This caused the later floods to undermine the bank on the highway side and eventually the bridge abutment may have been damaged.

The State Highway Dept. brought in a D-8 Caterpillar Bull Dozer to remedy a similar condition where the wash crosses under Highway 160 below our headquarters. They also cleaned the center of the channel just above our bridge and restored the bank to its original palce.

ADMINISTRATION: On October 5, 6 and 7 Superintendent Wilson and Ranger Morris went to Natural Bridges to install new road and trail signs. Temp. Ranger Stanley is completing the trail sign project.

Aztec Ruins National Monument
Aztec, New Mexico

October 24, 1953

Memorandum:

To: General Superintendent
From: Acting Superintendent, Aztec Ruins
Subject: Monthly Narrative Report for October, 1953

Administrative:

Superintendent Hastings left on a 30 day leave October 10, and will return November 10. Ranger McCrary is serving as Acting Superintendent during his absence.

A request for postcards was made to several newspapers, radio stations, and Chambers of Commerce, so that we could continue sending them travel information. This was necessary because the privilege of sending frank mail had been revoked.

Travel:

A total of 526 cars brought 1607 visitors to the area. Of this number, 147 visitors did not avail themselves of the conducted tour through the Ruins. This brings the years travel to 24,576.

Decrease in Travel:

Travel for this month shows a decrease of .07%.

Weather:

Rainfall has been rather heavy this month with almost 2.50 ins. of rain recorded. The minimum temperature recorded was 34 degrees, maximum 84 degrees.

Maintenance and Improvements:

Due to a rather heavy rainfall on the night of October 19th, (1.58 in.), two back rooms of the Ruins were flooded with water to a depth of 2 to 4 inches. It was found later that a drain had been plugged with trash and prevented the water from draining off.

Canyon de Chelly National Monument
Chinle, Arizona

October 25, 1953

Memorandum

TO: General Superintendent
FROM: Acting Superintendent, Canyon de Chelly
Subject: Monthly Narrative Report for October, 1953

Travel: For the first time in many months travel fell under that of last year. 497 visitors in 205 cars as compared with 629 visitors in 196 cars for the same month last year. Total visitor count for the current calendar year is 6981. Guide and contact services totaled 67 hr.

Weather: High - low temperature ranged from 88 to 30. The first killing frost was on October 14th. There was .94 of an inch of precipitation recorded for this month. The cool rainy weather has been responsible in part for the decrease in travel to this area.

Roads: The new oil surface road is all the way into Canado Now. Road crews are working to the north and west of the Y this side of Canado. All roads in this area are passable but rough. The sawmill road is wet and not advisable for general travel.

Maintenance: General cleanup of area. Equipment checked and serviced for the winter. Superintendents residence cleaned and painted. Roads graded and some fill work done.

Publicity: A one page spread in The Fort Worth Press on Oct. 17th. by Caroline Hamilton, a visitor of last summer.

Concession: The Thunderbird Guest Ranch closed on Oct. 19th after a busy season. There will be no accommodations for visitors except occasionally a room at the Government school untill spring.

Interpretive Devices: Two new wayside exhibits were set up at White House Ruins overlook. These exhibits, complete with pictures and legends, will be a part of the self-guided trail to be set up from the overlook down to the ruins on the floor of the Canyon.

John T. McConville
Acting Sup't.

Memorandum

To: The General Superintendent
Southwestern National Monuments,
National Park Service
Globe Arizona,

From: Homer J. Farr, Superintendent

Subject: Monthly Narrative Report,

Visitors: There has been about twenty four hundred visitors this month,
Total visitors estimated since Jan'y 1st, 30,450

Weather: About one inche of snow and one fourth inch of rain about the middle of the month,
The balance of the month has been very warm and very dry, However this is characteristic of this community, a warm dry october without wind,

Flora and Fauna,

All wild life in the park is in excellent condition in fact I have never seen the deer look in better condition and more plentiful, All does and fawns are taking out to the lower levels and the more open part of the area and the old bucks as usual are getting in the higher places and more secluded, I seldom see them around the foot of the Mountain as before,

Special Visitors;

Mr Louis Gastellum, our congenial assistant General Superintendent from the Globe office as a very welcome visitors on Oct,13, going over the needs of the Monument with the Superintendent and offering many helpful suggestions, Messrs Tom Moran and David Van Pelt from the Regional office was more than welcome in the area on the 28, Mr Moran was giving advice about the Road and trail work and Mr Van Pelt was here of course to see that it would be done in the proper manner with respects to the eyes of a good Landscape architect, Both appear to be mighty good Indians, but were strictly looking after the affairs of the Park Service, Not much time for jokes,

October 25, 1953

Memorandum

To: General Superintendent, SWNM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for October, 1953

General: Indian Summer in the Gila Valley brings the cotton season into full swing. There are now about 8,500 cotton pickers in the fields daily, according to the Area Labor Market report issued from Casa Grande. The same report notes that there are at present between 500 and 1,800 cotton picking machines available in the county. Machine picking is now at the rate of 3,500 bales per week and increasing daily.

The local Jaycees went "western" for their annual rodeo - beards and sombreros being conspicuous around Coolidge.

Travel to the monument is on the upswing with the return of cool, cool weather.

Articles on Casa Grande appeared in the Coolidge Examiner and the Los Angeles Examiner. Both newspapers played up the wierd and wonderful "labyrinth" design, as usual. Shades of Theseus and the Minotaur!

The "Great House" will once again appear on the silver screen in the near future. On September 27, Dr. Emil W. Haury of the University of Arizona and ~~the~~ a group of fifteen archeology students visited this monument with a camera crew under the direction of Mr. Al Runkle of Tucson. Considerable footage was run off with Casa Grande and the archeologists as actors. This sequence is to be part of an educational publicity film on the history of southern Arizona, sponsored by the Tucson Chamber of Commerce "Sunshine Climate Club." The film will be shown on TV and as a movie to club groups throughout the United States.

Casa Grande was pleased to welcome a number of NPS visitors this month, most on their way back home from the Design and Construction Conference in Zion.

October 25, 1941

MEMORANDUM

TO: General Board of Directors, 1941

FROM: Department of State, 1941

SUBJECT: Monthly Review Report for October, 1941

General: The review for the month of October, 1941, shows a general improvement in the economic situation. The index for the month is 100.0, compared with 98.0 for the previous month. This is due to a number of factors, including a decrease in the price of raw materials, a decrease in the cost of labor, and a decrease in the cost of transportation. The index for the month of October, 1941, is 100.0, compared with 98.0 for the previous month. This is due to a number of factors, including a decrease in the price of raw materials, a decrease in the cost of labor, and a decrease in the cost of transportation.

Travel to the continent is on the increase and the weather is cool, cool weather.

Articles on the travel situation in the United States and the United Kingdom. The situation is generally good, but there are some difficulties in the United States and the United Kingdom.

The "Great Game" will now begin to be played out in the near future. The situation is generally good, but there are some difficulties in the United States and the United Kingdom. The situation is generally good, but there are some difficulties in the United States and the United Kingdom.

The situation is generally good, but there are some difficulties in the United States and the United Kingdom. The situation is generally good, but there are some difficulties in the United States and the United Kingdom.

Weather: With the exception of a few windy, dusty days, our weather this month has been quite pleasant.

| | 1953 | 1952 |
|---------------|-------------|-------------|
| High Maximum | 104 degrees | 103 degrees |
| Low " | 78 " | 95 " |
| High Minimum | 63 " | 68 " |
| Low " | 40 " | 47 " |
| Precipitation | 0 inches | 0 inches |

Interpretive Service: The slides of our interpretive program were received from the processors and duly forwarded.

A total of 151 tours through the ruin were made with an attendance of 1547 visitors. The average tour lasted 45.1 minutes. 1351 visitors looked through the museum but did not go to the ruin. Travel this month decreased by 42 people as compared to travel for the same period last year.

With all annual leave out of the way, Casa Grande National Monument once again faces the oncoming winter "tidal wave" with its full complement.

NPS Visitors:

| | |
|-----------|---|
| October 8 | Mr. and Mrs. R.E. Smith and son. Mr. Smith is on the architectural staff at Region I. |
| " 10 | Architect Reese Smith, Natchez Trace Parkways, and wife. |
| " 11 | Mr. C.E. Peterson of the Washington Office. |
| " 11 | Mr. Dick Sutton, Washington Office, and wife. |
| " 20 | Mr. E.C. Klenner, Washington Office. |
| " 20 | Regional Architect Kenneth Saunders and wife. |
| " 23 | Mr. D.C. Bayless, Washington Office, and wife. |

Noteworthy Visitors and Organized Groups:

| | |
|--------------|--|
| September 27 | Mr. Al Runkle of Tucson, professional photographer. |
| " 27 | Dr. E.W. Haury, University of Arizona and the Arizona State Museum. |
| October 1 | Group of 37 4th graders, Salt River Indian School, Scottsdale. |
| " 9 | Eloy 4th graders. Group of 37. |
| " 16 | Group of 38 4th graders, Eloy. |
| " 20 | Coolidge 4th graders. Group of 233. |
| " 22 | Group of 39 4th graders, Picacho. |
| " 24 | Edward B. Danson, Department of Anthropology, University of Arizona, and a class of seven in Museum Methods. |
| " 24 | Dr. and Mrs. Michio Nagai, Kyoto University, Tokyo, Japan. |
| " 24 | Deacons, 3rd Ward, Mesa. Group of six. |

Administration and Protection: Six requests for information were received and promptly answered. The Adamsville site remains unmolested.

Maintenance: More time was consumed in routine cleanup of the ruins and picnic area as travel increased. Other than routine, the sewer field was dragged and leveled, the road sign at Sacaton was repaired and repainted, the museum cooler was removed, and residences inspected preparatory to the installation of heating stoves.

Personnel: Mr. Peck returned from annual leave on October 21st.

Library: One book, Kroeber and Waterman's Source Book in Anthropology, was donated. A request for publications needed in the library was sent to the Bureau of American Ethnology.

Museum Prospectus: The rough draft of our museum prospectus is nearing completion. If our travel doesn't snowball too rapidly we may finish it in the near future.

Archeological Salvage: Mr. Minor Simms, a local cotton grower, is clearing a field near the monument and has offered to report to us if the leveling operation uncovers any archeological material.

A.T. Bicknell,
Superintendent

Administrative and Protection Division for Information
was received and promptly answered. The Nashville file number 10-
10124.

Maintenance: More time was expended in routine cleaning of the
tanks and picnic area as travel increased. When tank cleaning, the sewage
float was tested and leveled, the road sign of location was repaired and
replaced, the museum cooler was removed, and railroads connected pro-
cessory to the installation of feeding system.

Personnel: Mr. Bell returned from annual leave on October 1st.

Library: One book, Kroeber and Winterton's Lower Paleolithic in
Nashville, was located. A request for publication needed in the library
was sent to the Bureau of American Archaeology.

Future Prospects: The rough draft of our museum prospectus
is nearing completion. If our travel doesn't snowball too rapidly we
may finish it in the near future.

Pre-archaeological Laboratory: Mr. Wilson Rimer, a local cotton grower,
is clearing a field near the museum and has offered to report to us if
the leveling operation uncovers any archaeological material.

A. T. Richmond,
Superintendent

Chaco Canyon National Monument
Blancofield, New Mexico

October 25, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Chaco Canyon

Subject: Monthly narrative report for October, 1953

Weather

And the Rains came! a total of 1.04 inches of precipitation was recorded this month. The Chaco Arroyo ran about 4 feet deep on the 20th and 21st, and was running water for a period of four days.

High for the month was 87 degrees on several days during the early part of the report period with the average maximum in the mid 70's. Low for the month was 11 on the 20th with average minimum around 34°.

Several days of high winds with blowing sand made outside work difficult at times. Four completely overcast days and three more days of rain cut into the travel figures for the month.

Travel

This is the first time in some months that we are unable to report an all time high for the period. We missed it by 2 people. A total of 289 people in 95 cars visited the monument this month against 291 people in 95 cars for this period last year.

Interpretation

This program has suffered somewhat this month due to several reasons. A large percentage of the people had just come down from Aztec and just wanted "to look around" and declined the guided tour. Due to the lack of other interpretative devices they spent an average of about 45 minutes in the area. We hope to remedy this situation in the future.

The other contributing factor to the low percentage of visitors taking the guided tour has been the fact that a lot of the time the one man on duty was on essential duty in other parts of the monument. These duties away from the museum are amplified this year because the ranger is trying to be superintendent, ranger, and labor foreman at the same time.

Administration

Daily duty was maintained throughout the month. The museum was open every day with interpretative services still on a "hit or miss" basis. Normal correspondence was kept current and most filing done.

The better part of one day was spent with Mr. Edward Sargent on the land exchange problem and the proposed exchange lands were driven over and checked.

Maintenance

Routine maintenance was accomplished during the month in preparation for winter. Outside faucets were turned off and antifreeze placed in all of the trucks. The tool storage room as well as the work shop were cleaned out after the fall sandstorms, and numerous other small items done.

Roads and Trails

All primary roads were policed twice for trash and all main and most of the secondary roads were dragged at least twice. The S&MC tractor which is normally used for grading the road is not working properly so the roads could not be graded this month.

With all of the rain some work had to be done to fill in the washouts on the main road. Washouts in the secondary roads has been postponed until completion of the S&MC work for the fall.

Part of the trail behind Pueblo Route was relocated. This had been a dangerous place in this trail but with the addition of some standard steps it will be in good shape.

The entrance sign on the south boundary was moved to the entrance. It had evidently been erected before that part of the monument was fenced and was about three quarters of a mile inside the boundary.

Soil and Moisture Control

The seven man crew started constructing tree and cable jetties on the 16th but after only two days work had to stop due to water in the arroyo. Work will be resumed the 26th, but due to a decrease in the S&MC allotment cable structures will be placed in only the most necessary places.

An inspection was made of some of the jetties during the recent runoff and they were found to be functioning properly.

General

The fences on the east, south, and west boundaries where they cross arroyos were repaired this month. They had been washed out during the summer but since there was no stock on the adjoining range repair was put off until now. If time permits, the construction of some drops across these places will cut repairs to a minimum.

The old stake truck was taken to Aztec for sale. One trip was made to Gallup to pick up supplies from the General Services Warehouse, and the 1951 Ford pickup was taken to Durango for a tune-up and repairs.

News Items

Two of the "old timers" returned to the canyon this month: Mrs. Richard Wetherill and Mrs. Frederick Hyde.

Mrs. Wetherill and son, Richard Jr. came in on the second of the month accompanied by Mr. Lou Bachler. The latter was making tape recordings of Mrs. Wetherill's recollections of Chaco Canyon "way back when". It is part of a program sponsored by business men of New Mexico to get recordings of the pioneers of the state. The possibility of getting duplicate recordings were discussed with Mr. Bachler.

Mrs. Hyde came in to present the monument with a hand bound volume of George Pepper's report of Pueblo Bonito. The printed inscription in the front of the volume in part is as follows: "Presented to the Museum of Chaco Canyon National Monument in memory of my husband, Frederick E. Hyde, archaeologist, friend of the Indian, and contributor to his economic betterment: pioneer of the Hyde Exploring Expedition at Pueblo Bonito 1896-1899---", and is autographed by Mrs. Hyde. This volume was accepted on behalf of the monument and the Park Service.

N.P.S. Visitors

Supt. and Mrs. Homer Hastings and Ranger and Mrs. Paul McNary from Aztec. This was Paul's first trip to Chaco. Mr. Mack from Gallup on the 2nd also.

Other

Mrs. R. Wetherill and son on the 2nd.
A group of 42 students from the Univ of New Mexico on 17th and 18th.
Mr. Hyde on the 17th.

Guilty Conscience

A letter recieved from a family which visited the area last month points out the need for better control over visitors. The son picked up "an old rock which the Indians used to grind on" from around the BC sites located across the canyon from Pueblo Bonito and after

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Chiricahua National Monument
Dos Cabezas, Arizona

October 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

General. The superintendent was absent on annual leave from September 10 to October 1.

Weather. Weather has continued very dry with only .04 inch of rain in September. Three showers have fallen so far in October but they only produced .11 inch of moisture.

Inspections. Historian Littleton and a few others on the monument on October 1, making a brief trip over the road and discussing Apache and Chiricahua history with the superintendent. Ranger George Smith and landscape architect Warren W. Smith on October 21 at Chiricahua and went over the proposed power line, Natural Point Nature Trail, extension of Echo Canyon Road and Natural Bridge parking area, as well as discussing road conditions with the superintendent.

Maintenance. For some time our fixed ground and metallic telephone line has proved very inefficient. With the addition of the AAA power lines this condition has become worse and it was agreed with the permission to take it into an all-wire line. This conversion was accomplished the last month and the line was found to be giving excellent service.

Approaches to Monument. The dirt roads leading to Chiricahua are becoming very dusty and rough due to the prolonged dry spell.

Cooperating Government Agencies. Headquarters for the local district forest ranger has been moved from Portal, Arizona to Billson, Arizona as the result of consolidating all local Forest Ranger districts. Along with this change the Forest Service has proposed to abandon the telephone exchange at Portal, where the Park Service line connects. This proposal was followed by various protesting letters from residents in the Portal vicinity to Arizona's governor and senators. The district ranger has discussed the situation with me several times but so far nothing has been decided. We could not feel too badly if we lost the Portal end of the Park Service line as we get little service from it and spend much time maintaining it.

1. The first part of the report deals with the general situation of the country and the position of the various groups. It is a very good summary of the situation and is well written. It is a very good summary of the situation and is well written. It is a very good summary of the situation and is well written.

[illegible]

Cooperating Non-Government Agencies. The citizens of this community are working hard to get the county road from Willcox to Chiricahua oiled. A meeting was held in the community center building and the local road commissioner was invited. We are wishing them luck as this would make, by far, the best approach road to Chiricahua as it would directly tap Arizona State Highway 86 which has very heavy East-west travel.

Interpretive Service. 1102 visitors were contacted in the museum in 284 parties. An estimated 244 visitors made use of the self guided natural history trails. One conducted trip of 1 hour was made with three visitors.

Travel. Chiricahua again took a loss in travel this month with 1405 visitors compared with 1731 for October of 1952. We are still ahead for the calendar year with a total of 21,597. This is 64 visitors or .3% ahead of this time last year.

Police Protection. Deer hunting season opened with a bang on the 23rd - literally with a good many "bangs". Ranger Barrel spent several days reposting the boundary before hunting season. Since season opened he has been patrolling from sunup to sunset. With our 4 x 5 mile monument surrounded by deer and deer hunters it keeps one man busy protecting the area.

Forest Fire Protection. The forest is about as dry as it ever gets. A dry lightning storm started two fires on the National Forest south of the monument, last week. The Forest Service has put men on all of their lookouts for the remainder of hunting season. As we hope there will be no hunting on the monument we are trying to "get by" without sending the fire control aid back to Sugar Loaf Lookout. Hunting patrols and a few special trips to Massai Point we believe will give adequate detection and protection.

NATIONAL PARK SERVICE

Tumacacori National Monument,
Tumacacori, Arizona.

October 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Tumacacori

Subject: Monthly Narrative Report for Coronado National
Memorial for October 1953

The inspection trip was made on the 24th of this month by the Superintendent.

By prior arrangement I met Forest Ranger Reynolds of the Canelo District at their station and talked with him and Forest Supervisor Roger Morris of boundaries and their fire suppression program as it effects Coronado. During the hunting season Miller Peak will have a fire lookout on duty as range conditions remain dry.

Deer season opened in Southern Arizona on the 23rd and on the day of patrol, the 22nd, most hunters were setting up their camps. Two groups were asked to relocate their camps as they were well within Memorial boundaries, and some three hours were spent at Montezuma Pass pointing out to hunters as well as possible where the Memorial lands were located.

Press releases advising of the game reserve at Coronado were forwarded to Southern Arizona newspapers in advance of the hunting season.

General conditions remain satisfactory. Some cleanup was necessary at the top of the Pass and the trash barrel was destroyed but information signs were in good condition.

I stopped to visit with Miss Grace Sparkes at her home and Miss Sparkes mentioned that she was very much interested in seeing the Park Service develop water holes within the Memorial for wildlife usage.

That wildlife is prevalent in the area was pointed up on this trip. Lion track was observed and two blacktail deer were sighted just South of Coronado Peak.

October 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, El Morro
Subject: Monthly Narrative Report

This month, 353 people came to El Morro. This is a few more than a year ago. Of these people, 211 took a trip around the Rock in 37 parties, 10 visitors went over the top of the Rock and 34 persons listened to an orientation talk. There were 3 campers.

For the most part, the weather was warm and dry except for the last few days when we had .53 of an inch of moisture and a little cold. The warmest was 78 degrees and the coolest was 19 degrees Fahrenheit.

The water system quit functioning one day and after considerable cleaning of the chlorination tanks and bleeding of the pipes by Gene Bott, the system is back in operation.

The office stove was dismantled, cleaned and set up, and is now functioning properly.

The old gas pump was taken down, the tank pulled out of the ground (there were only 25 holes in it), and the hole filled.

Under the able direction of Gene Bott, the campground sewer road was laid out, built, graveled, and the parking areas laid out, built, graveled and some lined with rocks. Also, the "farmers" road was graveled and the cattle guard put in place. The entrance sign, built at Walnut Canyon by Superintendent Guillet, was delivered, a base built for it and it concreted into position. It is a mighty nice sign, thanks to all concerned. Gene left October 22. We wish that we had lots more jobs to keep such an agreeable fellow around.

The men, today, are erecting the concrete picnic tables. After that, they expect to gravel the areas and line them with stone.

Ranger Brugge went off duty on the 30th of September but stayed over as laborer until the 17th of October. He was a good worker, liked guiding the visitors and we surely hated to see him go. The ranger cabin pipes were

Flowerhouse reports and witnesses take were accomplished as follows: a platform was constructed to place the barrels of shell oil. Twenty-five gallons of the above oil per barrel. Another pump was installed in the rear house. Several live lizards were in the house. Two also were not accounted for. Seven birds of various size were seen. A great deal of work was done to get into the water tank, making it impossible to place the platform in front. Take the water tank was very high. The water was very high. Several live lizards were seen. Several birds of various size were seen. Several birds of various size were seen.

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Gran Quivira National Monument
Gran Quivira, New Mexico

October 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report - October 1953

Weather

Clear weather predominated, with a few days of strong winds and a few cloudy days. The maximum temperature was 88°, the average maximum being 76°. Minimum temperature, 25°; average minimum 42°. Precipitation of .08" on the 19th. settled the dust on the roads. Total precipitation for the year to date totals 10.86 inches. This compares with 11.13" in 1952 and 10.06" in 1951 to the same date.

The Pinto bean crop is nearly all harvested. Some fields did not yield as heavy as had been anticipated.

Inspections

Assistant Superintendent Gastelum inspected the ruins and the trails October 12. Mr. Gastelum's help and advice on operating and interpretative problems of this area are sincerely appreciated.

Maintenance

The large crop of weeds were removed from along the trails; also the weeds were removed from the missions and in the vicinity of the museum and residence. The roads and trails are in good condition at this time.

Miscellaneous repair and maintenance jobs were accomplished as follows: A platform was constructed to place the barrels of fuel oil. Doors were repaired at the museum and residence. Clothes hooks were installed in the rest rooms. Painted the living room in the residence. Some sign work was accomplished. Seven loads of water was hauled from Mountainair. A ground squirrel managed to get into the water tank, making it necessary to clean and sterilize the tank. Lois Kite worked two days on trails and other maintenance. October has been a busy month, with a considerable number of visitors to care for daily; maintenance work and making preparations for the coming winter.

Gran Quivira National Monument

Approaches to the Monument

The State Highway crew have maintained the approach road from Mountainair and the road is in very good condition.

Interpretative Service

A total of 283 people in 64 parties were conducted through the mission and Indian ruins. Parties totaling 223 people in 78 parties used the self-guiding facility. Visitors contacted and given interpretation in the museum totaled 481.

The long overdue shipment of 5000 Gran Quivira two-fold leaflets were received October 2. It has been noted that approximately 40% of the visitors desire one of the free leaflets.

Increase in travel

There were 506 people in 142 cars who visited the monument. Total for the travel year to date is 1,190 cars and 4,289 people. The 1952 travel year to the same date (Jan. to Oct.) was 3,161 people in 891 cars. Fifty-nine people used the picnic ground during the month.

Visitors

National Park Service

Assistant Superintendent Castellum, October 12.

Park Ranger Grant Clark and Mrs. Clark, Carlsbad Cavern

National Park, October 7.

James Wilson, former Park Ranger, Bandelier, October 4.

Other Noteworthy Visitors

Joseph Watson, School Principle, Carrizozo, N. Mex. Sept. 27.

Mr. and Mrs. Paul Baker, Editor of Lincoln County News, of Carrizozo, New Mexico, October 11.

Groups

Albuquerque Branch of American Association of University Women; a group of 16, Mrs. Lansing Bloom, leader, Oct. 14.

Group of 10 pupils from Miera, New Mexico school, Oct. 14;

Mr. D. H. Chase, School teacher was leader of the group.

Public Health

A ground squirrel drowned in a water tank, making it necessary to wash and sterilize the tank.

Statement of the Highway

The State Highway now have maintained the highway from its construction and the road is in very good condition.

Interpretive Service

A total of 200 people in 14 parties were conducted through the museum and Indian ruins. Parties totaling 200 people in 14 parties used the self-guiding facility. Visitors conducted and given interpretation in the museum totaled 400.
The last weekend shipment of 2000 more parties was made. Parties were conducted October 2. It has been noted that approximately 50% of the visitors desire one of the two facilities.

Interpretive Service

There were 200 people in 14 parties who visited the museum. Total for the fiscal year is 1,100 and 4,100 people. The last fiscal year for the same date was 1,000 and 4,100 people in 14 parties. Fifty-nine people used the guided facility during the month.

Interpretive Service

Accidents

On October 14 I was involved in an accident. Due to an emergency I needed help with the water system. When I called at a neighbour for assistance a dog bit me. Dr. Becker of Mountainside attended the wounds and gave a shot of penicillin. No loss of work time resulted and the injuries are well on the way to recovery.

Miscellaneous

Work on the gas pipe line, which passes a short distance North of the monument, is progressing; the Company expect to have the project completed through this area sometime in December. The ditch has been dug to a depth of about six feet and is ready for pipe to be laid.

The Report Manual, Vol. 7, was brought up to date.

A bird feed stand was placed on the back porch of the residence and many birds of several species come throughout the day for water. Quails and rabbits, also a Road Runner make use of another drinking trough placed on the ground. One flock of 16 quails are seen daily. Three Antelope were seen by Mrs. Howell and myself on October 7, six miles South of the monument.

Four rattlesnakes were disposed of during the month.

Channing T. Howell
Superintendent

On October 18 I was involved in an accident. I was in my car when I was hit by a truck. I was injured and taken to the hospital. I was in the hospital for several days and then I was released. I was in the hospital for several days and then I was released. I was in the hospital for several days and then I was released.

South of the river, the project completed through this area is shown in the map. The river has been dammed in a series of small dams and is now used for irrigation.

[illegible]

11-11-61

Montezuma Castle National Monument
Camp Verde, Arizona

October 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report, October 1953

Weather: It has been extremely dry, with clear days and blue skies. These conditions have made the weather ideal for the visitor but not so good for the stockmen. The first frost of the season occurred the night of October 23 when the temperature fell to 31 degrees.

Special Activities: Lloyd Pierson spent the first 10 days of the month packing and hauling artifacts from various northern Arizona monuments to Globe where they were stored in a fire proof building.

Two days of relief work each week were furnished Tuzigoot so that the one man stationed there could have his days off.

Considerable time was spent with a Mr. McColland from Riverside, California. Mr. McColland, an author, plans to write a novel with the Castle and its people as the subject. He was in the area for two days going over the ground and using the library.

I spent part of October 22, with Architect Saunders of the Regional Office and Edwin Kenner of the Washington Office checking the area's physical system and discussing rehabilitation projects.

Travel: It has been steady all month, although somewhat less than last October. For the record, 8,612 visitors in 1,183 cars visited the Castle and 1,532 visitors in 539 cars went to the Well. For some unknown reason, visitation to the area was smaller the first part of the month than the latter half.

Interpretation: With but one man on duty at the Castle, interpretive contacts were pretty well divided between the museum and the model location. It is interesting to note that visitors arriving this time of year spend much more time in the area than those who come during the summer months. This is because we have a more leisure type visitor during the fall months as well as to cooler weather.

A lady visitor had this to say about the Montezuma Well Loop Trail and guide Pamphlet: "This is such a good-way--I like seeing things

Page 2:

this way. You feel like such a rubberneck on a guided tour. If a person is half-way intelligent and can read, then these trails are the best thing." Although we don't quite agree that the guide pamphlet is better than the guided trip, we were happy to hear this statement.

Visitors:

October 9 - Mr. and Mrs. Dick Sutton from the Washington Office.

October 17 - Darrel Crumley from Globe Office.

October 18 - Chief Ranger and Mrs. Dinsmore from Petrified Forest.

October 18, - Mr. & Mrs. George Roundy, Superintendent of various National Monuments back in the days of Boss Pinkley.

October 22 - Mr. Sauders of the Regional Office and Mr. Kenner of the Washington Office.

Maintenance and General Work: Because of employee sickness and other special details only a small amount of work was accomplished this month. Nevertheless, fuel oil lines were extended to Residence No. 5, and the stove connected to a 50 gallon storage barrel. We are now in the process of burying a 500 gallon fuel oil storage tank next to the barrels so that oil may be ordered in larger quantities.

The outlet of Montezuma Well was cleaned of obstructing debris and plant growth. Believe it or not, the water level rose ten inches to its maximum level, following this job.

Roads and Trails: With the exception of the entrance road to Montezuma Well, roads and trails are in good shape. If it ever rains enough to soak up the soil, it is planned to grade the Well road. It is impossible to do anything to it until then. Several loads of gravel were hauled, however, to fill in some of the worse holes.

Research and Observation: The biennial wildlife census was taken October 6th at the Well and on October 10th at the Castle and turned up some new records, notably of the Mexican Crossbill. All in all, 53 species of birds and ten species of animals were counted during the two days, establishing an estimated population of 600 birds and animals in the Monument.

Some biting midges (no-see-ums) and other microscopic insects were collected and sent to Dr. Wirth of the U. S. National Museum. In his reply, Dr. Wirth stated that the collection contained several very interesting new records and species, one of which was known only from Kenner County, Calif., and another, known only from Texas and Oklahoma.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
NATURAL BRIDGES NATIONAL MONUMENT
BLANDING, UTAH

October 23, 1953

Memorandum

To: General Superintendent

From: Seasonal Ranger, Natural Bridges

Subject: Narrative Report for the Month of October, 1953

GENERAL: Bates and Bob made all new road and trail signs. All new road signs were installed on their way in on October 5. With the use of an air compressor, loaned by San Juan County at Blanding, it was possible for them to drill holes in solid rock for the pipe standards that support the signs. Also, holes were drilled so that after shooting new pits, the pit toilets may be moved to a new location. This will be done next spring. The remainder of the signs were painted and a few were put up on the 5th and 6th of October. I am now in the process, when weather and tourists permit, of drilling extremely solid rock with a repeatedly blunted and resharpened instrument known as a star drill; driving force is of course a bay sledge. Purpose is to furnish holes in which to cement lengths of pipe to which I am bolting the new signs. Recent storms have certainly kept the dust under control.

WEATHER: Alternately beautiful and terrible! On Sunday October 11, we had twelve hours of solid, cold, miserable, down-pour making the roads to Blanding an impassable quagmire. Armstrong and White Canyons at flood stage, rolling large rocks and floating trees down canyon like toothpicks. Oct. 19, 20, 21, 22, was blessed with heavy rains, sleet and even a little snow coupled with heavy winds. The road over Bear's Ears is impassable except to four-wheel-drive Jeeps, quite a few hunters in passenger cars are stuck. Two fellows, who are camped here, just came back from Elk Ridge. They have a Jeep with a winch and it took them three hours to get just two cars free of the mud.

TRAVEL: A total of 225 people in 90 cars visited the monument. This seems a rather excellent attendance considering the weather and the time of year. We had 44 campers. I conducted three guided tours to the Indian ruins with a total of 8 people. Another 3 guided tours around all three bridges with a total of 13 people. I also put on four slide shows for a total of 15 very appreciative persons, using my own wildlife and travel slides and etc.

2001, 22 September)

[Faint, illegible handwritten notes]

1950-1951

[illegible]
$$\frac{1}{\rho} \frac{d\rho}{dt} = \frac{1}{\rho} \frac{d\rho}{d\tau} \frac{d\tau}{dt} = \frac{1}{\rho} \frac{d\rho}{d\tau} \frac{1}{1 - \beta^2} = \frac{1}{\rho} \frac{d\rho}{d\tau} \frac{1}{1 - \frac{v^2}{c^2}} = \frac{1}{\rho} \frac{d\rho}{d\tau} \frac{1}{1 - \frac{v^2}{c^2}}$$
[illegible]

1. The first of these is the fact that the material is not a uniform mass, but is composed of a number of small, irregular fragments, which are held together by a thin, fibrous material. This is the case with all the specimens examined, and it is the only one of the kind that has been found in the United States.

[illegible]

ROADS AND TRAILS: A little trail work has been done and quite a bit on signs etc. All new signs will be up before I leave.

LOCAL: Roads to landing are in very bad shape due to prolonged rains and ore trucks churning the mess into a sea of potholes and liquid mud.

REGRETS: My time is nearly run out and I hate to leave. I regret even more having to leave the Park Service. It is a good outfit, I like the work and I would give anything to stay in!

Signed

Jack Stanley
Seasonal Ranger

1. I have been thinking of you a great deal lately, and wondering how you are getting on. I hope you are well and happy. I have been very busy lately, but I will try to write to you more often.

Navajo National Monument
Tonalea, Arizona

October 26, 1953

Memorandum

To: General Superintendent
From: Superintendent, Navajo
Subject: Monthly Narrative Report for October, 1953

Travel: There were 203 visitors to the area this month which is a record high for October. There were 25 conducted trips to Betatakin and 4 parties went to Keet Seel. The total visitation this year to date is 2,116 - 1,236 more than the 880 recorded last year.

Weather: Since October 21 we have had one light snowfall and very cold weather. The high temperature was 80 degrees and the low was 23 degrees. There was .22 inches of moisture recorded.

Roads and Trails: As a result of a nice rain we were able to blade the entrance road and do some trail work. In general all reservation roads are now better than usual.

Rehabilitation: The rehabilitation of the power house for the water supply system - building number 11 - has been completed. It was enlarged, the roof raised, the entrance door relocated and enlarged to facilitate removal of the motor. Ventilators were installed to eliminate overheating the motor and a new motor mount was made. We can now service the motor without having to first remove it from the building.

Interpretation: Two days were spent with Mr. Kenneth Pool, an artist from Denver, making rough sketches of posters for use in the school kit.

One day was spent at Inscription House Ruin making a sketch map of the road and trail from the trading post to the ruin. With some additional work the map will be ready for reproduction. The finished map with information for the visitor will be available at the Inscription House Trading Post where visitors are required to register. We anticipate that this program will give us somewhat better control of visitation to that portion of Navajo National Monument.

Power Plant. The Onan 5 K Diesel power plant broke down and will have to be hauled to Phoenix before it can be used again. Tonto is operating on the Kohler 1200 watt stand by plant and will probably have to use this until commercial power is brought into the area.

Construction: Good progress was made on the new comfort station and two houses. The partitions are in, roof decks on, but not completely roofed with roofing material. Septic tanks are poured and the windows were glazed October 24th. There was much necessary work, but unexpected work completed during the month. With good luck the buildings here could be completed in another month.

Patrols: Deer hunting season opened the 23rd. Several patrols were made to portions of the monument to insure there were no violations. Several patrols around the area were made on heavy travel days as the fire danger is moderately high.

Rehabilitation. The present residence occupied by the Superintendent was given a new asphalt roofing. This building will serve as quarters for the seasonal ranger when the new houses are completed. Mr. Mendoza from Gila Pueblo, a temporary carpenter here, applied the roofing material at a considerable saving in cost over local or contractor quotations.

Ruins & Interpretation Services: Archeologist Wenger carried 12 gallons of Bari-Boil-It to the ruin for use in settling the dust. The last application was made nearly one year ago with excellent, long lasting results.

One trip was made to Gila Pueblo to take the archaeological material not on display for better storage.

A small travel chart indicating the number of visitors to the area for the month, and for the year, was installed in the museum.

A new insect display case was constructed to better illustrate our small wildlife "critters".

Directional road sign markers were given a new coat of stain and the letters repainted.

Archeologist Wenger made one trip to Tucson on his day off, to obtain information about the proposed museum exhibit revision at Tonto. The University of Arizona State Museum donated several fine photographs of the lace cotton shirt found in the ruins at Tonto for our museum.

Wildlife. With no rain for over a month, the javalinas have been coming to the trailer quarters in large numbers every evening to obtain water from the birdbath. Insecticide slide photo's are being obtained almost nightly (by flash) of these prey.

Four rattlesnakes were removed during the month.

Local. Superintendent Wenger made the 20 mile cross country with the Sheriff's posse across the Salt River Canyon Country, Oct. 2-4th.

Gilbert R. Wenger

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tumacacori National Monument,
Tumacacori, Arizona.

October 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for October

Weather. Summer weather continued through the first two weeks of this report period and then decidedly changed into Fall. We had two days of high winds on the 18th and 19th but no precipitation at all. Maximum temperatures averaged 90 degrees and a minimum of 33 degrees was recorded.

Construction. The shelter roof over the corridor ruins was completed on October 1 and a completion report covering the project was prepared and forwarded your office. We can report that the structure withstood some high velocity winds and very well.

Maintenance. In addition to routine maintenance on restrooms, other buildings, and grounds, our maintenanceman was able to construct and mount two fire extinguishers in the museum and one at the butane tank. The heating units in both museum and residence were cleaned, new filters installed, and placed in operation. A screened air vent was constructed over the water heater in the garage.

Publicity. Southern Arizona newspapers carried our travel figures for the month of September and also our press release requesting cooperation from deer hunters at Coronado National Memorial.

Personnel. Maintenanceman Deubler has been on the sick list part of the month due to a recurrence of a back ailment.

Ranger Bullard returned to duty on the 22nd following a month of annual leave.

Tour Leader D. Richard Paver, who has been working on week-ends for the past month, was terminated on October 13.

Mr. [Name] [Address]
[City] [State]
[Country]

Dear Sir: [Text of letter body]

[Text of letter body]

[Text of letter body]

[Text of letter body]

[Text of letter body]

[Text of letter body]

[Text of letter body]

Visitors, N.P.S. Mr. and Mrs. William Hausmann, National Capital Parks, on September 28, enroute to the Zion Conference.

District Ranger Earl Worthington and family, Mesa Verde, on September 29.

Mr. and Mrs. Dick Sutton, Washington office, and Mr. Charles Peterson, Independence Hall, on the 13th.

District Ranger Bill Featherstone and family, White Sands, on the 14th.

Mr. Kenny Saunders, Region 3, and Mr. Edward Kenner, Washington office, on October 19.

Mr. and Mrs. John Davis for a short visit on the 20th.

Superintendent John Lewis and Family, Saguario, on the 25th.

Travel. We had visitors from all parts of the country and from other nations but not as many this year as in 1952. Visitation dropped 20 percent with 2,254 persons recorded. We counted 199 persons as "turn arounds" or those people who left the building after being advised of the admission fee, and 1,883 paid admissions, and 371 complimentary admissions.

Interpretation. The Superintendent was on duty alone most of the month except on the week-ends when Tour Leader Paver was employed. We had 193 guided trips with 1,616 persons in attendance. The size of the parties varied from 1 to 54 people. Visitation to the museum and patio garden totalled 2,254 persons.

The National Park Service traveling exhibit was on display here until the 16th, and then it was forwarded to the Museum Branch in Washington. On the whole, it was well received by the public.

Preparations for the future installation of the self guide trail got underway with construction of 45 bases and numbered stakes. The five easels which were installed last month received good usage and were used in supplementing the guided tours. An electric eye or photo-cell electric visitor counter is being installed in the museum to record those persons who will use the museum and patio facility without paying the required fee when this self guiding system goes into effect. When one Ranger is on duty and he is in the church to protect it from vandalism, no one will be available at the desk to dispense information and collect the fee. It is obvious, beforehand, that revenue will drop decidedly, as only about 60 percent of visitors now take the guided trips.

1. The first group of people who are interested in the study of the history of the United States are the people who are interested in the history of the United States.

[illegible]

1. The Government of the United States of America, hereinafter referred to as the Government, has the honor to acknowledge the receipt of the letter of the Government of the Republic of the Philippines, dated the 10th day of March, 1900, in relation to the subject of the above-captioned case.

The National Film Board (NFB) was established in 1939, and its mandate was to produce and distribute films that would educate and inform the Canadian public. The NFB was the first Canadian government agency to be created specifically for the purpose of film production and distribution. It was the first Canadian government agency to be created specifically for the purpose of film production and distribution.

[illegible]

Agencies, other than Government. An invitation was extended to the Superintendent by the Arizona Sonora Desert Museum at Tucson to visit their establishment and it is hoped that time will be available soon to accept.

Ray B. Ringenbach
Superintendent

Representing the military, Mr. Robert C. Keith, Major, U. S. Army, and Mr. John W. Smith, Mr. John Smith, Chief Architect, Washington Office, Mr. John W. Smith, and Charles E. Peterson, Architect, California National Institute are on October 5. Mr. John W. Smith, Chief Engineer, and Mr. John W. Smith, Chief Engineer, are on October 5. Apparently Charles E. Peterson, Chief Engineer, and Mr. John W. Smith, Chief Engineer, are on October 5. Apparently Charles E. Peterson, Chief Engineer, and Mr. John W. Smith, Chief Engineer, are on October 5.

Trawl. Trawl has shown some improvement since 1960. Sailport caught 1980 visitors in the area. This represents a decrease from 2100 in October last year. 1981 visitors went through the area while it was used as fish traps and via Sailport Trawl. 30 states, including the United States, were represented in the trawl.

Geistknoten und Denkfiktionen: Die Amerikaner haben's geschafft: Sie haben festgestellt, dass es keine Denkfiktionen gibt. Es gibt nur Geistknoten.

While almost daily afternoons while the balloons were down the ship
in constant need of dusting and polishing.

Annotations. Over 1000 of the National Service and Reporting for National Youth and Community were donated to the Library by the Mathematics Community Association. 41 volumes of Scores of American Planning Council reports and 27 E.O.N. bulletins were received from the Mathematics Dept.

Activity, John DeLoach, staff photographer to David Bell, received information and pictures for a Washington article.

2-1-44

W. R. A.
Los Angeles

October 25, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Tuzigoot

Subject: Report 1ml, October 1953, monthly narrative report

Weather. Warm days and cool nights. Maximum temperatures in the high 80's during the day and minimums in the high 40's at night. Winds in the afternoons and a trace of rain on October 19.

Official Visitors. Chief Clerk Crumley on an inspection trip Oct. 10. Mr. K. Saunders, Region three Office and Mr. Edwin Keuner of the Washington Office on October 22.

Reportworthy Visitors. Mr. Robert E. Smith, Region 1 Architect, and Mrs. Smith on Oct. 8. Mr. Dick Sutton, Chief Architect, Washington Office, Mrs. Sutton and Charles E. Peterson, Architect, Independence National Historic Park on October 9. Mr. Reese Smith, Park Engineer, and Mrs. Smith, Natches Trace Parkway also on October 9. Assistant District Park Superintendent and Mrs. Eugene Velzy, State of California Division of Beaches and Parks on Oct. 13.

Travel. Travel has slowed down considerably this month, Tuzigoot received 1966 visitors in 848 cars. This represents a decrease from 2197 in October last year. 1671 visitors went through the museum while it was open and 1966 visitors used the Tuzigoot trail. 38 states, Australia and Canada were represented in the travel.

Maintenance and Rehabilitation. The Superintendent's quarters have been repainted with hopes that he might soon arrive.

With almost daily afternoon winds the tailings pond keeps the museum in constant need of dusting and polishing.

Accessions. Steve Mather of the National Parks and Exploring Our National Parks and Monuments were donated to the library by the Southwestern Monuments Association. 21 volumes of Bureau of American Ethnology Annual Reports and 27 B.A.E. Bulletins were received from the Smithsonian Inst.

Publicity. Felix Zelenka, staff photographer for Trend Inc., aquired information and pictures for a forthcoming article.

Personnel. Acting Superintendent Pierson returned to Montezuma Castle September 28 and started hauling archaeological material to Globe. Messrs. Kohler and Pierson, Montezuma Castle, have helped keep Tusigoot open.

Miscellaneous. Visitor traffic through the ruins was halted briefly by a 30 inch rattlesnake on the trail the afternoon of October 20.

Topic: Superintendent, National Monument

Subject: Monthly Executive Report of Superintendent to the Board of National Monuments during the month of October 1953

Report Period:

Zorro A. Bradley
Zorro A. Bradley
Acting Superintendent

During the month of October the weather was very dry. The temperatures have been in the low 80s for the last few days. There has been a total of .24 inches of precipitation during the month but the weather has still been hot and arid. The amount of business in the surrounding area has increased the danger of fire.

Administration:

Administrative duties were carried out and all necessary reports were submitted. Most of our time has been spent in planning of work plans for the coming year. The Visitor Center and the current day museum. The construction of our building has not yet been started. The work of the month has been done by the Superintendent during the month.

Buildings:

Reparative work was started and anti-fray curtains. Plans for 23 signs were made and shipped by truck with Mr. Mack from Flagstaff. All of the equipment for the month has been received and only a few items were missing. This report will be completed by November 1. A weekly letter from Flagstaff has been coming with the Superintendent on this project and during the signs will be made and sent to the Superintendent. Most of the safety measures recommended by safety engineers have been completed. All yards have been plowed to the original site and all old stumps have been removed and the metal shield has been placed in the door to the museum room in position no. 2.

A small electric heater with thermostat control has been purchased for the next room to replace the large kerosene oil heater formerly used. It is believed that this will result in a considerable saving and also improve safety conditions.

Expenditures have been checked and other routine work

Other:

There were 112 visitors totaling 1,975 visits to the highest yet recorded for October. This is a record for this month for the National Monument. The amount of 1,975 visits.

Walnut Canyon National Monument
Flagstaff, Arizona

October 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon
National Monument during the Month of October, 1953

Weather Conditions

Crisp, cool nights with moderately warm days. Low temperatures have been in the low twenties for the last ten days. There has been a total of .34 inches of moisture during the month but the woods are still dry and an unpredicted number of hunters in the surrounding area has increased the danger of fire.

Administration

Administrative duties are current and all quarterly reports were submitted. Much of our time has been spent in patrols of both sides of the canyon during the Turkey season and the current deer season. No violations of our boundary has yet been noted. Twenty-two hours of annual leave was taken by the Superintendent during the month.

Maintenance

Automotive equipment was checked and anti-freeze installed. Signs for El Morro were crated and shipped by truck with Mr. Mack from Wupatki. All of the concrete signs for Wupatki have been poured and only a few hours work remains. This project will be completed by November 1. A Navajo laborer from Wupatki has been working with the Superintendent on this project and during the sign work we have hauled and cut wood for Wupatki. Most of the safety measures recommended by Safety engineer Ahern have been accomplished. All vents have been raised to the required six feet on our oil storage tanks and the metal shield has been placed on the door to the furnace room in residence no. 2.

A small electric heater with thermostatic control has been purchased for the rest rooms to replace the large duotherm oil heater formerly used. It is believed that this will result in a considerable saving and also improve safety conditions.

Campgrounds have been cleaned and minor repairs made

Travel

There were 1016 parties totalling 2,978 visitors which is again the highest yet recorded for October. This brings our travel year to date up to 35,744 visitors; an increase of 4,193 over our total 1952 figure.

Visitors

October 15...Mr. Daggett Harvey accompanied by Mr. J. Cunningham and Mr. H.C. Vorse of Grand Canyon
October 14...Dr. Keener, University of Arizona.

N.P.S. Visitors

September 28...Mr. and Mrs. Robert E. Smith and Son - Region 1
Mr. and Mrs E.S. Zimmer - Region 1
Landscape Architect R.A. Wilhem, Region 1, Great Smokies
Mr. and Mrs. T.B. Kiener, Region 1
October 1 Mr. Lloyd Pierson, Montezuma Castle
2 General Superintendent John M. Davis, Globe Arizona
9 Mr. Dick Sutton, Washington Office
Mr. Peterson, Independence National Historic Site
18 Chief Clerk Crumley, Globe Arizona

Special Activities

The re-dedication of the Pioneer Mother marker by the Daughters of the American Revolution was held at 2:00 P.M. on Saturday, October 3 with forty members and friends in attendance. Talks were made by Mrs. Theodore G. McKesson, State Regent, Mrs. Sydney Fritsche, State Historian and the main address by Dr. W.W. Tinsley, head of the Department of History at Arizona State College. Superintendent Guillet also addressed the group and later conducted them thru the Museum and presented an interpretive talk at the overlook.

Interpretation and Research

Sixty-three and one-half hours were spent in contacting 758 groups comprising 2,292 visitors.

Plants collected by Ranger Spangle and sent to Dr. Kearny for identification have been returned. We now have a total of 241 plants. Among those collected were 16 new plants representing two new families, four new genera, nine new species and one new variety.

Memorandum

To: General Superintendent

From: Superintendent, Wupatki

Subject: Report 1ml, Wupatki and Sunset Crater National
Monuments, October, 1953

Weather:

A dry and windy month, with only .09 inches of rainfall recorded at Wupatki. Except for a few overcast days, generally clear and bright with cool days and increasingly cold nights. Roads dusty.

Official Visitors:

Architect Kenneth Saunders, Region Three Office, on the 27th.
General Superintendent, John Davis, on October 6-9.
Engineer Tom Moran, Region Three Office, on the 8th.
Chief Clerk Darrell Crumley, Globe Office, on the 19th.
Architect Saunders accompanied by Edwin C. Bender, Chief of
Architectural Standards and Maintenance, Washington Office, on the 24th.

Maintenance, Rehabilitation and General Work:

With a heavy load of paper work, inspections and conferences regarding the road and other projects, and reduced man-power due to the extended illness of Maintenance man Bean, little beyond routine maintenance was accomplished. Considerable time was spent on plans for residence and research rehabilitation; on a survey of the Wupatki Ruins trail for minor relocations, regrading and surfacing; and on locating section corners necessary to surveying and marking Indian and Archaic Springs for claims to the water rights. Engineer George Johnston's assistance in the latter two projects was invaluable. George will probably be happy to get back home where he can relax on week-ends.

Roads and Trails:

The base course for the Wupatki Entrance road from Highway 89 to the Earth Cracks has been laid and compacted. A cinder pit was

Assistant Secretary

Subject:

A copy of the report of the Commissioner of the General Land Office, dated October 10, 1913, is herewith transmitted for your information. The report contains a detailed statement of the work of the Bureau during the year ending September 30, 1913.

Very respectfully,
Assistant Secretary

The report of the Commissioner of the General Land Office, dated October 10, 1913, is herewith transmitted for your information. The report contains a detailed statement of the work of the Bureau during the year ending September 30, 1913.

Very respectfully,
Assistant Secretary

The report of the Commissioner of the General Land Office, dated October 10, 1913, is herewith transmitted for your information. The report contains a detailed statement of the work of the Bureau during the year ending September 30, 1913.

Very respectfully,
Assistant Secretary

The report of the Commissioner of the General Land Office, dated October 10, 1913, is herewith transmitted for your information. The report contains a detailed statement of the work of the Bureau during the year ending September 30, 1913.

opened up just west of the highway and much of the cinder cover material was hauled and placed in windrows; some of it has been spread and is being compacted. Base material is being hauled and spread on the long tangent from the Earth Craters to the Doney's to bring that section up to grade. A rented grader and an additional dump truck from Canyon de Chelly are helping to speed operations. Because of the onset of cold weather, oiling the road may be difficult at this time. It is hoped that this operation can be put off until warmer weather in the spring when oiling can be done more effectively and continuously over the entire length of the new road.

The present entrance road has received little attention this month because of equipment breakdowns and the illness of Maintenance man Bean. In spite of this, it is holding up fairly well under seasonally heavy traffic. One of the washboard sections was bladed for a distance of about five miles after the rain on the 19th. The loop road continues in fair shape, though dusty. The Sunset Crater entrance road is in bad shape, with washboards and some bad holes developing. Our grader and loader are still in the Forest Service shop under repair.

Interpretive Service:

Contact service was maintained at Wupatki on a daily 8-12 and 1-5 schedule, with some contact during noon and off-hours. No contact service was available at Sunset Crater, but the register stand was kept supplied with trail guide booklets.

Travel: Travel at Wupatki hit a high again this month with 1267 visitors in 486 cars registered as against 1018 in 400 cars last year. Our figure may be a little low on this since no allowance was made for non-registrants. 141 visitors in 51 cars came in off-hours and so were not contacted.

Registrants at Sunset Crater numbered 1385 visitors in 573 cars. Adding 25% for non-registrants, the estimated travel would be 1731 visitors in 716 cars. This is considerably under last year's count, and may be highly inaccurate. Sunset Crater is usually about double the Wupatki total.

NPS Visitors: Mr. and Mrs. Jerry Miller, Ann Miller and Mrs. Kenny Saunders, Regional Office, on the 29th.

Mr. and Mrs. Tom Moran, Mr. and Mrs. Dick Sutton, Messrs. Peterson, Balch and Marsh, on the 8th.

Bill and Ann Cabot, Region Two, on the 10th.

Fred and Helen Peck, Casa Grande, with daughter Susie and Helen's sister Judy, on the 14th.

Foreign: Wupatki had visitors from Canada (provinces of British Columbia, Saskatchewan, Ontario and Quebec), South Africa, New Zealand, Norway, Belgium, Virgin Islands, Denmark and England.

Sunset Crater had visitors from Canada (provinces as above), Venezuela, Brazil, Germany, Latvia, Denmark and Japan.

Personnel: Maintenance man Joe Bean was in the hospital most of the month with a severe case of shingles. He is on the road to recovery and should be back on the job soon.

Superintendent Brewer was laid up for a day,

Water supply:

Heiser Spring is still doing well at better than 2000 gpd; Wupatki Spring is down to about 60 gpd.

General:

A large dead pine fell across the loop road about five miles from Sunset Crater. With the aid of the 4-wheel drive weapons carrier, it was broken in half and dragged off into the cinders.

October 30, 1953

Memorandum SWNM-53-78

To: Superintendents, Southwestern National Monuments
From: General Superintendent
Subject: Appeal on Quarters Appraisals

Reference is made to FO-70-53, concerning quarters appraisals. This memorandum provides for the appointment of an Appeals Committee to consider all appeals from the rental rates recently approved by the Director.

In order to apply as uniform a method as possible on appeals received from the field, I appointed a committee consisting of Assistant Superintendent Gastelum as Chairman, Chief Clerk Crumley, and Superintendent Brewer. The committee not only considered actual appeals from the field, but it conducted considerable research into the matter of rentals. A rather voluminous report was prepared illustrating the type of quarters furnished by other government agencies, the type of rentals available in the open market, and a detailed statement was prepared outlining the many factors that are present in the Southwestern National Monuments, in addition to isolation, which affect the value of quarters to the employees. The committee had to limit its appeal to those factors which are allowed under the quarters regulations, but which had not been given thorough study in the appraisal conducted last year.

We are attaching individual appeals made for each of the quarters in your area for your information. The various exhibits referred to could not be produced in sufficient quantity to mail each of you a copy. These exhibits included pictures of dwellings illustrating various conditions and we prepared only sufficient copies to transmit to the Regional Office and one copy for our general files. Whenever you are in this office, we will be glad to show you the entire file.

It should be understood that the attached forms cover only the request for adjustment of the rentals over the rates which were previously approved and do not constitute approved rates. When final action has been taken by the Regional Review Committee, you will be informed of adjustments, if any are made. However, since a number of you have formally appealed your rentals or have informally indicated to us that you are not satisfied with the high increase in rentals, I thought that this information would be of interest to you.

SUMMARY OF MONTHLY NARRATIVE REPORTS - SOUTHWESTERN NATIONAL MONUMENTS
NOVEMBER 1953

| | | <u>Page No.</u> |
|---|--|-----------------|
| <u>Weather</u> | Winter pays brief visit, but most of month pleasant. | 1 |
| <u>Special Activities</u> | Advisory Board meeting at Gila Pueblo; Mr. Cooke, superintendent Chiricahua attends meeting concerning telephone service. | 1-2 |
| <u>Official Visitors</u> | Advisory Board members, Assistant Director Lee, Regional Director Tillotson and other Regional Officials at Gila Pueblo, Wupatki, Sunset Crater, Tuzigoot and Montezuma Castle; Mr. Abram Cannon, Secretary's Office at Walnut Canyon and Wupatki. | 2 |
| <u>General Publicity</u> | Good coverage given Advisory Board meeting in Arizona press; Tumacacori again featured on Radio Station KCNA. | 2-3 |
| <u>Maintenance, Rehabilitation & General Work</u> | Campground improvements completed at El Morro; administration building at Walnut Canyon renovated. | 3-4 |
| <u>Roads and Trails</u> | Entrance road Montezuma Castle striped by State Highway Department. | 4 |
| <u>Interpretive Services</u> | Headquarters staff busy with preparation and revisions of two-fold and self-guiding leaflets; self-guide system popular at Tumacacori. | 4-5 |
| <u>Museum Activities and Exhibits</u> | Historical preservation unit to be established at Gila Pueblo; Tonto museum exhibits reworked. | 5-6 |
| <u>Research and Observation</u> | Two excellent manuscripts submitted by Messrs. Richert and Pierson; Plateau published paper by Ranger Spangle; corncobs from Tonto Ruin found to be an exceedingly valuable find. | 6 |

| | | <u>Page No.</u> |
|---|--|-----------------|
| <u>Loan</u>
<u>Library</u> | Good tape recording on early history of Chiricahua received. | 7 |
| <u>Southwestern</u>
<u>Mons. Association</u> | Editing of <u>Animals of the Southwest Deserts</u> completed. | 7 |
| <u>Ruins</u>
<u>Stabilization</u> | Five-year program for ruins stabilization prepared by Mr. King; Hubbard Mound stabilization continued during month. | 7 |
| <u>Travel</u> | "Winter" visitors arriving in Southern Arizona; travel for year 13 per cent above same period last year. | 7 |
| <u>Visitors</u> | Illustrator Janish and Mr. Janish at Gila Pueblo; former superintendent W. J. Winter visits Casa Grande; Senator Goldwater and Miss Grace Sparks inspect Coronado National Memorial. | 7-8 |
| <u>Wildlife</u>
<u>Management</u> | Animal census reports indicate coyote population being reduced rapidly; coati observed as far north as Walnut Canyon. | 8 |
| <u>Soil and</u>
<u>Moisture</u> | Willow cuttings planted at Canyon de Chelly; Second quarter work completed at Chaco Canyon. | 8 |
| <u>Personnel</u> | Superintendent Bean transferred to Chaco Canyon, effective November 7. | 9 |
| <u>Local News</u> | Daughter born to Piersons, Montezuma Castle; recreation association organized by headquarters employees. | 9 |
| | Question of the Month. | 9 |

December 4, 1953

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - November 1953

Weather

Winter paid a brief visit to most of the Southwestern National Monuments areas, bringing snow, hail, sleet, and cold. Generally, however, the month was pleasant with clear, cool days.

Special Activities

Headquarters--The outstanding event during the month was the meeting of the Advisory Board on National Parks, Historic Sites, Buildings and Monuments at Gila Pueblo on November 20. This group visited Wupatki and Sunset Crater on the 17th. On the 19 Mr. Davis met the members of the party at Tuzigoot and accompanied them on a tour of that area and Montezuma Castle and on into Globe. Accompanying the Advisory Board members were Assistant Director Lee, Regional Director Tillotson, Assistant Regional Director Miller, Regional Archeologist Reed, Mrs. Nettie Benson of the Director's Office and Miss Alvina Zimmerman, Secretary, Regional Office.

We were extremely pleased to act as hosts to this group and judge from comments made that the field trip and meeting were highly successful.

We were also pleased by the gracious welcome given these visitors by the Globe Chamber of Commerce, which presented one member of the Advisory Board and the Washington Office representatives with a copy of the beautiful Christmas issue of Arizona Highways and a year's subscription to this magazine.

Casa Grande--Mr. Gastelum visited the area to confer with Superintendent Dicknell and representatives of the Natural Gas Company of Arizona concerning the possibility of bringing a line into Casa Grande. He also discussed the seal coating of the entrance road.

Chiricahua--Mr. Saunders visited Chiricahua to go over the rehabilitation projects with Superintendent Cooke.

A meeting was held in Portal to discuss the closing of the telephone exchange by the Forest Service, which would leave the area and a number of permittees without telephone connections. It now appears that a cooperative may be formed to take over the exchange.

Southwestern National Monuments

Special Activities - continued

Navajo--The superintendent made three trips - one to Tuba City for automotive repairs; one to Flagstaff for equipment, and one to Canyon de Chelly. Inspections were made of Rainbow Bridge and Keet Seel.

At Rainbow Bridge, evidences of vandalism and negligence were found in the camp area. Food boxes and other structures had been pushed over or torn down and the camp was very dirty.

At Keet Seel one short wall was found to have fallen sometime between September 11 and November 1. The fallen wall is near room 79, but is not shown on any of our maps.

Wupatki--A special use permit was processed for the Arrowhead Uranium Mining Company of Grand Junction, Colorado. This concern is mining uranium across the river on the Navajo Reservation and hauling it over 6 miles of the Black Falls-Heiser Spring road.

Miss Bernice Loughlin, Public Health Nurse for the USIS, held a clinic for ailing Navajos in the east patio of Residence #1. Mrs. Brewer and Mrs. Burroughs assisted Miss Loughlin and served lunch to 23 women and children.

Official Visitors

Headquarters--Assistant Director Lee, Regional Director Tillotson, Assistant Regional Director Miller, Regional Architect Reed, Mrs. Benson, Washington Office, Miss Alvina Zimmerman, Regional Office, members of the Advisory Board; Architect Saunders.

Casa Grande--Naturalist King and Mrs. King; Assistant General Superintendent Gastellum; Regional Director Tillotson, Miss Zimmerman and Dr. Elegen, member of the Advisory Board.

Chiricahua--Architect Saunders.

El Morro--Archeologist Erik Reed.

Tonto--Architect Saunders.

Tumacacori--Naturalist King.

Tuzigoot--General Superintendent Davis and the visiting Advisory Board group, together with the accompanying Washington and Regional Office officials.

Walnut Canyon--General Superintendent Davis; Assistant General Superintendent Gastellum; Engineer Moran; Naturalist Dodge; Mr. Abram Cannon, Chief, Classification Division, Secretary's Office.

Wupatki--The Advisory Board group and accompanying NPS officials; Mr. Cannon; Messrs. Davis, Gastellum, Moran, and Architect Carter.

General Publicity

Headquarters--The visit of the Advisory Board members was well covered by articles in the Arizona Republic (Phoenix) and the Globe Arizona Record. Reporter Ben Avery of the Arizona Republic came to Gila Pueblo during the time the Advisory Board was here, and this newspaper published two articles concerning the group's visit to the parks and monuments in Arizona.

General Publicity - continued

Of general interest was an editorial in the November 2 issue of the Arizona Republic calling attention to an article in the October-November National Parks Magazine by Richard E. Klinck, regarding the preservation of Monument Valley. Mr. Klinck advocated the placing of this area under the National Park Service and the Republic urged that the people of Arizona and Utah support this proposal.

Chiricahua--The November issue of Arizona Guide devoted a two-page article to Chiricahua. Among the interesting facts(!!) mentioned was that geologists have figured that, at the present rate of erosion, the big balanced rock will go tumbling down the mountainside in 601,940 A.D.

Gran Quivira--An article in the Lincoln County News publicized the monument's features and travel figures. The Pipeliners, publication of the El Paso Natural Gas Company, mentioned Gran Quivira in a 6-page story entitled "The Big Expansion," and the National Park Service received favorable publicity in a 7-page article in the same issue concerning the archeological survey being conducted in connection with a pipe line being constructed just north of the boundary of Gran Quivira.

Tumacacori--Press releases were carried in the Tucson and Nogales papers concerning the installation of the new self-guide system.

Radio Station KCNA made a tape recording of the highlights of the mission and transcribed it on the KNOW YOUR ARIZONA program on November 19. Mr. Jay Miller of the station was the inquirer and Ranger Bullard supplied the answers. Several weeks ago this same program presented an informal trip through the museum.

Tuzigoot--The Arizona Republic carried a short article with several pictures of Tuzigoot.

Maintenance, Rehabilitation and General Work

Headquarters--The natural gas line into Gila Pueblo was completed and the new furnace installed. The offices and quarters are now quite warm and comfortable.

A walkway was constructed in front of the building, leading to the General Superintendent's office. Space was cleared of brush to provide larger parking area just beyond the walk.

Rehabilitation work on windows, roofs, etc., continued throughout the month.

Aztec Ruins--The Great Kiva roof was repaired temporarily with asbestos fiber roof coating. An Electrolux refrigerator was installed in the ranger apartment, and a hot water heater moved from an outside shed into the superintendent's house. A fence was placed around the Hubbard Mound.

El Morro--The campground-picnic road and area were completed. Tables, benches and fireplaces were placed in permanent locations and gravel placed around them. Superintendent McNeil reports that the area is now so nice appearing that he anticipates heavy usage next season.

Maintenance, Rehabilitation and General Work - continued

Montezuma Castle--Superintendent Cook reports a number of jobs accomplished which improve the appearance of the area and make better working conditions. All road and trail signs were given a linseed oil treatment as were the ladders to the Castle A ruin.

Tuzigoot--All window frames and outside woodwork are being soaked in linseed oil and stain, as recommended by Architect Saunders. Three days were spent clearing tumbleweeds from the trails and rooms in the ruin.

Walnut Canyon--The administration building was given a complete renovating by the superintendent. Work continued on the Island Trail, with two flights of stairs being repaired and capped with flagstone.

Wupatki--Repairs and improvements to the diesel tank for the Heiser area Onan light plant were accomplished. Rehabilitation of the superintendent's residence was also accomplished. Surveys for spring locations and for trail locations were made, mostly "on their own time," by Engineer Johnston and Ranger Burroughs.

Roads and Trails

Arches--Stormy weather cut all wash crossings and considerable time was required to repair them. Because of heavy storm damage during the past few months and also the increased equipment rental rates, more money than anticipated would be needed has been spent during the first half of the year. Accordingly, some shaling and graveling jobs planned for the winter will have to be abandoned.

Canyon de Chelly--Monument roads were in fair shape. However, at this time of the year, Navajo wood haulers give the roads rough usage, tearing them up considerably.

Chaco Canyon--The road bed of the new road from Pueblo Bonito to Residences 6 and 7 has settled as the result of recent moisture so that it can now be used. Several loads of gravel were spread on the road crossing Chaco Wash to the new headquarters and several more placed in holes along the main road.

Montezuma Castle--The one-mile of paved entrance road to the Castle was striped by the Arizona Highway Department. Sections of the Montezuma Well loop trail were repaired.

Wupatki--Work on the road project in this area was continued throughout the month.

Interpretive Services

Headquarters--Material for a revised edition of the Arches two-fold leaflet was prepared and submitted by Mr. Arnberger. He also obtained photographs of Wupatki Ruin for use in the forthcoming reprint of the Wupatki two-fold leaflet, and reviewed the section dealing with Southwestern National Monuments in Mr. Dorr Yeager's, Your Western National Parks.

Interpretive Services - continued

Headquarters - continued

A numbered memorandum with illustrations describing the Layman's Herbarium recently developed at Montezuma Castle was prepared. We were pleased to receive favorable comment from Regional Naturalist Dodge and a request for additional copies of the memorandum for general distribution throughout Region Three.

The first draft of a guide leaflet for the White House Trail at Canyon de Chelly was started, and the guide booklet for Cove Trail at Arches was revised and sent to the printer.

Mr. Arnberger presented a talk on the Southwestern National Monuments at a noon meeting of the Miami Rotary Club with about 50 in attendance. He also presented an illustrated talk on the National Monuments of Northeastern Arizona and Southeastern Utah before the Y-Men's Club in Miami.

Mr. Castellum talked to both the Globe Lions and Rotary Clubs during the month. His general theme was the federal government, its employees, and fiscal problems. After his talk to the Lions Club, the local postmaster and a visiting postal inspector complimented him by saying his was the best organized talk they had heard on the subject.

El Morro--Superintendent McNeil presented an illustrated talk to about 50 Ramah school students.

Montezuma Castle--Ranger Sutton gave a talk called "Bird of the Verde Valley" using Kodachrome slides and recordings of bird calls to a biological seminar at Arizona State College, Flagstaff.

Tumacacori--With the installation of the Self guide system on November 5, a major change in Tumacacori's interpretive program took place. Visitor reaction to date has been enthusiastic. They all seem to agree that not having to wait for scheduled tours, freedom to take the facts and the trip at their leisure and individual pace are major advantages.

Three special guide trips were made: one with members of the Arizona Archeological and Historical Society; and two with 48 members of the American Railroad Association.

Walnut Canyon--Ranger Spangle presented a talk on "Conservation in the National Park Service" to the Science Seminar at Arizona State College.

Museum Activities and Exhibits

Headquarters--Mr. Arnberger spent some time during the month putting the naturalists' workshop in order for eventual use in preparing exhibits, displays, and other interpretive devices. A work bench was completed and a shadow board made for the accessories for the shopsmith power tool.

We were pleased to receive word that a two-person historical preservation unit will be set up at Gila Pueblo within the near future. One of the main jobs of this unit will be the handling of the large collections of prehistoric material now being assembled here.

Museum Activities and Exhibits - continued

Casa Grande--The preliminary draft of a museum prospectus was received from Casa Grande. This was prepared largely by Archeologist Peck and will receive review and suggestions from this office before it is typed in final form.

Montezuma Castle--The wax figures for the Castle model were received from the Washington Office. These were installed and greatly improve the model display. A new window glass was installed at the model to replace the old one which was faulty.

Tonto--The museum exhibits have been reworked to make them more attractive. An indication that the exhibits are enjoyed was noted during the period when the burial exhibits were temporarily removed. Many visitors returned with friends to whom they wished to show these exhibits and were disappointed when they could not see them. A new case is being built to show the best burial--one that has enough artifacts and material to make it of interpretive value.

Research and Observation

Headquarters--Naturalist King reports that we have received an excellent paper by Mr. Richert detailing the clearance work and profile trenching done at the Citadel parking area at Wupatki. Also, we were pleased to note that Plateau, in its October issue, published a paper entitled "A Revised Check List of the Flora of Walnut Canyon National Monument," by Ranger Paul F. Spangle. This paper is a significant contribution to our knowledge of the flora of Walnut Canyon, and a fine job has been done by Mr. Spangle in assembling material for the monument herbarium.

Coronado National Memorial--During the monthly inspection trip to this area, Ranger Bullard noted the following wildlife: 5 peccary; 2 Sonora White-tailed fawns; 4 ravens; 6 Arizona jays; 5 Western or Mexican bluebirds; and numerous bush-tits. He also noted that the grasses in the area are in fine condition, and with good rainfall predicts a splendid floral display next spring.

Gran Quivira--Superintendent Howell spent a day inspecting a large Indian ruin 16 miles west of Gran Quivira. This was discovered by a deer hunter who thought he might have found the "lost mission."

Montezuma Castle--A well-written paper by Mr. Pierson, entitled "A Brief History of Camp Verde" was submitted for approval for publishing.

A collection of corncobs found by Mr. Pierson during excavation of the Tonto ruin was sent to Dr. Mangelsdorf of the Botanical Museum of Harvard for identification. Apparently we have something quite rare. Dr. Mangelsdorf wrote to Mr. Pierson as follows: "I must tell you at once that so far as one important aspect of the maize problem is concerned you have hit a veritable jackpot."

Loan Library

An excellent recording of an interview between Superintendent Cook of Chiricahua and Mrs. Lillian Riggs, noted pioneer in that area, has been received. The original tape will be recorded on a wax record. This is one of the best recordings we have received and is a valuable addition to our file of material on early history of our areas.

The acquisition of seven new bookcase sections enabled us to shift the bound volumes so there is working space all through the library.

Accessions for the month totaled 124.

Southwestern Monuments Association

The Association is paying an artist's time for ten days to finish drawings for the Saguaro exhibits.

The editing of Animals of the Southwest Deserts was completed by Mr. King on his own time.

Ruins Stabilization

At Tumacacori Mr. King discussed the problem of how to protect the outlying adobe structures of the convento portion of the mission.

Mr. King also spent some time working up the proposed five-year program for ruins stabilization, stressing particularly the necessity of (1) accomplishing the necessary laboratory research on the vegetal remains from Upper Ruin at Tonto, and (2) setting aside a considerable sum in fiscal year 1957 to initiate research in an attempt to find a satisfactory technique for stabilizing earthen features and structures.

Mr. Vivian spent the month at Aztec Ruins in the comprehensive stabilization of the Hubbard Ruin. He reports that drainage and other factors are going to make this site one of the more difficult to maintain.

Travel

This month we can again report an increase over the corresponding figure a year ago. There were 23,386 visitors compared to 21,238 in November 1952, or a 10 per cent increase. Total for the travel year to date is 441,593, a 13 per cent gain over the corresponding period a year ago.

The "winter" visitors are beginning to arrive in Southern Arizona. According to at least one superintendent, these visitors seem to have more time to spend and indicate greater interest in the features the areas have to offer than do the usual summertime vacationists.

Visitors

Headquarters--Superintendent Bicknell; Architect Saunders; Superintendent Preston, Yosemite; Tour Leader John Barr, Carlsbad Caverns; Mr. and Mrs. Harry Linder, Carlsbad Caverns; Mr. and Mrs. Carl F. Janish.

Visitors - continued

Antec Ruins--Governor and Mrs. Lew Jordon, Idaho;
Jim Kewamwewa, Museum of Northern Arizona.

Casa Grande--Mr. and Mrs. W. J. Winter, St. Augustine, Florida (Mr. Winter was superintendent at Casa Grande during the 30's); Dr. and Mrs. Seibel, Amarillo, Texas (Regional Director of the Bureau of Mines, and Chairman of the Southwest Field Committee): Assistant Superintendent and Mrs. Shevlin and Naturalist Christianson, Grand Canyon.

Coronado National Memorial--Senator Barry Goldwater of Arizona visited this area, accompanied by Miss Grace Sparkes, who reports that Mr. Goldwater is interested in seeing the area developed and will attempt to obtain funds for this purpose.

Gran Quivira--Archeologist Fenenga and Cummings, El Paso Natural Gas Company.

Navajo--A group of Near East agricultural and political leaders accompanied by Mr. E. R. Smith, Bureau of Land Management.

Tonto--Richard Van Gelder, Museum of Natural History, University of Illinois; Dr. and Mrs. Seibel.

Tuzigoot--Mr. Van Gelder; Engineer Bradley, father of Acting Superintendent Bradley.

Tumacacori--Mr. George Boundey; Mr. W. J. Winter; Messrs. East and Seibel, Bureau of Mines.

Walnut Canyon--Mr. and Mrs. Malcomb Farmer, Museum of Northern Arizona; Mr. and Mrs. W. C. Brillhart, BFR, Grand Canyon.

Wupatki--Miss Bernice Loughlin; Mr. and Mrs. W. W. Wilson.

Wildlife Management

The animal census reports submitted by the areas were compiled by Mr. Arnberger and submitted to the Regional Office. The reports indicate that the coyote is rapidly being reduced in the Southwest, no doubt due to the extensive poisoning and predator control campaigns of recent years. The prairie dog, which has been a vanishing species, seems to be holding its own at Chaco Canyon and Canyon de Chelly. Walnut Canyon reports three observations of coati, a northern extension of range for this interesting Mexico animal.

Soil and Moisture Conservation

Canyon de Chelly--Mr. McConville's report on the soil and moisture conservation program follows: "For the past two weeks willow cuttings have been planted in the canyon, mainly in the 1-year-old jetties. Cuttings were taken from the heavy stands at White House and Anasazi Ruins. A new pond was completed this month along the old Muebo. Although not in the monument proper, it is on the Chinle watershed."

Chaco Canyon--The soil and moisture crew completed the construction of trestle and cable jetties planned for the second quarter. Two thousand, two hundred and forty-three (2,243) feet of cable were placed during the quarter. Runoff from precipitation in October and the first of November showed that the jetties constructed at that time were functioning as desired.

Personnel

Chaco Canyon--Superintendent Glen T. Bean's promotion and transfer from Great Sand Dunes to Chaco Canyon, effective on November 7. We are happy to welcome the Bean family back into our organization.

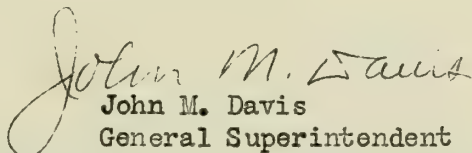

Local News

A recreation association was organized late in October with all employees at Gila Pueblo and their families as members. Officers selected were Mrs. Gail Arnberger, President; Mrs. Virginia Stoker, Vice-President; Mr. Clarence Davis, Secretary-Treasurer. One of the first activities was an Anniversary Party to celebrate our first year of operation at Gila Pueblo. The party was a most enjoyable affair, and it is hoped to make it an annual event.

Montezuma Castle--A daughter, Janet Louise, was born to the Lloyd Fiersons on November 15.

Question of the Month:

From Casa Grande: A visitor asked, "Is the word hokum derived from Hohokam?"

John M. Davis
General Superintendent

Advisory Board in session in the Gila Pueblo Council Room. Standing L. to R. Mssrs. Tillotson, Lee, Reed. Seated L. to R. Mssrs. Miller, Bannister, Grant, Blegan, Knopf, Anthony, Brew, Huber, Wagner, and Woodbury. Mrs. Benson and Miss Zimmerman.

ARCHES NATIONAL MONUMENT
MOAB, UTAH

November 23, 1953

Memorandum

To: General Superintendent

From: Superintendent, Arches

Subject: Monthly Narrative Report for November, 1953

WEATHER: Unusually stormy weather prevailed during the month and a two day snow storm laid down three inches of snow in the monument on the 13th, and 14th. Courthouse Wash ran again and at many of the smaller washes the crossings were also washed out.

TRAVEL: Inspite of stormy weather and the road conditions which go with it, travel this month shows an increase of 15% over the same period last year, with 1397 people entering the area in 437 cars.

INTERPRETIVE SERVICE: At Headquarters 37 people were contacted who were not going into the monument or who were taking the trip to Courthouse Towers. This number amounts to 10 % of the total contacts at this station. Due, I suppose, to the cold weather, only 287 people signed the register at the Wayside Exhibit. We estimate that not quite this many used the Cove Nature Trail. Ranger Morris remodeled the Cove Trail coin deposit box by installing a heavy metal welded box which he bolted firmly to the frame of the stand. We hope this will discourage those cheap needy souls who have broken into the wooden box three times. He also placed instructions on the use of the booklet which may cut down our loss of leaflets.

ROADS: All wash crossings were out by the last storm and two days were spent in repairing them. Due todamaging storms in the last four months and a substantial increase in the equipment rental rates on our D-12 Patrol & Dump Truck, more money has been expended on the 211 account than was budgeted for this $\frac{1}{2}$ year. In order to have a working balance for next spring our planned shaling and graveling job for the winter will have to be abandoned. Maintenanceman Winbourn will work on jobs where equipment operation is not so heavy for the next four months.

State Route #93 was bladed by the County once this month; however one week later the heavy storm made a mess of it again. Maintenanceman Winbourn has made it passable with pick & shovel fill-ins.

UTILITIES: The 10 KW light plant is now back at the Moab Garage for a re-overhaul job to remedy the oil leak which developed soon after the First overhaul. Satisfactory mechanical work is a rare thing in Moab. We are still hoping that Santa Claus will give us a light Christmas.

NATIONAL PARK SERVICE
FACILITY NATURAL RESOURCES
WASH., D.C.

November 11, 1951

Memorandum

To: General Superintendent

From: Superintendent, National Park Service

Subject: Monthly Narrative Report for November, 1951

Weather: Generally stormy weather prevailed during the month and a few days were fair. This was due to the fact that the weather was in the hands of the weather service and the weather was in the hands of the weather service and the weather was in the hands of the weather service.

Traffic: Traffic of heavy trucks and the road conditions were in the hands of the weather service and the weather was in the hands of the weather service and the weather was in the hands of the weather service.

Administrative: In November, 1951, the weather was in the hands of the weather service and the weather was in the hands of the weather service and the weather was in the hands of the weather service.

Remarks: All work was completed and the weather was in the hands of the weather service and the weather was in the hands of the weather service and the weather was in the hands of the weather service.

Weather: The weather was in the hands of the weather service and the weather was in the hands of the weather service and the weather was in the hands of the weather service.

All outside hydrants, tanks and water lines, subject to freezing have been drained and all heating units were inspected and installed. Fire extinguishers, both in buildings and equipment, were tested and refilled.

AUTOMOTIVE EQUIPMENT: All equipment was serviced for the winter. USDI-31792, Didge Pickup was surveyed and put up for sale to the highest bidder. Lewis T. McKinney was the successful bidder.

NPS VISITORS: Superintendent and Mrs Homer Hastings, Aztec Ruins, Nat'l. Monument
Superintendent and Mrs Charles Kelly, Capitol Reef Nat'l. Monument
Supervisory Park Ranger Earl Worthington and family, Mesa Verde National Park.

LOCAL ACTIVITIES: The Moab Chamber of Commerce will be reorganized on December 9. With the terrific influx of Uranium and Oil people an efficient organization of this type is certainly needed. The Moab Lions Club has again undertaken the project of signing the outlying roads in the vicinity of Moab. This will be a great help to the tourist in finding his way to Dead Horse Point, etc., through the maze of AEC Access roads.

NATURAL BRIDGES: The area was closed for the season on October 30 and all equipment transported to Arches for storage. Jack Stanley, who was employed as Track Driver, was also terminated on this date. Ranger Morris constructed and installed a new register stand which contains a map and instructions on how to see the Natural Bridges. I regret to report that the sign job was not completed and will have to wait until next spring.

Aztec Ruins National Monument

November 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Aztec Ruins

Subject: Monthly Narrative Report, November, 1953.

Weather: For the past month temperatures have constantly dropped with minimums running below freezing at night. Rain, snow, hail, and sleet have fallen at various times. The minimum temperature was 13° above zero and the maximum was 72°.

Administration: On November 12 Supt. and Mrs. Hastings returned from 30 days annual leave which was their first real vacation. In California the Earl Jacksons were visited at Pinnacles National Monument and a visit was made to Muir Woods. Return was via Oregon, Washington, Idaho, and Utah and in the latter state Arches National Monument was visited very briefly.

Travel: A total of 165 cars brought 1141 visitors. Of this number 181 visited the museum only while all the others went through the ruins. This brings the year's travel total to 25,717. This is an increase of 66 visitors over the same month last year and an increase of 226 for the travel (calendar) year.

Maintenance and Improvements: Asbestos fiber roof coating was used to temporarily repair the roof over the Great Kiva.

An Electrolux refrigerator was transferred from El Morro and picked up in Gallup. This has been installed in the ranger's apartment.

The water heater for the superintendent's residence was removed from a small shed built on the outside of the house and properly installed inside.

A section of boundary fence was constructed on the north side of the Hubbard Mound which had not been fenced since this was acquired by the Government.

Protection: All fire extinguishers on the monument were properly supported on hooks placed low enough so the extinguisher can be removed by a female fire fighter.

Interpretation: Work was begun on the easel displays for the self-guiding trail

THE HISTORY OF THE

REIGN OF

CHARLES THE FIRST

BY JOHN BURNET

IN TWO VOLUMES

LONDON, Printed by J. Streater, at the Sign of the Gun, in St. Dunstons Church-yard, 1680.

THE first of these two Volumes contains the History of the Life and Reign of CHARLES THE FIRST, from his Birth to his Execution. The second Volume contains the History of the same Prince, from his Execution to his Restoration.

Excavation and Stabilization: Work under the direction of archeologists Vivian and Mathews continued throughout the month on the Hubbard Mound. The following is quoted from Mr. Vivian's report to Naturalist King.

"To date excavation and wall debris has been removed on the west, north, and east sides down to the approximate original ground level. The cobblestone foundations extend two feet below this level. The circumference has been trenched on these sides and the trench backfilled with small cobbles and gravel in an attempt to provide some drainage at the base of the wall and also to cut off the sub-surface moisture.

".....exposed walls of approximately half the site have been stabilized and this with the removal of wall debris and trenching brings the work about three quarters of the way toward completion."

Ranger McCrary has been taking Kodachrome slides as the work progressed.

National Park Service Visitors:

October 24 Mr. and Mrs. H. M. Koehler, Regional Office, Region Three
November 23 Administrative Assistant Steve Leding and family
from Grand Canyon

Special Visitors

Governor and Mrs. Lew Jordan of Idaho
Jim Newmytewe, Museum of Northern Arizona

Homer F. Hastings
Superintendent

Canyon de Chelly National Monument
Chinle, Arizona

November 26, 1953

Memorandum

TO: General Superintendent

FROM: Acting Superintendent, Canyon de Chelly

Subject: Monthly Narrative Report for November, 1953

Travel: There were 268 visitors in 90 cars this month. This figure exceeds by far the number of visitors for any previous November. Due to the cold weather there were only 26 campers. The current calendar travel year to date shows a total of 10,564 visitor days, an increase of about 23% over the 1952 travel year.

Weather: High - low temperature ranged from 75 to 15. There was .42 of an inch of precipitation recorded for this month. Most of the precipitation was in the form of snow, totaling $2\frac{1}{2}$ inches, which melted slowly and soaked into the ground.

Roads: All roads in the area are in fairly good shape. The over-look road to Spider Rock is still too wet to blaze but is passable without difficulty. Navajo wood haulers tear up the roads pretty badly at this time of year.

Noteworthy Visitors: On Nov. 4th a group of Near East Agriculture and Political leaders under Dr. E. E. Smith SM spent several hours at the monument.

RR Visitors: Nov. 9th. Sup't. and Mrs. Aubuchon from Navajo. Sup't. Aubuchon visited the area prior to his taking over as Sup't. Canyon de Chelly about Dec. 1st.

Maintenance: General maintenance in preparation for cold weather. Outside water lines drained and secured. The new rest rooms were cleaned and closed for the winter.

Personal: Maintenance man David Gorman was on sick leave from Nov. 8th through the 21st.

Interpretive Devices: We have received many favorable comments by visitors on the new wayside exhibits at White House ruins over-look.

Capulin Mountain NATIONAL MONUMENT

November 28, 1953,

Capulin New Mexico, ,19

Memorandum

To: The General Superintendent,
Southwestern National Monuments,
National Park Service,
Globe Arizona,

From: Homer J. Farr, Superintendent,
Capulin Mt Nat'l Monument,

Subject: Monthly Narrative Report,

Visitors: Approximately six hundred visitors to the old Volcano this month, bringing the total to 31050 this year,

Weather: Plenty of weather this month, The first part of the month we had rain and snow all day and all night making about two inches of moisture, then again about the middle of the month we had a five inch snow, almost one half inch moisture, again about the 20th, we had six inches of snow a little over half inch of precipitation, making just three inches for the month, except for a very few days we have had very nice warm weather,

Flora and Fauna ;

We have lost about half dozen of our buck deer by straying outside the park during hunting season we have plenty left, (about eight or nine left), Close watch has prevented any poaching in the park this year, All our vegetation is in splendid condition since the moisture,

Special Visitors,

None,

Road Project,

Road Maintenance and Rock retaining wall work began Nov 23, and is going along according the schedule, Color scheme is being carried out by matching the color of the cinders with same color of Rock wall, I am very proud of the work so far,

Information Pamphlets,

None passed out this month, Now on hand 2000.

Very Respectfully

Homer J. Farr

November 25, 1953

Memorandum

To: General Superintendent, SNW
 From: Superintendent, Casa Grande
 Subject: Monthly Narrative Report for November, 1953

General: "Winter" is upon us. Archeologist Peck found it hard to realize that it is now necessary to wear a coat in the ruin.

A statewide survey published in the October Arizona Business and Economic Review shows southern Arizona leading the northern part of the state in general growth. According to the same survey, the economic picture in Pinal County is difficult to assess because of the unstable water supply and heavy dependence on cotton.

The "winter type" visitor, with more time to spend and more interest in the ruin, is beginning to appear.

Weather: November was ushered in with a bad dust storm on the 8th. Otherwise, weather was clear and colder.

| | |
|---------------|------------|
| High Maximum | 84 |
| Low | 55 |
| High Minimum | 62 |
| Low | 22 |
| Precipitation | .10 inches |

Interpretive Service: A total of 192 tours through the ruin were made with an attendance of 1730 visitors. The average tour lasted 46.09 minutes. 1960 visitors looked through the museum but did not go to the ruin.

1997, 1998, 1999, 2000, 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010, 2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022, 2023, 2024, 2025, 2026, 2027, 2028, 2029, 2030, 2031, 2032, 2033, 2034, 2035, 2036, 2037, 2038, 2039, 2040, 2041, 2042, 2043, 2044, 2045, 2046, 2047, 2048, 2049, 2050, 2051, 2052, 2053, 2054, 2055, 2056, 2057, 2058, 2059, 2060, 2061, 2062, 2063, 2064, 2065, 2066, 2067, 2068, 2069, 2070, 2071, 2072, 2073, 2074, 2075, 2076, 2077, 2078, 2079, 2080, 2081, 2082, 2083, 2084, 2085, 2086, 2087, 2088, 2089, 2090, 2091, 2092, 2093, 2094, 2095, 2096, 2097, 2098, 2099, 2100, 2101, 2102, 2103, 2104, 2105, 2106, 2107, 2108, 2109, 2110, 2111, 2112, 2113, 2114, 2115, 2116, 2117, 2118, 2119, 2120, 2121, 2122, 2123, 2124, 2125, 2126, 2127, 2128, 2129, 2130, 2131, 2132, 2133, 2134, 2135, 2136, 2137, 2138, 2139, 2140, 2141, 2142, 2143, 2144, 2145, 2146, 2147, 2148, 2149, 2150, 2151, 2152, 2153, 2154, 2155, 2156, 2157, 2158, 2159, 2160, 2161, 2162, 2163, 2164, 2165, 2166, 2167, 2168, 2169, 2170, 2171, 2172, 2173, 2174, 2175, 2176, 2177, 2178, 2179, 2180, 2181, 2182, 2183, 2184, 2185, 2186, 2187, 2188, 2189, 2190, 2191, 2192, 2193, 2194, 2195, 2196, 2197, 2198, 2199, 2200, 2201, 2202, 2203, 2204, 2205, 2206, 2207, 2208, 2209, 2210, 2211, 2212, 2213, 2214, 2215, 2216, 2217, 2218, 2219, 2220, 2221, 2222, 2223, 2224, 2225, 2226, 2227, 2228, 2229, 2230, 2231, 2232, 2233, 2234, 2235, 2236, 2237, 2238, 2239, 2240, 2241, 2242, 2243, 2244, 2245, 2246, 2247, 2248, 2249, 2250, 2251, 2252, 2253, 2254, 2255, 2256, 2257, 2258, 2259, 2260, 2261, 2262, 2263, 2264, 2265, 2266, 2267, 2268, 2269, 2270, 2271, 2272, 2273, 2274, 2275, 2276, 2277, 2278, 2279, 2280, 2281, 2282, 2283, 2284, 2285, 2286, 2287, 2288, 2289, 2290, 2291, 2292, 2293, 2294, 2295, 2296, 2297, 2298, 2299, 2300, 2301, 2302, 2303, 2304, 2305, 2306, 2307, 2308, 2309, 2310, 2311, 2312, 2313, 2314, 2315, 2316, 2317, 2318, 2319, 2320, 2321, 2322, 2323, 2324, 2325, 2326, 2327, 2328, 2329, 2330, 2331, 2332, 2333, 2334, 2335, 2336, 2337, 2338, 2339, 2340, 2341, 2342, 2343, 2344, 2345, 2346, 2347, 2348, 2349, 2350, 2351, 2352, 2353, 2354, 2355, 2356, 2357, 2358, 2359, 2360, 2361, 2362, 2363, 2364, 2365, 2366, 2367, 2368, 2369, 2370, 2371, 2372, 2373, 2374, 2375, 2376, 2377, 2378, 2379, 2380, 2381, 2382, 2383, 2384, 2385, 2386, 2387, 2388, 2389, 2390, 2391, 2392, 2393, 2394, 2395, 2396, 2397, 2398, 2399, 2400, 2401, 2402, 2403, 2404, 2405, 2406, 2407, 2408, 2409, 2410, 2411, 2412, 2413, 2414, 2415, 2416, 2417, 2418, 2419, 2420, 2421, 2422, 2423, 2424, 2425, 2426, 2427, 2428, 2429, 2430, 2431, 2432, 2433, 2434, 2435, 2436, 2437, 2438, 2439, 2440, 2441, 2442, 2443, 2444, 2445, 2446, 2447, 2448, 2449, 2450, 2451, 2452, 2453, 2454, 2455, 2456, 2457, 2458, 2459, 2460, 2461, 2462, 2463, 2464, 2465, 2466, 2467, 2468, 2469, 2470, 2471, 2472, 2473, 2474, 2475, 2476, 2477, 2478, 2479, 2480, 2481, 2482, 2483, 2484, 2485, 2486, 2487, 2488, 2489, 2490, 2491, 2492, 2493, 2494, 2495, 2496, 2497, 2498, 2499, 2500, 2501, 2502, 2503, 2504, 2505, 2506, 2507, 2508, 2509, 2510, 2511, 2512, 2513, 2514, 2515, 2516, 2517, 2518, 2519, 2520, 2521, 2522, 2523, 2524, 2525, 2526, 2527, 2528, 2529, 2530, 2531, 2532, 2533, 2534, 2535, 2536, 2537, 2538, 2539, 2540, 2541, 2542, 2543, 2544, 2545, 2546, 2547, 2548, 2549, 2550, 2551, 2552, 2553, 2554, 2555, 2556, 2557, 2558, 2559, 2560, 2561, 2562, 2563, 2564, 2565, 2566, 2567, 2568, 2569, 2570, 2571, 2572, 2573, 2574, 2575, 2576, 2577, 2578, 2579, 2580, 2581, 2582, 2583, 2584, 2585, 2586, 2587, 2588, 2589, 2590, 2591, 2592, 2593, 2594, 2595, 2596, 2597, 2598, 2599, 2600, 2601, 2602, 2603, 2604, 2605, 2606, 2607, 2608, 2609, 2610, 2611, 2612, 2613, 2614, 2615, 2616, 2617, 2618, 2619, 2620, 2621, 2622, 2623, 2624, 2625, 2626, 2627, 2628, 2629, 2630, 2631, 2632, 2633, 2634, 2635, 2636, 2637, 2638, 2639, 2640, 2641, 2642, 2643, 2644, 2645, 2646, 2647, 2648, 2649, 2650, 2651, 2652, 2653, 2654, 2655, 2656, 2657, 2658, 2659, 2660, 2661, 2662, 2663, 2664, 2665, 2666, 2667, 2668, 2669, 2670, 2671, 2672, 2673, 2674, 2675, 2676, 2677, 2678, 26

1900

1. The first of these is the fact that the majority of the population of the United States is now living in urban areas. This is a result of the process of urbanization, which has been going on since the beginning of the 20th century. The second is the fact that the majority of the population is now living in the middle class. This is a result of the process of social mobility, which has been going on since the beginning of the 20th century. The third is the fact that the majority of the population is now living in the white middle class. This is a result of the process of racial integration, which has been going on since the beginning of the 20th century.

the entire part of the scale in general, resulting in the same effect, the same thing is that there is still a small amount of the material which is left and may be used for the same purpose.

more interest in the war, in fact, in the war.

[illegible]

1. The first part of the document is a letter from the President of the United States to the Congress, dated January 3, 1862. It is a long and detailed letter, covering many topics, including the state of the Union, the progress of the war, and the administration of the government. It is a very important document, as it provides a clear and concise summary of the President's views and policies at that time.

Chairman of the Southwest Field Committee.

Administration and Protection: Eight requests for infor-
mation were received and duly answered. The Adamsville site remains
undisturbed.

Maintenance: Quarters #1 developed a leak. The roof was
checked and patched where necessary. The museum cooler was cleaned
and repainted. All stoves were set up. Other than this Mr. Lopez
was occupied in routine cleanup and maintenance.

Library: Our library was greatly enhanced by the following
donations:

Smithsonian Institution: 26th A.R., B.A.E., containing Russell's
work on the Pima. Bulletin #15, B.A.E.

Carnegie Institution: Publications 422, 477, 506, 533, Catalogue
of Publications and Depositories of the Institution.

Amerind Foundation: Complete set of reports to date, in-
cluding Charles DiPeso's work on the Sobaipuri.

CHACO CANYON NATIONAL MONUMENT

Bloomfield, New Mexico

November 29, 1953

Memorandum

To: General Superintendent

From: Superintendent, Chaco Canyon

Subject: Superintendent's monthly narrative report for November, 1953

Weather

Beautiful sunny weather for the first part of the month favored travel for the result of a 112% increase over November of 1952. Cold sunny weather after November 17 then cut off travel and put a stop to outside work such as Soil and Moisture Control.

Maximum temperature - 72° on November 7
Minimum temperature - 11° on November 20, 22
Precipitation - 0.58 inches on 4 days

General

Glen Bean entered on duty as superintendent on November 7 (actual date of arrival - November 10). Art White's rejoicing over our arrival was short lived, however, as we were gone to Denver from the 15th to the 22nd for medical attention for our daughter, Laurie Ruth.

Returning to the Southwestern National Monuments Organization is like "coming home" even though we were strays for only a few months.

Special emphasis should be placed on the fine job Art White has done as acting superintendent during the last 9 months.

Travel

A significant increase in travel of 112% over that of November 1952 occurred this month with 206 people in 65 cars visiting the area. This swells the annual travel to 3,818 visitors as compared with 3,328 for the same period last year.

Soil and Moisture Control

On November 2 the soil and moisture crew completed the construction of tree and cable jetties planned for the second quarter and was laid off.

2,243 feet of cable with trees and tamarisk were placed this quarter. Runoff from precipitation in October and the first part of November showed that the jetties constructed at that time were functioning as desired.

Maintenance

The many routine maintenance jobs continually required in monuments with limited personnel occupied a great deal of the time of the superintendent and ranger this month. Among these tasks was the change of valves on the propane systems at Residences 6 and 7 made to correct one of the discrepancies listed by Mr. Ahern's safety inspection last summer.

Roads and Trails

The road bed of the new road from Pueblo Bonito to Residences 6 and 7 has settled enough as a result of recent moisture that are now able to use it.

Several loads of gravel were spread on the road crossing Chaco Wash to the new residences and several more loads were placed in holes along the main road. One load of rock was hauled to Pueblo Bonito for use next spring in building steps on the trail near Threatening Rock.

Ranger Service

Art White took Glen Bean on a patrol trip to Kin Miniola and Kin Klizhin to acquaint him with the sites, to check possible "pot hunting", and to check the boundary fence. No evidence of vandalism was found.

Visitors

National Park Service visitors to Chaco Canyon this month were Mr. and Mrs. Steve Leding and family of Grand Canyon.

Other notable visitors for the month were Dr. J. Röder, Kublenz, Germany; Mr. and Mrs. I. Allen Graffham, Tucker Tower Museum, Ardmore, Oklahoma; and Mr. Harvey Caplin on a return trip to take more pictures for the New Mexico State Tourist Bureau.

Chiricahua National Monument
Dos Cabezas, Arizona

November 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather. Most of the past month has been warm and pleasant but the last week has given us some high winds, two light snow storms and some extra cold weather for November. As this is being written the weather is again mild and warm.

Inspections. Architect Saunders spent November 1 at Chiricahua and went over the various rehabilitation projects with the superintendent. It is hoped that work on these can be started soon.

General Publicity. In the November issue of the "Arizona Guide" Chiricahua's publicity was increased from a few lines to a two page article. Two dozen copies were received from the publishers. Among other things they mention that geologists have figured that, at the present rate of erosion, the Big Balanced Rock will be tumbling down the mountain side in 601,740 A. D. Naturally we wish the geologists would be more accurate and tell us the month and day of the month. We might want to plan on being there to witness the tragedy.

Approaches to Monument. The road over the mountain from Portal and Hodge was closed by snow for a few days but is now passable again. Other roads are in quite good condition. We are thankful for the light snows and snows which settled the dust on the dirt roads.

Cooperating Agencies. The Forest Service has announced its intention of getting out of the telephone business at Portal. This would leave Chiricahua and a number of Forest Service and Park Service telephone permittees without outside telephone connections. A meeting was held at Portal on November 17 to discuss the subject. There now seems to be a possibility that a cooperative organization will be formed to take over the central.

Interpretive Service. 896 visitors visited the museum in 254 parties. 2 conducted hikes were done on Echo Canyon. An estimated

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL BUREAU OF SURVEY

265 made use of the self-guided natural history trails. Interpretation slowed down some this month due to only one man being on the job much of the time.

Travel. For the first time since May Chiricahua has shown an increase in travel. Travel for this November was 1212 which is 55 ahead of November, 1952. We are 121 ahead for the calendar year to date with a total of 12, 809. While our travel lead over last year is not worth mentioning the campground use shows a good increase. 3120 extra visitor days have been recorded for the campground as compared with 1577 for it is the last year. These overnight or long-term visitors together with the Sunday and weekday picnickers add up to quite a lot of janitor work.

Ranger Service. Patrol of the monument to keep deer hunters off was continued until the end of white tail deer season. No violations were discovered this year.

NATIONAL PARK SERVICE

Tumacacori National Monument,
Tumacacori, Arizona

November 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Tumacacori

Subject: Monthly Narrative Report for Coronado National
Memorial for November 1953

The monthly inspection trip to Coronado was made by Ranger Wm Bullard, Jr., on November 19. He reports the following:

Roads were in fine shape. The hunting season just ended and expecting vandalism we were pleased to note that Memorial signs were not perforated. Memorial neighbors reported, however, that hundreds of cars passed through the area and that some hunting occurred within our boundaries. The report that a deer had been killed by an automobile within the boundaries was traced down and it was found that this occurrence took place quite some distance from our lands.

Senator Barry Goldwater, Dem., Ariz., visited the memorial with Miss Grace Sparkes on November 3. She reported that he said to her that he was interested in seeing the area developed and would attempt to seek funds.

Wildlife observation included five peccary on SW slope of Coronado Peak, within 150 yards of boundary fence, two Sonora White tailed fawns, four ravens, six Arizona jays, numerous bush-tits, and five Western or Mexican bluebirds.

Grasses in the area are in excellent condition. Evidently any cattle in the vicinity do attempt to graze the slopes. With a normal winters rainfall we should be able to look forward to a wonderful flower display this Spring.

I took the opportunity to scout some of the South boundary starting from Coronado Peak and walking to the International line. It took an hour to walk from the 102 I.B. marker to Montezuma Pass. There is a trail, evidently

UNITED STATES

NATIONAL PARK SERVICE

WASHINGTON, D. C.
November 1, 1911

Special Agent in Charge

Dear Sir:

Reference is made to your letter of October 26, 1911, in which you request information regarding the status of the various National Parks in the Department of the Interior.

The following information is being furnished to you for your information:

There are at present 15 National Parks in the Department of the Interior. The following are the names of the parks and the date when they were established:

1. Yellowstone National Park, established in 1872.

2. Sequoia National Park, established in 1890.

3. Redwood National Park, established in 1892.

4. Mount McKinley National Park, established in 1897.

5. Glacier National Park, established in 1902.

6. Grand Teton National Park, established in 1906.

7. Mammoth National Park, established in 1908.

8. Mount St. Helens National Park, established in 1909.

9. Mount Rainier National Park, established in 1899.

10. Mount Hood National Park, established in 1902.

11. Mount Adams National Park, established in 1902.

12. Mount Baker National Park, established in 1902.

13. Mount Shasta National Park, established in 1902.

14. Mount Lassen National Park, established in 1902.

15. Mount Whitney National Park, established in 1902.

The following are the names of the parks and the date when they were established:

1. Yellowstone National Park, established in 1872.

2. Sequoia National Park, established in 1890.

made by Border Patrolmen that runs from the 102 Marker to the Pass.

I note that we are in the possession of one building on the area. It will probably serve as the first Ranger's residence. The rent appraisal committee might be figuring out what they want for it so that a man can move into at any time. The building lies 75 yards west of the 102 boundary marker and 20 feet north of the fence. It is constructed of sheet iron and is 5x8 feet. The roof has been covered with straw and has a stove pipe. Utilities are already furnished, a pile of wood is stacked outside. Possibly this hut has had something to do with smuggling for it is hidden in a little draw under a tree and cannot be seen until one is almost upon it.

Ranger Bullard spent about 14 hours on this patrol.

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

This time, for the third successive month, we can chalk up an increase in visitors over a year ago. We had 182 visitors who came in 62 automobiles. 164 of these visitors took a trip around the Rock in 31 parties; 17 persons listened to an orientation talk; 22 hardy souls went over the top of the Rock in 6 parties and 4 still harder souls camped overnight.

The warmest was 69 degrees and the coldest was a minus three degrees Fahrenheit. After our nice balmy fall, winter struck with a vengeance on November 18. So my snow shoveling, interrupted by the short summer, has begun again. We had two or three snowstorms strike one right after the other, so the shovel got several good workouts!

The approach roads for the first part of the month were very rough, due to the lack of moisture. The last part, they are covered with snow and are usually icy. The Monument road has remained in good shape.

The campground-picnic road and area was completed this month. The tables, benches and fireplaces were placed permanently and gravel placed around them. The whole thing is so nice looking that word has passed among the neighbors, and we can expect a good deal of local usage next summer.

Although the nights were not sub-zero before the snow, they were fairly chilly. One night, two visitors stayed in the campground. They spent the next day around the Rock, up on top, etc., and stayed the next night in the campground. They must have been related to polar bears!

A talk, illustrated with slides, was given to some of the Parish School students - about 50 in number.

Inventory was taken and only a few minor items came up missing. A general cleanup of the entire area and the garage was effected shortly before

the snow struck. The rest room remains open, but is checked every morning. I have my fingers crossed with all this sub-zero weather.

The only National Park Service visitor was Erik Reed who came by on the 22nd for an all too short visit.

Very respectfully,
Chief of Park

Irving McNeil

Irving McNeil, Jr.
Superintendent

Enclosure

Enclosure 1 - Report of the Superintendent of the National Park Service, dated January 22, 1944, regarding the condition of the rest room at the El Morro National Monument. The report states that the rest room is in good condition and that the snow has not yet melted. The Superintendent also reports that the rest room is open and that the snow has not yet melted.

Enclosure 2

Enclosure 2 - Report of the Superintendent of the National Park Service, dated January 22, 1944, regarding the condition of the rest room at the El Morro National Monument. The report states that the rest room is in good condition and that the snow has not yet melted. The Superintendent also reports that the rest room is open and that the snow has not yet melted.

Enclosure 3

Enclosure 3 - Report of the Superintendent of the National Park Service, dated January 22, 1944, regarding the condition of the rest room at the El Morro National Monument. The report states that the rest room is in good condition and that the snow has not yet melted. The Superintendent also reports that the rest room is open and that the snow has not yet melted.

The National Park Service has received a report from the Superintendent of the National Park Service, dated January 22, 1944, regarding the condition of the rest room at the El Morro National Monument. The report states that the rest room is in good condition and that the snow has not yet melted. The Superintendent also reports that the rest room is open and that the snow has not yet melted.

On the same date, the Superintendent of the National Park Service, dated January 22, 1944, regarding the condition of the rest room at the El Morro National Monument. The report states that the rest room is in good condition and that the snow has not yet melted. The Superintendent also reports that the rest room is open and that the snow has not yet melted.

Enclosure 4

The report from the Superintendent of the National Park Service, dated January 22, 1944, regarding the condition of the rest room at the El Morro National Monument. The report states that the rest room is in good condition and that the snow has not yet melted. The Superintendent also reports that the rest room is open and that the snow has not yet melted.

The new edition of the book is now ready for sale. It is a revised and enlarged edition of the first edition, and contains all the latest information on the subject.

The book is published by the American Book Company, New York, and is available in both paper and cloth editions. The price is \$2.50 per volume.

For further information, please write to the American Book Company, New York.

Yours very truly,
The American Book Company

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Gran Quivira National Monument
Gran Quivira, New Mexico

November 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report - November 1953

Weather

Clear weather predominated; there were three cloudy days, eight partly cloudy and twenty clear days. Temperatures: Maximum, 70°; Minimum 15°; Mean 44°. Precipitation occurred on three days totaling .49" with snowfall totaling 2" on the 19th. and 21st. Total precipitation to date for the year totals 11.35 inches; this compares with 12.22" in 1952 and 10.63 during 1951 to the same date. High winds occurred on six days of the month.

Inspections

Dr. Erik K. Reed, Archeologist, Region Three and Archeologist Albert H. Schroeder made an inspection of the area November 5.

General Publicity

The Lincoln County News, Carrizozo, New Mexico featured an article publicizing Gran Quivira National Monument; the features of the area were described and travel statistics were included.

The National Park Service received favorable publicity in the Autumn issue of El Paso Natural Gas Company's quarterly magazine, THE PIPELINER, in which was featured a 7-page illustrated story of the archeological survey in connection with the construction of the pipe line which passes just north of Gran Quivira National Monument.

In the same issue, another 6-page story, "The Big Expansion", mentions Gran Quivira National Monument.

Approaches to the Monument

The approach road from Mountainair is in good condition, having been maintained by the State Highway crew. Due to several hundred loads of pipe and other heavy supplies, I had anticipated that this road would be torn-up and in very bad condition, but it held up remarkably well. The roads to Carrizozo and Corona have had some maintenance, but are in rather poor condition.

Gran Quivira National Monument

UNITED STATES
DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE
Grand Canyon National Monument
Grand Canyon, New Mexico

November 14, 1934

Memorandum

To: Chief of Department

From: Superintendent, Grand Canyon

Subject: Grand Canyon National Monument - November 1934

Summary

Grand Canyon National Monument, New Mexico, was established by Act of Congress, March 3, 1909, and is situated in the Grand Canyon of the Colorado River. The monument is bounded on the north by the Colorado River, on the south by the Grand Canyon of the Colorado River, on the east by the Grand Canyon of the Colorado River, and on the west by the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is bounded on the north by the Colorado River, on the south by the Grand Canyon of the Colorado River, on the east by the Grand Canyon of the Colorado River, and on the west by the Grand Canyon of the Colorado River.

Recommendations

It is recommended that the monument be placed under the management of the National Park Service, and that the monument be placed under the management of the National Park Service.

General Remarks

The Grand Canyon of the Colorado River, New Mexico, is a natural wonder of the world. It is a deep, narrow, and winding gorge, and is situated in the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is bounded on the north by the Colorado River, on the south by the Grand Canyon of the Colorado River, on the east by the Grand Canyon of the Colorado River, and on the west by the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is bounded on the north by the Colorado River, on the south by the Grand Canyon of the Colorado River, on the east by the Grand Canyon of the Colorado River, and on the west by the Grand Canyon of the Colorado River.

Recommendations in the Summary

The monument is a natural wonder of the world, and it is recommended that it be placed under the management of the National Park Service. The monument is situated in the Grand Canyon of the Colorado River, and is bounded on the north by the Colorado River, on the south by the Grand Canyon of the Colorado River, on the east by the Grand Canyon of the Colorado River, and on the west by the Grand Canyon of the Colorado River. The monument is situated in the Grand Canyon of the Colorado River, and is bounded on the north by the Colorado River, on the south by the Grand Canyon of the Colorado River, on the east by the Grand Canyon of the Colorado River, and on the west by the Grand Canyon of the Colorado River.

RECEIVED
NOV 15 1934

Maintenance

Various parts of the water system were winterized to prevent freezing. The cooling systems of the trucks were also winterized. More weeds have been removed from the vicinity of the Missions and along the roadsides; general maintenance of the road and trails has been carried on. Roads and trails are in good condition. "No Hunting" signs were posted along the Monument boundaries. Four loads of water were hauled from Mountainair. All work programs are current. Lois Kite worked a total of four days during the month. The Superintendent was on annual leave during two days of the month.

Research

The El Paso Natural Gas pipeline ditching crew cut through the side of a ~~box~~collon pit house about 1 1/2 miles northwest of here; Archeologists Fenenga and Cummings did the excavating of it. They stated that there is indication of a number of other pit houses in the immediate vicinity. They tentatively set the date of the pithouse at between 600 and 900 A.D. A few potsherds and stone artifacts were found.

One day was spent with Max Wells, inspecting a large Indian ruin, 16 miles West of Gran Quivira. It appears that the pueblo was constructed surrounding a courtyard approximately 80 feet square. The material used was stone. Many lesser ruins are evident in the area. Mr. Wells discovered this ruin while deer hunting. His first thought was that it might be the "lost mission".

Interpretative Service

A total of 307 people in 62 parties were conducted through the Mission ruins. A total of 185 people made use of the self-guiding facility. Museum contacts totaled 451 people.

Increase in Travel

Travel continued to hold up remarkably well, due to the prevailing nice fall weather and to visitation to the monument by pipeline workers and their families. A total of 492 people in 135 cars visited the monument. Total visitation for the year to date is 4,781 people in 1,325 vehicles. The picnic grounds was used by 54 persons during the month.

Visitors

Dr. Erik K. Reed, Region Three Archeologist, Nov. 5
Mr. Albert H. Schroeder, Archeologist, Reg. 3, Nov. 5
Archeologists Franklin Fenenga and Thomas Cummings,
El Paso Natural Gas Co. October 30.
State Game Warden Dunlap, Belin, New Mexico, Nov. 15
School group of 9 from Ruidosa, New Mexico, Nov. 9.

Protection

"No Hunting" signs were posted on the boundaries prior to the hunting season and daily patrols were maintained during the season. Several deer were known to be ranging in the monument throughout the hunting season.

Miscellaneous

Two rattlesnakes were disposed of; the latter one on Nov. 13. Two coyotes were sighted within the monument. One covey of 19 quail are seen regularly.

Speaking of pipelines, here is a quotation (for what it is worth) from a recent newspaper: "More dirt has been moved in burying pipelines than in digging all the canals ever dug".

The pipeline past the area has been welded, lowered and covered.

Montezuma Castle National Monument
Camp Verde, Arizona

November 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Montezuma Castle
Subject: Monthly Narrative Report, November 1953

Weather: November was clear and warm up to the 19th. when the first storm of the season arrived. Since then temperatures have dropped to a low of 19 degrees with only .24 inches of moisture recorded.

Travel: Travel was very good the first part of the month but has fallen off this past week as a result of colder weather. 2,514 visitors in 838 cars were counted at the Castle and 1,121 visitors in 378 cars went to the Well. This totals 3,635 visitors to the area and is an increase over November of last year.

Interpretation: A talk on Birds of the Verde Valley was presented by Myron Sutton to a biological seminar at Flagstaff (Arizona State College) on the evening of the 18th. The program was illustrated by Kodachrome slides and accompanied by recordings of bird calls.

Visitors: Of major importance to the monument was the arrival November 19th. of the National Park Advisory Board. This group was accompanied by Mr. Lee and Mrs. Benson of the Washington Office, Messrs. Tillotson, Miller and Reid and Miss Zimmerman of the Regional Office, Dr. Bryant from Grand Canyon, and Mr. Davis of the Globe Office.

Maintenance and Rehabilitation: Considerable work of this type was accomplished this month. The Castle museum was partly rewired and the power saw located in the basement placed on a separate circuit. This job was in accordance with Mr. Ahern's recent recommendation. Also, on the museum windows were installed new screens and all outside wood work repainted. Trash cans, flame cabinets, garage doors, the oil house, and weather station were given a coat of paint.

A new pit latrine was constructed in shop at Cottonwood and delivered to the picnic area at Montezuma Well.

At the Well, the residence bathroom and kitchen were painted and some new cabinet doors installed.

1. The first part of the document discusses the importance of maintaining accurate records of all transactions and the role of the accounting department in ensuring the integrity of the financial data.

2. It is noted that the accounting department is responsible for the preparation and presentation of financial statements to the management and the board of directors.

3. The document further states that the accounting department must adhere to the highest standards of professional conduct and maintain the confidentiality of all financial information.

4. It is also mentioned that the accounting department should work closely with other departments to ensure that all financial transactions are properly recorded and reported.

5. The document concludes by emphasizing the need for continuous improvement and the importance of staying up-to-date with the latest accounting practices and regulations.

Page 2:

Roads and Trails: The Arizona Highway Department road crew striped the one mile of paved entrance road to the Castle. This is a nice job and no doubt has improved traffic service from the safety standpoint.

Also, at the Castle, all road and trail signs were given a linseed oil treatment, as the ladders to the Castle A ruin.

Repair of sections of the Montezuma Well Loop Trail was accomplished during the month.

Work was commenced at the Well on November 13 th. to replace the old wood cattleguard with one made from railroad iron. Cold weather and some precipitation has delayed this project.

Museum display: The wax figures for the Castle model were received from the Washington Office. These were installed immediately and have certainly improved the model display. The figures show excellent workmanship and are complete in every detail. In connection with this job, a new window glass was also installed at the model; this replaced the old glass which was faulty.

The flower display (Layman's herbarium) was improved some by placing a few flowers on the wall just above the display proper. This tends to call attention to this section of the museum.

Research & Observation: "A brief History of Camp Verde" by Lloyd Pierson was submitted for publishing approval. This is a well written and concise paper which took considerable research work to assemble. ~~the information.~~

A collection of corncobs recently mailed from here to the Botanical Museum of Harvard University proved to be quite rare. Mr. Mangelsdorf of the University in his reply to Pierson states, "I must tell you at once that so far as one important aspect of the maize problem is concerned you have hit a veritable jackpot."

Sutton continued work this month on an interpretive checklist of birds of the Verde Valley. He also noted two new records for birds at the Well; Anthony's Green Heron and Florida Gallinule

Local Items: Born to Mr. & Mrs. Pierson on November 15, was a fine baby girl, Janet Louise. All concerned are getting along nicely.

John O. Cook
Superintendent

The first of these is the fact that the present law is

XXXXXXXXXXXXXXXXXXXX
Navajo National Monument
Tonalea, Arizona

November 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Navajo

Subject: Monthly Narrative Report for November, 1953

Travel: There were only 32 visitors this month compared to 70 during November of last year. The travel for this travel year has already more than doubled any previous travel year. Our annual travel to date is 2148.

Weather: Nice fall weather has prevailed most of the month. Beginning November 17th, though, we had a touch of winter with slightly more than 6 inches of snow. The low temperature during the month was 9 degrees and the high was 67. There was 6.43 inches of moisture recorded.

Inspections: A trip was made to Rainbow Bridge to inspect the area and to collect the annual travel figures. There were 826 persons who visited the bridge and of these 714 arrived by boat, 67 by horse back and 45 hiked.

The Echo Camp area at Rainbow Bridge was found to be very dirty. Evidence of vandalism and negligence was quite apparent in the camp area. The toilet, food boxes and other structures were torn down or pushed over. The trail to the bridge via Rainbow Lodge was in very poor condition. The trail on the north side of Navajo Mountain was in good shape.

An inspection trip was made to Keet Seel and one short wall was found to have fallen sometime between September 11 and November 1st. The fallen wall is near room 79 but is not shown on any of our maps.

Roads and Trails: The roads are at present in good condition. There has been enough moisture to pack the sand and yet not enough to make any of the roads slick.

General: 6 radiators - light plants and vehicles - were flushed and readied for winter operation. One trip to Tuba City for automotive repairs, one to Flagstaff for equipment and one to Canyon de Chelly.

John A. Aubachon, Superintendent

Tonto National Monument
Flagstaff, Arizona

November 30, 1953

Memorandum

To: General Superintendent

From: General Superintendent, Tonto

Subject: Report 141, Tonto, November, 1953.

Weather. Cold spell November 18 to 24, a cold "n" rain, otherwise dry and warm for the rest of the month, with fine days at the end of the month.

Travel. 2197 visitors for November, compares with 1253 for the same month last year. About a 76% gain. Partly local, partly out-of-state increases. Over 36,000 for the year, running at rate of about 32% increase.

Visitors, Nov. Special. Mrs. Inez Miller, Mrs. Helen, Mrs. E. R. Tom Oster, Phoenix.
Architect Saunders, Santa Fe, accompanied by Mrs. Saunders and Miss Harriet Lassiter.
Richard Van Gelder, Museum of Natural History, University of Illinois and Guy Schuller, Arizona State Game and Fish Commission.
Mr. & Mrs. C. L. Kiehl, Amarillo, Texas. Mr. Kiehl is Regional Director of the Bureau of Mines for this region.
Major John Farr, Chaco Canyon, Carlsbad, New Mexico.
Mr. George Cavanaugh, progressive national banker from Tucson.

Perquimé. Perquimé Society, Glendale, was employed as trail laborer e.o.d. 407. A.

Construction. Moderately good progress was made on houses and so forth station, with about 3 days lost due to union troubles. With good luck, the job should be completed in December.

Interpretation. In order to improve the interpretative value of our museum, partly limited by space and only three exhibit cases, all of the exhibits were completely re-arranged. Pastel colors were used to help make the cases more attractive and to get away from the usually white interiors. While the job is not completed the major changes have been made and the three cases are now in use. Perquimé and the limited the relief installation and most of the work on this project,

RECEIVED
Southwestern
St. Louis, Mo.

UNION STATES

though both of us worked a couple of lien days and several long evenings on the cases. Considerably more can be done, if we get time to do it.

The temporary removal of one burial exhibit and/or removal of another, has resulted in cries of anguish from many of our visitors who return often, and want to show the skeleton to their friends. We are building a case to exhibit the best burial as it has enough art facts and material with it to be of interactive value.

General. A little lost time this month due to illness. Very small but necessary maintenance & housekeeping jobs had to be done, which require the usual work after hours and on lien days. The great increase in visitors took up most of the regular work days, and museum improvement work was carried on simultaneously with talking with visitors.

It finally became apparent that commercial power here could be delayed enough so that we would have to depend on fuel oil heat for some time yet, so considerable time was required to get stoves from storage in Cila Pueblo, get them in shape and install. Stoves were installed in the new houses to have them warm enough for installation of asphalt floor tile soon.

Office work has accumulated beyond the usual amount, as the personal time ordinarily used for that was required by other work, and partly because we were slowed down by illness for a few days, and had to take quite a few evenings off.

Charles C. Sharp
Superintendent

and because the right side of the brain is larger in the left hemisphere, the right side of the brain is larger in the left hemisphere.

THE UNIVERSITY OF CHICAGO

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE,
Tumacacori National Monument,
Tumacacori, Arizona.

November 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for November

Weather. Winter has arrived in Southern Arizona. Temperatures varied but a minimum of 19 degrees was reached on the 21st. Maximum temperature reading was 87 degrees. Five days of overcast were recorded but precipitation was limited to .06 of an inch. Rains were reported South of us and the Northern area received more precipitation than our immediate vicinity.

Maintenance. Rout ine maintenance was performed on buildings and grounds all month. As time would allow, we worked on the project of burning the weeds, long overgrown, from the area. The island at the parking area has been cleared of weeds and trash. With the advent of winter our patio garden has reached the deciduous stage and the removal of leaves and transplanting has been started.

Publicity. Tucson and Nogales newspapers carried our press release in prominence notifying of the installation of the new self-guide system.

Radio Station KCNA made a tape recording of the highlights of the mission and transcribed it on the KNOW YOUR ARIZONA program of November 19. Mr. Jay Miller, KCNA, was the inquirer and Ranger Bullard supplied the answers. Several weeks ago this same radio program presented it's listening public with an informal trip through our museum.

Interpretation. A change of major importance in Tumacacori's method of interpretation was made this month with the installation of the self guide system on November 5. With a series of numbered stakes at points of interest and a trail booklet of explanation, all visitors may now guide themselves through the mission area.

We can report that visitor reaction to date has been enthusiastic. In course of improvement we have solicited opinions from almost every group who has used the booklet. Their comments range from "good" "excellent" to "this beats listening to a guide"! They all seem to be agreed that the major advantage

is the no waiting for scheduled tours, and the freedom to take the facts and the trip at their leisure and individual pace. No adverse comment received as yet.

Dale King spent several days with us and provided help in inaugurating the system and giving us the benefit of his observations. We appreciate his coming down.

Three special guide trips were made with groups who visited. Seventeen members of the Arizona Archeological and Historical Society on November 8 and two trips with 48 members of the American Railroad Association on November 11 were conducted.

Travel. We report a travel decrease for this month of 17 percent. We do not believe that bona fide travel is decreasing but that the loss is merely the method of computing visitation due to the change in fee system.

Some interesting statistics:

| | November | |
|---|-------------|-------------|
| | <u>1952</u> | <u>1953</u> |
| Paid admissions to area | 906 | 2387 |
| Number of Visitors who went through mission | 906 | 2255 |
| Number of visitors who used museum (free in 1952) | 3430 | 2928 |
| Number of visitors who declined to pay entrance fee or used area w/o charge while Ranger not on duty. | | |
| Actual count | | 354 |

Personnel. Several days of annual and sick leave were taken by Maintenanceman Deubler. He underwent treatment by a physician in Tucson for an injury to his back. Mr. Deubler is back on the job but must wear a back brace.

Appointed seasonal Ranger for this year was Mr. Franklin Smith of Pueblo, Colorado. He will report for duty on December 2.

Visitors, NPS and others.

Tuzigoot Nat'l. Mon.

November 26, 1953

Memorandum

To: General Superintendent

From: Acting Superintendent, Tuzigoot

Subject: Report 1ml, November 1953, Monthly Narrative Report.

Weather. Generally clear, bright and warm. Maximum temperatures in the 80's, minimum temperatures in the mid-40's with a trace of snow in the valley on the 20th.

Official Visitors. On November 19th, General Superintendent Davis arrived at Tuzigoot to meet Assistant Director Lee, Regional Director Tillotson, Assistant Regional Director Miller, Regional Archaeologist Reed, Superintendent Bryant of Grand Canyon and members of the Advisory Board.

N. P. S. Visitors. October 27- Maintenance man and Mrs. Gunnard Johnson from Theodore Roosevelt National Memorial Park, North Dakota.

October 31- Archaeologist and Mrs. Reichart from Chaco Canyon.

November 4- Engineer Willard Bradley from the Regional Office, Administrative Officer and Mrs. Charles F. Hill from Yosemite National Park, and Ranger and Mrs. Myron Sutton from Montezuma Well.

Reportworthy Visitors. November 11- Mr. Richard G. VanGelder from the Museum of Natural History at the University of Ill.

November 14- 16 members of Troop 13, Boy Scouts of America from Prescott, Arizona.

Travel. After a drop in October, travel has again picked up with 1552 visitors in 649 cars. This represents an increase of 111 over 1441 visitors in November last year. 1202 persons went through the museum while it was open and 1552 visitors used the Tuzigoot trail. 36 States, Hawaii, Canada, England and Sweden were represented in the travel.

Maintenance and Rehabilitation. Following Mr. K. Saunders' recommendation, all window frames and outside woodwork are being soaked in Linseed Oil and stain. On November 13th, the approach road was bladed by the county road crew. Three days were spent in clearing Tumbleweeds from along the trails and from rooms in the ruin with hoe and weed burner.

Publicity. A short article with several pictures by Gordon Shepard appeared in the Arizona Republic on October 25th.

Personnel. Superintendent Cook, Archaeologist Pierson and Ranger Sutton from Montezuma Castle helped keep the monument open during the month.

Walnut Canyon National Monument
Flagstaff, Arizona

November 23, 1933

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon National Monument during November, 1933

Weather Conditions

The first snow in any amount came in the form of rain and snow on the 17th and 18th. A total of 1.62 inches was measured here while Flagstaff measured a little over two inches from the storm. Temperatures dropped to around 10 degrees above zero for several nights. Otherwise the days have been moderately warm and pleasant.

Administration

The annual inventory of equipment was taken and submitted. All administrative work is up to date and with a let-up in travel we have had time to get caught up on some of the less important phases.

Maintenance

The administrative building was given a complete remodeling by the Superintendent. Windows and woodwork was varnished and the interior floors given a good scrubbing as well as wax and polish.

Work was continued on the "Island Trail" and two flights of stairs were repaired and capped with flagstone. Weekly checks have been maintained on our water system. The blasting from the El Paso Natural Gas pipeline construction was felt at monument headquarters and has caused some concern about our water line.

Inspection and routine repair has also been made to the Telephone line and service the last three months has been satisfactory.

Travel

Travel continues heavy for this time of year with 1,581 visitors arriving in 567 cars. Last year we had 1,345. Our travel year to date shows an increase of over 19 percent in spite of our approach roads having been in a deplorable condition for the last three months.

Interpretive Services

A total of 42 1/2 hours was spent in contact time with 1,490 visitors in 463 groups.

Ranger Spangle presented a talk on "The National Park Service" to the Science Seminar at A.S.U. on November 1.

SECRET

1. The first part of the document is a summary of the work done during the last year. It covers the period from January to December 1952.

2. The second part of the document is a detailed report on the work done during the last year.

3. The third part of the document is a list of the work done during the last year. It includes a list of the work done during the last year, a list of the work done during the last year, and a list of the work done during the last year.

4. The fourth part of the document is a list of the work done during the last year. It includes a list of the work done during the last year, a list of the work done during the last year, and a list of the work done during the last year.

5. The fifth part of the document is a list of the work done during the last year. It includes a list of the work done during the last year, a list of the work done during the last year, and a list of the work done during the last year.

Walnut Canyon National Monument
Flagstaff, Arizona

November 15, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon
National Monument during November, 1953

Weather Conditions

The first moisture in any amount came in the form of rain and snow on the 18th and 19th. A total of 1.62 inches was measured here while Flagstaff measured a little over two inches from the storm. Temperatures dropped to around 10 degrees above zero for several nights. Otherwise the days have been moderately warm and pleasant.

Administration

The annual inventory of equipment was taken and submitted. All administrative work is up to date and with a let-up in travel we have had time to get caught up on some of the less important phases.

Maintenance

The administrative building was given a complete renovating by the Superintendent. Windows and woodwork was washed and the museum floors given a good scrubbing as well as wax and polish.

Work was continued on the "Island Trail" and two flights of stairs were repaired and capped with flagstone. Weekly checks have been maintained on our water system. The blasting from the El Paso Natural Gas pipeline construction was felt at monument headquarters and has caused some concern about our water line.

Inspection and routine repair has also been made to the Telephone line and service the last three months has been satisfactory.

Travel

Travel continues heavy for this time of year with 1,581 visitors arriving in 567 cars. Last year we had 1,243. Our travel year to date shows an increase of over 19 percent in spite of our approach roads having been in a deplorable condition for the last three months.

Interpretive Services

A total of 42½ hours was spent in contact time with 1,290 visitors in 463 groups.

Ranger Spengle presented a talk on "Conservation in the National Park Service" to the Science Seminar at A.S.C. on November 4.

3. The third part of the report deals with the specific details of the country's development during this period. It is a very interesting and informative study of the country's development during this period.

4. The fourth part of the report deals with the specific details of the country's development during this period. It is a very interesting and informative study of the country's development during this period.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Flagstaff, Arizona

November 27, 1953

Memorandum

To: General Superintendent
From: Superintendent, Wupatki
Subject: Report 1ml, Wupatki and Sunset Crater National
Monuments, November, 1953

Weather:

An unsettled month with cloudy windy days. Three days brought precipitation with a total of .46 which included two inches of snow on the 20th and the minimum temperature of 19 degrees on the same date. The maximum temperature was 74 degrees on November 4th.

Official and Reportworthy Visitors:

Oct. 27th Mr. Church of USGS to verify Navajo names of geographic features in the Segi area.

Oct 29th Miss Bernice Loughlin, Public Health nurse of WIS held a clinic for ailing Navajos in the East Patio of Residence #1. Ida Brewer and Helen Burroughs served lunch to 28 women and children-- Ida gave follow-up shots as prescribed by Miss Loughlin.

Nov. 1st. Bob and Wanda Muler former Wupatkians, now with the Museum of Northern Arizona.

Nov. 5th Mr. and Mrs. Bean, parents of Chaco Canyon National Monument's Superintendent Glen Bean.

Nov. 10th Engineer and Mrs. Loftis enroute to Crater Lake National Park.

Nov. 12th Chief Ranger Howard Stricklin brought Mr. Abram Cannon, Chief of Classification Branch, of Sec'y. of Interior.

Nov. 12th Gen. Supt. John M. Davis, Ass't. Gen. Supt. Luis Castellum, Road Engineer Tom Moran and Landscape Architect C.D. Carter for conference on Road construction.

Nov. 17th Regional Director M.R. Tillotson, Ass't. Regional Director Hugh W. Miller, Naturalist Matt M. Hodge, Archeologist Erik K. Reed and Miss Alvina Zimmerman accompanied Mr. Ronnie Lee and Mrs. Nettie Benson of the Washington Office who were escorting the Advisory Council Group.

Nov. 25th Mr. and Mrs. W.W. Wilson formerly of Rainbow Lodge were overnight visitors.

W. H. Holmes, Director of the Department of the Interior.

Road Constructions:

Penetration oil was shot on the 5.8 miles of road between Highway 89 and the forest fence. Because of cold weather and other factors penetration was not successful.

The cinder base course dumped on the long tangent between the Earth Cracks and Doney Crater presents a loose fill with difficult hot centers. One visitor punctured his gas tank and others complained of this road condition.

Maintenance, Rehabilitation and General Work:

The Diesel tank for the Heiser Area Onan light plant was excavated raised, cleaned and taken to Flagstaff where proper oil line outlets were welded into it. The Superintendent built a form and Maintenance man Joe Bean poured concrete saddles to support the tank on the surface. The diaphragm fuel pumps on the plant did not have the crank to pull the fuel from the tank in its underground location. The tank and lines were painted black and the above-ground installation is now serving perfectly.

Sunset Crater area was thoroly policed on the 30th.

Engineer George J. Johnston and Ranger Carroll Burroughs made surveys for Spring Locations (needed for water rights application) and for trail location as time permitted, mostly on what we jokingly call "their own time".

The Superintendent constructed and hung a gate in the East Portion of Residence #1.

A Wupatki Ruin road sign was installed where the lower cinder pit road looked more travelled than the entrance road.

Installation of Panel Ray gas heaters in the bed rooms is complete. The bathroom space heater and hot water heater are being installed now.

The oil stove closet between bath and living room has been cleaned out, the stove is stored at Heiser Spring. The grilled vent to the living room was remodelled into a book shelf facing the living room.

Maintenance man Joe Bean has serviced all outside hose bibs with stop-and-drain cocks and fitted them with handles where required. All water lines are believed to be winterized now. Joe has also taken care of service to the Onan light plants and mobile equipment thru out the month.

Permits:

A Special Use Permit was processed for the Arrowhead Uranium Mining Co. of Grand Junction, Colorado. This concern is mining uranium across the river on the Navajo Reservation and hauling to Vinona, Arizona. Their haul is over about 5 miles of the Black Falls-Heiser Spring Road.

Travel:

The gloomy cold days have decreased travel to Wupatki and Sunset Crater. Adding 25% for non-registrants the estimated travel at Sunset would be 803. Contact service was maintained daily at Wupatki 8-12 and 1-5, with some contact during off hours. 644 visitors arrived at Wupatki in 249 cars--62 visitors were not contacted.

General:

Miss Bernice Loughlin of the U S Public Health Service returned for a second clinic within this report period, on the 24th. Helen and Carroll Burroughs were on annual leave so Lizzie Bean helped Ida conduct the clinic and serve lunch to the Navajo women and children. Both the Public Health Nurse and the Wupatki Basin Navajos voiced their approval to hold the clinics at our residence. It is unfortunate that just as this program gets underway Miss Loughlin fears that her position is to be abolished. We hope that her position will be continued.

J.W. Brewer Jr.

J.W. Brewer, Jr.,
Superintendent

Class
Memorandum

January 11, 1954

Memorandum

To: Director

From: General Superintendent

Subject: Monthly Narrative Report - Southwestern National
Monuments - December 1953

Weather

Superintendent Guillet of Walnut Canyon reported that December was the driest and coldest month on record. Statements from other superintendents indicated that these conditions prevailed throughout the Southwestern National Monuments areas. We hope sufficient rains are still falling soon so that the spring floral displays will be as beautiful as we have come to expect them to be.

Special Activities

Headquarters--Archaeologist and Mrs. Dickert arrived at Aila Pueblo on December 16. They will be here about three weeks during which time Mr. Dickert will work primarily on the monthly archaeological collections recently brought to the headquarters office for study and storage.

Monument superintendents were instructed to carry on a training course as outlined in PA-34-53 and to submit a report to this office as to how the Guide to Supervisory Development has been utilized. A committee consisting of Mr. Castellano, Chairman, and Messrs. Stratton and Irwin was appointed to study the Guide and make recommendations as to how the training should be carried on at headquarters and to offer practical suggestions for training programs in the individual areas.

Steps were taken to have each monument superintendent named as a designated agent of the Treasury Department in order to carry out the new procedure to be used in distributing salary checks as outlined in PA-47-3.

As a result of comments from superintendents concerning the Management Improvement Committee's recommendations on the existing situation created as a result of the removal of the trading privilege, procedures to be followed were sent to the N.M.N. Council.

of these are: consolidated mailings; sorting out processed material without envelopes; using lighter stock envelopes; discontinuing circularization of superintendents' monthly reports from other regions in accordance with instructions from the Regional Director; mailing all agent ledger accounts on a quarterly rather than a monthly basis, except during the last quarter of the fiscal year.

A postal meter has been ordered which will save about an hour and a half a day per annum in stamping the mail and making the required stamp records.

Official Visitors

Headquarters--Archaeologist Schroeder; Landscape Architect Glinner; Photographer George Grant.

Chaco Canyon--Park Master John Hall and Soil Conservationist Balch.

Chiricahua--Photographer Grant; Supervisor of Construction and Maintenance Lott.

Gran Quivira--Archaeologist Schroeder.

Hohokam Castle--Photographer Grant; Archaeologist Schroeder.

Tonto--Landscape Architect Glinner; Architect Saunders; Archaeologist Schroeder; Photographer Grant.

Transcisco--Photographer Grant.

Tuzigoot--Photographer Grant.

Walnut Canyon--Photographer Grant.

Wupatki--Photographer Grant; Engineer George Johnson.

Boundary Changes

Chaco Canyon--The National Park and the National Office spent several days in the area working on the proposed exchange of land with Mr. Howard Ferguson. If the proposed exchange works out to give us the land desired for the new entrance road, the boundaries probably will be changed to include the land received and to exclude the land exchanged. Mr. Ferguson is agreeable to the exchange but the problem of mineral rights must yet be solved.

General Publicity

Automobile manufacturers think highly of our areas as backdrops for their advertisements. At Hohokam Castle, the castle was used as a background for a brochure for Buick automobiles.

Two commercial photographers, a 1951 Plymouth, and several models arrived at Transcisco to use the mission as background for publicity stills.

The December 6 issue of the Arizona Republic carried a factual and interesting article on Transcisco.

Maintenance, Rehabilitation and General Work

Heating Units--The new natural gas furnace installation was completed, and we are now keeping warm at much less expense than with the old oil-burning furnace. Two more boys were painted and shelving has been installed preparatory to the beginning of Dr. Richert's work on the archeological materials now stored at Alta Reside.

Arches--The re-signing of the Death Valley Towers Trail was completed. Other tasks accomplished included overhauling the light plant and completing the reservoir project.

Caplain Washburn--While cold weather impeded the work in this area, considerable work was accomplished on the retaining wall.

Casa Grande--The Southern Contracting Company of Phoenix gave the entrance road and parking area a good coat.

Chaco Canyon--Chiricahua--In these areas, frozen water pipes caused considerable inconvenience and many extra hours of work.

Montezuma Castle--A cattle guard, constructed of railroad iron and concrete, was installed at Montezuma Well. Trail repairs inside the Well were finished, and all signs given a coat of stain and oil.

Paisano--Reflectors for the museum display cases were received and plans made to install them. Thinning and staining of all outside work was continued.

Payson--Frozen water lines in several of the house trailers had to be thawed. Both light plants were serviced. An objectional "it is unlawful..." legend on the Sunset Crater sign was removed.

New Construction

Payson--The comfort station was completed and placed in use on December 30. The new residences have been completed with the exception of the heating systems and electric power, in which the heating systems demand. Superintendent Harry Roberts, "Trailer Development Corporation, the contractor, has done a good job with the houses and the comfort station, under somewhat difficult conditions. He will have the most magnificent location, view... of any quarters in the entire Roosevelt Lake area. All personnel here are pleased with the major design features of the houses, and we are especially glad to get the archeologist and his family out of the house trailer."

Roads and Trails

California--The State Highway Department is completing a funding project on State Route 12 which should reduce the present danger of arguing with a cow over the right-of-way.

Roads and Trails - continued

Gran Quivira--The paved portion of the highway from Montezuma was center-striped by the State Highway crew, which also did maintenance work on the approach roads.

Montezuma Castle--It has been reported that the Black Canyon Highway (State 69) will be through to the Verde Valley and usable in two to three months. Also, the State Highway Department is planning to bridge the Verde River and complete the highway to Montezuma Well in 1934. Superintendent Cook feels that if this materializes, travel to the area should go over 100,000 by 1935.

Flagstaff--Even with a reduced crew, work on the Flagstaff entrance road progressed well. Bulk material was hauled for the long curve near the Earth Grads, and a new cattle guard was completed at the Forest Service fence. The loose fill on the last tangent from the Earth Grads to Henry was compacted with choppers and waddy rollers; that section is shaping up very nicely. The new approach from Henry to Flagstaff this was roughed out with the dozer.

Concessions

Canyon de Chelly--Mr. A. B. Nelson of Winslow, Arizona, called at Flagstaff to discuss the possibility of taking over the Thunderbird Ranch operation at Canyon de Chelly. He spent most of an afternoon with Messrs. Davis and Castellani, who found that he had a good background of knowledge concerning this concession. The partnership desiring to take over the Thunderbird Ranch includes Mr. Nelson, his son, John B. Nelson, and Mrs. Ida Mae Davis, all of whom have had considerable experience in the operation of Indian trading posts. Both Mr. Nelson and his son are at present connected with the Bellini Brothers.

Cooperation - Non-Government Agencies

Coronado National Memorial--Local interested groups are opening preliminary negotiations with the State of Arizona to have it assume maintenance of the county road now running through part of Coronado and to have this designated as a state highway.

Flagstaff--The Museum of Northern Arizona rain gauges were given their quarterly reading and check, and the readings forwarded to Dr. Collins.

Associations

Headquarters--Through the cooperation of Northwestern Lands of Flagstaff, we have stockpiled at headquarters twenty 15-foot lengths of 60# steel rail and three 15-foot lengths 30# rail, to be used in the construction of cattle guards, etc., in the Northwestern National Monument areas.

Accessions - continued

Casa Grande--The library was enriched by the following: Smithsonian Institution: 26th Annual Report, P.I.S., which contains Russell's work on the Pin, Bulletin 19; Carnegie Institution publications (42, 477, 506, and 531), Catalogue of Publications and Depositories of the Institution; Amerind Foundation: Complete set of reports to date, including Charles Hileco's work on the Mohave.

Interpretive Activities

Headquarters--The naturalists were occupied a large part of the month in writing and revising various trail and informational booklets for the monument areas. Among these receiving attention were: the self-guiding White House Trail at Canyon de Chelly; the Cove Trail at Arches; the Naville Trail at Great Sand Dunes; the Fossil Point Trail at Chiricahua; and the revised edition of the two-fold leaflet for Capulin Mountain.

Plans were initiated to have a well-prepared natural history guide to Walnut Canyon by Ranger Spangle published. Tentative arrangements have also been made for Dr. Spangle to write the text for two small booklets entitled, Flowers of Walnut Canyon and Birds of Walnut Canyon. These booklets will be illustrated with pen and ink drawings by Mrs. Spangle, and we hope to publish and sell them through the Association.

An excellent outline for a natural history handbook was received from Ranger Barrad, Chiricahua, and sent to the Regional and Washington Offices for comment and appraisal.

Mr. Castellum spoke to a group of Catholic men in Flag, Arizona. Approximately 70 men were in attendance and showed great interest in the work of the National Park Service. After the meeting, Mr. Castellum spent about an hour answering questions. His subject was "The National Park Service and Monuments and Memorials Dedicated to Spanish and Christian Influence in this Country."

Montezuma Castle--Ranger Sutton gave two lectures to geology classes from Arizona State College at the Bell. He also gave a talk and showed motion pictures on clouds to the Arizona State College meteorology and dendrology classes at Flagstaff.

Tumacacuri--The second month of operation of the self-guide system confirms the previous observation that the public likes it. One hundred and eleven parties were observed and it was noted that they are spending an average of 46 minutes with the booklet. A small informational placard was located to explain the "log frame," their date and usage. The unexcavated walls of the small church were located and outlined by a series of stakes to strengthen interpretation at easel No. 4.

Museum Activities and Exhibits

Archeology--Langer Harris is planning the construction of a Layman's Herbarium, plant specimens for which will be supplied by Brigham Young University, through the kindness of Dr. Ferdinand F. Harrison. The framing of the specimens and construction of the display case will be done this winter along with a proposed book and slide display. When completed, these displays will add much to visitors' enjoyment of the area.

Casa Grande--A new multiplex panel was completed and installed, the subject -- "Distribution of the court played ball game in the New World."

Chiricahua--A small ecology exhibit featuring five plant water colors by Mr. W. Clark was installed in the museum. It furthers the story told by the professionally-built panel installed last year.

Walnut Canyon--Preliminary plans were prepared by Mr. Guilford for the construction of two exhibits in the museum in this area. It is hoped these can be completed during the present "off" season and be ready for the beginning of the heavy travel season in the spring.

Research and Observation

Archaeology--In last month's report we mentioned a valuable collection of corn cobs found by Mr. Hiersen of Hueston Castle. It was stated that these were found during the Tonto excavations whereas they were found in a small cave on Mosier Creek in Arizona. This slight correction in our previous statement does not detract from the value of Mr. Hiersen's discovery which Dr. Haysgood of Harvard considers to be a very rare and important find.

Dr. Hiersen's report on the excavations in the lower ruin at Tonto was received, as was his interesting paper on "A Brief History of Camp Verde." The latter paper has been forwarded to the Regional Office for approval for publication in Arizona Highways or similar publication.

Southwestern Monuments Association

The annual report was prepared. This indicates that the past year was the top one in terms of receipts and the second highest one in terms of number of pages published.

Mr. Kirtz corresponded with the Regional Office concerning approval for the publication of eight titles in the technical series and a popular booklet on Indian legends.

The Association is gaining recognition as a source of information on Southwestern subjects and many letters requesting information and assistance are received.

Water Stabilization

Mr. Tilden's work at Ames being was reviewed by him and submitted as a part of Mr. King's water-pollution report.

Mr. Hixson reported to headquarters to a list such as the materials that have been brought here, especially the materials from Ames.

Less time was spent by Mr. King preparing the 3-year program for water stabilization. The stabilization reports for the year ending at Ames being were typed.

Travel

We finished the year with a total visitation of 168,407, an increase of 151 over the previous year.

Some areas experienced phenomenal gains. Laramie, for example, shows an increase of 125%. Former Superintendent Johnson attributed this big increase in visitation to good a road area to improved roads and to the desire of people to get away from the more crowded larger parks and mountains.

Visitation to Yellowstone was approximately the same as a year ago, but a 10% increase in our grand area was noted. Again this probably reflects the desire of people to get away to a quiet area where they can enjoy their vacation safely and at their leisure.

Visitors from almost every country in the world were numerous throughout the year.

Visitors

Headquarters--Mr. and Mrs. Baker - Mr. Baker is a physicist with the University of Denver; Ranger Kelly and Family, El Paso; Chief Clerk and Mrs. Henry Lindor, Portland, Oregon; Artist Jerry Carson.

Ames River--The representative here obtain the traveling information to be used in connection with water studies on the San Juan River above Elmonte.

Great Smoky--The State's Travelers visited the area, an usual this year. The Wildlife Division of Tennessee was in charge of the program and arrangements. There were 150 visitors in the group, which was smaller than usual.

Portland--Mr. and Mrs. Winfield Kim, Co-President of the Joint Prince William; Mr. and Mrs. Joe Garry, Insurance Agent and Arizona Highway writer, doing an article on the Salmon Springs Valley.

Texas--Frank Hall, State Sen., New York; Mr. and Mrs. Bill Crockett, Jr. and Mrs. Crockett, Jr.; Sam Williams, Arizona Fish and Game Department.

Yosemite--Dr. E. L. Brown, Jr., Berkeley, California; a National Park Service Ranger; Captain C. Ross, Santa-Cruz visit.

Police In Action

As both Coronado and Miramonte counties were taken to discourage things that might be done to cut Christmas trees in the areas. A highly visible sign was erected near the entrance to Miramonte. A press release was prepared and forwarded to Northern Arizona newspapers soliciting the cooperation of the public to stop the "Christmas tree cutting" during the holiday.

Wildlife Management

Field Reports--A complimentary interview was received from Assistant Regional Director Miller concerning the annual winter report. He was able to give praise of the work done by the field men in the preparation of their reports.

Personnel

Early in the month John A. Anderson accepted his duties as superintendent of Grand St. Daily National Research and May 1, 1954 transferred to the superintendency of Pinal. He was happy to welcome Mr. Young and his family back into the Southwestern National Research organization.

Transfer--Temporary Ranger Franklin Smith reported to Phoenix for the current winter season.

Memoranda

Field Reports--A highly complimentary letter was received from Professor Butler of Washington State College in which he particularly praised the service given to him and his family by Superintendent Anderson and Smith. During their recent vacation the Butler family visited 20 national monuments and a national park on a 16-day camping trip. Mr. Butler closed his letter by saying "We thank you and your staff for doing a splendid job--better than we had any right to expect."

NATIONAL PARK SERVICE
ARCHES NATIONAL MONUMENT
Moab, Utah

December 23, 1953

Memorandum

To: General Superintendent
From: Superintendent, Arches
Subject: Monthly Narrative Report for December, 1953

WEATHER: Only one light snowstorm occurred during the month; however it has been unusually cold with temperatures staying below freezing even during the day.

TRAVEL: In spite of the cold weather skies have been clear and roads passable, all of which accounts for the 200% increase in travel over the same period last year. During the month 503 visitors entered the area in 157 cars. Our annual travel of 30,853 visitors and 9,118 cars shows an increase of 14% over last year. The Natural Bridges annual travel of 3268 visitors and 1112 cars is a 5% increase over last year; however this is not a true comparison, as these totals are only up to October 23, 1953.

INTERPRETIVE SERVICE: At the Wayside Exhibit 134 people signed the register and we estimate the same number used the Cove Nature Trail. Ranger Morris has been working on plans for the construction of a Laymans Herbarium. The plant specimens will be supplied by the Brigham Young University, through the kindness of Dr. Bertrand F. Harrison. The framing of the specimens and the construction of the display case will be done this winter along with our proposed book & slide display. We may be scratching for funds for material, but believe the whole display will add a great deal to the visitors enjoyment of the area. Negatives for the Delicate Arch Nature Trail have been submitted to your office.

ROADS & TRAILS: Our road maintenance program came to a necessary (financial) halt last month and Maintenance man Winbourn has been doing various jobs on buildings, grounds, equipment, and trails. He will complete the resigning of the Courthouse Towers trail this month. The monument roads are in fair condition although muddy and snowy in spots.

REHABILITATION PROJECTS: The reoverhaul job on our light plant seems to be a satisfactory one. The cover for the reservoir was finally received and installed by Merle Winbourn. This completes one project.

ADMINISTRATION: The big job of the month in the office has been the conversion of our files to the new filing system. We found this an excellent time to dispose of a mass of obsolete material. The job is about 75% complete. Ranger Morris went on annual leave December 14 which will allow him to use up his leave for this year.

" MERRY CHRISTMAS "

Astec Ruins National Monument
Aztec, New Mexico

December 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Aztec Ruins

Subject: Monthly Narrative Report, December, 1953

Weather: Snow which fell on December 2 still covers the ground and temperatures remain low. The month's minimum was 3° below zero and the month's maximum was 65°. Total snowfall for the month was 10 inches. Most daytime temperatures were in "the thirties" and some did not reach freezing.

General: Despite the winter weather we have had visitors on all but four days in the report month with a total of 97 on November 28. On most days there have been at least two or three parties guided through the ruins. Shoveling snow, clearing roof drains of ice, and keeping the plumbing from freezing has required most of our time.

Visitors and Service to the Public: There were 567 visitors in 166 cars. Seventy-six tours were guided through the ruins for 425 visitors. There were 142 visitors who did not take the guided trip. Of these 32 were members of the Junior Chamber of Commerce group holding a state convention in Farmington. On November 28 a session was held in the Great Kiva, but only two members of this group took the regular guided tour. Ranger Paul McCrary gave a welcoming talk to the group. Travel this month shows an increase of 236 or 71 per cent over the same month last year and brings the total for the year to 26,284, the highest count on record.

In Aztec Ranger McCrary gave an illustrated talk on Carlsbad Caverns to 22 members of the Young Farmers and Homemakers Association.

The Carlsbad 16 mm. sound film and the New Mexico National Monuments film on hand at Aztec were shown the Mobile Unit crew and monument neighbors.

Administration: Our new guided trip fee sign was mounted under glass.

The annual Equipment Inventory was completed and Board of Survey reports were prepared.

All loose pictures on museum catalog cards were replaced with dry mounting tissue.

A holder for two-fold leaflets on neighboring areas was completed.

On the museum porch we finished mounting the concrete NPS emblem received from Walnut Canyon some time ago. (This project was nearly complete before we were advised that standard emblems would be supplied from a central office.)

The afternoon of December 24 was taken off as provided by Executive Order, but a party of nine visitors in three cars was guided through the ruins.

Maintenance: An office window was repaired.

The cut-off valve for the drinking fountain was dug out and when found to be "jimmied" the fountain was blanketed against freezing.

Storage in the basement was re-arranged and a work bench constructed.

An automatic pressure switch on the water pump was replaced.

An old band saw borrowed from Chaco was rehabilitated for use in making markers for our self-guiding trail.

The faulty switch for the burial in the ruins was replaced.

Air was pumped into our underground water storage tank to restore the lost air cushion.

Self-guiding Trail: Work was started on the easel exhibits for our self-guiding trail but this was suspended pending receipt of further information.

Mobile Unit: Due to the winter weather work on the Hubbard Mound was suspended and the Mobile Unit trailer was moved to Globe. On the same trip Mr. Richert also took an insect storage case being held at Artec for transfer.

N. P. S. and Newsworthy Visitors: Don Watson, Al Lancaster, and Jean Pinkley from Mesa Verde studied the work being done on the Hubbard Mound by the Mobile Unit.

State Representative Dave Martin came twice for tree-ring information to be used in connection with water studies on the San Juan River above Bloomfield,

Art White and Glen Bean were here from Chaco.

Unusual: Work on a natural gas well was started on the Hubbard Ranch only about 200 yards from the northwest corner of the main ruin. Drilling has been delayed due to various misfortunes, and according to the latest reports, the well is being abandoned.

Canyon de Chelly National Monument
Chino, Arizona

December, 1953

Memorandum

To: General Superintendent

From: Superintendent, Canyon de Chelly

Subject: Monthly Narrative Report for December, 1953

Travel: There were 25 visitors to the area this month which brings the annual travel count for 1953 to 7,261 persons, 1,000 more than in 1952.

Weather: There has been a wide variety of weather this month. The high temperature was 61 degrees and the low was 0 degrees. There was .07 inches of moisture recorded.

Roads: I don't see how these roads could be classed as anything but good, especially after having become so accustomed to those found in the Lava's National Monument area. The Indian Service has kept the approach roads in good condition but our own road needs a lot of maintenance. There is nothing to be gained by routine maintenance work at this time of year. It is hoped that when weather permits some special road maintenance can be accomplished.

The White Horse Trail has been badly washed in some places and its repair will be made as weather permits.

Visitors: Ben Watson and Joe Pinkley, Mesa Verde National Park, Colorado.

General: Since I am now at Canyon de Chelly a lot of time was spent familiarizing myself with the area and getting acquainted with the local people.

The water pump pump was cleaned and drained. An over-head storage rack for lumber was constructed in the garage and the areas' supply of lumber brought in out of the weather. A wood and trash burning stove was installed in the work shop. An inventory of equipment was made. Three days were spent pumping our septic tank and unclogging the long and winding sewer line. Six days were spent in the area office on cleanup and routine filing of material received since August, 1953. The filing system was brought up to date and two large pieces of office furniture removed and stored elsewhere. Cleanup of the tool shed, grounds and garage was started but cannot be completed until we get rid

UNITED STATES

NATIONAL PARK SERVICE
SOUTHWEST REGION
Flagstaff, Arizona
January 1, 1963

of surplus items.

Trips: One trip was made to Gallup for supplies and equipment. Three days were spent at Navajo assisting Mr. Roy Young the new superintendent there.

Personnel: Seasonal ranger John Lettenville was terminated December 3. I entered on duty as superintendent November 29, 1962.

Mrs. Aubuchon and I want to wish everyone in Southwest National a happy, prosperous New Year.

John A. Aubuchon
Superintendent

1950-1951

The first of the series of reports on the progress of the work of the Committee on the Organization of the United Nations, was published in 1950. It was a report on the work of the Committee during the year 1949-1950.

The second report, published in 1951, was a report on the work of the Committee during the year 1950-1951.

The third report, published in 1952, was a report on the work of the Committee during the year 1951-1952.

1952-1953

The fourth report, published in 1953, was a report on the work of the Committee during the year 1952-1953. It was a report on the work of the Committee during the year 1952-1953.

The fifth report, published in 1954, was a report on the work of the Committee during the year 1953-1954. It was a report on the work of the Committee during the year 1953-1954.

The sixth report, published in 1955, was a report on the work of the Committee during the year 1954-1955. It was a report on the work of the Committee during the year 1954-1955.

The seventh report, published in 1956, was a report on the work of the Committee during the year 1955-1956. It was a report on the work of the Committee during the year 1955-1956.

Capulin Mountain

NATIONAL MONUMENT

Capulin New Mexico,

December 23, 1953

Memorandum

To: The General Superintendent
Southwestern National Monuments,
National Park Service
Globe Arizona,

From: Homer J. Farr, Superintendent
Capulin National Monument,

Subject: Monthly Narrative Report,

Visitors:

Just about one hundred fifty visitors this month, bringing the total travel year to thirty one thousand two hundred, (31200),

Weather:

Rather bad weather all month, have had eight snow storms this month ranging from one inch to eight inches each time, we now have about four inches of snow on the ground and last night the thermo stood at eleven below, have had about two and one half inches of water this month,

Flora and Fauna:

All wildlife and vegetation are in good condition and unless we have much more snow we expect them to come thru all O K,

Special Visitors:

None,

Road Maintenance:

In spite of the bad weather we have been able to put in part time during the month and have considerable retaining wall erected, It is bitter cold right now and we do not expect that we can work any more this month,

Information pamphlets,

None passed out this month, now on hand 2000,

Sincerely

Homer J. Farr,

December 25, 1953

Memorandum

To: General Superintendent, SWM
From: Superintendent, Casa Grande
Subject: Monthly Narrative Report for December, 1953

General: Weather has been fine all month - warm sunny days and clear, cold nights. In spite of this our travel continues to drop at an alarming rate. For the first time in many years winter visitors are having no trouble finding accommodations. Vacancy signs on motels throughout southern Arizona have replaced the No Vacancy signs of former times. Local travel to this area on Sundays has been curtailed by the installation of an automobile race track between Coolidge and Florence. The track is open every Sunday afternoon, thus providing the cotton choppers the "Roman Circus" type of entertainment they most enjoy. As for the out of state travel, as indicated above, it just hasn't materialized as yet this season.

The Don's Travelcade arrived Sunday, November 29. The day was beautiful but the group was smaller than usual. A total of 190 Don's guests were shown through the ruin in two guided trips. The Coolidge Chamber of Commerce was in charge of the arrangements and program. They did a fine job and all concerned enjoyed themselves.

Local merchants have indicated that Christmas sales are off as compared to former years. (This seems to be an annual lament all over the country, yet this years sales are reported to have beaten all records. Commercialized Christmas -- Phooey !)

Weather: Several very cloudy days; some fairly high winds but little dust.

| <u>1953</u> | <u>1952</u> |

Administration and Protection: The Adamsville site was checked twice this month and found to be undisturbed, aside from a blanket of cotton blown over it from a nearby cotton gin.

Nine requests for information were received and duly answered.

Maintenance: On December 10 our entrance road and parking area were given a seal coat by the Bentson Contracting Company of Phoenix. Miscellaneous repairs and maintenance this month included the patching of the roof of quarters # 1, replacement of grease pipes on the sewage pump, repair of walk to women's rest room and to quarters # 6 with bitumals and sand, the dragging and leveling of sewage field, and the cleaning of all ditches along the entrance road.

Museum: Multiplex panel completed and installed. Subject of panel - "Distribution of the court played ball game in the New World."

Library: Accessions this month - Medallion papers # 4, 10, 11, from Globe. These were duly catalogued and marked.

Personnel: Young Mike Clancy, age 3, suffered a set back in his ambition to become a pilot without a plane. On December 2, while watching TV, he decided to imitate the Superman program then on and take off from the top of the couch. The take off was fine but he forgot to head into the wind when he landed. Result: leg broken in two places. The young man is doing well now although he resents being permanently grounded.

In Conclusion: The Casa Grande staff sends the Season's Greetings to all our compadres.

A.I. Hicknell,
Superintendent

CHACO CANYON NATIONAL MONUMENT

Bloomfield, New Mexico

December 27, 1953

Memorandum

To: General Superintendent

From: Superintendent, Chaco Canyon

Subject: Superintendent's monthly narrative report for December, 1953

Weather

Quite variable weather in December was highlighted by balmy weather at mid-month followed by a cold snap which froze the water line to the new residences.

Maximum temperature - 54° on December 1

Minimum temperature - 1° on December 24

Precipitation - 0.26 inches on 4 days

General

Most of our time this month was spent in "getting Bean in and White out", i.e. going over administrative matters in connection with my arrival and Art's promotion to Bandelier. This included taking the annual inventory. We both took annual leave which would otherwise have been lost at the end of the year.

Inspections

Paul Balch of the Region Three Office made a brief inspection of the soil and moisture work here in conjunction with his visit on the boundary change proposal.

Boundary Changes

John Kell and Paul Balch of the Region Three Office were here on November 30 and December 1 and 2 working on the proposed exchange of land with Mr. Edward Sargent. If the proposed exchange should work out to give us the land desired for use of the proposed new entrance road, the boundaries would probably be changed to include the land received and to exclude the land exchanged. Mr. Sargent is agreeable to the exchange but the problem of mineral rights must yet be solved.

Chiricahua National Monument
San Carlos, Arizona

Maintenance

The water line from the "CCC Well" to the new residences froze sometime just before Christmas, leaving us only about 5 days supply. Three days of work has definitely located the trouble to be in the span of pipe across Gallo Wash.

Interpretive Service

The demand of other duties took us from Pueblo Bonito much of the time during the month with the result that only 4 of the 29 visitors took the guided tour.

Increase in Travel

The slight increase in travel from 26 people in December of 1952 to 29 people this December can hardly be considered significant in view of such a small travel figure.

Visitors

National Park service visitors in December included John Kell and Paul Balch of the Region Three Office.

Accidents

Frank Beyale, a Navajo living just north of the monument, walked off a cliff in a snow storm and died from injuries and exposure before he was found on December 7. The accident occurred just outside the monument boundary. Both Frank and his brother have worked for the stabilization crew.

Personnel

Ranger Arthur H. White was transferred and promoted to Supervisory Ranger at Bandelier National Monument on December 22. Art did an exceptionally fine job as acting superintendent here at Chaco Canyon for the last nine months and will be sorely missed.

Art White took annual leave from December 2 to December 8 and I took annual leave then from December 10 through December 19.

Glen T. Bean

Chiricahua National Monument
Dos Cabezas, Arizona

December 25, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Chiricahua
Subject: Superintendent's Monthly Narrative Report

Weather Conditions. Clear weather prevailed during most of the month, with temperatures well below freezing at night. An inch of snow on the 5th lasted long enough to keep the road icy for a week. On the 22nd seven inches of snow, followed by strong winds, effectively closed the Massai Point road to visitor traffic. The road is still closed, but should be passable within a day or two. The storm scared away most of our visitors, anyway.

The moisture content of the snows amounted to 39 hundredths of an inch. This is far below normal for the month, and the year's total of 12.07 inches is the lowest in the fourteen years of weather records. It is less than two-thirds of the average annual rainfall; almost 6 inches less than last year; and 1.35 inches less than the previous low in 1950. Help!

Inspections. Mr. Mott spent a day here on the 16th, lining up the work for the forthcoming rehabilitation program. His suggestions and advice were very welcome.

Maintenance. On the morning of the 9th we awoke to find that we had no water. Several days spent in de-rooting the catch-basin at the spring and cleaning some of the outlet pipes remedied the difficulty, but we all looked somewhat grubby for a few days. The cold weather has, as usual, given us a little trouble with exposed plumbing fixtures, and snow removal is currently keeping us busy.

Approaches to the Monument. The road over the mountain from Portal is snowed in, probably for the rest of the winter, but all other roads are ice-free and in good shape. The State Highway Department is rapidly completing their fencing project on State Route 181, which will vastly reduce the present danger of arguing with a cow over the right of way.

Cooperating Governmental Agencies. The REA is prepared to install our utility poles and overhead wiring, but they have not as yet started work.

Donations and Accessions. Thanks to the Southwestern Monuments Association our reference library is filling out nicely. In the last few months we have received several books and papers from them.

Interpretive Service. A total of 552 visitors were contacted at the Museum in 160 parties. An estimated 167 people used the self-guiding nature trails. Leave-taking, sickness and weather conditions curtailed the rest of the program.

Museum Activities and Exhibits. A small ecology exhibit featuring the fine plant watercolors by Ora M. Clark was installed in the Museum. It furthers the story told by the professionally-built panel which was installed last year. The forthcoming rehabilitation of the Orientation Station (or Exhibit Building, as we now call it) will give us almost double the present exhibit space. It is an exiting thought.

Increase AND Decrease in Travel. Although we had only 759 visitors to the area this month (a decrease of 11% compared to December of 1952) the total for the year represents a new record. The travel figure for the year stands at 23,568, an increase of 29 people over last year's record, or 00.14% ! As campers are the people who usually appreciate the area most, it is pleasing to note that campground use increased 35% for the year. This is a significant increase in terms of the added work load involved for the staff. Wood hauling and garbage collecting as well as interpretation take an increased amount of time.

Visitors. Visitors to the Monument this month included the following:

- Dec. 5 - Mr. & Mrs. Winfield Line, ex-President of the Palm Springs Museum
- " 6 - Mr. & Mrs. Jim Carey, Associated Press and Arizona Highways writer, doing an article on the Sulphur Springs Valley for the latter.
- " 8 - NPS Photographer George A. Grant
- " 15 - Supervisor of Construction & Maintenance E.T. Mott

Police Protection. Misguided attempts to cut Christmas trees in the Monument have been thwarted, we hope, by the erection of a highly visible temporary sign near the entrance.

UNITED STATES
DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Tumacacori National Monument,
Tumacacori, Arizona.

December 25, 1953

Memorandum

To: General Superintendent

From: Superintendent, Tumacacori

Subject: Monthly Narrative Report for Coronado National
Memorial for December 1953

Patrol and inspection of the area was made
on December 18 by Ranger Bullard.

Range conditions appeared satisfactory and a
quick snow storm was reported received on December 4.

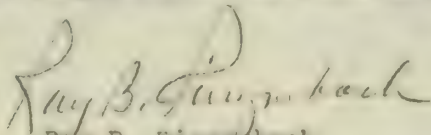

Most of the Ranger's time on this patrol was
spent installing a permanent trash barrel site. As a deterrent
to vandals a concrete base was built with provisions for locking
the barrel in place. Some cleanup was necessary at Montezuma
Pass but trash was lighter than we have come to expect.

A friendly letter was received from Miss Grace
Sparkes, Chairman of the Coronado International Monument Comm-
ission of Arizona. She mentioned among other things the hunting
this season within the Memorial that she had observed and also
reported that lion are prevalent. Miss Sparkes' letter was
acknowledged with thanks.

Local interested groups are opening preliminary
negotiation with the State of Arizona to have them assume
maintenance of the County road now running through part of
Coronado, and have this designated a State highway.

Mr. and Mrs. Stevens, residents near Coronado,
stopped by the monument on a courtesy call.

Press releases were prepared and forwarded to
Southern Arizona newspapers soliciting the cooperation of the
public to the no "Xmas tree cutting" within the Memorial.

December 16, 1953

Memorandum

To: General Superintendent

From: Superintendent, El Morro

Subject: Monthly Narrative Report

There were a total of 84 visitors to the Monument this month. This is more than double a year ago. These visitors came in 23 automobiles. 32 took a trip around the Rock in 13 parties. No one went over the top of the Rock and no one camped out though one couple had planned to but finally gave it up -- to much snow.

The coldest this month was a twelve degrees below zero and the warmest was 52 degrees Fahrenheit. There has been between 15 and 20 inches of snow, and it has been on the ground all month.

The superintendent has had time for little else besides working on the business end of a snow shovel. After the eight and one half inch snow, it took three days to clear the trails because each evening the wind blew back in the trail enough to cover what he had put in a good hard day's work digging out. There were a goodly number of other days when the snow wasn't so deep that he put in a good day's work behind the shovel. The salt obtained last fall for the steps helps out to some extent, but the effective use of it must be learned. Next time, it is planned to put it down about an inch thick!

With all the cold weather -- it has turned cold and stayed cold -- the rest room has been drained and is now "out of order".

According to New Mexico State law the dump truck must have some new lights on it by January 1. We took it to Sarah and had most of the work done, but the garage lacked the parts for the final touches so we will have to take it back.

In between snows, we gave the outside generally a good clean-up, we refinished some of the floors in the residence, accomplished small routine jobs such as making up a batch of chlorine for water purification, etc. We have started working on our half-guided trail leaflet.

Received 12 February 1993; accepted 12 May 1993

[illegible]

THE UNIVERSITY OF CHICAGO PRESS

[illegible]

1. *What is the main purpose of the document?*

There were some light and some dark clouds, but no rain.

The following information was obtained from the records of the Department of the Interior, Bureau of Land Management, regarding the land owned by the United States in the State of California.

The only National Park Service visitor expected to be by was Warren Oblinger; but I guess the snows were too deep for him as he didn't show up. Seems to me we had about 1 or 2 inches of snow on the level at about that time!

1. The first part of the document is a list of names and titles, including "The Hon. Mr. Justice" and "The Hon. Mr. Justice".

Irving McNeil, Jr.
Superintendent

Clear weather prevailed during the greater portion of the week, with 14 clear, 12 partly cloudy and two almost clear days recorded on Fort Laramie. Total barometric pressure a total of 67.42. Precipitation was recorded with 4.81 inches of precipitation. Total precipitation for the year, 11.88 inches. This compares with 11.40 during 1934, 1935 - extreme temperature 12 degrees, average minimum - 5 degrees the 1931.

[illegible]

The Lincoln County News gave this report some editorializing in a similar issue.

The December 7 issue of Time magazine has an article (p. 88) relating the suspension of a Hamilton Avenue St. New Orleans, then the December 20 issue (p. 88) had an article pertaining to an earlier outbreak. The December issue, New Orleans, placing this case at 82,000 years.

At the present time there is no direct line of communication between the two countries. The only direct line of communication is by air, which is very slow and is not very reliable. The only direct line of communication is by air, which is very slow and is not very reliable.

UNITED STATES

DEPARTMENT OF THE INTERIOR

NATIONAL PARK SERVICE
Gran Quivira National Monument
Gran Quivira, New Mexico

December 27, 1953

Memorandum

To: General Superintendent

From: Superintendent, Gran Quivira

Subject: Monthly Narrative Report, December 1953

Weather

Nice weather prevailed during the greater portion of the month, with 18 clear, 10 partly cloudy and two cloudy days; strong winds occurred on four days. During four storms a total of 6" of snowfall was recorded with 0.21 inches of precipitation. Total precipitation for the year, 11.56 inches; this compares with 13.40" during 1952. Average maximum temperature 48 degrees; average minimum - 2 degrees the 23rd.

Inspections

Archeologist Schroeder made an inspection of certain of the Indian ruins, Nov. 30, and moved some archeological material from Gran Quivira, for storage at Globe.

General Publicity

The Lincoln County News gave this area some favorable publicity in a recent issue.

The December 7 issue of Time magazine has an article (p.84) relating the excavation of a Mogollon house in New Mexico; also the December 28 issue (p.44) has an article pertaining to an early American, the Sandia man, (New Mexico) placing his age at 20,000 years.

Official Visitors

Archeologist Albert H. Schroeder, Region Three, Nov. 30.

Approaches to the Monument

At the present time roads are in good condition except for a few rough spots. The State highway crew have done maintenance work. Also, during the early part of the month they have center-striped the paved portion of the highway from Mountainair.

Very truly yours,

Maintenance

The cistern pump which supplies water to the residence failed to operate on two occasions. Repair parts ordered six weeks ago have not been received. The packing box casting on the deep well pump was taken to Mountainair to be brazed, as an old welding had cracked, causing considerable leakage of water.

The muffler was replaced on the Ford stake truck, as it had rusted through in numerous places; the Dodge pick-up storage battery was replaced with an oversize battery as the old one had gone dead, would not take a charge and was beyond economical repair.

Minor maintenance work was carried on at the Missions. Storm doors were installed on the museum and the residence. Three loads of water were hauled from Mountainair. Lois Kite worked a total of 15 hours during the month. The Superintendent was on Annual Leave ten days during December.

Interpretative Service

Total of 112 people in 26 parties were conducted through the Missions and Indian ruins. Contact was made with 169 people in the museum and 174 people used the self-guiding trail.

Increase in Travel

A total of 286 visitors in 78 cars were recorded. The total travel for the year is 5,067 visitors in 1,403 vehicles. This compares with 3,527 visitors in 988 vehicles during the 1952 calendar year. During 1953 vehicles from every State and several foreign countries were recorded. Approximately 40 percent of the visitors were from out of state.

Miscellaneous

The last rattlesnake of the season was disposed of Nov. 30. The covey of 19 quails are frequently seen.

Channing T. Howell
Channing T. Howell
Superintendent

24 Dec. 1953

Memorandum

To: General Superintendent, Southwestern National Monuments
From: Acting Superintendent, Montezuma Castle National Monument.
Subject: Monthly Narrative Report for December 1953.

Weather: December was dry with only .21 inches of rain on the 4th and 5th; occasional cloudy days but mostly cold (15 above) nights and chilly to cool days (40 to 60). Down to 11 on the 23d. Just good hunting weather.

Travel: To the Castle Area 1248 people in 409 cars and to the Well 766 people in 264 cars for a grand total of 2014 people in 673 cars. This is slightly higher than the 1133 people of a year ago this month. Travel dropped just after the first of the month and there was little fluctuation between week days and week ends.

For the 1953 travel year Montezuma Castle and Well received 64,517 visitors - as usual a new record attendance, and 12,000 over the 1952 travel year. Broken down this shows 19,826 visitors at Montezuma Well and 44,491 visitors at Montezuma Castle.

NPS Visitors: George Grant on Dec. 3 to take some much needed photos with equipment and ability to do the job. Archaeologist Schroeder on the same date to check on interpretive devices and archaeological problems. Art White on Dec. 5 to visit.

Publicity: Photographer Bob Richards and crew with a brand spanking new '54 Oldsmobile were in to use the Castle as a background for future advertisements.

Approach Roads: The local paper, The Verde Independent, reports that the Black Canyon Highway Association was told that the Black Canyon Highway (State 69) will be through to the Verde Valley and useable in two to three months. Also of extreme interest is the remark that the State Highway Department is planning to bridge the Verde River and complete the highway to Montezuma Well in 1954. If Tonto gets 25,000 winter visitors 90 miles from Phoenix on the Apache Trail--we should go over 100,000 by 1955.

38,000 Please!

Navajo National Monument
Tonalea, Arizona

December 27, 1953

Memorandum

To: General Superintendent
From: Superintendent, Navajo
Subject: Monthly Narrative Report - December 1953

Weather. Generally clear skies with less than normal snow on the ground for December. Temperatures kept well within normal range. Little moisture resulted from three snows which were accompanied by driving winds.

Travel. During December Navajo experienced quite an increase in travel over the same period of the past two years. Such brisk activity is not anticipated for January. Total travel for the month - 3. Total for 1953 - 2151.

Administration. A new superintendent arrived on December 6 to replace Superintendent Aubuchon who was promoted and transferred to Canyon de Chelly. Much of the month was spent getting settled, going over the records and learning a little of the area, the equipment - and the Navajo neighbors. Superintendent Aubuchon returned for a two-day visit to give much appreciated assistance in getting acquainted with the new assignment.

Roads. The approach roads have been open and in good condition. The grader was in operation until the roads were clear of the heaviest snow of the month, and the snows have been light while the grader is in the shop for repairs.

Foy L. Young
Superintendent

Very truly yours,
[REDACTED]

Tonto National Monument
Roosevelt, Arizona

December 30, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tonto
Subject: Report 1ml, Tonto, December 1953

Weather. Dry, no rain. Very cold last two weeks of the month, but clear. Less than 20° above, some nights, last week of the month. Froze water lines to Coopers tank, line contracted and pulled unions apart. The storage tank was completely drained by this, but recovered in 3 days.

Travel. 2312 visitors for December, compares with 1580 last December. With 34,435 for the year, we have had almost a 100% increase in two years, with the same staff. We had 10,852 visitors in the "off-season" June through December.

Visitors, 1953 & Special.

Landscapist Architect Blinnier, December 1.
Archaeologist Schroeder, Santa Fe, December 2.
Photographer George Grant, Leaky Mountain, Dec. 4.
Bill Bruckman, Jr., with Mrs. Bruckman, and Mrs. Bruckman Sr. of Seattle. Bill was seasonal ranger at Mount Canyon a year or so ago.
Jack Miller, Arizona Fish & Game Department, December 11.
Joe, Evelyn & Robert Sharp, over the holidays, from California & Jackson.
Architect Sanders, Mrs. Sanders, Mr. Davis and sister, and Mrs. Davis, December 29.
Dr. Frank Vail, Pathe News, New York, Dec. 30.

General. The winter travel season began here on December 26 with about 280 visitors on that day. From now on it will be over-hauling. We have been extremely busy all month with museum work, construction, moving cover plant and fuel tank, power lines, setting up l.p. gas cabinets at the new residences, and innumerable details. It has been a very busy month, and longer days at times, with trying to run the area and set up the new residence and utility area at the same time.

The diesel plant was set up in the new utility area, new lines put up, and the plant run continuously. It seems to run better now, and even operates the electric water heater at partial efficiency.

The trailer-utility area cleanup was started the first week of December, with considerable work to do. This is being done by the trail crew.

UNITED STATES
DEPARTMENT OF THE INTERIOR

Construction. The comfort station was completed and in use the morning of December 30. We were too busy for a formal dedication ceremony, so this historic event was allowed to slip quietly into the normal pattern of operations, with only a subdued pride in the demeanor of the staff to indicate that one more great milestone had been passed in the development of Tonto. It will make us more janitor work, as we expected.

The new residences have been completed with the exception of heating systems and electric power, on which the heating systems depend. Frontier Development Corporation, the contractor, has done a good job with the houses and the comfort station, under sometimes difficult conditions. We will have the most magnificent location, view, and rent, of any quarters in the entire Roosevelt Lake area. All personnel here are pleased with the major design features of the houses, and we are especially glad to get the archaeologist and his family out of the house trailer.

Since the seasonal ranger does not enter on duty until January 2 of this season, we have of course had the usual four days a week of one man duty. That applies to visitor contact and office work, of course, as we have been putting in 7 day weeks on all sorts of work entailed by moving to the new housing area. However, with the beginning of the winter travel season rush, little can be accomplished beyond service to the visitors when only one man is on duty. We hope to get caught up on reports and other necessary office work when the seasonal ranger enters on duty and has had a little training.

NATIONAL PARK SERVICE
Tumacacori National Monument,
Tumacacori, Arizona

December 25, 1953

Memorandum

To: General Superintendent
From: Superintendent, Tumacacori
Subject: Monthly Narrative Report for December

Weather. This has been a winter weather month. No precipitation was expected or received but mornings have been freezing and below and cold winds have prevailed. Afternoon sunshine brought temperatures up somewhat but we find ourselves remarking to the visitor's comments that the weather is "unusual". A minimum temperature of 14 degrees was recorded on the 13th and a maximum of 75 degrees on the 8th.

Publicity. Press releases were prepared on area visitation and forwarded to local papers and Radio Station KCNA. Southern Arizona papers released our press notice requesting the public's cooperation in not cutting trees and shrubs in Coronado National Memorial during Xmas season.

Two commercial photographers, a 1954 Plymouth car, and several models, used the mission as a backdrop for publicity stills on November 27.

A newspaper article on Tumacacori appeared in the Phoenix ARIZONA REPUBLIC on December 6. Evidently written by a staff writer, it was factual and interesting.

Maintenance. All of Mr. Deubler's and part of the Rangers' time was spent during the month on area maintenance. Transplanting and winter planting in the patio garden continued with stocks, pansies, and calendulas located; African alohes were removed and replanted to supplement our limited vegetation along the parking area wall. Several agaves were relocated and irrigating canals provided. We continued the weed burning as time would allow and winter grass was sowed at the Ranger residence. All outside doors, wooden gates, and signs were given a coat of linseed oil preparation, and informational signs relettered. Two metal parking area signs were installed at the road entrance, one at each end of the parking island.

your letter of the 10th and in the information concerning the proposed extension of the park. The National Park Service is very much interested in the proposed extension of the park and is at present studying the matter.

UNITED STATES

Trouble with the water system was overcome but it took the major ~~DEPARTMENT OF THE INTERIOR~~ ^{NATIONAL PARK SERVICE} to accomplish it. The heavy electric motor was taken to Nogales and then to Tucson for repair. ~~General~~ Overhaul; storage tanks were drained, a new pressure switch installed, and the air compressor renovated. Residences, rest rooms, garden, and the fish pond did without water this one long day. The policy of checking the water level in the deep well on a monthly basis has been established. No appreciable drop in the water table was noted this month.

Interpretation. This has been the second month of operation of the self guide system with no change in the public's reaction to their use of it. They like it.

With the entrance on duty of the seasonal Ranger it has been possible to station one man on church duty whenever visitors are on the grounds. This roving Ranger interprets-supplementing the use of the guide booklet. Undoubtedly, he has been a deterrent to vandalism as none of consequence has been noted.

Observance of 111 parties on the self guide trail indicates they are spending an average of 26 minutes with the booklet.

Several additional informational arrows have been located along the trail as demanded and a "please" warning sign leroyed and installed at entrance to Mission. A small informational placard was also located to explain the "leg irons", their date and usage.

The unexcavated walls of the small church were located and outlined by a series of stakes to strengthen interpretation at easel No. 4.

Travel. Visitors totalled 2,821 persons. This is a decline in visitor count for the sixth consecutive month, excepting September, under the new fee system. Total visitors for the calendar year was 45,877 persons or an increase of 3 %, as computed through this date.

Counted turnarounds for the month was 379 persons or 13.5 percent of the monthly travel.

Personnel. Mr. Franklin Smith, Tumacacori's seasonal Ranger in 1952, returned to enter on duty on December 2. Frank worked at Grand Canyon last summer and will be with us for the winter. We're glad to have him back.

December 28, 1953

Memorandum

To: General Superintendent
From: Acting Superintendent, Tuzigoot
Subject: Report 1ml, December, 1953 Monthly Narrative Report

Weather- Unusually clear, bright and warm. Daytime temperatures in the high 70's and dropping to the 30's at night. No precipitation recorded for the month.

Official Visitors. George Grant arrived on December 12th. and spent several hours in the afternoon taking pictures of the new trail construction and general improvements.

Travel. Tuzigoot received 1269 visitors in 434 cars during December. This represents an increase of 589 over this same month last year. 982 visitors went through the museum while it was open and 287 visitors arrived during hours that the museum was closed and were not contacted. Represented in the travel were visitors from 31 states, Alaska, Southwest Africa, Germany, Estonia, Finland and Switzerland.

Maintenance and Rehabilitation. During periods of little or no travel the job of painting and staining all outside woodwork was continued and some time was spent on general grounds clean-up.

Clothes line poles, constructed of two inch pipe, have been installed and strung in the patio by the residence.

Roads and Trails. The approach road has been extremely dusty all month and the blading and ditching done by the county work crew was no help to this condition.

Project for ensuing month. Reflectors for the museum display cases/ lights have at last arrived and their installation will be the main project next month.

Personnel. Mr. James J. Brunstein, English teacher at the Cottonwood High School, entered on duty November 29th. to do relief work until the Stratton's arrive.

Memorandum

TO: General B. H. Lathrop
FROM: Acting Superintendent, Fort Verde
SUBJECT: Report on the condition of the monument, Fort Verde, Arizona

The monument, Fort Verde, Arizona, is situated on the right bank of the Colorado River, about 10 miles from the mouth of the river. It is a small, rectangular, masonry structure, about 100 feet long and 50 feet wide. It was built by the Spanish in 1775, and was used as a fort by them and by the Americans in 1848.

The monument is in a very good state of preservation. The masonry is well kept, and the structure is in good condition. The monument is a very interesting relic of the Spanish period in Arizona.

The monument is situated on a small island in the Colorado River. It is a very good example of the Spanish masonry work of the 18th century. The monument is a very interesting relic of the Spanish period in Arizona. It is a very good example of the Spanish masonry work of the 18th century. The monument is a very interesting relic of the Spanish period in Arizona.

Very truly yours,
B. H. Lathrop

Walnut Canyon National Monument
Flagstaff, Arizona

December 28, 1953

Memorandum

To: General Superintendent

From: Superintendent, Walnut Canyon

Subject: Monthly Narrative Report of Activities at Walnut Canyon
National Monument during December, 1953

Weather Conditions

As the weather man predicted, December of 1953 broke two records as the driest and coldest December on record. Only .35 inches of moisture and the temperature reaching a low of -5 degrees. Nights have been below 15 degrees much of the time and around five above the latter part of the month.

Administration

The instructions for the new filing system were received and the work of changing over was done before advice was recieved from the Globe office to delay this work.

Ranger Spangle entered on annual leave December 21. 14 hours of leave were taken by Superintendent Guillet.

Maintenance

General repair to small items of equipment and water system as well as general regular duties. Ice and snow was removed from the shady spots on the Island Trail and it was kept open the entire month.

Travel

With roads in good condition and fair daytime weather, travel again broke all records for December. 765 visitors arrived in 389 cars This brought our final travel year figure to 38,090 or an increase of 20.1 % over last year.

Interpretive Services

Talks were given to 598 persons in 201 groups. With these we spent a total of 20 hours.

Museum

The new display was started for case 4 and 5 of the Museum and is well on its way to completion. Superintendent Guillet spent spare time on this work and it should be ready for installation by February 1 if time permits. Materials were generously furnished by S.W.M.A.

Wupatki National Monument
Flagstaff, Arizona

December 26, 1953

Memorandum

To: General Superintendent

From: Superintendent, Wupatki

Subject: Report lml, Wupatki and Sunset Crater National
Monuments, December, 1953

Weather:

Overcast the first few days in December with light snow flurries at Wupatki and a heavier fall at Sunset Crater. Clear, bright and cold for the rest of the month with a minimum of 6° above on the 24th. All roads passable throughout the month.

Special Activities:

Trader Herb Huckreedy played host to the local Navajo families at a Christmas party held at the Black Falls Trading Post December 20th. About 25 families attended.

Maintenance, Rehabilitation and General Work:

Because of high winds and below-freezing temperatures, water lines to several of the house trailers froze and had to be thawed out.

Both light plants were serviced during the month.

Maintenanceman Joe Bean serviced both Monument pickup trucks and spent several days effecting minor repairs on the Ford dump truck.

The Museum of Northern Arizona rain gauges were given their quarterly reading and check, and the readings were forwarded to Dr. Colton.

The Wupatki entrance road and the loop road to Sunset Crater were given a thorough policing.

The objectionable "It is unlawful ---" legend on the Sunset Crater sign was removed.

THE HOUSE OF COMMONS

Revised: 1997-01-15

The *Adelphi* is a small, light, and fast boat, and is well suited for the purpose of carrying out the work of the *Adelphi* in the

Roads and Trails:

Work on the Mupatki entrance road progressed well, though with a reduced crew. Base material was hauled for the long curve near the Earth Cracks, and a new cattle guard was completed at the Forest Fence there. The loose fill on the long tangent from the Earth Cracks to Doney was compacted with sheepsfoot and wobbly rollers; that section is shaping up very nicely. The new stretch from Doney to Mupatki ruin was roughed out with the dozer.

Maintenanceman Joe Bean spent a couple of days filling holes on the Mupatki entrance road and several more days spreading shale on the section from Mupatki to the south boundary. Both the Case loader and the Galion grader are back in service, and Joe is now blading the road from Sunset Crater through to Mupatki.

Interpretive Service:

With Superintendent Brewer away on annual leave, contact service at Mupatki was a little spotty this month; however, contact was maintained on a daily 8-5 schedule insofar as it was consistent with other duties. No contact service was available at Sunset Crater but the register stand was kept supplied with leaflets and guide pamphlets.

Travel: With the weather clear and bright most of the month, Mupatki showed a total of 475 visitors in 172 cars. Of these, 95 visitors in 36 cars were not contacted. Sunset Crater showed a registration of 632 visitors in 247 cars; adding 25% for non-registrants there, the total for Sunset Crater would be 790.

Official Visitors: Photographer George Grant, Nov. 27th.
Engineer George Johnston, Dec. 14-18.

Accessions: Schmidt & Davis; Field Book of Snakes
Burt & Crossenheider; Field Guide to Mammals
Hobart M. Smith; Handbook of Lizards

The above were received from Southwestern Monuments Association and are most welcome additions to the Mupatki library.

Personnel: Archeologist Burroughs returned from annual leave Dec. 1st.
Superintendent Brewer went on annual leave Dec. 4th. When last heard from, he and Mrs. Brewer were headed for Mexico.

Water Supply: Heiser Spring is still running more than 2000 gpd; Mupatki Spring flow has increased to about 225 gpd.

Carroll A. Burroughs,
Acting Superintendent

There are two main reasons why the world is not a better place than it is. The first is that we are not doing enough to help the poor. The second is that we are not doing enough to protect the environment. Both of these problems are caused by the fact that we are not doing enough to help each other. We need to work together to make the world a better place for everyone.

1. The first step in the process of identifying a problem is to define the problem. This involves identifying the symptoms of the problem and determining the scope of the problem. Once the problem has been defined, the next step is to identify the causes of the problem. This involves identifying the factors that are contributing to the problem and determining the underlying causes. Once the causes have been identified, the next step is to develop a plan of action. This involves identifying the steps that need to be taken to solve the problem and determining the resources that will be needed to implement the plan. Once a plan of action has been developed, the next step is to implement the plan. This involves carrying out the steps that have been identified in the plan and monitoring the progress of the implementation. Finally, the last step in the process is to evaluate the results of the implementation. This involves determining whether the problem has been solved and whether the resources have been used effectively.
